

The elections in the Minneapolis trucking industry, held under the terms of the strike settlement, resulted in a sweeping victory for the union in nearly all of the larger houses. According to latest reports the elections in the 22 market houses-the heart of the struggle in the places involving the control of inside workers - showed that the union carried the elections in 19 out of the 22 houses.

Virtually the same proportion prevailed also in the larger transfer companies. With few exceptions the union carried these also.

the elections were misleading. The textile workers who have had their 166 firms represented in the Employers Advisory Committee all are small one-horse concerns. The or so others are in contest. What the reports neglected to state is that the union carried the market and the big transfer companies and comes out of the contest more strongly entrenched than ever before.

With this firm base in the heart of the industry the task of eventually lining up the smaller firms is greatly simplified, and the union has already announced a campaign of education and organization to this end.

The Federal Mediation Board has initiated a peace conference in an effort to end the strike in the textile industry. Francis Gorman, head of the strike committee, has accepted the peace overture of the Board despite his earlier statement that he would refuse arbitration until every mill was closed. George A. Sloan, spokesman for the textile bosses, also agreed to a conference,

Previously, Gorman announced he was going to ask for Federal Troops to "protect strikers". Ten have already been killed and scores injured under the "protection" of National Guardsmen.

These latest developments should cause every textile worker to watch any and all moves of the leadership. Vigilance must be the motto when the Gormans begin to make deals with the bosses.

Thousands of armed scabs, brutal deputies, the greatest military display since the World War, the killing of ten strikers and the wounding of scores, have failed to dam the irresistible strike wave that has flooded the textile industry and stopped the looms from Maine to Mississippi.

One half million workers are out on strike, with the flying picket squads swooping down and closing mill after mill, town after town. Pressed forward by a militant rank and file, ready to brave tear gas and bayonets, prepared to fight to the finish, even the diffident top leadership has been forced to issue bold statements.

A Report and Analysis of the Great Strike - Sunday Sept., 16th - S.p.m.

But the matter has passed out of his hands. The workers will not stop until they have closed every mill in the textile industry. Far from being dismayed by the plast of gun fire that left ten strikers dead, the Flying Picket Squads nave since pressed on to fresh victories.

"The strike is far more serious today than at any time since it began," Arthur G. Besse, spokesman for the woolen textile manufacturers, admitted. The number of mills closing has been "tremendous," he added.

Rendered frantic by the successful onslaughts of the workers, the manufacturers in South Carolina have petitioned Governor Blackwood to declare martial law. The State militia, scabs armed illegal-

ly with revolvers, with the full knowledge of the authorities, thousands of special deputies, all these are insufficient.

Can't Get Enough Soldiers

In reply, Blackwood indicated that he might declare sections of South Carolina in a state of insurrection, but, he asserted, he did not have sufficient troops at his disposal to take care of the whole situation.

There are 1,000 Guardsmen on duty in Greenville, S. C. alone, The Governor said it would take three or four thousand troops to enforce a martial law order, and that he

In 1934 something else is required and from California and from other states it emerges. The "new democracy", the "extension of the new deal", "end poverty," and a "socialistic" Democrat piles up the votes. It was to be expected that the state of Aimee Semple McPherson would furnish the newest new dealer. The fasting vegetarian, socialist democrat with his "epic" plan is just the latest but not the last of the distractions of the American working class on its road to class awakening. Middle Class a Decisive Factor

The middle class, including the major part of the farmers, is a decisive element in the coming struggle for power. This class is won to the workers' side not merely by the correctness of policy of the vanghard party of the workers and the courage and ability to lead shown by this yanguard, but also bourgeoisie rallies the petty bour-

iat. That they feel a distinct need for a clearer policy in line with this purpose is shown by the statement of Secretary of the Interior Ickes concerning the American Liberty League: "I've been hoping ever since 1912 that we'd have political parties divided on real issues. It looks as if it's working out that way at least. Today we have different groups in each party. I'd like to see all the progressives together and all the conservatives together.--We would get a clear-cut platform and not be afraid to state the issues." The issues would be those appealing to the middle class.

QUESTION BOX

G. S., Los Angeles-

Question: What is the program of the "Weisbord-League?

Answer: A complete answer to this question is outside of the limits of this column. The matter can only be skimmed over here.

