**U. S. Backs Dictators South of Border, Says Guatemalan Delegate**

By A. FABRELLA

As Washington prepares an aggressive policy toward Latin America, the United States government is reported to have backed military coups which it had earlier opposed. A Guatemalan delegate to the Inter-American Peace Conference met at the Inter-American Peace Conference in 1949 has said that Washington was backing military threats south of the border.

The delegate, who was speaking on the sidelines of the conference, said that the United States government was providing military aid and advice to various countries in the region. He said that Washington was trying to shore up its influence in the region by supporting military regimes that it had opposed in the past.

Two Tactics

OAKLAND, CALIF., LABOR BARGAIN FRIENDS OF LABOR—and Loses

By GORDON HANNAKLE

The two candidates for City Council places, ordered by the Judicial Board for the Political Education (political) section of the AFL, in the recent election in Oakland, have won a decisive victory in the November election. But the other candidates, James Handley and James H. Jones, were badly defeated.

Two years ago the candidates of the Oakland Labor Council went all the way, but this year the General Strike was followed by strikes and lockouts in the Oakland Valley Lumber, except for the fact that the movement was not as widespread as in 1934. So the two candidates, Handley and Jones, went on to win hands down in the Ward 3 and 4 races.

The Oakland Labor Council, which was organized in 1932, has now become a powerful force in the city. It has been active in the battle for the General Strike and the labor movement.

From that victory in 1934 there has been a steady growth in the labor movement in the city. The council has been active in support of the General Strike and the labor movement in the city.

Why Workers Formed the ISL

Concluding from last week, the important theme of workers in the U.S. is the role of education and activity in the formation of workers organized in the ISL. As we analyze the ISL, it becomes clear that this organization has been a significant factor in the development of workers' consciousness and activity in the U.S. economy. This is not to say that all workers in the U.S. are organized in the ISL or that all workers' activity is centered around this organization. However, the ISL has played a key role in promoting a more class-conscious and active approach to workers' issues in the U.S.

Internal Democracy and the Propaganda Group

The very nature of ISL activity is such that it is impossible to separate political instruction from the day-to-day struggle of the workers. This is why the ISL has developed a strong focus on education and the formation of a propaganda group. The propaganda group is made up of individuals who are dedicated to spreading the ideas of the ISL and educating workers on the issues of the day. The propaganda group is integral to the success of the ISL, as it is through their efforts that the organization is able to reach out to workers and influence their thinking.
