> Every worker in the United States er knows what wage-cuts mean. The heroic example of the Communists does not pass them by unnoticed. But they are still apprehensive, they are not as munist policy. The Communists must take into account the degree of consciousness of the masses. In order to lead them into decisive struggles against the class foe, they must be prepared to go with the masses as far as the masses will go at the moment. In common struggle with the working masses they have the best opportunity for winning them over to a Communist line of action.

### Relief Struggle Growing

The masses are at present conscious of the necessit of resisting further unemployment, further wage cuts, and of wrenching from the capitalist class a measure of relief for their misery. The workers are still bound to their reformist leaders by innumerable prejudices, traditions and organizational ties. If they are to be brought into action, their leaders must be pressed against the wall. The united front of working class struggle against boss misery must be organized. That is the way to carry the banner of the fallen Detroit fighters up higher. That is the way for a successful advance of the forces of Com-"iron front" embrace the bulk of the with that the enormous danger to the the drive it is possible to report an en-

The Communist party has once more, as often before, been the only shown that it is the only true party of the working class. It has proved that the workers are not going to remain

### Government Persecution Coming

Already, the boss government is initiating a ferocious campaign of persecution against the Communist organizers. The whole frame-up system of capitalist class justice, with its "criminal syndicalism" laws and other vicious devices is being set into motion. The entire working class of the country must come to the defense of those attacked like a solid stone wall. Every worker's fate, every worker's elementary right to existence, is at stake.

The Communist party is calling protest and memorial meetings all over the country. It is the duty of every class conscious worker to stand behind the party of his class, and to demonstrate his solidarity with it. Against the bosses' offensive, against government persecution, for the workers' right to demonstrate, for unemployment relief and unemployed insurance. Against wage cuts and for the six hour day, five day week. Against the imperialist war preparations and for Long Term Credits to Workers' Russia.

All New York workers will show their solidarity with the Communist party on Friday evening, March 11, at the Centra. Opera House, 67th Street and Third

Workers! Make your protests against the Dearborn massacre a powerful demonstration of solidarity that will strike fear into the hearts of the bosses!

Under this last heading should be included any measures that have some bearing on the and the Glass-Steagall Bill. (In consubject, but do not properly fall under any of the above headings. The above procedure, although not advocated as a rigid plan, should succeed in giving one a brief yet general sketch of the economic condition and immediate prospects of the country.

To sum up the economic developments say, that as yet there have appeared no signs of any immediate revival. The months of January and February conduction begun over two years ago. The per cent of capacity. The hoped-for rise in steel production to be brought on by an increase in automobile production failed to materialize, because of the lack of improvement in the production of new cars. The index of automobile production declined from a high of 52 for the first week of January, to one of 36.5 for the last week of February. Despite the streaming headlines to the contrary, Ford has not yet begun any substantial production. Freight car loadings and electric power output showed similar declines, the latter dropping during the two months' period from a rate of decline much greater than that of the past two years as a whole. The latest reports of building activity, one of the most important industries of the country, showed no bettering of its present paralyzed condition, the figures even showing an aggravation of the condition of the industry. The New York daily. Gold continues to be drained Times combined weekly index registered a new low for the depression in the last week of February. The index is now at stocks was 37 million, while for Feb-60.8 as against 69 for the beginning of the year.

The only figures reporting increased activity of a substantial nature have been those of shoe and cotton cloth production. In the production of cotton cloth, the rise from an index of 91 in tax measures are rushed through. "The the first week of January to one of 96 need to balance governmental budgets for the last week of February, had of all kinds beginning with the Federal merely an aggravating effect upon the Government." Thus reads the National market, the sales in no way being able City Bank report, expressing in their to consume the increased production. words the fear of the stability of the The stocks on hand increased, and de- U. S. government bonds. (An interesting feature to be in- talked of, in addition to the public debt, vestigated in this so-called consumers' in the discussions of defaulting. There industry, is the recent statement made is even talk here of a complete shut by the New York Cotton Exchange Service that 40 per cent in yardage and 60 per cent in weight of all the cotton goods produdced go into industrial

ied in the third week of February, the only break in the two months' period, failed to keep their gains, and again registered a decline for the final week of the month. The Annalist index dropped from 95 to the low of 91.4. In the factors connected with commodity prices no signs leading to the belief that a bottom has been reached can be seen. Although comprehensive figures are difficult to obtain, one is led to believe ment should attempt to rally around it that stocks on hand of manufactured the great masses of workers who goods still remain very high. The accumulation of raw materials is growing so rapidly as to become threatening for some industries. Crop estimates for the coming year indicate even greater yields than the present year. On the field of building activity the hoped for increase remained in the wishing stage. The figures of this year are running about 30 per cent below those of last year. For both contracts awarded and building permits granted, one is forced to use the words of the National City Bank Bulletin, "lowest by far" for any

