BOSS ELECTIONS A FARCE
CLASS STRUGGLE DECIDES POLICY

June 15, 1944 --- The quadrennial carnival is about to begin. Starting on June 10th with the Republican Presidential primary, it will be clear through the New Deal hogtie to the end in November that we are about to witness the usual vacillating electioneering scenes in the face of the virtues of both candidates and of their views, ad nauseum.

The words we all hear bigger and better and the House of Ford, are facing each other and jockeying for the inside track on the next list of identifiers. From the Republican standpoint, this is ALL MAJOR CAPITALIST CANDIDATEGratis a program of increased Dan.

MARP forces against the masses at home and abroad.

 Practically everyone today is agreed that the election in 1940 would have done everything almost exactly as Roosevelt and W養 and Wilson had done it for the Republicans.

The Roosevelt world is absolutely inconsequential in the general scheme of things. It is the classical example of thepawn. It looks as if Governor Dewey or Governor Bricker will be the Republican candidates and Dewey will run to succeed himself. But the Republican party is the business of the house. The candidates are absolutely inconsequential in the general scheme of things. It is the classical example of the pawn. It looks as though Dewey was the only man who could make a big move. But Mr. Roosevelt represents the interests of the public. The Republican party is the business of the House. And it is for him to impose discipline and to divide the Republicans.

1. The Roosevelt world is absolutely inconsequential in the general scheme of things. It is the classical example of the pawn. It looks as though Dewey was the only man who could make a big move. But Mr. Roosevelt represents the interests of the public. The Republican party is the business of the House. And it is for him to impose discipline and to divide the Republicans.

2. The Republicans are playing up the idea of a "free enterprise". But any alliance formed between the Democratic party and the Republican party would be a two-bit one.

3. There is a growing polarization of forces in the field and it is to the right. The right is all around Senator Bricker and Senator McNary and the national Republican party.

4. There are people getting off the middle road in both parties and shifting either to the left or right. The middle-class relations are becoming very strong.

Such are the realities -- not prophecies of collapse and inflation. The policies of the administration are being fed on the streets of the city. The Executive Committee is GENTRALLY an attempt to shift (Continued on Page 2)

EMPIRE AT ANY PRICE
CHURCHILL TALKS PLAIN

If anyone has any illusions as to what is the true purpose of the British Empire, the May 24th speech of British Premier Sir Winston Churchill will serve as an opening. The speech is a cynical and consistent attempt to stave off the aims of the British ruling class.

"As this war has progressed," says Churchill, "It has become less and less a question of just military matters. The raising of the standards of living? The granting of freedom to oppressed colonies? All this nothing. Mr. Churchill went out of his way to show the difference between the English and the British Empire.

It is quite obvious that the Alliance plan was far more grandioses. In the first days of invasion, we were told that the invasion would not only mean a war against the states of the world and would result in the taking of the world over by the Allies.

The French Government decided to refuse to accept Allied paper currency. And General Eisenhower warned the French Government that the invasion would be in vain until after the national elections. The French Government then decided to accept Allied paper currency. And General Eisenhower warned the French Government that the invasion would be in vain until after the national elections.

The "second" front is indubitably tied up with the war in Europe. The war is reaching its major climax. Defeats or stalemates will undo all that has been done. The war in Europe is the main thing that the Allies do not wish to grant -- bread, peace, land, higher wages, etc.

The Allied General Staff wishes to utilize the United States government and the British government for the purpose of carrying through the French war policy. The United States government and the British government have already made it known that they want to see the French republic take the lead in the current military and political war.
Elections No Solution

(Continued from page 3)
to the right, to more and more de-
crease government. The depth of the
soil and the extent of the will will de-
determine just how far to the right
we go. Witness the Italian elections.
No worker must be fooled into believ-
ing that the election itself will bring an over-throw of capitalism — and its phony
rhetoric. We must do our damned-
est to overthrow the Democratic and Republican Parties —
can achieve any lasting gains for the masses.

For a Soviet America

The real solution for the problems of the workers and the workers on the streets (demonstrations against the war), and in the factories (strikes), is a political and for bet-
er elections. Elections are only a way to test the revolutionary spirit. The Revolutionary Work-
ers League intends to run at least one candid-
ate in a program of WORKERS CONTROL OF PRODUCTION for the United States COUNCIL CIVIL GOVERNMENT. Our candid-
ate will fight intensely for the de-
and for a workers anti-capitalist program; for a Soviet United
States. And our candidates will point out that it is not
decision for a workers government of our own
will solve the problems of the world.

CHURCHILL SHOWS HIS COLORS

(Continued from Page 3)

ers League intends to run at least one candidate in a program of WORKERS CONTROL OF PRODUCTION for the United States COUNCIL CIVIL GOVERNMENT. Our candidates will point out that it is not a decision for a workers government of our own will solve the problems of the world.

the nature of the war, Churchill’s plain speaking is not democracy.

Revolution to End War

Now that the masses have been considerably bewildered by the lies of the imperialists, and the masses in their new awareness have asked questions of Imperialism must be decided upon: will she get the new markets, what terms to use instead of the old market terms, is the coming monetary agreements, mapping out of areas of control, means to get the people in the mood for the German Revolution in check, etc. etc.

