# DEFEND THE SOVIET UNION! Manifesto Of The Socialist Workers Party

NEW YORK, N. Y. SATURDAY, JUNE 28, 1941

The Soviet Union is in mortal danger! Under the most adverse conditions the Soviet masses are heroically defending the Workers' State against imperialist invasion. The Second World War, which could have been prevented only by victorious socialist revolution and destruction of world capitalism, menaces the very existence of the isolated Workers' State. All the warnings of Lenin and Trotsky have come true.

German imperialism seeks to overthrow the October revolution and to restore the capitalist system in its degenerate fascist form. This is the essential meaning of Hitler's attack on the Soviet Union. Every worker who realizes the significance of this attack will have no hesitation in accepting the slogan of our party:

#### Defend the Soviet Union at all costs and under all circumstances against imperialist attack!

The Russian working class in October, 1917, established a government of Soviets which took the land from the landlords and gave it to the peasants, and took the banks, industries and railroads from the capitalists and placed them-as nationalized property-under the management and control of the workers. Thereby the Soviets abolished the system of private property which permits a handful of capitalists to own the wealth of a country and to exploit the vast majority of the people. This achievement of the October revolution is the greatest advance ever made by any people. It proved, beyond any refutation, that the working class is capable of taking its destiny into its own hands. The unprecedented development of this nationalized property proved for all time the superiority of socialist methods of production over capitalist anarchy.

The productive forces were nationalized by the Soviets of Workers', Soldiers' and Peasants' Deputies under the leadership of Lenin and Trotsky. Those Soviets no longer exist. They have been destroyed by the Kremlin bureaucracy, which has usurped all political power. But the productive forces are today still not in the hands of private owners. This means that, in spite of the damage done to the revolution by Stalin and his Kremlin clique, the essential conquest of that revolution survives.

It is this nationalized property that we call upon the workers of the world to defend against every enemy. It is this nationalized property which the capitalists of Germany, represented by Hitler, are out to seize and transform into capitalist property. Today, therefore, the main enemy of the Soviet workers is German imperialism. Against this enemy must be pitted every worker conscious of the tremendous advance which the October revolution made in the progress of mankind. Every blow of the Red Army against German imperialism is a blow for the socialist future of mankind. It is the duty of every worker to aid the Red Army to victory.

"Workers! The defense of the USSR is not a parlor phrase...The international defense of stake, the greatest clarity is needed. Nobody today is rendering better service to the class enemy bureaucracy. than the Stalinist apparatus which in the struggle for the remnants of its prestige is sowing con- the fate of the USSR and the world proletarian fusion and chaos everywhere!

union fallen into the hands of corrupt and degenerate leaders: Our struggle against Stalinism is a struggle within the labor movement. Against the bosses we preserve the unity of the class front, we stand shoulder to shoulder with all workers. The Soviet Union is a Workers' State, although degenerated, because of Stalinist rule. Just as we support strikes against the bosses even though the union conducting the strike is under the control of Stalinists, so do we support the Soviet Union against imperialism. Despite imprisonment and repression, our comrades in the Soviet Union, the hounded Trotskyists, will prove to the Soviet masses that the Trotskyists are the best fighters against the capitalist enemy.

## Defense Of The USSR **Against Its Capitalist Allies**

Churchill has indicated that he will consummate some form of military alliance with the Kremlin. When the United States reaches the "shooting war" stage, Roosevelt will likewise enter into a formal alliance.

The Soviet Union is now compelled by sad necessity to seek these alliances. That is necessitated by the isolation and weakness of the Soviet Union. What, however, shall be the attitude of the working class toward the Soviet Union's capitalist allies? The Communist International today evades answering the fundamental question; tomorrow it will answer it as in the period of the Franco-Soviet pact-calling upon the workers to support the imperialist war of the "democracies.' We warn the workers: the "democratic" ally is just as hostile to the nationalized property of the Soviet Union as is the fascist enemy. Roosevelt and Churchill will seek two things at the same time: the defeat of their German imperialist rival, and also to prevent the Soviet Union from strengthening itself through victory. Even at the cost of weakening their fight against their imperialist rival, Roosevelt and Churchill will try to hold down the world working class, including the Soviet Union. The chief contradiction in modern society, we have said since 1917, is between the Soviet Union and the imperialist world. That still holds true. Special circumstances now, as during the time of the Stalin-Laval pact, bring about an alliance between the Soviet Union and capitalist countries. Not the least of these circumstances is that Stalin's reactionary policy lessens capitalist fears of the revolutionary role of the Soviet Union and weakens the effect of the example of the October revolution. But only for the time being is the fundamental antagonism between the Soviet Union and Anglo-American imperialism relegated to the background. The fundamental antagonism remains and will come to the fore precisely if the "democracies" begin to win. Only a week ago the sober spokesman of American monopoly, the New York Times, said about the Soviet Union: "The democracies, having got rid of dictatorship in Germany, would hardly support dictatorship elsewhere." The Times has not unsaid this vicious threat, any more than Churchill unsaid his enmity to the Soviet Union. Kerensky, the representative of Russian "democratic" capitalism, hails the democracies for agreeing to "help" the Soviet Union; "a victory of the democracies," he says, "would end in the collapse of the Soviet regime"-that is, in the restoration of capitalism. The Vatican announces it is training priests for work in Russia in case of a "change"—which it anticipates whether the fascist or the democratic imperialisms become masters of Europe. Irreconcilable proletarian opposition to the imperialist allies of the Soviet Union offers the only guarantee that the workers will be on guard to save the Soviet Union from destruction at the hands of the victorious "democracies." Hitler understands very well that the fundamental antagonism of modern society is between the Soviet Union and the capitalist world. While alluding to an alleged agreement between Britain and the Soviet Union as one of his pretexts for the invasion, Hitler's main war-cry is that he is saving Europe from Bolshevism. While preparing for the contingency of waging a full-length war against a Soviet-British alliance, Hitler is also exploring the possibility that he will secure a free hand against the USSR. It is plain that he has hopes of forcing a peace in the west during the course of his war against the Red Army.

