In fact, around like a football, not only in the we learn from a wailing complaint made legal institutions of capitalism, but in against the same people who are allied the labor movement, is again threatened with him elsewhere in Paterson, for inwith the same fate. The danger to the stance), that Gitlow was run out of movement for Mooney's release arises in spite of the clear, unmistakable and thoroughly correct provisions outlined for it in the recent appeal issued from San Quentin penitentiary by the world renowned prisoner No. 31,921. For years, false "friends" of Mooney deceived and frustrated the workers by promises that if they would only remain "respectable" and not "create disturbances" or organ fze demonstrations, Mgoney would be released by the labor fakers in high places who would see this or that capitalist politician in the behalf. Tom Mooney himself put an end to this rubbish and worse when he wrote in his appeal last month: "From the cell where I have been buried alive for fifteen long

years I appeal to every working class organization with a spark of militancy leled conflagration-agitation that will arouse the masses to demand my unconditional pardon and the release of all class war prisoners." This is the only sound basis upon which a movement can be built.

#### The Stalinist Plan

We have already commented upon and attacked the course taken by the official Communist party and the International Labor Defense which it controls. They are evading the concrete proposals made by Mooney, whispering around in small circles that Mooney would adopt their course if he were not in prison "where he cannot know the situation". Instead of striking out on the right path, the L .L D. and the Stalinist machine have adopted a narrow, sectarian policy which seeks to limit the Mooney movement within the stifling confines of the Communists, the Communistic organizations and those under its immediate influenc and control. Mooney, and we with him, proposed a genuine united front of all the organizations he mentioned in his appeal-Communist, socialist, A. F. of L. unions, Amalgamated Clothing Workers, I. W. W., etc., etc. This is the only way to put the issue in the labor move ment and to divide the real friends of Mooney from the false. But the Stalinists are so contemptibly fearful of matching their program and deeds in an open movement with those of other tendencies in the working class, that they prefer sectarian isolation thinly and unsuccess-fully veiled under the name of "united FROM CANADA front from below" to the broad and genuine united front movement of all groups.

The case of Tom Mooney, which for | cannot find a single Left wing representhe clandestine "conference" at which this committee constituted itself because it would have "nothing to do with Communists" at all. A more malicious cariature of the spirit and letter of of stitches were made in his scalp, and Mooney's appeal for a united movement an X-ray examination made Tuesday to can hardly be imagined.

> It would be naive to imagine that this 'committee''is anything but a united front . . . against the Communists. That the official party policy has facilitated their task, does not change the fact that the anti-Communist crusade interests these people infinitely more than the incarceration of Mooney and the other class war prisoners. The New York branch of the League which met Tuesday evening, upon hear ing the story from comrade Shachtman decided to send a telegram of the warmest greetings and wishes for speedy recovery to our comrade. Arne Swabeck has not only been in the front ranks of the Left Opposition from its inception but was one of the leaders of the Communist party in this country from its earliest days, and before that, was an active militant in the A. F. of L. and the.I. W. W., being one of the leading fighters in the famous Seattle General Strike. Deeply concerned as every one of his comrades and friends will be to hear about the accident, they will be equally overjoyed to learn that he will be back in the ranks in a short time, manifesting that devotion and energetic

activity for the cause which have been associated with his name during all his life in the revolutionary movement.

For the first time since the famous latter raised one anchor, the men would Nore mutiny of British seamen, some drop the other. The officers of the fleet 12,000 sailors of the Atlantic fleet of found themselves helpless before this the largest navy in the world have been outspoken and courageous insubordinadrawn into a mutinous action only little less sensational than the uprising of the Chilean navy men a few days ago. From one of the strongest traditional arms of British imperialism, the navy, has unexpectedly come one of the sharpest rebukes to the new "National Government" and a rejection of its reactionary "econ omy plan".

