### Lenin on the Paris Commune

We reprint below an article by Lenin on the significance of the Paris Commune to the international working class. Lenin and the Bolsheviks absorbed the lessons taught by Marx and Engels on the Commune and found these invaluable in their struggle for the Russian Revolution. On the sixty-first anniversarv of the Paris Commune it is befitting for us to reprint this brief writing penned by one who helped carry out the tasks the heroic Paris-, ian Communards set themselves, continued their work, and began the class revenge of the world proletariat against the bloody suppression of the Commune by leading the Russian workers to the victorious Red October.-Ed.

Forty years have passed since the proclamation of the Paris Commune. 1871, by meetings and demonstrations. graves they will once more take the no serious political organizations of the oath to fight untiringly until their ideas proletariat, no strong trade unions and have conquered, until their cause has co-operative societies. been completely victorious.

This was an event unprecedented in history. Up to that time power had popular, workers' Government. At first this movement was extremely indefinite and confused. It was joined by patriots who hoped that the Commune would renew the war with the Germans and bring it to a successful conclusions. It was supported by the small shopkeeners who were threatened with ruin un- to defeat the poorly organized forces of desperate. Stark misery and starvation less there was a postponement of payments on debts and rent (the Government did not want to give them such a postponement but the Commune gave it). Finally, it had, at first, the sympathy of Rennenkampfs and Meller-Sakomelskys, the bourgeois republicans, who feared organized such a slaughter as Paris had that the reactionary National Assembly (the "backwoodsmen", ignorant landlords) would restore the monarchy. But about 45,000 were arrested and many the chief role in this movement was of of these were afterwards executed, course played by the workers (especially thousands were imprisoned or exiled. Only the workers remained loyal to the Commune to the end. The bourgeois republicans and the petty-bourgeoisie soon broke away from it, the former afraid of the revolutionary Socialist proletarian character of the movement, and the others dropping out when they saw that it was doomed to inevitable defeat. ### Gains of Reaction Serious Warning against Stalinist Policy

Germany were breathlessly watched by a world torn by economic crisis and apprehensive of social convulsions. For the bourgeois philistine, for the addict of parliamentary cretinism, the elections constitute a fait accompli, an established fact. Thus, for instance, the American press, in its comment on the revictory for the "inherently conservative character" of the German people. Hitler's inability to muster a larger vote defeat. Taking this 24.8% and seeing what makes it up we find it is further narrowed by analysis. Under occupations, gainfully employed, the census lists (1920) figures—the 1930 figures not available, are even more in our favor) as dairy farmers, farmers and stock raisers; 6,201,261, and for dairy farm, farm and stock, laborers; 3,041,627. This means 6 million farmers and 4 million as agricultural workers. But of these 6 miltoday.

The big agricultural population in the last analysis boils down considerably, and the farmer as an ally does not lose any of his significance but he does lose much of his specific weight for America. The farm population as 24% of the toal (1920) is composed of about 40% agricultural workers, 25% tenant farm ers, 15% mortgaged farmers and 20% farm owners. This does not settle the problem and does not prove that the majority are revolutionary. One knows the majority of the American industrial workers are not revolutionary. How ever, once we obtain a proper perspective it shows the relation of the workers and farmers in the coming revolution.

This block of agricultural workers on cattle raising and dairy farms are not approached as farmers, but are won as workers. They are not allies, they are ours as a class. The varied forms of cropper dirt farmer and tenant famer which make up the poor and middle farmer are our allies. As for the owners, yes even some of them will make good allies. As for the capitalist farmer-they are not allies, they are enemies and will be treated as such. We will waste no time in winning them over. Our allies lie in the percentage between the agrarian workers and the capitalist farmers. These must be won. What is true in these backard sections. where the country can eke out an existence even if the city goes to hell, but where in the city cannot continue without the country; is more so true, in developed capitalist countries like America. In fact, however, the problem is turned around. The city needs the country and has safe-guarded this need by a thousand and one ties that bind the country to the city, but the country on the other hand cannot exist without the city,—not in advanced America. Not on the present mode of production. That is only possible by stepping back a stage or two and this is not an overnight step but one which would follow a chaos, when neither capitalist nor proletarian rules.