"Weeks and months are approaching when every revolutionist will have to show what he is the USSR is dependent upon the international worth. Carry the ideas of Marxism and Leninism revolutionary struggle of the working class. into the ranks of the advanced workers. Help the Where the blood and fate of millions are at at international proletarian vanguard free itself from the straitjacket of the insensate Stalinist

"What is involved is no small matter: it is revolution!" LEON TROTSKY

Chamberlain is still at the helm in England. The main driving force in Hitler's decision to invade the Soviet Union was undoubtedly the wheat, oil and other raw materials which he needs for a long war. But he also hopes that his anti-Bolshevik slogans will again win him an understanding with his imperialist rivals.

Thus far Churchill, representing at present the most important section of British imperialism, has rejected the perspective of negotiating a peace. Churchill and Roosevelt fear Hitler more than Stalin. However, the powerful groups of imperialists in England and here who are anxious to make peace with Hitler will now redouble their efforts to win the British and American governments to their program.

Appeasement gains mightily from Hitler's assault on the Red Army, for the basic motivation of the appeasers is a belief in capitalist solidarity against the workers of the world. The real fight against the appeasers is not aided by those who fine up with the capitalist war-mongers. Those who subordinate the working class to the governments of the "democracies" make it that much easier for the Roosevelts and Churchills to come to an agreement with the appeasers without any fear of a vigilant and independent working class movement.

### The Communist Party

267

What has been happening in the Soviet Union may be unknown to you, but you have evidence at hand to show you that Stalinism is incapable of leading the defense of the Soviet Union. You have the evidence of the Stalinist organ, the Daily Worker. Until after the invasion began, the Daily Worker had not one word to say to warn and arouse the workers about the danger of a Nazi attack. On the contrary, it branded "the extravaganzas now being dressed up as 'news' of a crisis between Germany and the Soviet Union as "Wall Street" lies "designed to give the impression that the Soviet Union is 'weak' and that it is 'isolated.'" Stalin's vainglorious boasting about the great gains resulting from the Stalin-Hitler pact, and his pretense that the pact was forced upon Hitler by the might of the Red Army, dictated the Daily Worker's conspiracy of silence about the terrible danger confronting the Soviet Union. Moreover the Daily Worker's editors-believing that Stalin would enter into still another agreement with Hitler-denounced the reports of impending Nazi-Soviet war as designed "to discredit such further steps for the advancement of peace and for the safeguarding of Soviet neutrality that the Soviet Union may take." This lying and stupid policy, dictated by the Kremlin, left the members. of the Communist Party more unprepared for the terrible news than any other group of the population.

The Communist Party is not an independent revolutionary party which boldly speaks out in the interests of the international working class. On the contrary, it is merely the supine agent of the Kremlin bureaucrats. Precisely now, when one of the main duties of a genuine revolutionary party is to speak out and warn the workers of England and America to be on guard against the capitalist "allies" of the Soviet Union, the Stalinist parties are beginning to shift their line toward open support of the imperialist war waged by these capitalists. The instructions they will receive from the Kremlin will be in the spirit of the "editing" of Churchill's speech by the Moscow broadcasters: to dress up the "democratic" imperialists as progressive friends of the Soviet Union. The Stalinist parties tomorrow will "discover" that the imperialist war is no longer imperialist. They will drop their pseudo-militancy in the trade unions. They will sing Roosevelt's praises again as loudly as they did in 1936. They will, in a word, do their utmost to deliver the workers bound hand and foot to Churchill and Roosevelt, as Stalin's cynical payment to the imperialists for an alliance.

### What We Do Not Defend

The Soviet Union and Stalin's regime are not at all identical. The October revolution was not made for the bureaucrats who have usurped the seats of power. In defending the Soviet Union, we do not defend these usurpers. Stalin and his clique have brought the Soviet Union to a point where Hitler feels confident that he can in a short time conquer it. Within the Soviet Union the Stalinist bureaucracy has destroved every form of workers' democracy established under Lenin and Trotsky. The Cain in the Kremlin has murdered the best, the most devoted and most capable Bolshevik leaders of the Soviet workers, and at this very moment keeps imprisoned in his dungeons hundreds of thousands of revolutionary workers upon whom he now perpetrates the last indignity of all-he prevents them from defending the Soviet" Union arms in hand. Outside the Soviet Union, Stalin strangled the Chinese revolution and led the whole European labor movement to catastrophic defeats. Thus the Soviet Union was deprived of its only reliable allies.