Against Wage Cuts

Right on the eve of the regular Atlan tic maneuvers of the British fleet, the sailors not only refused to weigh anchor, but threatened the officers that if the

tion which was cheered by the thousands of sailors who then launched their strike against the government's wage cut, with cheering and singing. The magnitude and resolution of the sailors' action is breathtaking. So much so, apparently, that the bourgeoisie is at a loss for what to do. ,What under "normal" conditions would mean the summary execution of the ringleaders, and the punishment of all participants, is today met with the greatest caution. The Times dispatch says that "there has not been the remotest hint of a court martial. Instead, Sir Austen Chamberlain, First Lord of the Admiralty, announced today in the House of Commons: 'His Majesty's Government have authorized the Board of Admiralty to make proposals for alleviating hardships." And, it continues with full justification, "as startling as was the incipient mutiny in the British fleet, without precedent in modern times, the action of the government in making terms with those who have broken discipline is regarded as even more startling"

That the first organized sign of rcvolt against the new reactionary administration of MacDonald, Baldwin and Chamberlain should come from the sistance which it is bound to encounter German Kaiserism, so the action of the British sailors is unmistakably a harbinger of powerful rumblings and clashes in the economic structure of the country, in which the working class of England will be afforded the opportunity of rising to the heights of the General Strike days of 1926, and, under favorable circumstances, even to a higher plane of revolutionary activity.

As our London correspondent writes (see page two), there is a widespread ferment in the working class. Meetings, demonstrations and protests are the oider of the day. Many of the manifestations of discontentment are still spontaneous, largely because there is no force capable of organizing them, or willing to do it. The new "Opposition" led by The second National Conference of the Henderson, who is as reactionary in everv respect as MacDonald himself, can be looked to only to put obstacles on he road of labor the socialists. We see it from the de-i morning, September 24, and running themselves at the head of battles if they nevertheless develop, only for the purpose of betraying them. Their measure is given again by the Times dispatch when it writes of the taunts of the Labor back benchers to the partial retreat announced by Chamberlain: "This jubilation was not shared by responsible [!] leaders of the Opposition on the front labor benches. They, in common with members of the government, consider the matter extremely grave. Not only have British seamen refused to obey orders, therby forcing the postponement of manenvers of the Atlantic Fleet, but they have set an example of disobedience to other services, civil and miltary." And the Left wing of the Independent Labor Party, Maxton and his associates. where are they? From the London dispatches thus far available, they continue to grumble a little, to address some meetings, and to do anything else except to organize the workers for a sharp and militant struggle against the new govern ment and against the Hendersons who are tarred with the same stick as Mac-Donald himself. Unfortunately, whatever movement of resistance has thus far developed, appears to have been captured largely by the Left wing I. L. P. leaders-a guarantee in advance that the movement will be led back to the camp of reaction by these experts in perfidy. And the Communist Party of Great Britain? It does not appear on the scene to any effective extent. The reports do not even mention its activities. The only indication of its position that we have is the article in the Daily Worker by one so that all arrangements can be made of the British Stalinist majordomos, William Rust, an article permeated with that conservatism in a conclusive situa-Communism in the days of the General tion which proved so fatal for British Strike. The slogans it issues ("Not a penny off the dole", etc., etc.), do not differ in any important particular from the slogans of the Left I. L. P. The most urgent need of the moment, the campaign for a united front to resist the brutal encroachments upon the workers planned by the National Government, one of the best ways of revealing the true caliber of the Labor misleaders of all varieties, is allowed to go by the boards. The London Daily Worker, further, takes care, through the party secretariat, to warn against tendencies towads "ultra-Leftism", by which it means the desire of the party ranks for a more militant and decisive program of action than the party leadership has advanced. And there lies the danger to British Communism: that the development of the situation, once more as in 1926, will find GRAND TOTAL TO DATE: \$1,392.14. it trailing helplessly along.

SOCIAL DEMOCRACY FRENZY We have already said in our previous notes that the bourgeois press has begun the attack against the social democratic ministers, principally against Prieto,

Largo Caballero, the two "deficient ministers". The attack of the bourgeois press has produced a great perturbation among the they tell the truth or rather because they have lost the friendship of the bourgeoisie after having lost the confidence of the working class. We already have El Socialiste, the central organ of the Spanish social democracy, making Marxian declarations of faith and proclaiming with a great deal of emphasis that they defend the principle and the inescapable necessity of the class struggle. In the same editorial article they declare that the Spanish social democracy is eminently "revolutionary" and they direct an at

We said last week that the I. L. D. and the Left wing "cannot labor under the illusion that the leadership of the magnificent movement which is about to be started will fall to it automatically. A false, a stupid policy may cause it to forfeit not only leadership in the movement but even prestige and influence. What the Left wing allows to slip through its hands will be picked up by conservative and reactionary groups which will only lead the movement into a ditch of futility as they have done so often in the past" What we forecast only a few days ago has already signal to the Left wing. It must pay attention to it, reflect upon its significance, upou the extent of its own responsibility for it, and upon the measures that must be adopted immediately to deal with it. A Novel Committee

