A YEAR OF PRACTICE

"Seize the Time" has been publishing for one year now. The Staff of STT feels that the first few months of publishing have helped us to assess our own weaknesses in light of our practice and development. We are encouraged by the support we have received from other organizations and individuals. We feel that our work is significant, and we hope that others will join us in our efforts to build a strong, united working class movement.

STT has been active in a number of areas, including the liberation movements in the United States and abroad. We have worked to support the struggles of African Americans, Puerto Ricans, Chicano and Mexican workers, and other oppressed groups. We have also been involved in the struggle against U.S. imperialism and its effects around the world.

We believe that the working class is the most important force in the world today. It is the only group that can truly be class-conscious and revolutionary. We must support and organize the working class, and we must do so in a way that is consistent with the needs of the world revolution.

We are encouraged by the support we have received from the working class. We believe that the working class is the key to success in the struggle against imperialism and exploitation. We must work to build a strong, united working class movement, and we must do so in a way that is consistent with the needs of the world revolution.

We are confident that our work will continue to be successful, and we look forward to the future. We believe that the working class is the key to success in the struggle against imperialism and exploitation. We must work to build a strong, united working class movement, and we must do so in a way that is consistent with the needs of the world revolution.

We are confident that our work will continue to be successful, and we look forward to the future. control and abortion programs as a conscious government attack on people's existence.

Both positions are correct in the specific situation applying one solution to both situations was monstrous.

These are the principles "Seize the Time" has been developed since the beginning of the year. They are the basis for understanding our relationship to other forms of propaganda and political organization, and our future direction.

SEEZE THE TIME'S RELATION TO OTHER PAPERS
1) Communication
STT as a newspaper does not exist in a vacuum. In fact, we depend on the existence of other kinds of revolutionary newspapers. STT is the voice of a new generation of people. It represents the political growth of those who are becoming aware of the necessity to fight against the people who benefit from this crime and to help overcome those conditions.

2) Cultural Formations
STT understands that in the prisons or anywhere else, revolutionary organizations must develop cultural forms of expression to continue a more virtuous atmosphere of degregationalism and gang mentality than the prison system can only be abolished by the establishment of a new society.

3) Organizational and Support Information
Information is power. When people are informed, they are able to act effectively. STT has set aside a section called "Message to the People". This issue includes communications from the leadership and people, class action in the context of the lives and welfare of people here. We cannot ignore its attempts to destroy us both individually and collectively.

Although it has been difficult, we have been able to announce the national liberation front within the US. STT's relationship with this movement and coalition on specific issues is very important. We need to develop more ties with organizations or be sent by the organizations, particularly in these regions. We would like to see such a paper become affiliated with a joint council of various organizations.

Our staff is a collective of serious revolutionaries which includes political staffs. We need to develop specific strategies to fight against the split in the Black Panther Party which is really effective black and white revolutionary organizations.

STT has really felt the need to work with cadre organizations, particularly in the formation of cadres. We have been in early forms of cadre organizations and people who are now engaged in the liberation struggle.

We hope to:
1. Sum up conditions and practice
2. Penetrate into the realm of political theory
3. In order to propose over-all strategy

It represents the political growth of those who are becoming aware of the necessity to fight against the people who benefit from this crime and to help overcome those conditions.

We will be trying to preface articles with cadre organizations and represent those organizations' political principles of the paper. We have and will continue to do various kinds of mass organizing in line with the rising tide of revolution. We will be developing specific strategies to fight against the split in the Black Panther Party which is really effective black and white revolutionary organizations.

2) Organizational and Support Information
STT understands that in the prisons or anywhere else, revolutionary organizations must develop cultural forms of expression to continue a more virtuous atmosphere of degregationalism and gang mentality than the prison system can only be abolished by the establishment of a new society.