By his pact with Hitler, his collaboration with the Nazis in dismembering Poland, his 1939 attack on Finland, and his leaving Hitler free to master Europe, Stalin has alienated from the Soviet Union the sympathies of tens of millions of workers.

Not for one moment do we suspend our struggle against the Kremlin dictator and the bureaucracy which he represents. For the fact is already evident, and will become more so with each day, that the Soviet workers must rid themselves of this bureaucracy and re-establish workers' democracy in order to assure victory against the Nazi armies. The overthrow of Stalin by the workers is demanded by the needs of the struggle to save the Soviet Union. We are confident that the Russian workers who made three revolutions in the space of twelve years-1905, February 1917, October 1917-will rise again to the level of their great revolutionary traditions.

Stalin must be overthrown-but only by the working class. His overthrow by Hitler would mean restoration of capitalism. For the sake of the Soviet Union and of the World Socialist Revolution, the workers' struggle against the Stalinist bureaucracy must be subordinated to the struggle against the main enemy-the armies of Hitler Germany. Everything that we say or do must have as its primary object the victory of the Red Army.

The Soviet Union can be best understood as a great trade

Hitler's role as guardian of Europe against Bolshevism brought him rich dividends from Chamberlain. The party of

I o rally the utmost energies of the Soviet masses, to rally around the Soviet Union the masses of all countries, to arouse in the German proletariat the determination at all costs to undermine and sabotage the Nazi war machine-these tasks of the hour require a policy in the Bolshevik spirit of Lenin and Trotsky, tribunes of the people summoning the whole world to revolt. Nothing could be further from this than the statement of Molotov upon the outbreak of hostilities.

It could have emanated from the most conservative capitalist regime in the world. There is in it not a word of appeal to the world masses; nor a word about socialism or the traditions of the October revolution. Molotov seeks to inspire the Soviet masses by reminding them that "This is not the first time that our people have had to deal with the attack of an arrogant foe." That is true. Enshrined forever in the hearts of the working class are the successes of Trotsky's Red Army in beating back on twenty-two fronts the armies of the imperialist world. But that is not the tradition that Molotov is talking about! His tradition now is "our people's reply was war for the fatherland"-against Napoleon! In this avoidance of the traditions of the October revolution, Molotov reveals the character of the Kremlin regime, its fear of the masses and their revolutionary heritage.

In everything it does the Stalinist bureaucracy indicates its lack of trust in and fear of the great masses. It is to the capitalist masters that the Kremlin looks for aid. In his policy Stalin finds a place for the masses only as so many pawns whom he can yield to the bourgeois masters as payment for collaboration. The Soviet broadcasts of Churchill's speech omitted Churchill's anti-Communist statements; Stalin is already dressing up the leader of British imperialism.

The Kremlin bureaucracy is interested only in maintaining its privileges, at no matter what cost to the Soviet and world masses. Stalin gave Hitler everything that he could, so long as these concessions did not directly involve the surrender of the power and position of the bureaucracy.

In the light of his fundamental policy, Stalin surely will not carry on this war as it ought to be carried on-as a war in which the Soviet Union, though taking advantage of all aid from Hitler's imperialist enemies, plays the independent role of a Workers' State, rallies the world masses to the banner of socialism, calls upon the working masses of Germany to overthrow Hitler and capitalism and to join in an alliance with. the Soviet Union. Stalin represents the antithesis to such a revolutionary policy, he has crushed that policy wherever he could, inside and outside the Soviet Union. He has murdered its best representative, Leon Trotsky.

Workers and peasants of the Soviet Union! We appeal to you in the name of our martyred leader, Comrade Trotsky. His voice would now be urging you on to revolutionary war against Hitler. This was the hour of danger which Trotsky was destined to turn into the hour of proletarian triumph -but his noble and heroic mind was crushed by Stalin's pickaxe. Since he has been denied the happiness of participating in your decisive battles and final victory, let Trotsky henceforth participate invisibly in your struggle. Let his voice,

### The Main Tasks Of The **American Working Class**

Every worker must defend the Soviet Union as a class duty. The revolutionary worker cannot accept the corrupt and opportunistic line of the Stalinists. He defends the nationalized property of the Soviet Union and not the Kremlin bureaucrats. He defends the Soviet Union because capitalism has been overthrown there. He can under no circumstances support the imperialist war of Britain and the United States, no more than he would support the imperialist war of Nazi Germany. The revolutionary worker understands that if Churchill and Roosevelt find themselves allied to the Soviet Union that does not change by one iota the reactionary character of the war that Churchill and Roosevelt are waging.

The workers must fight fascism to the death-but the imperialist war of Britain and the United States is not a war against fascism, it is a war against their imperialist rivals. The only way the workers can fight against fascism is to take the power and establish a Workers and Farmers Government in the United States. Only such a socialist government would be a real ally of the Soviet Union.

Meanwhile the method to defend the Soviet Union is to continue the class struggle against the imperialists. Defend the workers' rights against government strikebreaking! Build the power of the working class until it becomes the governmental power. That is the best service which the American workers can render to their brothers in the Soviet Union.

Defend the Soviet Union! Defend the conquests of the October revolution!

Down with the Stalinist bureaucracy that weakens the Soviet Union!

