**Is World Government Achievable Through the Present Governments?**

By H. L. DRAPEL

The two great world wars have cast a powerful spell over the minds of men throughout the world. This is true even in the case of the First World War—which was fought mainly by the British and the French. The future is supposed to be a world where there is no war, and where there is peace. But if this is true, the world's present governments have failed in their duty. They have let the nation down in every way.

We are told that the world is becoming a better place to live in. But how can this be when the world is still divided into nations and each nation is fighting its own war? The world is not a place for nations, but for people. And if the world is to become a better place to live in, then it must be united into one world government.

**A Powerful Idea**

The political ideology of the present world is a powerful idea. It has been around for many years, but it is still not widely accepted by the general public. The idea of a world government is not a new one, but it is still not widely accepted by the general public. The idea of a world government is not a new one, but it is still not widely accepted by the general public.

The world is becoming a better place to live in. But how can this be when the world is still divided into nations and each nation is fighting its own war? The world is not a place for nations, but for people. And if the world is to become a better place to live in, then it must be united into one world government.

**Simplicity and Unification**

Simplicity and unification are the two main characteristics of the present world. The world is divided into nations, and each nation is fighting its own war. But if the world is to become a better place to live in, then it must be united into one world government.

The world is not a place for nations, but for people. And if the world is to become a better place to live in, then it must be united into one world government.

**The Case for a World Government**

The world is not a place for nations, but for people. And if the world is to become a better place to live in, then it must be united into one world government.

The world is not a place for nations, but for people. And if the world is to become a better place to live in, then it must be united into one world government.

**The Conclusion**

The world is not a place for nations, but for people. And if the world is to become a better place to live in, then it must be united into one world government.

The world is not a place for nations, but for people. And if the world is to become a better place to live in, then it must be united into one world government.