As if in reply to the initial blunder of the I. L. D. and the party (which even the Stalinist shallow-pates might have guessed would meet with a joyful reception in the conservative camp and give it the besought opportunity to act morally indignant), a call has been issued for a conference which is to organize "a massive labor protest in behalf of Tom Mooney". Who has issued the call? Whom do the committee members repre sent? When and where did they get togthr to form their committee? Who took the intiative and who was responsible for the committee's selection? We learn nothing about these cogent questions in the call. To all intents and purposes it is a self-appointed clique which, somewhere in the dark of the moon, suddenly arrogated to themselves the authority to act for the Mooney movement. Its caliber may be judged from its composition and from some additional facts.

On the committee we find an admixture of snuffling liberals, of outright and notorious reactionaries and racketeers in the labor movement, like Hillman of the of the funds required for the sending of Amalgamated, Fania M. Cohen, loyal delegates to the National Conference and servitor to every reactionary administration in the I. L. G. W. We have already said that the Catal onian statute was the proof of the treaers from the I. L. The force of economic events, without

consideration for the customs of high diplomacy, which consist of resting in summer from the "work" of winter, has provoked an extraordinary movement in the political relations of Europe and even of the whole world during the recent months.

The lack of independence in the position of German capitalism, which renders its existence even dependent upon foreign credits, makes the bourgeois press and public life particularly sensitive to all these changes.

The central problem is the deportment towards France. The German bourgeoisie still hesitates to submit itself flatly to French hegemony. That this is still Anglo-American combination. But it must be said that the German government in recent times has been particuwhich destroys at least the illusion of a has accustomed us.

The press of the German Communist Party, to the extent that it still exists, does not even deal with this question except by the general and mechanical formula of the "war danger". That is the inevitable consequence of the abandonment of all strategy in the European question which the Comintern summed up in 1923 by the slogan of the "Sovict United States of Europe".

In the interior of the country, the bourgeoisie has utilized the defeat of the G. in a rabid manner (occupation of the Karl Liebknecht House). It utilizes the elements of the slum proletariat, adventurists and in large part provocateurs, who were able to slip into the party during the "third period" in order to discredit the party as such. The decrees, whose importance we have explained. facilitates this task for it enormously, for they have deprived the party of a good part of its press as well as of the possibility of action by means of meetings and demonstrations. As to the possibility of action in the trade unions. the party has itself deprived itself of this.

Triumphantly, the bourgeois press announces that the trade union congress this year (we will speak of it in greater detail) is the first one since the

What is more important than might appear at first sight, are the new decrees which prohibit the savings banks (official institutions of the communities and by that fact, everywhere favored by the small savers) from according credits to these communities. This not only means the depositing of all available means for private economy, but the inauguration of a grand-scale pillaging of the communities by this private economy, an audacious game which will strongly disquiet the petty bourgeoisie. Communist League will mark an impor- for the Opposition cannot succeed with tant milestone in the development of our its great historic mision, unless it preorganization and, consequently, in the pares its soldiers for the coming day. history of American Communism, whose banner we bear and whose future we represent. The conference is a culminating point in three years of preparatory labor for the gruelling battles yet to come. Its deliberations have been grounded by all that has gone before and its results can be anticipated, even now, with reasonable assurance.

Our ranks have been welded together on the basis of a correct political line. If the Conference accepts the proposals of the National Committee it will not find it necessary to confront the organization with any new or surprising turns. Our theses and other recommendations only represent a synthesis of the policies and methods already worked out and applied in our daily work and agitation on the basis of our platform. The approval of this line by the Conference will necessarily carry with it an endorsement of the course on which the National Committee has guided the movement and a repudiation of the criticisms brought against it. Any kind of indefiniteness on this point is out of the question. The Conference is to draw the balance and decide. Proceeding from this the National Conference is then obliged to declare an end to controversy over the disputed questions and to prohibit any further discussion of them. It can do this with full authority and with assur- ing fast to our essential function as proed throughout the organization. Our conference preparations have been a triumph of proletarian democracy, a model illustration of its processes-the only methods yet discovered whereby a living workers' organization can assert its collective judgment.