Revolutionary war to the death against fascism! Against all the imperialists in this war!

On guard against the capitalist allies of the Soviet Union!

For a Workers and Farmers Government, the only reliable ally of the Soviet Union!

Long live the world socialist revolution!

MINNEAPOLIS, June 23-The 5,000 truck-drivers of Minneapolis, who voted overwhelmingly on June 9th to quit the AFL and join the ClO, are being subjected to unprecedented attacks of violence and intimidation by not less than 300 hoodlums imported here by Tobin's Teamsters International and the AFL.

Tobin's representatives have publicly announced that CIO truck-drivers will not be permitted to drive on the streets and highways and that a local and national AFL boycott will be imposed on any truck operated by a CIO driver. This boycott is already in full force.

Since the drivers voted to go CIO, one or more International Representatives from virtually every AFL union in Minneapolis has arrived here to join the campaign and put pressure upon AFL locals to boycott CIO drivers. ## War Chest Drive Vital Now For **Defense of USSR**

It is fortunate, indeed, that the entire party has been gearing into the War Chest drive for four weeks, so that we can expect all-out action between now and August 1st, the date for conclusion of this drive. Every dollar now assumes an entirely new importance, as the party gives every ounce of effort to rally the American working class to the defense of the Soviet Union.

By bourgeois standards the few hundreds of dollars that came in this week may not seem very much. But they make it possible in this, the greatest emergency that has faced the revolutionary movement since 1917, to mobilize our press and every comrade and friend to distribute our Manifesto in defense of the Soviet Union to many tens of thousands of American workers.

In the hour of the greatest need of the Soviet Union, we have always declared, we shall be found at our posts, doing whatever it is humanly possible for us to do to save the Workers' State from destruction at the hands of its imperialist enemies or allies. The War Chest becomes our mainstay in this solemn task.

We have the first example of what every branch might well do, in a letter from the young and still small Milwaukee branch. The Milwaukee comrades reject the quota of \$10 set for them for the War Drive, and raise their quota to \$55-more than five times what we asked of them. There's a star for all the smaller branches to shoot at-and the bigger ones too.

All-out action in the next days for the War Chest will make possible for us to treble and quadruple our distribution of propaganda for the defense of the Soviet Union.

The mail is too slow for these days of emergency-wire funds!

### On The War Fronts

## Hitler Seeks Soviet Resources For Long War

## Shift To East Forced By Need

#### By GEORGE STERN

Germany launched a fateful attack on the Soviet Union. Hitler opened a new front in the East stretching from the Baltic to the Black Sea. In a drastic shift of policy he embarked upon a campaign to win the wheat and oil of Russia before coming to final grips with Britain.

In this column last week we. said that a German-Soviet clash at this time was unlikely because we believed Stalin would make fresh concessions rather than risk Nazi attack. We considered that Hitler would go the length of an attack ou the Soviet Union only if his need of Russian wheat and oil were truly desperate and his attack on Britain stymied. All apparent evidence last week suggested this was not yet the case. But not enough evidence was in. Hitler's move across It is not yet plain, however, how

at all were made. There is a significant passage, in Hitler's pro- gaged in a life and death struggle clamation of war concerning the for its empire against the Nazi concentration of Soviet troops claimants to world power, is more

along the German frontier. The presence of these forces, he said was "intended mainly at the tying up of such powerful (German) forces in the east that the radical conclusion of the war in the west. particularly as regards aircraft could no longer be vouched for by the German High Command."

#### WHAT HITLER NEEDED

This is a substantial revelation for Hitler to make. It tells us that no concessions by Stalin were of any use to Hitler so long as he had to maintain more than 100 divisions, with accompanying mechanized forces and aircraft, along the Soviet border. It tells us that nothing could satisfy him in this situation short of total demobilization of the Red Armythat is, total voluntary surren-

For if revolutionary energy can truly be unleashed in the defense of the Soviet Union, Hitler will finally meet his Waterloo, at home and abroad. ## **How Comintern Changed Its Line** When Stalin Signed Hitler Pact

#### Stalinist Leaders Swore Pact Wouldn't Affect The Line But In Three Weeks They Dropped "Collective Security"

Hitler's assault upon the Soviet Union will change the line of the Communist parties, which for the past 21 months have to his aggressive policy in Eastpreached opposition to the imperialist war efforts of Churchill ern Europe against Poland .... and Roosevelt.

We need only review the somersault of the Comintern after greeted the pact with the state the signing of the Stalin-Hitler pact to predict in broad outline ment that it was "a tremendous the about-face which the Stalinist leaders will now seek to im- conribution to the peace of the pose. Only, the new line will be a film run in reverse.

Prior to the Stalin-Hitler pact, the Stalinists had preached for four years the gospel of the "defense of democracy against fascism." Britain, the United

The September, 1939, issue of the Young Communist Review, official organ of the Young Communist League, declared:

"Should Germany undertake aggression against Poland, the Soviet Union would denounce its pact."

Suddenly, the tone of the Communist Party press changed. The leaders discovered overnight that this was not a war of democracy

Browder, on September 13, 1939. found that "... the character of the war now developing is that of a struggle between two rival imperialist groups for the domination

Builder of the Red Army

there are certain concessions that Stalin could not make, because they "would lead to the same result as a war, eventual destruction of Stalinist power in the Soviet Union at the hands of the Nazis and the internal reaction which Hitler would surely sponsor once he got a foothold."

