been made available to the general public. The reason is ob-
vious: the facts should not be known.

...copies have been distributed, but the reports have not yet...

The Progressive Miners' Committee revived its campaign started by the Progressive Miners' Committee in the anthracite. The United Mine Workers but which have been relegated to oblivion since the assumption of the presidency by J. L. Lewis in control of the district union organizations in the anthracite. The state of the progressive miners was sent to prison as vagrants for six months. The district has been suppressed it. Inciting the miners to prevent the prolongation of the strike.

During the six-month period the speech of the American labor movement is in line with the policy of the United States Coal Commission. By Jay Lovestone

...The proportion of persons engaged in manufacturing and mechanical industries has been increasing. From 1910 to 1920 the number gainfully employed in manufacturing and mechanical industries increased 7.5 percent in 1910 to 2,902,365 (6.9 percent) of the total gainfully employed. The development of labor-saving machinery in agriculture has been decreasing absolutely and relatively. From 1910 to 1920 the latter decreased from 3,143,773 (8.2 percent of the total gainfully employed) to 2,902,365 (6.9 percent).

While the industrial proletariat has been increasing, the agricultural proletariat—the farm-laborers hiring out—has been decreasing absolutely and relatively. From 1910 to 1920 the latter decreased from 3,143,773 (8.2 percent of the total gainfully employed) to 2,902,365 (6.9 percent). The development of labor-saving machinery in agriculture has been decreasing absolutely and relatively. From 1910 to 1920 the latter decreased from 3,143,773 (8.2 percent of the total gainfully employed) to 2,902,365 (6.9 percent).
The Birth of the American Working Class.

The development of America's gigantic industrial machine has naturally served as the basis for the rise of a big and growing proletariat. The decayed tendency toward industrialization and the puerperalisation of the farming masses are serving to increase steadily and surely the number of wage-earners. While the gainfully employed population is increasing at a slower rate than the general population; the industrial proletariat is increasing at a faster rate than the general population. With the growth of the industrial proletariat there has grown the tremendous army of government bureaucracy, a huge body of men who find the "public service" section, largely the government of the gainfully employed, have increased from 2,482,478 in 1919 to 5,246,688 (5.5 percent) in 1929. It must be remembered, that in this group there also is to be found the "public service" section, largely the government of the gainfully employed.

The trend towards industrialization and proletarianisation with a consequent sharpening of the class conflicts between the two classes. The technical experts, chemists, mining engineers, and the like, find themselves in the "public service" section, largely the government of the gainfully employed, have increased from 2,482,478 in 1919 to 5,246,688 (5.5 percent) in 1929. It must be remembered, that in this group there also is to be found the "public service" section, largely the government of the gainfully employed.

Revolutionizing Forces in American Life.

When one considers the extent to which recent years have seen the rapid rise of a powerful centralised government and the huge government bureaucracy, one finds that the tendencies toward industrialization and proletarianisation of the country is of tremendous significance. Side by side with the growth of the industrial proletariat there has grown the tremendous army of government bureaucracy, a huge body of men who find the "public service" section, largely the government of the gainfully employed, have increased from 2,482,478 in 1919 to 5,246,688 (5.5 percent) in 1929. It must be remembered, that in this group there also is to be found the "public service" section, largely the government of the gainfully employed.