The sentence reading, "But how can anyone hail as epoch making, a bill that does nothing but make legal that which is actually taking place", should have been concluded, "namely, the conof the past two months, one can but tinued withdrawal of gold by foreign countries.") The entire attempt to increase commodity prices by increasing the available money in circulation is tinued the kaleidoscopic decline in pro- based upon the false assumption that the opportunity is enhanced to hammer it is possible to inject into the process one more lesson home to the Minneapolis steel industry which ordinarily shows of circulation, additional money despite workers, namely the one of the true an improvement during the first quarter, the fact that business does not desire continued to perform at about 26 to 27 the additional sums. The bankers have yet to explain how the possible increase in currency will result in an actual increase. Were the government actually able to inject new money into circulation, then this would be a factor in tending to bring about a temporary rise in prices. But the present measures are valueless in this respect. Actual business conditions are the determining factor, and not the effect of money in circulation. Summed up in the words of Marx, "prices are not high or low, because there is more or less money in circulation, but on the contrary, there is more or less money in circulation, bean index of 222 to one of 216, registering cause prices are high or low." The complete futility of the present currency measures is summed up in the above

> The danger of America going off the ready serving the life sentence imposed gold standard (inflation in the strict sense of the term) becomes greater from the country. In the first month of the year the total decrease of gold ruary this sum had mounted to 67 million. In addition to the above there exists the ever mounting deficit of the national government, which will probably reach well into the three billions for the present fiscal year, unless new Private German bonds are now being down of the stock market. The framework of the banking system is rapidly becoming weaker.

All in all, the conclusions to be drawn are, that the prospects for immediate Commodity prices temporarily stead- revival are not great. Unemployment and the misery of the working class will most probably become more accen l tuated. The questions of immediate relief and of unemployment insurance must remain at the forefront of our unemployment campaign. Concentrating on of the English language is limited. The these slogans, and in addition bring- worker who is anxious to know about ing forward that of the six hour the platform of the International Left day, as well as that of credits to the Soviet Union, the Communist movemore and more should become disillusioned with the prospects held out for them by the capitalist system.

# Railroads & Strike Policy

The Strike Weapon and its Rejection by the Misleaders

tween the bosses and the workers con- on the railroads. cerning hours of work, wages and workworkers have to promote and protect political struggle wherein the workers are aiming for control of the government, the strike can only serve as a supplementary weapon, as an aid or help in the general struggle for political power and control. But when workers organized in trade or industrial unions fight only for better conditions, or to keep the wages and working conditions fensive purposes.

Therefore, we think that without illustrating this point further, the average worker will agree with us when we maintain that the strike is the only weapon of the labor unions, and a good one at that. But good weapons can only by the leaders of the Railroad brotherhoods in the last fifteen years.

The last time the Brotherhood leader ship made any pretense at using the strike weapon effectively, was during the movement for the eight hour day on the were such inventions as: The B. and O. railroads in 1916. Two strikes were organized and came within a few hours of taking effect to bring about the eight question. The other, which is yet more hour day for railroad workers. The first strike was called off with the enactment of the Adamson Eight Hour Law. The railroad owners took the Adamson Law to the U.S. Supreme Court with a view brought results in extended influence of having it declared unconstituational. Another strike vote was taken and the second railroad strike came within a few the Young Spartacus, of the Greek or- hours of going into effect when the Supreme Court came out with a 5 to 4 decision against its unconstitutionality. It was necessary for the railroad workits much broader appeal. In line with has been expressed concretely in many ers to use the strike weapon to squeeze the Eight Hour Law out of congress and it had to be used again to squeeze agreement with it out of the Supreme Court by the narrow margin of 5 to 4. In neither case was the strike weapon used but it was ready for use if necessary, and the strike weapon was the thing

which furnished the necessary influence

United Front Necessary

There are, of course, as long as the miserable conditions remain and intensify, bound to be new strikes, perhaps many still on an isolated local There are bound to be new rebellious upsurges where the U. M. W. gentry controls. The rebel forces are bound to coal operators and their agents. Their lesson from all of the recent and past one of common struggle. And no fight for a, united front of all rebel miners against the common enemy.

