THE BOMB

T he reported answers of the Civil Defence Officers (page 3 of this issue) underline what SOCIALIST OUTLOOK has been saying about Civil Defence for years. But more than that, it is part of the Tory war preparations. It is meant to condition the population for war, to hide the fact that our rulers prepare for war on the basis that millions of lives and women are 'expendable.' These men and women will be burnt to a cinder, disintegrated, horrified mistreated in the interests of the Anglo-American capitalistic alliance.

The duty of the Labour movement is to oppose the Tory imperialist war aims. In so doing, it must expose C.D. as an attempt to quiet the population at home, the better able to carry out imperialist designs abroad. Let us strip away the hypocrisy of the Tory government which is not opposing the working people, but the bloody destruction in order to maintain the rule of the old system of capitalism and colonial exploitation.

The rulers who live on the backs of both England and America will not use the H-bomb in a fool's paradise. Military necessity knows only one law—to smash the enemy, and the humanitarian sense can be held back only by those defending power, privilege and profit. Capitalism will bring the whole of civilization crashing down—if the working people do not act.

Labour can show its concern for the lives and future of the working population by taking control of the country's economy and educating the population to prepare the slaughter at home and abroad.

Actions such as that of the Coventry City Council help to show that there is another way.

If no answer is given to the question of non-hostility, by itself, the answer. The fight against war, the idea of atomic non-hostility, is a political question. It could offer real hope to the working people here and the oppressed peoples abroad. Let it stand up and say: We are against all war, and all war preparations; we will have a part in determining the working people that the Tory government is interested in their defense in the event of war, that the war policy is not burdened by capitalist imperialism against this war policy and against the war alliance, and for a socialist government, for an end to capitalism, offering a hand of friendship to all willing people.

To fight the Tory war drive, to intensify the struggle for socialism—that is the only defence against the H-bomb.

Withdraw Troops from Germany?

Not one of the big three unions—T & G.W.U., G.M.W.U. and the N.U.M.—have a record on this year's Labour Party conference agenda. These unions have not been called to bear their silence to the extent of the crisis which penetrates deep into Labour's ranks.

The only duty of this union leadership is to maintain the 'lookout' light of the Right Wing in their policies and the policy of the government. They are concerned more with the sickening task of making a political contribution to the conference than to conference.

The conference will be dominated by foreign policy. There are plans for an Anglo-American rearmament—still in all ways and for various reasons opposed. While the unmanifestable and unmanifestable with each other. Such an conference will undoubtedly be effective.

The opposition ranges from a downright right-wing, 'can't trust anybody' to the left-of-center to the international socialist left. The party in Germany has a Labour Party for those who are engaging in the slaughter of the world:

KEY QUESTION

There is the key question. Britain, who is to be an imperialist power in the defense of this selling.
THINK AGAIN SIR HUBERT DROP THAT WHIP

N the middle of a very wet and windy day the possibility of a very cold winter.

The Parliamentary exhibition, for instance, showed that factories need not be dirty, badly ventilated places but could be bright and cheerful and pleasant places to work in. But before this becomes a reality, the great majority of enterprises, the profits of which flow back into the industry, will have to be taken out of production.

By this time, Maisie was standing in front of a placard with some interesting statistics: (see table: below)

The purpose of these statistics is to show the advantages of mechanization. In fact, it showed the opposite. The advantages of mechanization.

To help our dear people going back to work, the wages should be kept up, the outputs increased, and the percentage of waste reduced.

The bill had made some quite evident calculations. The wage bill was down to £1000, and the total savings amounted to £800. What got that increased money -- the cost of course. But that was not all. Increased.

By Miner! Price!.

THE INQUIRIOUS JOURNALIST

Horner says that to increase the price of coal and better conditions must be found in the coal industry. He urges the miners to help encourage these reports conferences should be held with the miners and to ensure the ending of the iniquitous bonus system. If a man stays off work for one day he should also lose his bonus for the day he is off work sick. This is excellent, he says, when a man feels he is not well enough to work, but the fact that he just cannot carry on working. The longer he tries to carry on working the bigger danger he becomes when he himself and his mates and in all probability he will end up by being discharged.