The discussion has been thorough, free and untrammelled by any kind of sup- the position of the youth under capitalpression. The selection of delegates proceeds in the same way. After this, it will be impossible to question the representative character of the Conference or its authority to speak for the entire organization. The membership as a whole will wait for its signal to terminate the discussion and concentrate all attention on the concrete tasks worked out on the basis of the fundamental decisions.

Outstanding among the questions concerning which the National Committee will insist on a categorical decision of are too absorbed in the general Opposithe Conference-because it has been the tion activity. The Platform adopted at the First Conference answered this question correctly. Without that the Left Opposiwreck. 5. Conduct a campaign for fifty new members out of the circle of sympathizers of the Opposition. Our opponents may laugh at the modesty of such a goal, but we need not worry about that. We do not claim to be a mass movement. Our aim is a selection of the vanguard, and fifty new members, a number which can be recruited with a determined effort-will mean a material strengthening of our movement which will guarantee the success of every one of the practical tasks of the moment. Strain in the direction of a larger and full-time staff which continues to expand the growth of the organization and its tasks. Settle this question in principle and explain the views and methods of Lenin regarding professional revolutionary work.

It will be seen at once that the suggestions indicated above, taken all together, do not constitute a very ambitious program. All the tasks enumerated are small ones, they are comparatively simple and they are all easily possible. Yet it would be a mistake for the Conference to go far beyond them.

It is not for us to adopt grandiose projects which are beyond our capacities at the moment, which are soon forgotten and never accomplished. We are under no compulsion to imitate the bluff-programs of the Stalinists. We do not have to "make a showing" before anyone. We are only obliged to know what to do next with the forces at our disposal

4. On the other points raised: Work in the Y. C. L., educational work, independent work wherever possible there is general agreement. The National Youth Committee will have to concretize these tasks and outline definite ways of pro-

ceeding. The youth comrades will be called upon to aid in this work. JOSEPH CARTER.

The Youth Thesis

The future growth of the American section of the Left Opposition depends in a great measure upon our ability to win the youth to its banner. For this

end we must understand correctly how to attract and secure their political and organizational support. The youth resolution, despite weaknesses of a minor character, correctly establishes our approach to this problem and a successful realization of its aim. On fundamental approach there is agreement. Our task at the present time is to set upon a practical solution to the problem of win-

ning the youth to our banner. At our first conference, over two and half years ago, we signalized our approach to this problem by asserting that the task of the youth members in our ranks, was to work as oppositionists in the general struggle of the Communist

Left without concentrating on specific youth questions. We understood correctly that during those days our main task was the establishment of the Left Opits position among the American Communists and to sink its roots as an ortask on a much larger scale.

The exigencies of the first period of our existence have passed. Our problems remain basically the same-but that an organizational and political stabilization has taken place nobody can deny. The

American Left Opposition is here to stay. Our problems today are broader. Our movement is much stronger and our foundation is a solid one.

An estimate of our membership will show that the youth make up one of its largest sections. They are a vital part of the organization, and have contributed a great share toward its growth. It is, howeevr, necessary, in view of a changed situation, to organize the youth activity for our younger comrades who can now devote their attention to it. Our approach is based on the analysis that while hitherto our younger comrades were not in a position to devote their time and energy to youth activity—that period has changed and it is absolutely urgent that they participate in full force in youth

work. The general problems of a theoretical nature and political sphere find a unanimous opinion among all our comrades. This will help very much to facilitate matters in an organizational sense. But the most important problem is that of finding a form through which our young comrades can operate. In this pre-conference discussion it is necessary to consider various propositions. We submit here, the proposal for the organization of a series of youth clubs wherever possible throughout the country. We consider at this moment something tangible which can be realized: the organization

The declarations by Maurin which we quote later on, show what confusion and what haziness prevails in the mind of these chance leaders. In his speech at the Madrid Ateneo, Maurin said among other things: "It is necessary to demand not useless Constituent Corteses, but a revolutionary convention. We need a deli-

We are convinced that the revolutionary workers of the Catalonian Federation who, by their class instinct, take a direct hand in the spontaneous struggles of the Spanish proletariat, will not take up any of the burlesque language of their leaders, but that they will employ the language of the proletarian revolution, that is, of the October revolution, of the Comintern of Lenin and Trotsky.

