Toward the New Party

As has already been reported, the New Workers’ Committee of the Communist League is conducting negotiations toward the formation of a new party in the United States. We hope to announce the results of these discussions in the near future. In the meantime, we believe it is important to provide an outline of the essential features of the new party. Such a position paper would undoubtedly give a reasonable indication of the nature and aims of the new party. The paper would contain the following sections:

1. An outline of the basic principles of the new party.
2. An explanation of the role of the New Workers’ Committee in the formation of the new party.
3. A discussion of the relationship of the new party to the international workers’ movement.

The paper would also include a declaration of the New Workers’ Committee’s commitment to the following principles:

- The new party will be a truly internationalist organization.
- The new party will be committed to the defense of the revolution in China.
- The new party will be committed to the fight against imperialism in all its forms.
- The new party will be committed to the struggle for economic justice and social equality.

The paper would be published in the New York Militant, the weekly newspaper of the Communist League, and distributed to members of the New Workers’ Committee. We encourage all interested parties to read this document and participate in the discussions leading up to the formation of the new party.

Thousands of workers have been laid off in the last few weeks. The situation is critical, and the C.W.A. is fighting a brave battle to keep its members on the job. The C.W.A. has been successful in some cases, but in others, it has been forced to accept the inevitable. The C.W.A. is asking for your support.

ARE THERE LIMITS TO THE FALL?

The problem of the creation of a new international political order is one of the most pressing in contemporary life. The failure of the World War to produce a lasting peace and the rise of new dictatorial states have created a situation in which the question of limits to the fall of the old order becomes increasingly acute.

Summary of the 13th Plenum of the Executive of the C.I.
by L. D. Trotsky

The question of the limits to the fall of the old order is of fundamental importance for all of us who are engaged in the struggle for the creation of a new international political order. The question of the limits to the fall of the old order is not a question of the limits to the fall of the old order itself, but a question of the limits to the fall of the old order as a means of achieving a new international political order.

Corporations Win the Fake N.R.A. "Elections"

(Continued from page 11)

The company judged by the market is the company which will be reorganized as it has been organized, because, after all, its actions are its public relations, and the shareholders have already made their decision through the market. The reorganization will keep going on, and it will go further, because the market is the great problem of the day. It is the problem of the day all over the world, because the whole world has come to realize that the reorganization of the corporation is the problem of the day, and that the shareholders have already made their decision through the market. The reorganization will go further, because the market is the great problem of the day.
