New Turn To Betrayal

Symptomatic of the ferment in the Young Communist League is the expulsion of six members of the Y.C.L. and Communist Party. These comrades were expelled in recent weeks in New York for criticizing the policies of the Comintern and Y.C.I. and defending the views of Marxism. They are among the dozens ex-

pelled in recent months from the Stalinist organizations for revolutionary criticism, a number of whom joined the S.Y.L. and the W.P. Only recently over half a dozen leaders among the New York Scandinavian workers were expelled from the C. P. for "Trotskyism" (!). Others in the Y.C. L. who question the recent turn towards "a broad non-party youth organization" and social-patriotism have likewise been expelled or "dropped for "Trotskyism." The Spartacus Youth League

has covered open Y.C.L. meetings with its literature and speakers. Recently, a four page leaflet was issued by the Chicago S.Y.L. to the meeting held in that city. In New York, in addition to the large district meeting covered, sectional meetings in Manhattan and Harlem have already been covered. Last Sunday evening four members of the S.Y.L., including one of the expelled, spoke at the East Side meeting of the Y.C.L. The following evening a criticism

The main immediate answer to the employer offensive is labor's offensive: Organization campaigns in the basic industries; strikes for union recognition and against all attacks on labor standards; intensification of labor militancy to answer employer militancy; the building up of a leadership in the unions which breaks forever with the philosophy of collaboration with the profit-grabbing employers and stands on the basis of struggle against them.

#### WAR TECHNOLOGY

Modern warfare when it involves the advanced capitalist countries is no longer a matter of winning battles. It is far more the pitting of the national resources and national technologies against each . other. The control of coal and iron, of cotton, copper and oil-of the "strategic" materials-becomes of major and decisive importance. The threat made by the rival imperialists to cut off Mussolini's oil supply is a reminder of this fact. It is also a reminder of the careful planning for future war made years in advance by the military arm of each government.

The United States, for example, has its plans laid in the minutest fashion for the complete mobilization of the necessary industries the moment war breaks out. Contracts for all war materials need only to struggle see more clearly the opbe signed to start, the production schedules already agreed upon with individual factories. The "Commodity Files" division of the United States Army keeps the most upto-date information on volumes of production of all commodities, the sources of supply, the stock piles in the warehouses, the percentages used for various purposes, etc. This department is entrusted with the task of seeing to it that sufficient supplies can be made immediately available at the outbreak of war to carry on the war for two years even if the country be completely blockaded (an impossibility in the case of the United States) and no outside sources can be tapped. Even more, this department, in collaboration with the navy, sees to it that the necessary ships are sent to keep open the channels of communication with those countries which supply necessary foodstuffs or raw materials. In this connection all of South America comes under the complete domination of U.S. imperialism through its naval supremacy in continental waters. Plans are even ready for the seizure of those countries or parts of countries that produce strategic materials. Canada with its monopoly of nickel, Bolivia and Chile with the their tin, lead and nitrates would fall easy victims.

#### LABOR AND THE WAR PLANS

An important aspect of this planning is the economic side of production. The allocation of finances

ment, the keeping of a tight rein on the working class. It means the attempt to destroy any organized resistance to the well-laid plans of capitalist profiteers, to check the workers in any effort to maintain their standards of living or to improve them. More than ever the everyday struggles of the workers against the exploiters becomes a menace to the entire capitalist system, since these efforts of the oppressed to better their conditions disturb the smooth functioning of the system at a most critical time Thus war forces the capitaliststheir fears aroused both at home

#### We Can Make Good!

O<sup>n</sup> the first anniversary of the Workers Party, to which this last issue of the New Militant was devoted, solid achievements were recorded. The Party has moved slowly forward but its gains in every instance have been substantial and durable.

Our Minneapolis stronghold is impregnable: the heaviest batteries of the labor skates combined with the local capitalist class have not even made a dent. For the first time in years, if not in history, has a red purge been so decisively smashed.

Add to Minneapolis, the activities of our comrades in the Toledo auto center, and the Akron rubber center, and a sketchy idea can be had of the role of the Workers Party in the sharpening class struggle in this country.

We have a failure to record, however-not an irremediable one but certainly a grave shortcoming. The lack of the eight-page NEW MILLITANT.

If the size of our organization is taken into consideration, it will readily be seen that despite the best intention our strength still lies in our ideas. Our power increases in direct ratio with the effectiveness of our propaganda. And our propaganda is advanced largely if not wholly through our press.

While we may boast that our paper is the best in the labor field, the only one which gives a clear-cut revolutionary position on the leading issues of the day, it must be admitted that our press is weak. Its weakness is its size. A miserable four pages in which to report events of the class struggle, handle for the freedom of the Scottsboro boys.

the problems of war and Fascism, the treachery of Stalinism, the struggle in the S. P., the trade union question, and besides present simple agitational material to educate uninitiated workers in the fundamentals of Marxism.

It is manifestly impossible. Result: complaints. From some comrades: inadequate treatment of the more complicated problems of the intra-party strug-From others: the paper is too specialized for gle. trade union contacts. 011r

They are both right; under the present set-up, one or the other must suffer and sometimes both. There is no solution other than the regular eight-

pager. The comrades who complain and others who don't but realize our difficulties can do no better service to themselves, the party and the working class than to put the drive for the eight-page NEW MILITANT over.

1,000 subs will take us over the first hurdle! It can be done; it must be done. With the eight-pager, it is almost a certainty, that the second year of the Workers Party will be immeasurably more fruitful than the first!