Thanks to the extreme weakness of the official C. P. in Catalonia, the confusionist and Right wing leadership of Maurin still remains at the head of the most numerous Communist Federation, in the most industrial region of the country. But in order to preserve his leadership, Maurin wants to discredit the "Spanish Trotskyists" who are obviousy disconcerting him. Jordi Arquer is the one charged with this job. In a series of articles in La Batalla, he denounces the "epigones of Trotsky, the sowers of falsifications". Not having the courage to stand up directly against the ideas developed by Trotsky in his latest works, he crudely attempts to oppose our Spanish comrades of the Left Opposition to Trotsky. "Nin and the other Spanish 'Trotskyists' reproach the Catalonian Federation", he writes, "for having a false position in the Catalonian question. But they have read Trotsky badly. Hasn't he written in one of his letters (the Spanish revolution from day to day) that 'in the present stage of development and with the existing relationship of social forces, Catalonian nationalism is a progressive revolutionary factor'? This is how the epigones of Trotsky falsify their master!'

> 4. In the Balkans, the old pre-war social democracy already put forward the slogan of the democratic Balkan Federation, as the way out of the madhouse created by the separated states. Today, the Communist slogan in the Balkans is the Balkan Soviet Federation (by the way: the Comintern adopted the slogan of the Balkan Soviet Federation, but at the same time it rejected this slogar for Europe!) Can we, under these conditions, make our own the slogan of the Balkanization of the Spanish peninsula? Isn't it monstrous?

5. The syndicalists, at least certain of their leaders, declare that they will figat against separatism even with arms in hand. In this case, the Communists and the syndicalists would find themselves on two sides of the barricades because, without sharing the separatist illusions, while criticizing them, on the contrary, the Communists must stand up pitiless;y against the hangmen of imperialism and their syndicalist lackeys.

Should the petty bourgeoisie succeed-against the advice and the criticism of the Communists-in dismembering Spain, the negative results of such a regime will not take long in manifesting themselves. The workers and the peasants of the various sections of the peninsula will speedily arrive at this conclusion: yes, the Communists were right. But this means precisely that we must not assume a particle of responsibility for Maurin's program.

7. Monatte hopes that the Spanish syndicalists will create a new "syndicalist state". Instead of this, the Spanish friends of Monatte are integrating themselves successfully into the bourgeois state. It is the story of the luckless hen who sits on duck's eggs. Today, it is very important to follow all that the Spanish syndicalists say and do. This is wil open up possibilities for the Left Opposition in France to deal a harsh blow to French anarcho-syndicalism. One cannot doubt for a single instant that under the revolutionary conditions the anarcho-syndicalists will discredit themselves at every step. The gifted idea of the syndicalists consists of controlling the Cortes without participating in it! To employ revolutionary violence, to fight for power, to seize the power-all this is not permitted. In its place, they recommend the "control" of the bourgeoisie which is in power. A magnificent picture: the bourgeoisie takes its breakfast, it lunches, it dines, and the proletariat led by the syndicalists "control" these operationson an empty stomach.

These two pamphlets will give the reader an invaluable analysis of the present situation in Spain and the prospects of the further development of the revolution. The standpoint of the Opposition, in contrast to that of all the other groups involved in the present Spanish situation (the official Communist party, the Maurin group, the syndicalists, and others), is presented with the exceptional clarity and pentration for which the author is so well-known.

The success of this work depends on first, the participation of all of the youth comrades and second, a clear idea of Communist youth work and our aims

and tasks. The Thesis endeavors to answer these questions. An important thought expressed in it is that:

"Limited experience with Communist youth work requires that youth tactics, elements, and train them deliberately for demands, slogans and special oragnizational forms should be put forward not as dogmas or finished products which have universal validity but rather with fices, who are willing and able to learn a view of testing them in practise, exand boot aside the wise-acres and the amining the results, and thereby laying the ground for more effective tactics,

It can serve as a basis for the advanced idea of a Communist Opposition youth movement. The proposal of Spartacus youth Clubs under the guidance of the organization, unified nationally through the efforts of our comrades appears to be at this moment the most logical step to take. In such organizations our young comrades must devote their main efforts.

