

## LEADERSHIP SLATE

The convention will pass perspectives for new work in several areas, necessitating new assignments for some members. In addition, it will vote on a slate for the Political Committee. Leadership and responsibility in the IS are much broader than the PC, of course. Although it will not be voted on, the following is to give an idea of who is responsible for what work. Personnel for the new regroupment and anti-war fractions are suggestions from the PC based on who we knew was active or interested in those areas.