Thus, it now appears, nothing could satisfy Hitler short of a military defeat of the Red Army or its equivalent in surrender without war. He chose the path of military conquest in preference to a new, insecure deal with Stalin.

Hitler in effect admits in his proclamation that without liquidation of the necessity for keeping such a large force employed in the East, he was unable to attack the British Isles. Consequently he had first to undertake this "liquidation." It is quite possible that the Nazi High Command decided likely to welcome the opening of that in any case an attack on Britain was not now feasible.

The very fact that he would embark upon so vast a project, however, proves also that he needs the economic resources of the Soviet Union far more urgently than was generally realized. His conquered provinces in West Europe face a winter of starvation. In Germany itself, despite the dazzling military successes, the need is apparently going to be greater than Hitler was willing to chance. And it now is clearer, likewise, that Caucasian oil has become an absolute necessity to keep Hitler's planes flying and tanks rolling. Hitler has not reversed his war strategy because of some sudden aberration. He has done so because his drive of conquest has made it unavoidable.

#### **OCTOBER STILL LIVES!**

How easily can he expect to attain his objectives? Only now are we going to learn how far the Stalinist regime in the Soviet Union has succeeded in devitalizing the Red Army.

The National Committee of the American Communist Party adopted, on September 4, 1939, several "slogans of action." Among these were:

"Embargo Japan and Germany for the defeat of fascist aggression and for establishing a democratic peace." And:

"Full moral, diplomatic and economic help for the Polish people and those who help Po-

"In the first stage" of the war, Hitler was the aggressor. "Now, on the other hand, the imperialists of Britain and France have passed over to the, offensive, have hurled their peoples into war against Germany... It is the British and French imperialists who have now come forward as the most zealous supporters of the continuation and further incitement of war."

And Browder echoed: "At this moment the responsibility for continuing the war lies, before all, upon the British and French imperialists.'

Thus it was that the Communist Parties everywhere concealed the real war aims of Hitler, denied his immediate menace to the Soviet Union, attempted to blind the workers of the world to the dangers of Nazi attack on the Soviet French imperialists. The October Union - all in order to keep the "goodwill" of Hitler, and to justify Stalin's signature to the pact

### "Democratizing" **The Armed Forces?**

There's been a lot of palavar about the General Staff's new conception of the army, and the plan for "democratizing" the armed forces.

An example of how this is being done comes from Camp Shelby, Mississippi, where Major General Edmund L. Daley, commander of the Fifth Army Corps, has directed an order to the commanding officer of every unit down to companies of the 32nd, 34th, 37th and 38th Divisions and attached troops of the Fifth Army Corps, as follows:

"Officers have been seen drinking in bars and restaurants with enlisted men in the Alexandria area.

"The corps commander calls to your attention that association of this nature is prejudicial to good order and military discipline. Steps will be taken to correct this condition."

The Stalin-Hitler "non-aggression" pact of August 23, 1939, which Hitler has ground to dust just 22 months later, struck a crushing blow at the workers of the world, and destroyed the sympathy which millions of class-conscious proletarians felt coward the Soviet Union.

#### The President's Memorandum

By ALBERT PARKER

President Roosevelt's memorandum on the question of Negro exclusion from the war industries deserves more study than has been given it. For it must be remembered that this is the first time in the almost nine years that he has been in the White House that Roosevelt has ever spoken on the question of the Negroes' problems at all.

Everyone with any political understanding at all knows why Roosevelt made the statement at this time. It was intended to get the leaders of the March-On-Washington Committee to call off the July 1 demonstration in the capitol.

First of all, it should be repeated that Roosevelt did not do anything to end industrial Jim Crowism. In his statement, he only approved the action of the Office of Production Management in sending a letter to all employers two months ago, asking them to "examine whether or not" their employment policies "make ample provision for the full utilization of available and competent Negro workers." Everyone knows that nothing has happened since that time. Employers may have examined their policies, or they may not: but certainly Negroes have not gotten jobs as a result.

been so much confusion cast on the question by the major Negro newspapers. The Afro-American, for example, said: "President Orders Defense Jobs Open To All." The Chicago Defender: "FDR Breaks Silence; Urges OPM To Smash Defense Job Race Ban; President, Stirred by Many Protests of Negroes, Takes Belated Action To End Employment Injustice." The Pittsburgh Courier: "JOBS FOR ALL"- ROOSEVELT; Nation's Chief Executive Orders OPM To Halt Discrimination In All U. S. Defense Industries." As though to clinch the matter, the Courier head on the continuation of the story says: "Roosevelt Ends Industrial Bias."

The plain and simple fact, of course, is that none of these headlines are correct. They are only another example of that gullibility that characterizes the Negro press when it comes to half-hearted promises and evasive statements thrown to them as crumbs.