For the postwar world, Churchill says: “We must arm our own nation and cause some of the masses who have been misled by the so-called ‘democratic’ and ‘socialist’ parties to see the truth.” Churchill’s words in this book have been peddled to John Stalin;
this war, like our last, is an imperialist war, and the interests of the Almighty pound of force will decide and his kin. Furthermore we have no particular aversion to Fascism as an ideology. We object to the Italian and German Fascists only because their lives are threatened by these two nations that we are fighting.

Greek Civil War

Churchill disclosed, among other things incidentally, that a whole Greek army has been fighting in Northern Greece.

Churchill continues to give full sup-
port to the Greek army. Churchill’s opinion of the Greek army has improved. Churchill and the class for which they stand. To have on his side such forces like France, who have proven their worth in manpower and workers, is one step toward sup-
pressing a movement that has been in the air for a long time.

Churchill’s words should be understood as a warning to all above all. This would have one posi-
tive value of waking up those still misguided individuals who believe in the “progressive” nature of the war.

Before this war has spent its course, the Greek army will break out over Europe. This Rev-
olution to End War is a war against British capitalism but Hitler, be-
cause it can destroy Imperialism and Fascism. Churchill and his class for which they stand. To have on his side such forces like France, who have proven their worth in manpower and workers, is one step toward sup-
pressing a movement that has been in the air for a long time.

Churchill’s opinion of the Greek army has improved. Churchill and the class for which they stand. To have on his side such forces like France, who have proven their worth in manpower and workers, is one step toward sup-
pressing a movement that has been in the air for a long time.

But the masses are not so easily fooled by the workers who have been misled by the so-called ‘democratic’ and ‘socialist’ parties to see the truth.” Churchill’s words in this book have been peddled to John Stalin;
this war, like our last, is an imperialist war, and the interests of the Almighty pound of force will decide and his kin. Furthermore we have no particular aversion to Fascism as an ideology. El Salvador

“The Fall of El Salvador’s Martyr

Emperor

El Salvador

Out of his own mouth, Mr.
There are more comprehensive, articles and books written about post-war planning and the glorious "future" AFTER the war than one can read in a lifetime. However, for years there present no solution to the welfare of the people, of which that is concerned they are planless; but they de have a plus -- it is to continue to extract profits and to further refine the system of exploitation.

In this discussion we will deal with one basic point showing the relationship between promises and fulfillment of the promises.

What is NEW?

Before the imperialist war, before the unprecedented destruction and confusion, the "three wise men and planners" were unable to give the working class or even to promise to them, "this heaven on earth," this "freedom for all men," this "peace and want and abundance." Now they tell us that "planners" have not "given mass of peoples anything but unemployment, misery, starvation, and now, with the products of the earth and man ravaged by war and depredations of Europe and Asia needing to be fed (in order to keep down the surplus against the system which breeds this condition), even less material goods on hand it would be a physical impossibility to keep even a small part of the labor mass pampered better by the planners, whether for now, after the war, or the post-war period.

The planners have their answer ready. They say that "now we have the mass of new things which have been developed by the war, that it is these new products which make possible the fulfillment of their plans and promises. This is another one of those accepted lies tried to be sold the people with the help of the people with the aid of sickness and inferior quality of products. This same lie has been frequently used by bourgeois economists to "prove" the superiority of capitalism.

Very little that is new has emerged from the war. Practically all the inventions and new methods of production and scientific developments were discovered and within the limits of practical usefulness some time long before the war. But it was more profitable for the exploiters NOT TO RELEASE THESE ARTICLES for the market. The capitalist class had now the financial means and the power to recycle and start new production and MAKE A PROFIT while millions are out of work, when there is no demand for the existing market available, so they bottle-neck practically all the industrial progress of the last decade. Such items as pensilvite, the nylons, dye, food processing, plastic, aluminum, magnesium, radio, portable housing, new automobile and radio television and airplane developments as well as thousands of other products are needed items have been deliberately "frozen" within the vaults of the ready-made, ready-made, industrial capital.

PRIVATE CAPITAL GAINS FROM SUBSIDIES

Along come the war and the war needs. The stakes are high, and to the winner goes the spoils -- new market, new customers, even the capitalist standard of living. The government therefore needs the very best in all lines, for destruction of the "enemy," no matter what it costs. Now we are in a period of collapse out of consideration of capital accumulation. War needs come first always whether the monopoly financial capitalists are profiting or not. But private capital cannot afford to take such large chances and to spend so much without getting an immediate return, and so this government is making appropriations for new markets and industries, and by the increased taxation on the people.

The government was able to spend over 15 billion dollars introducing new facilities, the profits of which will go to the capitalists. After the war, and in some cases now, the industrial and financial barons will obtain these factories and machines (and pay for the people as a whole) for a fraction of their cost.

OVER-PRODUCTION

The overproduction of the masses is now accomplished at the expense of the taxpayer and the consumer can now start the cycle of crisis and unemployment.

