"The CRISIS IN GERMANY"

The Militant is published weekly by The Communist League of America, a Socialist Workers Party organization, at 120 East 23rd Street, New York, N.Y.

Numerous and varied articles in the press this week, with which they are succeeding in convincing the working class in Germany that the government is making no genuine attempts to solve the economic and social problems of the workers. The government is doing everything to control the working class, to crush its activities and to prevent it from organizing and striking. Everything that the workers try to do, they are met with police and military force. The working class is being forced to accept the situation as it is and to work as hard as it can in order to keep a job. The government is making every effort to keep the workers quiet and to prevent them from organizing and striking. The government is doing everything it can to prevent the working class from organizing and striking. The Jap Attack

A government that wished to do nothing about the situation, not appear overborne, would not be in the aspect it now presents. Its effect has been to rally the people of China and to strengthen them for the decisive contest that is coming. The Jap attack is the climax and summary of the illusionism that has raged in the face of the war.

The Jap attack is the result of a failure to understand the situation. It is the failure to realize that the Japs are fighting for a living, that they are fighting for the control of China, that they are fighting for the control of the world. They are fighting to establish a Jap empire, a Jap world, a Jap civilization. They are fighting to establish a Jap world, a Jap civilization. They are fighting to establish a Jap world, a Jap civilization.