The editor of The Militant correctly wrote last week that Roosevelt did not even speak out, let alone act, against the whole system of discrimination in industry. "With careful intent, Roosevelt's words are: 'in defense industries', 'in this present emergency', 'in defense production'." Roosevelt presents the question of job Jim Crow in a "reasonable" manner, and summed up he means this:

"There is going to be a labor shortage, and employers will have to use Negroes in the end anyhow. Besides, this is an emergency, and we must make sacrifices, even to the extent of hiring some Negroes. This will not hurt the system of Jim Crowism, because it will last only for the emergency, and because in order to defend our Jim Crow democracy, we must use all the forces at our disposal. In addition, giving the Negroes

#### Army Taught To **Fight "Strike** Agitators"

The U.S. Army is being readied for "national defense" against...the American work-

An item in the Quincy, Massachusetts, PATRIOT-LEDG-ER, June 14, describes maneuvers by the 36th Coast Artillery Brigade in "defending" Fore River, the Boston Navy Yard and the Watertown arsenal against "saboteurs and strike agitators."

On the West Coast, the San Diego harbor fortifications at Pt. Loma were "successfully defended" recently by soldiers of the 19th Coast Artillery, in maneuvers in which one group of soldiers, as the local press described it, "clad in blue denim, simulated a mob led by

fifth column agitators?" Roosevelt's use of federal troops against the North American Aviation strikers wasn't accidental. That's what the boss-run army is for, as the examples of these training maneuvres indicate. The "enemy", to the boss government, is not simply those in the uniform of the Panzer Divisions, but more immediately, those who wear "blue denim" at home.

Party Refuses Aid to India By JACK WEBER

British "Labor"

The consequences of the British Labor Party's collaboration with Churchill are revealed in the recent attitude of that party towards India. The Labor Party leaders have withdrawn support from the Hindu socialist, Krishna Menon, who was for sixteen years a member of parliament for Dundee, always elected on the Labor Party ticket. The Labor Party now withdraws support of his candidacy on the Labor Party ticket be-Juse of Menon's stand on India. He is secretary of the India League of London, an organization that advocates independence for India.

It is always a good thing to have the attitude of the heads of the Labor Party expressed in writing. A letter signed by G. R. Shepherd on behalf of the National Executive of the British Labor Party, explains the refusal to reindorse Menon as follows: "It is impossible both to support the struggle of the Indian people and be a loyal supporter of the policy of the British Labor Party leadership." The same letter dares to affirm after this brazen statement: "the Labor Party does not whittle down in any way its own desire for the welfare of India."

Menon replies to this letter: "My allegiance is to those principles of freedom and social justice basic to, the international socialist movement". He adds: "The Labor Party policy is now declared by its supreme executive to be opposed to the basic conceptions of self-determination and national independence of subject peoples and at best to be for some form of benevolent and patronizing imperialism."

Let us state right here that we agree thoroughly with the statement made in the letter of the Labor Party that it is impossible to support both the struggle of the Indian people and the leadership of the Labor Party at one and the same time. To support the struggle of the Indian people, directed against British imperialism, one must oppose the Labor Party Leaders who bolster up that imperialism. Of that there can be not the slightest doubt. The misleaders of British labor are compelled by the logic of their support of and collaboration with the Tory government, to carry on the war of the Tories against the colonial peoples. These peoples are quite properly ready to make use of the plight of their imperialist masters to strike a blow for their own freedom.

#### This Was Macdonald's Policy Too

But let us not suppose that this attitude on the part of the Labor Party leaders is just a war attitude. Not at all. It is in line with the traditions of Labor Party government in peacetime too. When the Hindus, in their joy that labor had gained a victory and taken over the government under Ramsay Macdonald, felt that they could then act in their own behalf, Macdonald identified himself and his party completely with British imperialism. He used the army against the Indian people and said: "No party in Great Britain will be cowed by threats of force or by policies designed to bring government to a stand-

#### The Mediation Board's Anti-Labor Role Is Known To These Labor Officials

Listing the various government strikebreaking activities which ing of the Board at which the he was asking all CIO affiliates to combat, Philip Murray wrote of trade union officials might have the National Defense Mediation Board, in his June 12th letter to had an opportunity to record

a few jobs will serve to remove from us the stigma of preaching one thing for Europe and practicing the opposite here. I am not taking any steps to force employers to hire Negroes, I am only showing them how reasonable it would be."

#### **Roosevelt's "Moral Authority"**

Nobody who reads his memorandum carefully can claim that Roosevelt does more than add his moral authority to the OPM's request to relax a little the Jim Crow bars.

Whenever most employers are approached by Negro and labor organizations with the demand that they hire Negroes, they reply that they themselves have no objection to hiring them, but that their white employees do, and there would be "trouble" which might result in a reduction in production.

This is the bosses' line. But what does the government, what does Roosevelt sav?

In their treatment of the Negroes in that government department where the greatest number of Negroes are utilized, the armed forces, Roosevelt says the very same thing as the bosses!

In the army and the navy, Negroes are segregated. In the army Negroes are all in separate regiments, there is no such thing as a mixed regiment where Negro and white soldiers march or work side by side. In the navy Negroes are permitted only in the mess department, and nowhere else. The continued maintenance of this Jim Crow system has been explained by Roosevelt and his Secretary of the Navy on the basis that "to make changes would produce situations destructive to morale and detrimental to the preparations for national defense."

One can easily see from this how much Roosevelt's moral authority on the question of Jim Crowism amounts to!

