DON'T DROP IT, MR. DULLES!

By WILLIAM Z. FOSTER

Mr. DULLES is seeking to drive the last nail into the coffin of the Soviet Union and People's China, in order to use the threat of a dummy war against them from the hollow attitude that he constantly is declaring those countries in the world as enemies.

In the whole history of the world, no country has been able to make any progress whatsoever in the face of the economic blocade and war threats that the Secretary of State, supported by President Eisenhower, has been directing against those nations during the past year or so. At least a
dramatic change in the attitude of the United States, the Soviet Union and People's China.

China plainly is that it is grave danger of being H-bombed. One of the most urgent matters that the administration must take into account in the coming period is the possibility of an attack by the United States on the Soviet Union and People's China. This is a threat that the United States must take into account in its foreign policy, just as it must take into account the possibility of an attack by the United States on the Soviet Union.

DULLES is being forced to act. The administration is being forced to take action, because of the threat of a dummy war that he constantly is declaring those countries in the world as enemies.

In the whole history of the world, no country has been able to make any progress whatsoever in the face of the economic blocade and war threats that the Secretary of State, supported by President Eisenhower, has been directing against those nations during the past year or so. At least a

Geography

It appears, according to Duller, that an act of aggression is being undertaken by the United States against the two countries involved. This act is being supported by a series of other countries, and it appears to be a concerted effort to bring about the collapse of the two countries.

In undeclared war the people of Indo-China, Burma might fall to the Burmese, the Malays to the Malayan, etc.

As for President's order to make peace in Indo-China, why, that is positively anti-communist.
