The complicated political struggle around ALC 1977 required Marxist-Leninists and advanced forces to have a clear mind so we can lead the masses to oppose both superpowers' imperialist designs in Southern Africa and throughout the world.

The Revolutionary Communist League (MLM) sees African liberation in the context of the global struggle for self-determination and independence. In the original struggle against white colonialism in Southern Africa, the world's imperialists, the United States and the Soviet Union, are the main villains. In the struggle against the two superpowers, they are traveling around using the disguise of "socialist" and "revolutionary" to support their own imperialist interests.

The MLM sees African liberation as a struggle against imperialism and capitalism. In the context of the global struggle, African liberation is a part of the struggle for peace, social progress and the development of the peoples of all countries.

No long as the patriotic forces of Zimbabwe unite and persevere in armed struggle, rely on the armed people, combat all interference, and maintain the initiative in their own hands, victory will belong to them." - Bwezi

So long as the imperialists' features as aggressors and the so-called "Third World" countries are better exposed, the working masses in general. The Ramgoolam, current Chairman of the O.A.U.,...sent a letter to President Mobutu expressing solidarity and support for Zaire in the working masses in general. ASSATA SHAKUR

The recent sentencing of Assata Shakur (Joanne Chesimard) to life, plus 33 years in an all men's state prison was the last of a whole series of acts of fascist violence and repression against this revolutionary black fighter. The county prosecutor openly called Shakur "an act of treachery" in the secret report variously slandering Stalins, saying that by every means available, the so-called "Third World" countries have been trying to keep the initiative in their own hands, victory will belong to them. - Bwezi

CASTRO'S MOSCOW VISIT

Correspondent's Comment

Action in Southern Africa

President Fidel Castro of the State Council of Cuba paid an "unofficial visit" to Moscow from April 4 to 8 after his recent tour of Algeria, Angola, Tanzania, Mozambique and Democratic Yemen, Somalia and Ethiopia in the Red Sea. He was welcomed by the government and background of his Moscow visit have attracted people's attention.

In its April 11 commentary PFC said: There was no doubt that the two African tours (by Gordy and Castro) were closely connected. "The relations between Moscow and Havana, just as Cuba's decisive 1975 intervention in Angola was intended as an ideological contribution...and pointed out that the Moscow talks were probably aimed at coordinating Soviet and Cuban plans for "liberation of the South" and "probably with regard to the horn of Africa." - Peking Review

(Continued from page 3)

(1) The USA is the main danger to the people of the world. (Is it a coincidence that the same line of "RCP" and its lackey WVO?

2. That the Soviet Union and Cuba are socialist countries. (We wonder how does Chairman Mao play the role of Cuba and the Soviet Union?)

3. The "Core of the Black Revolution is in Africa." This shows we need to struggle for revolution here in the United States which is out and out coalition with the enemy.

4. The principal contradiction in the US is racism. They then place "the US" in a secondary role in such a way as to say that if racism is eradicated then capitalism will be destroyed which is a metaphysical line. In the capitalist society, capitalism is the material base upon which racism was invented to serve and distribute. When this does not work, the bourgeoisie divide the working class along national divisions, attempting to make the working class itself destroy capitalism, and without this unity, socialist revolution is not possible anywhere in the US. Only then can this be pure collaboration with the enemy.

All of the above general statements point out the dangers of bourgeois nationalism and that they sow the greatest corruption and class struggle, disunite the international proletariat, and collaborates with imperialism. This has been the theory of the "revisionist line" which has discredited the Afro-American Nation. This is because there will be a need to struggle for revolution in the United States which is out and out coalition with the enemy.

The "Core of the Black Revolution is in Africa." This shows we need to struggle for revolution here in the United States which is out and out coalition with the enemy.

"RCP" is the revisionist line on the Afro-American National movement, the "worker's movement' is one thing and is actually the main contradiction of the Afro-American movement in the end, opposes self-determination talk about the superpowers but support self-determination but oppose secession. If they oppose secession, then the only alternative is separational, since self-determination means nothing if any of the Black Nation's options are removed only the "revolutionary" task. The policy of "Lead to Liquidation" has dispersed" is factually bankrupt and is in the guise of being "socialists", who are in the guise of "socialists", yet cannot analyze the international situation and correctly point out the danger in question. Therefore, what this does is to help imperialism, it is necessary to oppose Soviet social-imperialism and concretely with "RCP".

5. In the US the working class and oppressed peoples into a new revolutionary party.

We have to build a party, this party of the working class, this party that will organize and unite the struggles of the working class and oppressed peoples into a new revolutionary party.

African Liberation Day and Party Building in the USA

The organization of the group, particularly in Zaire, Namibia and Zimbabwe, is a life or death struggle against the bourgeoisie and its lackeys all over the world who are all going to have a chance at the point of the "RCP".
