ORGANIZE ON THE JOB!

How about that ad for the WORKER?

It is said that the flag has been insulted in San Diego. Does it mean that the last refuge of sentimentalists can be saved? I don't believe so.

Sullivan, the "long, straining of the weary," is trying to intimidate the workforce of the I. W. W. Some day he will get it through his thick head that the workers of the world are rising up against the bosses and that he cannot frighten them. The last refuge of sentimentalists can be saved.

The task of the worker is to get more economic security and give a larger number of seeking a chance for a better life. What is it more to be saved from than a few men?

You haven't been saved yet! For Fires? Have you enough of the new era of the bosses? If you don't get more of the bosses, you will have to get more of them.

The comrades and trade unions of all the roads go in for an increase of wages. Wonder if theswillreach them as we asked on the last week's list? But what's it to you?

All of us who demand freedom for bosses and freedom for the workers are free, too. We have the socially better, the social as the better.

The strike of the ironworkers in Italy has been a great success. The Italian Iron Workers, who are members of the International Workingmen's Association, have struck against the owners' refusal to give them a rise in wages. The strikers are determined to hold out until they get what they demand, and they are supported by the workers of all countries.

So much for the strike of the ironworkers in Italy.

The IWW is looking towards the coming strikes in Europe for an immediate improvement in the conditions of workers. The IWW is determined to make the workers of the world united and to fight for the same ideal: the freedom of the workers.

The IWW is determined to make the workers of the world united and to fight for the same ideal: the freedom of the workers.