the leadership of the Communist Inter- the Right wing only because of the blunnational is making itself felt most acutely at the present moment, when the ob jective conditions for revolutionary progress are almost universally favorable to the proletarian vanguard. Paralysis and decay of the most vital organs of the official international Communist movement are the most notable effects, parti cularly glaring and disastrous in the present world crisis of capitalism, of the ravages of the bureaucratic internal regime which was required by the apparatus in order to destroy the fundamental pinciples of Marxism in all the parties of the International. In the three countries of Europe where the Communists should even now be leading the workers to decisive battles, a disheartening picture is presented. In bankrupted Germany, the plague of nationalist degeneration has gripped the only remaining non-Russian mass party in the Comintern and threatens it with another 1923 de bacle, even though in a different form and under different conditions. In rev olutionary Spain, the feeble skeleton formation of the official party plays no decisive role in the country, and lays a huge obstacle in the road to the victory by diverting the vanguard from the proletarian revolutionary goal to the-at best-mythical and - at worst-fatal goal of a "democratic dictatorship of the proletariat and peasantry". In England, the prostrated figure of the official party is unable to affect developments in any serious manner at all. The other parties of the International do not present a much more encouraging picture, despite brief and temoprary rises, despite the increasingly favorable conditions.

2. The Centrist bureaucracy has not, however, succeeded in completely destroying the Communst International. The latter posseses a vitality, not derived from Centrism, but still sufficiently powerful to have withstood the fatal consequences of the corrosive influence of the epigones. The vitality of the Comintern has its sources in the existence and popularity of the October revolution and the Soviet Union, its traditions and its as sociations, all of which the advanced elements of the working class still connect and identify in their minds with the existing parties. The support still enjoyed by the official parties is given them by the workers as representing the ideas of the October revolution. In addition to this tremendous factor, the hopeless bankrutcy of capitalist society, the intensified exploitation and misery characterizing it in its last period of decay, plus the despicable and unconcealed treachery of the social democracy, drive more workers to the ranks of Communism than the mountain of blunders, defeats and crimes of the Stalinist apparatus can drive away. While this state of affairs cannot produce a permanent "equilibrium" in the ranks of official Communism, it nevertheless operates at the present stage with such force that it may be said that the bulk of the revoluionary workers are either in or around the official Communist parties or under its influence. Furthermore, the shifting of the apparatus from its Right positions to positions of ultra-Leftism, driven by the pressure of events, by criticism the Opposition, by discontentment in the ranks of the party itself, are objective testimony to the possibilities which still exist to purge the party by radical measures of reform and to re-establish it upon a strong Marxian foundation. These are the principal factors which determine for the International Leit Opposition the role which it has assumed and which it must maintain: the Marxian wing of Communism, constituted as a faction of the Communist International which works for its regeneration and restoration. This historical task can be accomplished only by the most intransigeant struggle against the Centrist bureaucracy and the reactionary ideas with which it has poisoned the movement. 3. The formal splitting off of the Right wing from the Comintern in a whole series of countries, particularly since the Sixth Congress, has served to clarify the struggle in the Communist move ment. The Right wing represents the most consistently opportunist section of the ruling machine in the Comintern from 1923 to 1928 which, in the person of the Right wing, has now taken a giant's stride closer to the social demo cracy. In a number of countries. sections of the Right wing have already completed an organizztional fusion with the Second International. In the main, however, it represents a bridge built towards social democracy. It shares the basic theortical conceptions of Centrism (national socialism as against revolutionary internationalism), but otherwise it leads a parasitic existence, nourished by the cruder and more obvious blunders of purblind Centrism, which it criticizes with scraps borrowed from the platform of the Opposition. Liquidators, the ideological agents of the social democracy under the Communist banner who con stitute the Brandlerist "International" must be fought relentlessly at every juncture. While it has and can have shall be available for all the sections nothing in common with the Right wing at least two months before its actual liquidators, the Left Opposition, mindful convocation.

The destruction wrought by eight of the fact that great numbers of workyears of domination by the epigones in ers reacted honestly in the direction of ders and bureaucratism of the Stalinists. should make every effort to win over, by fraternal discussion, the revolutionary working class elements in the Right wing camp.