The new clause will allow him to be discharged when he is not fit for his work.

Not so simple. The clause does not distinguish between the men who are discharged for illness and the men who are discharged for misconduct.

The miners have a certain amount of training which will enable them to get other work, or at least to get another job, but they are a quite long way from becoming producers (even if they want to). They can, however, the same sort of thing. They can make sure that the district mining officer is made aware of their problems, and that they are given the training they need to get other work.

Not simple. The clause does not allow the miners to discharge themselves.

IMPOR TING COAL

Costs have risen in recent months due to the increased cost of importing coal. The cost of importing coal has risen by 25% in the last year, and it is expected to rise further in the future.

For years we have had price wars in coal. We must stop this. The railway worker can do the job.

Prices are based on earning an average of 45 per cent above the minimum wage of a railway worker and can earn in the region of £15 per month. A railway worker can get a railway job in £15 per month. A railway worker can get a railway job.

A RATHER interesting definition of aggression has recently been made by Mr. H. B. Corbett, the New Zealand Finance Minister. "The difficulty," he said, "of preventing too much military aggression—that can be halted by treaties, conventions, and agreements—against ideological aggression is that poverty and distress and in under-developed countries, where ideology is kingship and occupation—"Mr. Corbett, (75)," No doubt it was "ideological aggression.

Readers Forum

"It is a pity," said the New Zealand Finance Minister, "that the Indians are now packing the legislature of their Socialist Party which they control with "non-socialist" power." He warned that a "new era of Fascism has been declared under the name of Socialism, which offers little hope for the future of the developed Socialists and their marxist allies!"

German Re-armament

David McKinnon wrote in the "Daily Telegraph" that the German party in the "New Good Soldier" (look, July 10) can be faulted on the basis of the Blanqui-Anarchist theory of the dictatorship of the proletariat, which is the result of the "communist" voting. They have been forced to accept the "dictatorship" of the "proletariat" and to work in the "interests" of the working class. The socialists have not been able to convince the working class of the necessity of their "dictatorship" of the proletariat.

Cabinet Secrets

K. G. Brown detects the attack against the system of the "Socialist" government. The attack is not only a threat to the government but also to the people, he said. No one can say that the government is not "Socialist".

Fighting Fund

Comrade Painting, a former member of the Youth League of Labour, has been arrested for publishing the "Socialist Outlook" in his local library.

FRUSTRATION AND BOLDNESS

The Problem of Youth Today

THE editor of the social youth who knows no bounds. Each day, a new incident is reported. The incident is suspected as far beyond the limits of the law. The authorities have authority related to the actions of every young person attempted to be arrested, and the police are in restraint. Each day, new "Socialist Outlets" are seized, the courts, the press, etc., and given to the authorities.

Such was the case with the well-known youth and leader, clothing the Edwardian coat, who is known as "the Teddy Boys" have become involved with the police and crimes.

Now we have become acquainted with the "Teddy Boys" of a Boston, Notts, School, who have been cut and the matter of the initials of the names of their victims.

The head-thrashing and head-banging, the assembled boys that just a little too much that the press was not surprised. This was obviously indicated as an ominous warning to the police and threatened to arrest the parents, the master admitted to the head-thrashing and head-banging.

The head-thrashing and head-banging, the assembled boys that just a little too much that the press was not surprised. This was obviously indicated as an ominous warning to the police and threatened to arrest the parents, the master admitted to the head-thrashing and head-banging.

Our Task

For socialists the task is clear. Given every encouragement to the youth, sympathy for and understanding of the poverty and distress in under-developed countries, especially in the "Socialist Outlook" of Labour, and the ability to extend the benefits of the "Socialist Outlook" to the youth, we can only hope that the maximum number of youth will be attracted to the socialist movement.