Weisbord's viewpoint and statements are in such a things we believe his present attitude toward the class nature of the Soviet state is false and contraobject to his falsifying and distorting our position in general. Whether or not he disagrees with us on the Negro question cannot be stated right now since latest reports indicate that he is changing his former position, and, of course, our position will become official only after the end of our coming National Convention.

However, the main differences between us and Weisbord springs from the fact that he is an individual with whom the League finds it impossible to deal. One must have had the experience of the New Weisbord's characterization of us as "Left, fake, centrists." Even if there were no differences of a programmatic nature, it would be difficult to have harmonious relations with an individual whose enharmonious relations with an individual whose entire attitude towards you is marked by disloyalty. the question is of sufficient importance to you, that you get his approach first hand.

Question: How was the vote for the settlement of the first Minneapolis truck drivers' strike taken?

Answer: We are informed by comrades who were in Minneapolis at the time that the following took place: The terms of the settlement were introduced by the strike leadership with a recommendation for acceptance, the first vote being taken by shouting "aye" or "no". There was some opposition to the terms proposed and as a result of the method of voting and the ensuing confusion, it' was difficult to determine how the matter stood. After a thorough check up on union membership by elected tellers the workers who had been sent out to secure complete authenticity of the ballot were requested to return where a hand vote was taken.

Question: Was the agreement about union recognition written or verbal?

Answer: Written.

Question: Did Local 574 consult the other unions, some of whom were still coming out on strike before calling off the strike?

Answer: There were no unions coming out at the time the settlement was made, the building trades having come out some time before. There was no consultation of the unions by local 574 and none was needed, the matter resting entirely with 574.

It is the first stage, in which the fate of Europe legal manifestation of a menshevik group in the U.S. S.R. In the early days of the Soviet Republic the Mensheviks placed themselves on the side of the white guards and the imperialist intervention. They sided with the counter-revolution and therefore were outlawed on Soviet soil. Since that time there was the trial of the Mensheviks for aiding and abetting the interventionists in 1932. Nothing since that time has appeared to prove that these Mensheviks are less hostile or less an enemy to the Soviet Union than they were a few years back.

> In connection with this letter a dispute arose between the Stalinists and the Socialists, the latter maintaining their usual attitude. Instead of denouncing the counter-revolutionary (the Stalinists have so abused this term that they don't know a real one when they see him) Mensheviks and taking full responsibility for making this party illegal under the proletarian dictatorship they speak like liberals of the most luke-warm variety: "The soviet revolu-

At this meeting it was voted to create a military revolutionary center, which included Stalin, and which was to become a part of the revolutionary Soviet committee which organized the insurrection. This latter body, under the name of the Military Revolutionary Committee, was headed by Trotsky. By leaving off that part of the resolution which made the committee to which he was elected a subordinate one, Stalin attempts to make it appear that he was the "practical" organizer of the insurrection since Trotsky was not a member of this lower body. In actuality this committee did not function, even in a subordinate role, the military Revolutionary Committee doing all the work.

For a detailed account of this and other falsifications by Stalin see the appendix to the third volume of Trotsky's "History of the Russian Revolution". where the minutes of the above-mentioned meeting and other documentary evidence are presented.

Editorial Note

Below is the text of the united front pact in Belgium between the Socialist, Stalinist and our own youth organization. We wish to call the attention of the readers to two facts:

1. The overwhelming preponderance of the Socialist youth organization, which is six or seven times the size of the other two organizations, determines many of the features of the pact.

2. The changing times have forced the Stalinists into a united front with the "counter-revolutionary Trotskyists" and to sign their right of asylum especially for comrade Trotsky. We would welcome and print letters from any young Stalinist who would make so bold appendix to this pact. as to explain this fact or reconcile it with previous policy.

Brussells, August 18, 1934. Central Committee of the Belgian decided assistance. Communist Youth and the National leadership of the Leninist Youth (Trotskyists) declare their agreement to devote the greatest pos sible efforts towards the aim of achieving workers unity on the basis of revolutionary action.

2. Having come to agreement on this principle the three organizations decide to sign a pact of common action on the following bases:

a) Common action of solidarity for all the victims of internation al capitalist reaction, without distinction of tendencies; for the liberation of Thaelmann and Paula Wallich, symbols of the anti-fascist struggle in Germany and Austria; for the right of asylum in all capitalist countries for all the victims of international capitalist reaction, and above all, for Trotsky. b) Struggle against repression in Belgium, for the freedom of the imprisoned militants, such as Bohy, Beelen, and all workers persecuted for their participation in strikes.