The very connections of city and counlion farmers we find (1920 figures) tries under developed capitalism, gives 2,454,804 as tenant farmers, 1,461,306 as the American proletariat the advantage lion against the degrading conditions unmortgaged farmers and 2,074,325 as of the problem of revolution once this der which he is working. the problem different and in our favor. The Farmer-Labor Party is reactionary and will only lead the proletariat into the swamp of opportunism, this even Centrism understands now after years of blunders; but the idea of a "Workers and Farmers Government" and the slogan for it that Centrism still peddles, is just as reactionary, and can

lead to nothing but national reformism. The agrarian workers must be won as workers, the middle and poor farmers as allies according to the form of the problem. Negro and white, share cropper, contract farmer, dirt farmer, etc. and the capitalist farmer should not bother us. The agrarian crisis will not let up, even though there will be ebbs and flows, its basic effects will not be remedied through agrarian reforms. #### Drug Clerks Organize

NEW YORK .-

The present chaotic condition prevailing in the pharmaceutical industry, which is merely a photostatic copy of the existing chaos in the decaying capitalist structure as a whole, and the intense, almost inhuman exploitation of the drug clerk by a degenerade middle class of independent drug shop retailers, by the ever growing chain store magnates and dard of living of the drug clerks to the lowest level of existence—to that of the Chinese coolie.

The incurable cancer of capitalismunemployment—has greatly augmented the misery of the drug clerks and turned two thousand licensed and junior pharmacists of this city into the streets. Some of them have already taken their places on the breadlines. Others are still clinging to the last line of defense, their savings, which they were able to build up during the so-called "prosperity" period thanks to the dreadfully long hours of work which made expenditures other than the mere necessities—impossible.

The legendary professional status of the pharmacist in our capitalist society has acted as an emollient to his sore human pride and lulled in him the rebeling and protraction of the present crisis has dealt a shattering blow to his legendary status and made him realize his true status, tha of the wage earner, subject to all the laws governing wage labor under this decaying capitalist system.

The drug clerk has arisen and begun to move. He is moving in the direction of the trade union front.

His vanguard, leaderless, without experience and program, but in excellent fighting morale, has been intercepted by the A. F. of L. bureucracy and has definitely landed in the right flank of the labor camp.

On March 8, the Drug Clerks' Union was officially christened by Mr. Collins, national officer of the A. F. of L. and chartered as the Drug Clerks' Union of Greater New York, Local 581 of the Retail Clerks International Protective Association.

A brief account of the installation meeting will sufficiently describe the condition of this new-born babe.

The meeting was opened by Mr. Feinstone, president of the union, who introduced Dr. Linville, president of the Teachers' Union. Dr. Linville spoke at great length of the trade union movement, but as befits a president of an A F. of L. local, he distorted the revolutionary concept of trade unionism and reduced it to the ideological level of his class, namely the middle class. He finished his oration wishing them success

and low cultural level. Last spoke Collins of the A. F. of L. This typical labor bureaucrat, in a typical A. F. of L. dialogue, as he himself termed his manner of speech, harangued the young recruits yet untainted by the A. F. of L. philosophy and manifesting a good fighting vitality, and urged them to "hang on" and not to fight.

Here is one of his gems: "Folks, times are bad. Now is not the time to fight. Hang on to your job. Don't fight. Wait.' Immediately after the close of the

meeting, the more articulate element came up to the secretary and voiced their disapproval with the president's attitude toward radicals and the "don't fight, wait" idea. . .

"We came here to do work, not to wait", the cry of one of the militants resounded.

Here we see a familiar scene, so frequently enacted in the labor movement. The rank and file seething with revolt, holding them back, telling them that the hour has not yet struck and thus breaking their morale.

#### will not tolerate radicals in "his" union. Stalinist Flattery or Marxist Education

**NEW YORK.**—

It is mildly entertaining to behold Sam Don, the well-known "anti-war expert" come out in the Daily Worker (Feb. 20, 1932) and say that "The Five Year Plan has demonstrated beyond a shadow of a doubt that Socialism can be built in one country", a statement which corresponds only too well with the utterings of his comrade-in-arms, the eminent Israel Amter, who only a week previous to that explained that same theory of Socialism in one country at an Open Forum of the new "Water Front Section of the C. P. U. S." in the following way:

"The average rank and file worker of the Soviet Union knows more about the theory of Socialism in one country than Trotsky or Cannon, for neither of these men has recently been there. Is it surprising that he should know more about it than some expelled leaders who have even attemped to study the theory? The rank and file worker accepts nothing as ready to strike the enemy; the leaders final until it has been given actual trial. Trotsky rejects the theory without any effort to demonstrate it.'