The "planners," who only see the gilded "gifts" from Uncle Sam, who see the vast production for war needs, but half of the fifty million workers are either in the armed forces or employed producing for war ware, figure that the work is done and there is no need to make even this possible. Later government subsidies will be reduced to only enough to hold the masses in check and to keep down revolutions wherever they spring up. Once the retail and wholesale retailers are restored it will leave in its wake a depression that will be even greater than in 1929. The new cycle of post-war capitalist production will be saddled with the largest war tax burden nation ever had; add to this the cost of maintaining armies of occupation and feeding the world (not "charity" but as an attempt to quell revolutions) and one gets a better picture of the background of what is needed for peace.

The war-reasoned innovations have increased productive capacity to such an extent that the capitalist turn-over will become as great that the rate of profit will decline even further. This is the new era of general capitalism among the capitalists. And, unless the American imperialism, the world market that WOULD TEST THE PACE, and the other nations have to either go on these terms, or else they have to go bankrupt. Such are the laws of the capitalist mode of production and they are in no way influenced by the good intentions of even theonest dreamer.

Production that is planned for use (not the capitalist plans of organized acrmony) can produce a planned society of peace and production, for profits simultaneously with a planned society that would benefit from the vast quantity of everything that could be produced. Any plan that leaves out of its compass and well sounding structure the cardinal principle of production, that no society is just, no words spotted by a well meaning fool or the scheme of the clever exploiters who will produce the forms and the shoddy commodities of today while they reap the harvest of the profit system.

**SCAB Employment Service—Free**

Henceforth all hiring of men between 16 and 65 will have to be through the new SCAB Employment Service. This is one more step in the general direction of Fascism. The employers will not be obligated to hire by job with job links. He must not hire a man unless the man has hire on the SCAB list. He must hire out through a scab-governing agency. The present practice of raising a strike-breaking through this system and then hiring out the scab to the actual militant workers into insignificant plants at low wages, or keep them completely unemployed. It can force some worker willing to either accept such jobs where there is strike or stay hungry. Yes, we fear from Hitler don’t we?

---

"Labor Statesman"

R. J. Thomas, president of the United Auto Workers CIO, has become the moving spirit behind the new world economic business. In condemning the strike of the Chrysler workers in Detroit, the labor leaders of the United Auto Workers union members were fired. Thomas said: "Either we set our house in order and get the strike going, or we face an attack no one can withstand. The strike is nothing but a strike. We stand firmly behind the leadership and called for fighting their demands. In the name of patriots strike-to-live."

---

"Right, Right, Right"

The turning over the Internal Revenue service to the DAVID on the no-strike pledge is bringing forth some new reformist leaders who are attempting to take the head off the move- ment. For instance, Walter Reuther, the head of the UAW, is being led to "right" again. And in Detroit, the president of the Chrysler local, R. J. Thomas, is being turned into the leadership of the strike. The National Labor Board enables Thomas to give leadership to the coming strike of the automobilists in an all-out support of the strike of the workers. The UAW, from the breakfast to the dinner table, is trying to avoid a strike.

---

"Ward Workers Will Walk Again"

The Montgomery Ward workers are trying to avoid a strike. The workers are trying to get the Ward workers to get back on the payroll. The Ward workers are getting back on the payroll and are fighting for their demands. The strike of the Ward workers is no longer a strike. It is no longer a strike. It is no longer a strike.

"Campaign for Kelly’s Pardon"

**PETITION POINTS OUT FRAMES**

Richmond, Va.—At a recent meeting of the Samuel Kelly Defense Committee, the group adopted the new campaign for unconditional pardon for Samuel Kelly rather than merely presenting a case for the Federal Court. The committee was of the opinion that this would do more to establish the technical is- sues that might surround habeas corpus. The Governor of Virginia the question of whether Kelly was being held in priso- n and that should be the objective of his campaign for his release. The committee also agreed that there was more possibility of offsetting any action taken on the habeas corpus by the Attorney General.

Kelly has declared himself in fa- vor of a pardon for a reason, namely against probation or parole or any form of punishment. The petition points out the utter lack of evidence against Kelly— the fact that the charge against him of stealing clothes was nothing but a frame-up, and goes farther by pointing out the real reasons for Kelly’s imprisonment. The petition points out the fact that for the past twelve years Kelly’s name has been in the State of Virginia. He has never been arrested, much less convicted, for the crime of which he was charged. He has never been imprisoned in any State or Federal prison. The petition states that Kelly is a follower of the Marxian line. The petition states that Kelly can only be liberated by mass pressure and demands to be granted a pardon on a mass campaign that is not on technical grounds, but on the facts of the case. Kelly’s line as a result of the case is probably that he has been improperly imprisoned. The petition states that Kelly is a follower of the Marxian line. The petition states that he can only be liberated by mass pressure and that he is a follower of the Marxian line. The petition states that he can only be liberated by mass pressure and demands to be granted a pardon on a mass campaign that is not on technical grounds, but on the facts of the case. Kelly is a follower of the Marxian line. The petition states that Kelly can only be liberated by mass pressure and demands to be granted a pardon on a mass campaign that is not on technical grounds, but on the facts of the case.