4. In spite of, and in a sense because of, the obstacles placed in the path of its development and the organizational defeats inflicted upon it by the apparatus, the International Left Opposition is today at the highest point yet attained in its ideological progress. The disloyal abuse of the immense apparatus at the disposal of Centrism, its usurpation of the direction of the Soviet Union and the Comintern, the years of defeats and revolutionary ebb, the fact that the present revolutionary tide has not yet posed acutely and unpostponably before the Communist workers the fundamental strategical problems all these circumstances have combined to prevent the Left Oppositoin from enjoying an organizational growth commensurate with almost daily vindication and confirmation of its ideas, its prognoses, its platform. redress the dispersed and bewildered ranks of Communism so that the organized revolutionary vanguard shall be able to fulfill its historic mission. Our principal task, therefore, is not the pursuit for a "mass movement", which the whole environment and the conditions of our struggle renders futile, but the more systematic and strengthened organization of our propaganda for winning the militant vanguard.

In a number of countries, great steps have been taken in the past period towards the accomplishment of this task. The International Left Opposition has succeeded not only in clearing its ranks of all capitulationist elements of the Zinoviev group, but also of ultra-Leftist dilletante and compromising tendencies, such as were represented by Urbahns, Paz and van Overstraeten. In addition, elements alien to the ideas and spirit of the Left Opposition, like Pollak Czecho-Slovakia, Frey in Austria, the Landau group in Austria and Germany, have been dropped by the way-side. The Opposition, whose strength lies in its ideas and which constitutes a faction, has especially rigid requirements and cannot have any hesitation in enforcing them. For that reason, the American section of the Left Opposition also endorses the struggle conducted by our French section against the Right wing group of Gourget and against the ambiguous attitude of other members of the Ligue, such as Naville, who did not join in rejecting categorically the ideas and conduct of this group, and whose attitude, instead, confronted it, just as it comforted the Landau group in its destructive work in the ranks of the German Opposition. In the future, the American section must devote a greater amount of its attention to the developments in the other countries so that it may contribute the maximum possible clearing the road of progress of the International Left Opposition and helping to overcome those difficulties, and even crises, which frequently arise in the

#### How Everything Is Turned Upon Its Head

The mistakes of the German Communist Party in the question of the plebiscite is among those which will become clearer as time passes, and will finally enter into the textbooks of revolutionary strategy as an example of what should not be done. In the conduct of The aim of the Left Opposition is to the Central Committee of the G. C. its demands, the Stalinist bureaucracy paving the road for Fascism, then our in actuality addressed itself to the upper stratum of the social democratic party with the proposal for a united front against the Fascists under certain conditions. When the Social Democracy rejected the proposed conditions, the Stalinists formed a united front with the Fascists against the Social Democracy. This means that the policy of the united front is conducted not only from "be low" but also from "above". It maens that Thaelmann is permitted to address himself to Braun and Severing with an "open letter" on the joint defense of democracy and social legislation from the Hitlerite bands. In this manner, these people, without even noticing what they are doing, threw overboard their metaphysics on the united front "only from below", by means of the most stupid the authors of the circular letter unexand the most scandalous experiment of the united front only from the top, unexpectedly for the masses and against their will.

Lenin wrote at the time: "It would have been the profoundest error to think that the revolutionary proletariat is capable, so to say, out of 'revenge' upon the S. R.s and Mensheviks ---for their support of the crushing of the Bolsheviks, the assassinations on the front and the disarming of the workers -of 'refusing' to support them against the counter-revolution. Such a way of putting the question would have meant, first of all, the carrying over of petty bourgeois conceptions of morals into the proletariat (because for the good of the cause the proletariat will always support not only the vacillating petty bourgeoisie but also the big bourgeoise); 15 the second place, it would have beenand this is most important-a petty bourgeois attempt to cast a shadow, by 'moralizing', over the political essence of the matter.'

Lessons of the 'Red' Referendum

If we had not repulsed Kornilov in August, and had thereby facilitated his coming to victory, he would, in the first place, have destroyed the flower of the working class, and consequently, would have interfered with our victory, two months later, over the conciliators when they were overtaken by their Nemesis--not in words but in deeds-for their historic crime.

It is precisely "petty bourgeois moralof the classes for power, and the relation- izing" which Thachmann and Co. engage ship of forces at a given stage of this in when, in justification of their own turn, they begin to enumerate the endless infamics committed by the social democracy.