One can also judge Roosevelt's memorandum as much by what it leaves out as by what it says. Roosevelt has many times been asked to put some teeth into the OPM's letter. He could tell the War and Navy Departments to stop all government contracts to employers who discriminate in their employment policies. The result would be the immediate hiring of Negro workers by thousands of plants. These plants are run for one reason only: for private profit. If the government were in any way to threaten that private profit. the employers would drop their employment bars like pieces of hot iron.

But Roosevelt makes no such step. He is ready to send troops in to break strikes, but he isn't willing to even threaten employers who refuse to hire Negroes.

The refrain may become monotonous, but it is none the less true: The bosses don't "give" anything for nothing. Workers, Negro and white, win things that are worthwhile only by fighting for them.

Not only do we agree that it is impossible to support both the Indian people and the Labor Party leaders. We go further. It is impossible to defend democracy and to support these leaders in the coalition government. Their actions pave the way for fascism in England just as surely as the actions of the social democratic leaders of Germany paved the way for Hitler. If democracy is to survive in England, then the workers alone will be responsible for its survival. They can defend democracy only by repudiating the labor betrayers who sit together with the archreactionary Churchill in the Cabinet. They can defend democracy only by setting up their own government.

#### British And India Workers Must Unite

It is absolutely clear that the interests of the working class of England and the interests of the colonial peoples are tied together. Anything which weakens the struggle of the one, weakens the struggle of the other. Both fight a common enemy, the master class, the imperialist ruling class. Therefore if anybody acts for the ruling class against the colonial people, by the same token he acts to strengthen that same class against the exploited workers in the home country. The Labor Party leaders who not only will not aid the Hindus but on the contrary sanction the use of force against them, are by this act aiming a blow at the workers at home whom they supposedly represent. The workers are kept in subjection to their exploiters through the acts of collaboration of their "leaders."

The British workers believe in democracy at home and abroad. They always supported the demand for self-determination of the colonial peoples, particularly the Hindus. But it is not enough to sympathize with the fight of the colonial peoples for independence. The workers must render active aid to the Hindus. How can this be done? How can British Labor really fight for democracy, first of all in their own bailiwick and in their own "empire".? They can do this only by fighting the force which prevents and suppresses democracy, the capitalist class. The British workers can further the cause of independence at home and abroad by a militant struggle against this reactionary ruling class which no more fights for democracy than any of the dictators do.

But before it is possible for the workers to fight reactionary capitalism, they face the preliminary task of clearing out of their path the rubbish that accumulated from a preceding epoch. This impeding rubbish exists in the form of an opportunist and reactionary labor leadership which helps maintain the yoke of slavery on the necks of the workers. The step to repudiate these misleaders would be the first great step in the struggle for emancipation.

## The Ford Victory

The spreading shadow of the war has served to obscure the significance of the achievement of the Ford workers last week in securing a signed union contract from the Ford Motor Company.

Bourgeois journalists may fix their eyes exclusively on the shifting military scenes. But for the American workers, and the international workbosses are less intent upon the destruction of the organized working class.

It would be a fatal error if the Ford workers should imagine that their fight is at an end. What Henry Ford has conceded to the workers has not been yielded out of choice or some sudden access of good will. It has been wrung out of him by sheer organized power, and will be maintained by that power alone.

Ford's hatred of the workers has not abated. He is not reconciled to unionism. He is no less an enemy of labor today than he was yesterday. He is merely planning to adjust his methods in order to defeat the workers despite the unfavorable circumstances in which he now finds himself.

Ford plans to destroy the union by more subtle and deceptive means. He hopes to weaken and throttle it from within.

His major strategy now will be to win over and corrupt the International leadership of the UAW-CIO, to tie that leadership into a form of "partnership" with his management, to induce that leadership to lull the vigilance of the workers and stifle their militancy. At a more opportune moment, he will once more resume his more drastic methods against the workers, when he believes them to be drained of their militancy and their leaders to be too conservative to accept the challenge of a real fight.

But Ford has been proved wrong in his previous methods for destroying the union. He will be proved wrong again. He calculates too little on the workers, their indestructible fighting qualities, their solidarity, their will to extend the gains which they have already achieved, their capacity to produce new and militant leaders. Tomorrow, if Ford resumes his open war on the workers, he will find them as powerful and unyielding an opponent as he finds them today.

The economic battles of the workers are no substitute for the political and military battles which they will have to fight against fascism and capitalist reaction. But victories like that over Ford are the necessary preliminaries to the still greater proletarian battles that lie ahead.

### **Molotov** and Hitler

Revolution generates its own "secret weapons." These were the weapons with which the embattled workers of Soviet Russia twenty years ago hurled back foreign and domestic enemies on twenty-two fronts from the Crimea to Archangel, from Petrograd to Vladivostok. These were the weapons of revolutionary propaganda which dissolved opposing armies and inspired actual mutinies in the American interventionist forces in Siberia. These were the weapons which forced British withdrawal when British workers refused to load goods for British forces in Russia.

To what extent has the Stalinist degeneration in the Soviet Union dulled these weapons and rendered them ineffectual for use in the war against Nazi imperialism? Certainly Molotov's broadcast announcing the outbreak of war last Sunday offered no grounds for optimism in this regard.