It is so also in the very urgent matter of relief for and defense of the present victims of the class struggle in Kentucky. There is yet no reason why renewed efforts should not be made to establish a measure of unity in these endeavors. We would not even propose that the General Defense Committee and the I. L. D. should be able to affect a direct unification. But for the common objectives united front activities should be established. While that, however, is not so "ar being seriously atstantly harassed by starvation, are even tempted the appeal should be passed now suffering further wage cuts bring on to the workers everywhere to support ing the rate for day men down to \$2.00 the victims in both Harlan and Pineville Kentucky.

In the purely industrial disputes be, to oring the eight hour day into reality

Since the Eight Hour Day movement ing conditions, the only weapon the in 1916, strike policy and strike strategy has steadily drifted towards the very their interest with, is the strike. In a bottom of bankruptcy and today the strike is practically discarded as a weapon, in so far as the Brotherhood leaders are concerned. Instead of training and organizing the railroad workers to use the only weapon they have against their bosses, they have trained them to cast it aside or to hang it up in the closet and to keep it there. Instead of they have, from being taken away from keeping the strike weapon ready and them by the boss, then the strike is the in good shape, for use when necessary, only weapon for either offensive or de- the Brotherhood leaders sign one peace pact after another with the railroad bosses, always and inevitably at the expense of the workers. The recent Chicago peace pact was just another example of this bankrupt policy.

### Strike Policy vs. Cooperation Policy

The Brotherhood leaders, like all labe used effectively when placed in the bor leaders, are confronted with two hands of individuals who possess the nec- main alternatives; they must either fight essary skill and determination to use or surrender to the bosses. For workthem at the proper time. And this is ers there is no escape from one of these equally true about the strike weapon. two processes. We are compelled by the Let us note briefly how the strike wea-circumstances to choose one of two pon and strike strategy have been used roads upon which to travel, either to victory or to defeat. Since 1916, the Brotherhood leaders have steadily kept the railroad workers on the path which leads to defeat. The sign posts which directed our leadership along this path Cooperation Plan: the Watson-Parker Law to prevent strikes in labor disputes; Class Collaboration instead of Class Struggle; Peace Pacts, Mutual admiration and cooperation between Railroad and Brotherhood Officials. These were the slogans which were used as weathercocks to steer the railroad labor movement towards the swamp of surrender and defeat. The Brotherhood leaders chose this road because it was a road which offered less resistance to their personal interest and ambitions than the road which led towards organization, amalgamation and well-led struggles against the bosses.

In order to make it a little more clear

to the ordinary worker as to why the

Brotherhood leaders adopted the policy

to cooperate with the railroad management instead of fighting it so as to promote and protect the railroad workers' interest, we will point out several things. The Brotherhood leadership have organized the railroad workers into 21 separate craft unions. The same type of organization which the Locomotive Engineers launched at Detroit, Michigan in Imperative 1868. And we still cling to this out-ofdate craft system of organization. It would be to the railroad workers' interest to amalgamate these 21 useless and expensive crafts unions into an industrial union, but it would not be to "law and order" is getting ready to themselves with infamy. This question- vritue of support from the operators and the best interest of craft union officials grind out more "justice". During March able reputation does not, of course, make the state forces whereas elsewhere in to do so. Their big salaries separate them from the rank and file and so the interest of the Brotherhood officials runs in the opposite direction from that of the members. Therefore, we are not one union but tweny-one. It would be to the best interest of the Brotherhood members to have freedor sion in their unions so they could advocate amalgamation, reduction of official salaries, elimination of gag-laws grow. They face a common enemy, the and secret work, but this would be against the interest of 15,000 craft ofobjectives are common. Surely the main ficals like Robertson. They want gaglaws, censored magazines, obligations events should be one of common strug- and secret work to barricade themselves gle. And no doubt there will vet be against the organized criticism of the rank and file. It would be for the interdoubt there will yet be opportunities to est of railroad workers to have one strong union for all workers in the railroad industry so they could better protect and promote their interest against the bosses. It is against the interest of the labor leaders to build this kind of organization and consequently they cannot fight the bosses and are therefore forced to cooperate with them. So, the way things stand in the railroad brotherhoods today, it is the desire of the officials to avoid at all costs strikes and struggles because they have not got the kind of organization needed to put up a successful strike and it is against their interest to build one, and hence we have the cooperation policy instead of the strike policy.

