REVOLUTIONARY TACTICS

(This article is a continuation of new tactics for the I. W. W.)

ORGANIZATION IN THE INDUSTRIES.

The propaganda organizations in the industries would be the nucleus of militancy and activism in the various unions in these industries. A common and effective method of organizing a militant minority is through the medium of a regular paper. A two copies of this paper is necessary for circulation. Articles for publication should be written briefly on one side of the paper only.

The Agitator does not bear the union stamp because it is a newspaper for profits. But it is union, every bit of it. It is printed and published by unionists and their friends. It is aimed at the I. W. W. and serves as a propaganda for the doctrines of the I. W. W. It has grown and spread around the Progressives in Denver, in which they exhibited this machine, and the love of the world, a world of love—the love of a idea, of a world fit for the free.

Everywhere the strong have made the laws and oppressed the weak; and, if they have sometimes consented to the interests of society, they have always forgotten those of humanity.

Target

THE AGITATOR
