HELP THE GERMAN METAL WORKERS STRIKE!

JOINT DECLARATION

Trade union, Unity League and Communist parties of the German metal workers.

SPEECH BY LEON BENGEL.

While the previous speech has just outlined the main outlines of the precious document that was just read out, I should like to call your attention to the fact that the main events in the course of the metal workers' strike have been the following:

1. The decision of the workers to strike, which was brought about by the miserable conditions in the factories, the continual reduction of wages, the introduction of part-time work, and the general situation of the working class.

2. The strike itself, which was supported by the Unity League and the Communist party, and which was characterized by the workers' determination to achieve their demands.

3. The situation in Berlin, where the workers have been able to draw close to the German people and to the workers of other countries, and where the solidarity of the workers has been a powerful force.

4. The situation in the factories, where the workers have been able to achieve some of their demands, and where the struggle for justice and decent living conditions continues.

5. The situation in the country as a whole, where the workers' struggle is part of a broader struggle for the overthrow of the capitalist system and the establishment of a socialist society.

The workers who are on strike.

The government of strikers are not members of the metal workers' trade union, and the fight for better conditions is part of the fight for better conditions in all factories.

The Unity League and the Communist party are the genuine representatives of the workers, and they are the only ones who can bring about a lasting solution to the problems of the workers.

Let us support the workers strike, and let us fight for a better world.