Fight Against Bourbon Rule

THE Scottsboro boys must be freed! Not so ob-viously as Angelo Herndon are they a symbol of the oppression of the struggling Negro masses. But even more obviously are they a symbol of the ter rorism waged by the Southern slavocracy in order to keep the Negro masses from raising their heads.

The Scottsboro boys are in jail, once again under indictment which may lead to death sentences, solely because they are Negroes, and it is Southern bourbon policy to destroy Negroes in order to keep the whole Negro people in fear and subjection, and to keep race hatred alive so that the Southern white proletariat will not join with the Negro in common struggle.

Because every oppressed minority is an ally of the working class in the struggle for their common emancipation, and because a basic pre-requisite of future class struggles is the uniting of black and white, and because it is the elementary duty of every class-conscious worker to fight for the maintenance and extension of the democratic rights of the masses, we pledge ourselves anew to the struggle

The wind-up speaker, and chief attraction of the evening, however, was Reverend Theodore Adams, pastor of the Ashland Avenue Baptist Church. The Reverend put on a regular revival and offered as the solution of the problems of American youth the slogan 'Come to Jesus!" (sic!), and punctuated his pious exhortations with an attack on the Soviet Union, linking the workers' fatherland with Nazi Germany! Reverend Adams is the respectable front the Stalinists in control of the Congress are using to appeal to the church groups. The actual conference, attended by 40 delegates, a majority of Y. C. L. and New America members in a bloc, lasted about 4 hours on Saturday afternoon. One hour of this time was spent in again listenng to Mr. McNutt say nothing in the polished platform manner of a washing-machine salesman who just slays the Y. W. C. A. secretaries. Then the conference was divided into "commissions," directed in reports on youth and "unemployment, industry, education, war and fascism. This was intended to prevent any full and open discussion before the entire congress on resolutions introduced by the Yipsels and S.Y.L. However, a majority report in favor of the joint anti-sanctions resolution was reported by the commission on war and fascism, of which Sam Pollock was elected chairman. When the report was read to the congress, Lottie Gordon, Y.C.L. representative and wife of the district C. P. organizer, took the floor and charged the contents of the report to be out of order. After an hour's fight on the floor, in which the Y.C.L. members by parliamentary conniving succeeded in preventing any discussion on the actual contents of the resolution, it was tabled. During the course of the debate, however, it was revealed that the leaders of the A.Y.C., those staunch defenders of democratic rights, were opposed to "any controversial subject being discussed, since such subjects are against the program of the congress which is limited only to those questions on which all are in agreement." (sic!) The one significant phase of the entire affair was the genuine and principled united front affected between the Young Socialists and Young Fourth Internationalists on the basis of a fundamental agreement on the war question.

In the governments, and in the armies, both in France and in Germany, the Socialists collaborated with the General Staff and the capitalists and delivered the toiling masses to the slaughter. Marcel Cachin interviewed Mussolini on the question of forcing Italy into the war on the side of France.

THIS IS SOCIAL PATRIOTISM

"If I were asked I would say that among the great leaders of the war, Petain is the one whose modesty, seriousness and deep and sensible honesty is most deserving of sympathy."

"In case of Hitlerite aggression the workers of this country would rush to the frontiers."

-Leon Blum in Parliament, April, 1935.

"Bad Frenchmen want civil war."

-L'Avant-Garde, organ of the French Y.C.L., Oct. 26, 1935.

"Well, in case of a war launched by Hitler against the U.S.S.R. would you advance your slogan: turn the imperialist war into a civil war?----Maurice Thorez, May 18, 1935. Well, no!" ... THAT IS OIVIL PEACE!

"The mutineers wanted to start an armed march -Military report, end of May, 1917. on Paris." . . .

With each month of the war, revolt of the masses grew. Karl Liebknecht, who alone of 110 Socialist deputies voted against war credits, organized street demonstrations on May 1, 1916. Mutinies became more frequent on the French front. German and French soldiers fraternized. The Russian workers, in the midst of the war, overthrew the Czar and after having swept away the Menshevik-Socialist agents of French and English capitalism set up the workers' and peasants' government. In Central Europe, revolutionary forces grew.

In Germany, in 1918, the workers took power in many sections.

In the Black Sea the French sailors refused to fire on the Russian workers and mutinied against their officers.

THIS IS REVOLUTIONARY DEFEATISM Today

"The workers have no fatherland."-Karl Marx.

"Any defense of the capitalist national state is reactionary. It leads to the abandonment of the class struggle, to civil peace, for how can we struggle to the death against our own capitalists if we are prepared to support them in their struggle with other capitalists. On the contrary, we must take advantage of the difficulties in war to overthrow them.

"To bind ourselves to our own imperialism under the pretext of defending democracy against Hitler is pure deceit and treachery. What will French democracy look like during the war with its censorship and its firing squads? Mutinies on the French front and fraternization with the German soldiers will reawaken the strength and rebelliousness of the German workers and give them mighty support in the battle to rid themselves of Hitler. To remain docile, on the contrary, faithful to the tricolor is to lend support to Hitler who can then inocculate the German working class with the poison of natriotism.

"To bind ourselves with our capitalists under the pretext of defending the Soviet Union is also pure deceit and treachery. The capitalists cannot be fooled. That policy can only mean catastrophe for the French workers and for the U.S.S.R. itself. The sole defense of the U.S.S.R. which is more than an illusion, is the revolutionary assault of the oppressed masses of the entire world, of the French