Now, let us grant that the "average Upon the revolutionary drug clerk de- rank andd file worker of the Soviet Unvolves a great task and great responsiblion" knows more about the interior of the new "Palace of Soviets" than Trotsky or Gannon. But, does an average rade who works for the district and is know more about it than Trotsky or Cannon? Or does an average rank and file worker of the U.S. party know tiation in the ranks and in this manner more about the revolutionary movement in America than Trotsky or Cannon? And what is there to indicate that an average member of the U.S. party knows more about the theory of Socialism in one country than Trotsky or Cannon? After all, the Sam Dons and the Amteres must admit that he U. S. party member generally has not seen the Soviet Union and has not lived in a Socialist commonwealth so that he can be said to have any special familiarity with the nature, the problems and the difficulties of such a commodity. The theory of Socialism in one country is to the average worker only an idea, in the U. S. or elsewhere—and certainly, leadyears. The International did not make ers who have given their lives to the queer logic, to put it in another way, is equivilant to saying that because the ers was great. Not long ago, an "average type" got up in our Open Forum and sprung a surprise by saying-quite innocentlythat the Communist International-if translated into plain American language, would mean-the Russian Patriotic Society! We corrected him at that time by explaining clearly that this is not the case. But we do feel a little bit uncomfortable to have him come around and put up such embarassing questions again.

If Trotsky and Cannon have never tried to demonstrate the theory of Socialism in one country—and we must give them credit for never having been so foolish-that is because they have shrewdly observed the absurdities of such a theory, because they have a realistic attitude toward the world's revolutionary developments and because they are not the least inclined to mumble nonsense. I do not suppose that any of and they would see it clearly themselves. the leaders of the Left Opposition has ever carried a horse-shoe to bring him unity and we could expose them to the luck, but their commen sense has made it unnecessary for them to support such foolishness. One glance at Don's and Amter's logic is enough to show it is not worth trying.

No attempt was made to center the charge on inactivity, as my activity in the branch will attest to the fact that I have always volunteered for work and accepted all the tasks assigned to me. It is interesing to note that previous to the horrible discovery that I was a "counter-revolutionary, enemy of the working class", my activity and membership had been considered wholly satisfactory. Comrade Hacker himself, personally asked me to preside as chairman at the second Scottsboro Conference held a few months ago at a large downtown hall. Evidently, the stamp of "renegade" had not yet materialized before his eves.

The chairman last night, a new member of the cranch and, I think, a party member purposely assigned to the branch -since he does not live in our districtrefused to permit me the final say. He insisted on his formal right as chairman to be the last speaker. There were seven comrades present. The vote was called for. The chairman, organizer, and Labor Defender agent immediately responded. One young comrank and file member of the U. #### ATTENTION, GREEK WORKERS

In New York City two daily Greek bourgeois newspapers are published, the "National Herald" which supports the present "democratic" regime of Greece while the other the "Atlantis" represents the Royalist party of Greece and lately takes a pseudo-labor attitude.

The "Empros" undertook a one sided struggle against the National Herald overlooking any kind of attack against the "Atlantis" which is more dangerous because it appears with the cloak of liberalism and therefore the "Communistis" our Greek organ attacked this criminal neglect of the Greek Stalinism vigorously.

In the next issue of The Militant the Greek Bureau will write extensively upon this serious question which requires a correct and thorough discussion for the enlightment not only of the Greek speaking Communists but of all Communists as well.

1 German Opposition objectively, its past development must be taken into consideration. The complete bankruptcy of the Maslov-Ruth-Fischer Opposition greatly compromised the ideas of the Left in the C. P. G. The policy conducted by Urbahns contributed its share to the estrangement of the Left Opposition from the cadres of the party. The intrigues of Landau contributed the rest and only helped to make the Left Opposition ridiculous in the eyes of the best sections of the German working class. It was upon such premises that the Left Opposition had to resume its work in Germany. And in this work, it must be remembered, it was faced with a struggle not only against the strongest Stalinist party in Western Europe, but against the strongest Right wing group in the world, the Brandler group, as well.

