The workers are the real power behind the events that are taking place today. Their actions are the fuel that drives the revolution. The proletariat, in all its forms, is the true force of change. They must continue to organize, strike, and resist in order to bring about a world that is just and equitable for all. This document includes articles on various labor-related topics, such as the ongoing strike at the Workers League, the struggle for workers' rights, and the fight against imperialism. The workers must unite across borders and continue to fight for their rights until victory is achieved.
Labor Can Still Stop War
Before It Is Too Late
Workers Unity Only Spark of Sanity in Mad World

By JOHN McNAIR
(John McNaught was general secretary of the Workers Unity League—Editor.)

London, England

We are now entering the month of December, and by now the situation has become clear that the Khomon regime has come to an end. There appears to be some news about the end of the Khomornikov regime, but the information is not clear. It is not clear whether the news is true or false.

The situation is very complex, and it is difficult to determine the future of the country. It is possible that the Khomornikov regime will continue, but it is also possible that there will be a change in the regime.

Let us make no mistake about it: If the Khomornikov regime does not change, it will continue to harm the workers and the people of the world. It is essential that the workers take action to prevent this.

Negro Masses Face
The Crisis of War

Negroes, however, the need for unity among the workers is urgent. The workers of the world must stand together to prevent this crisis.

Russia Ousted from League

Russia was expelled from the League of Nations, as a result of a resolution passed by the League.

The resolution was passed by a majority vote. The resolution states that Russia has violated the terms of the Treaty oflatvia, and that it is no longer a responsible member of the League.

The resolution was signed by many countries, including the United States, Great Britain, and France.

C.I.O. Meets Deep Inner Crisis

The C.I.O. is facing a deep inner crisis, as its leaders are facing pressure from within.

The crisis is due to the fact that the C.I.O. has become too dependent on the government, and that it has lost touch with the workers.

The crisis has been exacerbated by the fact that the C.I.O. has been split by internal conflicts, and that it has lost its focus on the workers.

It is essential that the workers take action to prevent this crisis, and to ensure that the C.I.O. remains true to its roots.

War Profits Control
Looms As Big Problem

By FLORENCE B. ROSENBERG

NEW YORK, N.Y., DECEMBER 5

The war profits control problem is gathering momentum as a major issue in the coming months.

The problem is expected to become more pressing as the war winds down, and as the demand for war materials decreases.

The government is expected to take strong action to control war profits, and to prevent the concentration of wealth in the hands of a few.

Religion and Violence

Religion and violence are complex issues, and it is difficult to determine the root causes of religious violence.

The main cause of religious violence is the conflict between different religious groups, and the competition for resources.

The government has a key role to play in resolving this conflict, and in promoting peace and understanding.

Books

By Jim Corn

Many books have been written about the war, and the impact of the war on society.

One book that I have read is "The War That Changed Everything," by Jim Corn. This book provides a comprehensive overview of the war, and its impact on society.

The book is well-written, and provides a clear and concise overview of the war. It is a must-read for anyone interested in understanding the war, and its impact on society.

"The War That Changed Everything" is available at your local bookstore, or online at Amazon.com.