This cooperation policy has had a most destructive effect on the railroad unions since the railroads were returned to private control after the war. During the war, under government control, when the railroad owners were reaping enormous profits, the lower paid masses of railroad workers were allowed to organize without serious opposition and thousands of shop and maintenance workers streamed into the rail unions. But after the war profits were over, and the roads returned to private control, then the onslaught started on the unions by the railroad owners and the craft system of organization simply crumpled. The only thing that was saved from the wreckages was the Four Transportation Brotherhoods, whose leaders offered cooperation with the bosses in return for the privilege to collect dues from the members of the so-called "Big Four". Since that time all the labor skates have adopted the policy to cooperate with the boss in order to keep their meal tickets from being completely destroyed. Most of the shop workers have been permitted to remain in company unions for the last ten years. Working conditions have been gradually lost. Workers are being suspended or discharged for getting injured while at work to save the company from (Continued on page 4)

Gives Views on Problems of Communist Movement in Soviet Russia, Europe and the United States

(Continued from page 1)

struggle against the Stalin regime. Question: Do you still regard the present phase of the Bolshevist revolution as "Thermidorian", and has your view as expressed in your autobiography been borne ou. by events since your departure from Soviet Russia? Answer: I have never said that the present stage of the revolution was "Thermidorian." The historic conception of Thermidor has a very definite content: it means a completion of the first stage of a victorious counter-revolution. A Thermidor in the U.S.S.R. could mean nothing else than the coming into power, although at first in a semi-disguised form, of the bourgeoisie, and consequently a breakdown of the October revolution. I have never, at any time or anywhere, said that the October revolution has broken down. This opinion is persistently attributed to me by the Stalin press for purposes which have nothing whatever to do with the interests of truth. What I have asserted and do assert is that there has grown up on the basis of the October revolution a powerful bureaucratic stratum in which both active and passive Thermidorian tendencies are very strong. However, their victory is still far off. The opposition to these tendencies consists of a struggle for the independence of the Communist party, the trade unions and the soviets and for their vigilant control over the bureaucracy. This opinion was not formed by me after my exile] from the Soviet Union; on the contrary, it was the cause of my exile. A bureaucracy does not tolerate any attacks upon its commanding role. The danger inherent in the Thermidorian tendencies of a bureaucracy was pehfectly clear to Lenin. He gave warning against this danger in his last speech at the Eleventh Congress of the party in 1922. My last conversation with Lenin was de-cile with a bureaucratic guardianship. voted to this question. Lenin proposed Nevertheless, the Stalin apparatus in that I form a bloc with him against that bureaucratism, the focal point of the bureaucratic regime to its utmost protectionism and militarism. -ARNE SWABECK.

Weakening of Bureaucracy

Question: Is there need of modifying the Communist dictatorship in Russia and how should this be modified? Answer: This question is closely bound up with the first two. The economic successes, it is needless to say, have greatly strengthened the Soviet Union. At the same time they have greatly weakened the position of Stalin's official apparatus. In this there is no contradiction. In the first place, it is perfectly clear to all conscious elements of the population of the Soviet Union that the successes in the sphere of industrialization and collectivization became possible only cause the Stalin bureaucracy came up against the resistance of its protege. the kulak, who refused to surrender his grain to the State, and thus the bureaucracy was compelled to take over program in much the same way that the Chamberlain, who also in his time was cruelly beaten at the polls. Today Chamberlain (I mean the father, not the son) is in any case more popular in England than MacDonald. To be sure, principal leaders of the Russian opposition are alive. Rakovsky in Barnaoul is attentively following all the processes Union. A second and still more important cause of the weakening of the Soviet bureaucracy lies in the fact that the economic successes have greatly elevated not only the number of the level, their confidence in their own powers and their feeling of independence. All these traits are hard to reconits struggle for dominance has carried ize this fact: the economic successes, as led by Stalin. Lenin's second illness frequently happens in history, have not strengthened but, on the contrary, undermined the position of the ruling stratum. Answer: The present directly upon crises, wars and revolubeing placed on the order of the day in Europe.