#### With Blown-Out Lanterns

Historical analogies are only analogies. There can be no talk about the identity of conditions and tasks. But in the figurative language of analogies, we may ask: At the time of the referendum in Germany, was the question posed of the defense against the Korniloviad, or in reality, of the overthrow of the whole bourgeois order by the proletariat? This question is not decided by bare principles, nor by polemical formulae, but by the relation of forces. With what care and sincerity the Bolsheviks studied, counted and measured the relation of forces at every new stage of the revolution! Did the leadership of the German Communist Party attempt, when it entered into the struggle, to draw the preliminary balance of the struggling forces? Neither in articles, nor in speeches, do

we find such a balance. Like their teacher Stalin, the Berlin pupils conduct politics with blown-out lanterns.

His considerations on the decisive question of the relation of forces. are reduced by Thaelmann to two or three general phrases. "We no longer live in 1923," he said in his report, "the Communist party is at present the party of the provisional government; but to call many millions, which grows at a furious pace." And this is all! Thaelmann could not show more dlearly the extent to which an understanding of the difference between the situation in 1923 and 1931 is foreign to him! Then, the social democracy was breaking up into bits. The workers who did not yet succed in breaklife of every active political organism these two "varieties" there exist certain How many of them? By the policy of explain to the masses the anti-popular Democracy, turned their eyes hopefully

and from which the Left Opposition is not immune. Any tendency in our own ranks to minimize the importance of the genuine internationalism which is constituted by an active and fraternal intervention in the life and work of the movement as a whole, must be sharply

checked and corrected. 5. One of the difficulties which the International Opposition has enountered in the past period has been the defections of members of the Bureau which has so grately incapacitated it as to compel the International Secretariat to assume functions other than nurely administrative ones. This assumption of political functions has proved to be correct, and at the present moment, the Secretariat is the only effective center holding together the various sections of

the Opposition, and, by grace of the support given it by the great majority of the sections, having the authority to intervene in any country for the purpose of defending the ideas of the Left Opposition. The fact that purely formal organizational attacks are levelled at the Secretariat precisely by those elements who are breaking, or never had anything in common, with the principle and political ideas of the Opposition,-elements like Landau, Frey, van Overstraeten, Urbahns. Weisbord, etc.,-gives the measure of these criticisms. Until an international congress can take place, and a representative Bureau elected, we must give all our assistance towards strengthening the authority and the capacities of the Secretariat.

At the same time, the Communist Lea gue of America (Opposition) suggests that the International Congress be called for the Spring of the coming year, so that the international relations of the Opposition may be strengthened, a review of the past years undertaken, and the tasks for the coming period elaborated. We propose that all the main theses and documents for the congress

This was a dethe factory committees was incomparamand directed at the social democracy bly greated in 1923 than it is today. The factory committees were actually carrying out at that time the basic functions gan "All power to the Soviets!", which of Soviets. The Social Democratic bureaucracy in the trade unions was losing ground from under its feet every day.

The fact that the situation in 1923 was not utilized by the opportunist leadership of the Comintern and the German Communist Party is still alive in the consciousness of the classes and the

parties, and in the' mutual relationships between them. The Communist party, Thaelmann says, is the party of millions. We are very glad of that. We are very proud of it. But we do not forget that the Social Democracy still remains the party of millions. We do not forget that, thanks to the horrible chain of the epigone mistakes of 1923-1931, the present Social Democracy reveals far greater powers of resistance than the Social Democracy of 1923. We do not forget that present-day Fascism, nursed and reared by the betrayals of the Social Democracy and the mistakes of the Staliuist bureaucracy, represents a tremendous obstacle on the road to the seizure of power by the proletariat. The Communist party is the party of millions. But thanks to the preceding strategy of the 'third period", the period of concentrated bureaucratic stupidity, the Communist party is still extremely weak today in the trade unions and in the factory com-

mittees. The struggle for power cannot be led by basing oneself only on the votes of a referendum. One must have support in the factories, in the trades, in the trade unions and in the factory committees. All this is forgotten by Thaelmann who substitutes strong words for an analysis of the situation.

To contend that in July-August 1931, the German Communist Party was so powerful that it could ented into an open struggle with bourgeois society, as embodied in both its flanks, the Social Democracy and Fascism, could be done only by a man who has fallen from the moon. The party bureaucracy itself does not think so. If it resorts to such an argument, it is only because the plebiscite failed and consequently it was not put to the further test. It is precisely in this irresponsibility, in this blindness, in this unscrupulous pursuit of effects, that the adventurist half of the soul of Stalinist Centrism find its expression !
