Forward the C. I. O.!

PHILADELPHIA, PA., May 15.—The Federal government has yet to take strong measures to force the observation of the 14-day C. I. O. strike, but the demonstration in the textile industry is gathering momentum.

Textile industry managers have asked the C. I. O. strikers if they would agree to replace two strikers who left a plant in Steubenville, Ohio, because the company threatened to fire them. The strikers refused to return, saying that they would not work in the mill for the duration of the strike.

The strike in the textile industry has spread to other states, including New York, Pennsylvania, and Ohio. The strike is being led by the C. I. O. and is supported by the National Textile Workers Union.
