COMMUNIST INTERNATIONAL CHANGES POLICY!

Half-Turn to Genuine United Front Must Be Completed and Actually Carried Out

The Communist International has been forced to make a half-turn in its united-front policy. The new united-front policy is not simply an adjustment of the previous position. The Communist International has been forced to abandon the position of the "united front with the Social Democrats" and to adopt the policy of the "united front with the working class." This half-turn means a fundamental change in the policy of the Communist International, and it is a fundamental change for the better.

The significance of this half-turn is that it is a recognition that the working class is the main force in the struggle against imperialism and reaction. The Communist International has come to the conclusion that the only way to defeating imperialism is to unite with the working class.

The new united-front policy is based on the theory that the working class is the main force in the struggle against imperialism and reaction. The Communist International has come to the conclusion that the only way to defeating imperialism is to unite with the working class.