Trotsky on the Character of Our Epoch

Without understanding the nature of

the epoch in which we live, the manner and tempo in which events unfold themselves, the enormous weight of the subjective factor in accelerating, precipitating, or retarding changes in the international situation, and without drawing the strategical lessons from the revolutionary convulsions of the post-war period and the Russian revolution, a repetition of the defeats of the world revolution are unavoidable. It is precisely upon these crucial questions that the program of the Communist International fails to give an adequate answer. "Without an extensive, general, dialectical comprehension of the present epoch as an epoch of abrupt turns,"

writes Trotsky, "a real education of the young parties, a correct strategical leadership of class struggles, a correct application of tactics and a sharp and situation, is impossible. And it is just at such a turn that in two or three days the Communist International often decides the destiny of the world revolution for years to come."

Events in Germany are now converging toward such a decisive point. For piece of land is decreased absolutely and this reason the lessons of the defeat of 1923 which Trotsky succinctly reviews taken into cultivation, which implies a in this pamphlet assumes extraordinary timeliness. The German party was unable to reorientate itself toward mobilizing for the seizure of power in 1923 after it had been directed by the Third Congress toward the conquest of the in advanced capitalism with the con- masses through daily work in the trade stant shift of the rural to the urban unions, in parliament, in factories, in population and the debitand mortgage the press and so on. «The Strategy of the World Revolution»

The Strategy of the World Revolution | would stride." Stalin conceived the bloc as a means of preventing military inter-

vention of the imperialist powers in the Soviet Union. Published by the C. L. of A. Opposition)

The chapter on "The Maneuverist Character of Revolutionary Strategy" illuminates a tactic that has been systematically abused by the Right wing and deeply confused by the Centrists. Trotsky with scathing irony ridicules those corps of maneuver specialists who imagine that by maneuvers they can solve all the big questions of the class struggle. "Once and for all it must be impressed that a maneuver never decides anything in great matters . . . A correct maneuver can only facilitate the decision by giving the possibility of gaining time or of attaning greater results with smaller forces. Difficulties in principle, on the contrary, cannot be overcome with the aid of a maneuver." What should be the attitude toward the so-called ally? "In a maneuver, one must always proceed from the very worst assumptions with regard to one's adversary to whom concessions are made. or with regard to the dubious ally with whom arrangements are concluded, and not from the best. It must be constantly borne in mind that the ally can perhaps become an enemy by tomorrow." And above all, in every maneuver the independence of the party must be maintained.

Trotsky devotes a chapter to the question of the party regime. In a thoroughly dialectical manner he analyses the question of groups and factions within the party, shows under what conditions they arise, and under what conditions they are absent: analyses the question of Bolshevization and leadership, the relation between the C. P. S. U. and the parties of the West. After all the monstrous perversions on these basic questions by the bureaucratic apparatus it is indeed refreshing to read these lines, so lucid and so Marxian.

## bold right about face at a turn of the Lectures on the History of

On Wednesday evening, March 16th at B P. M., comrade Shachtman will give the second of his series of eight lectures on the History of the Communist International. This lecture will deal with the first congress of the International held in 1919. Comrades and sympathizers who intend to attend this lecutre would do well to read "The Manifesto of the Moscom International" which was signed in Moscow in March 1919 by comrade Lenin, Trotsky, Platten, Zinoviev and Rakovsky.

### Glotzer's National Tour

In the west comrade Glotzer's national tour has met with success as well as with some difficulties. In St. Louis the meeting was held in the main public lbrary hall with better than 100 workers in attendance. This attendance gives testimony to the growing interest in Communism displayed by the workers there. This became further evident in relations between agriculture and indu- purely episodic bloc of leaders that the discussion following the lecture with stry but also the external relations be- would inevitably have to be and would many questions addressed to the speaktween colonial and imperialist coun be demonstratively broken at the first er touching upon the fundamental proletarian problems.

In the mine field of Illinois comrade Glotzer met some difficulties. Our most ations of the union scale committee. In Communist persecutions. Under such conditions, as could be expected, the meeting became small but nevertheless gave an opportunity to discuss some of the workers' problems with the live wires present.

There were additional difficulties in Kansas City which were also of the character hitting the Communist movement as a whole. Our comrades were actually unable, even after much effort, to secure a hall. The meeting therefore had to be held in a private but spacious house. It was the same house where one of the existing unemployment councils meet. While it is located a good deal out of the way there was nevertheless an attendance of about 40 workers who took serious part in the questions dis-