THE THREAT OF ILLEGALITY

American capitalism is already giving advance notice of the bloody answer it is preparing to the slaves whom it denies a living within their slavery. In the roar of gunfire at Detroit it said to the of American Communism is bright with workers whom it has thrown onto the promise, but we will move toward that streets: "We cannot employ you and we will not provide for you, and if you protest we will shoot you." The massacre at Detroit was followed a few days later by the murderous attack on the Chicago demonstration of the Communists before the Japanese Consulate. Here, as in Detroit, the police were clearly the aggressors. The demonstration was designed as a peaceful one, with Communist direction it could not be advance. That must be judged and esotherwise under the given conditions, for it is no part of Communist policy te substitute the futile violence of an individual or of a small group for the per of the workers must precede and intervention of the masses who are not regulate the daily tactics and working

We do not credit the story, by means of which the police-murderers are attempting to cover themselves, that the first shots were fired from the crowd, and by a "Communist agitator" at that. Such individual reactions to the regime of brutal repression are of course possible; one may say inevitable. Even if police who forcibly deprived the manilinescapable fact in the situation—the cho-syndicalism and social democracy festants of their rights would bear the whole responsibility. THE SITUATION AND ITS TASK

One of the most important problems of American Communist tactics is to maintain an open legal, or at least semilegal, position until a significant workers' mass movement has caught up with the capitalist press. ndicate-if only in its general outlines -the composition of the political world situation today, as it has resulted from the fundamental contradictions of decay capitalism, complicated and sharpened by the severe commercial, industrial and financial crisis. The following, hastily sketched reflections, far from embracing all countries and all questions, are to be the subject of serious further, collective treatment.

1. The Spanish Revolution has created the general political premises for the immediate struggle for power of the proletariat. The syndicalist traditions of the Spanish proletariat have at once reveated themselves as one of the most important obstacles in the way of the development of the revolution. The Comintern was caught unawares by the events. The Communist party, totally impotent at the beginning of the revolution, occupied a false position on all the fundamental questions. The Spanish experiences have shown-let it be recalled once more—what a frightful instrument of the disorganization of the revolutionary consciousness of the advanced workers, the present Comintern leadership represents! The extraordinary delay of the proletarian vanguard ing class of America and ruthlessly lagging behind the events, the politically dispersed character of the heroic strugand standards of life. But in spite of gles of the laboring masses, the actual that had been the case in Chicago, the that—and this is the most singular and assurances of reciprocity between anar--these are the fundamental political conditions that made it possible for the ure of conditions that become more and republican bourgeoisie, in league with the social democracy, to establish an or two years ago in the foremost ranks the outward signs of this change are not the insurgent masses blow for blow, to They are proceeding in the same way It is like the slow accumulation of steam political power in the hands of the government.

The struggle unfolding in the Far East is, it is understood, carried on not ments and clashes among the ruling for the sake of the railroads, but over

the fate of all of China. In this gigantic historical struggle, the Soviet government cannot be neutral, take the same position with regard to China as to Japan. It is duty-bound to stand completely and fully on the side of the Chinese people. Only the unflinching loyalty of the Soviet government to the struggle for the liberation of the oppressed peoples can really protect the Soviet Union on the Eastern frontier against Japan, England, France, the United States.

Under what forms the Soviet government will support the struggle of the Chinese people in the coming period, depends upon the concrete historical circumstances. If it had been insane to surrender the Chinese Eastern Railroad voluntarily to Japan before, then it would be just as insane to subordinate the entire policy in the Far East to the problem of the Chinese Eastern Railroad. There are many indications that the behavior of the Japanese military clique in this question bears a consciously provocatory character. Directly behind this ernment.

The fundamental conditions of the East: its immense expanse, its countless human masses, its economic backwardness-give these processes their slow, their drawn out and crawling character. In any case, there is no threat of an immediate and acute danger to the existence of the Soviet Union from the Far East. During the coming period, the main events will develop in Europe. Here, great opportunities may arise, but from the same source also, great dangers threaten. For the present, only Japan has tied its hands in the Far East. The Soviet Union must, for the present, keeps its hands free.

The pamphlets "Against National Communism", "Shall Fascism Really Be Victorious?" and "How Can National Socialism Be Defeated?" have all appeared in a second edition. The latest pamphlets have all appeared editions of 15,000 and have been completely sold out. The present sphere of influence of the Left Opposition will allow us to advance to editions of 25,000. This is a significant step forward.

> CLASS IN MARXISM It is not yet too late to join the class in Marxism taught by comrade Swabeck every Thursday evening at eight o'clock, at our headquarters, 84 E. 10th St. Comrades and sympathizers are invited to attend. The subject matter already covered included discussion of Class Struggles in France, the 18th Brumaire, the Communist Manifesto, the Gotha Program.

> Some of the remaining sessions, and they are more than half, will be devoted to analysis and discussion of the dispute with the anarchists, the dispute with the Utopians, historical materialism, and dialectics. We repeat: it is not yet too late to join this class. The fee is small. The next session is Thursday, March 24th.