All Molotov did was to whine about "perfidy unparallelled in the history of civilized nations." He insisted that "the German government could not find grounds for a single complaint" against the Kremlin's observance of the Stalin-Hitler pact. He proclaimed, as though it were something to shake millions loose from torpor-that Germany had violated a non-aggression pact! Did he call upon the German workers to rise against their rulers? No, he referred to the German masses only to say that "we well understand" their "sufferings." Did he appeal at all to the monumental history of the civil war of 1918-22 when the Russian workers showed how revolutionary conquests could be defended? No. Molotov sounded like the Chamberlain of Sept. 1, 1939. We have been grievously wronged and deceived and now, we regret to say, we have to defend ourselves against a perfidious attackthat was the tenor of his statement. Not a word of the fight for socialism, the struggle for the world revolution. In contrast to Molotov's timidity, Hitler, the demagogue and propagandist, in his proclamation of war claimed that German Fascism is "striving ... for a new Socialist order. . .systematically eliminating differences of rank and class..." Hitler had learned more from the history of the Russian revolution and used it, in reverse and for opposite purposes, than the whole Stalinist bureaucracy has ever known. Hitler was smart enough to tell the war-oppressed masses of Germany that the war against the Soviet Union was a "war for socialism." "To this Molotov replies with a whining recital of Hitler's insincerity. Not by such means and methods will the Soviet Union be successfully defended. Not by such means will the Hitler incubus be severed from the German masses. The Stalinist regime will act as a brake and a check on the power of resistance of the Russian workers. The task of breaking that hold becomes one of the most fearful urgency if the war against Hitler is to be fought as it should be fought.

#### THE MILITANT

## **Trotsky's Unheeded** Warnings

#### He Warned At Outset Of Nazi Regime That Hitler's Attack On USSR Was Inevitable; Fought Stalin's Compromises

The Nazi attack on the Soviet Union tears the last crumbling prop out from under the "realistic" policies of Stalin and the Kremlin oligarchy. Today the USSR faces the crushing attack of the monster that Stalin helped create.

Against Stalin's false policies for eighteen years one voice was firmly and consistently raised -the voice of Leon Trotsky. Stalin acted always from the narrow and conservative and counterrevolutionary standpoint of the Soviet bureaucracy. Trotsky argued always from the standpoint of the fundamental interests of the Russian and the world revolution. Stalin won applause in the salons of the world bourgeoisie. He was the "realist" who was helping to destroy the "menace" of Communism. Trotsky was the "impractical dreamer," the man who never swerved from the path of the world revolution.

Now once more the warning of this "impractical" are vindicated by events. This is no cause for mere fingerpointing--such satisfaction Trotsky himself always found melancholy indeed. The peril of which he warned has now come to pass and we know that if Trotsky were alive today, he would be offering his services without hesitation to the Red Army which he brought into being.

There are profound lessons to be learned from Trotsky's repeated warnings and predictions of a Nazi attack on the Soviet Union.

#### **Before Hitler Came To Power**

These he made not only after Hitler came to power, but even before that fateful event. In 1931, Trotsky wrote:

"Once Hitler comes to power, and proceeds to crush the vanguard of the German workers, pulverizing and demoralizing the whole proletariat for years to come, the Fascist government alone will be the only government capable of waging war against the USSR... In case of victory (in Germany) Hitler will become the Super-Wrangel of the world bourgeoisie."-(GERMANY, THE **KEY TO THE INTERNATIONAL SITUATION.)** In an article in Liberty (July 16, 1932), Trotsky wrote:

"To make intervention possible, a great, highly industrialized, and moreover, continental European empire would be needed... To be more accurate-a country would be needed which had nothing to lose. A glance at the political map of Europe will convince you that such a mission could be undertaken only by a Fascist Germany. More than that, a Fascist Germany would have no other road left to go...A war against the Soviet Union would grow out of these circumstances with fatal necessity."

#### For Crushing Hitler At Once

Trotsky then went on in the same article to give his famous outline for the course the Kremlin should follow in event of the victory of Fascism in Germany. Who knows how different Europe and the world might be today if this policy had heen nursued! He declared:

Two months after Hitler took power in 1933, Trotsky wrote:

"A year and a half ago, we wrote that the Red Army in its principal mass ought to turn its face to the west, to have the possibility of smashing Fascism before it can destroy the German proletariat and unite with European and world imperialism . . . Even leaving aside the question of help to the German proletariat, there remains the question of the defense of socialist construction against German Fascism, the shock troops of world imperialism. Do the Stalinists deny this danger? The most that they can say is that Hitler is not yet, today, capable of carrying on a war. That is true and we said so some time ago.

"But if Hitler, today incapable of carrying on a war, will be capable of it tomorrow-and he will not be able to avoid carrying on war-does not a correct strategy demand that Hitler be prevented from preparing his blow; i. e., that the German workers get rid of Hitler before he gets rid of the German workers? . . . One cannot sow grain and plant cabbages with his back turned to the west, from which, for the first time since 1918, comes the greatest threat, which can become a mortal danger if it is not paralyzed in time.

"Or have the Stalinists perhaps assimilated the pacifist wisdom of the 'purely defensive' war being the only permissible one? 'Let Hitler attack us first, then we will defend ourselves.' This was always the reasoning of the German social-democracy: let the National-Socialists first openly attack the constitution, then, well...etc. Still, when Hitler OPENLY attacked the constitution, it was already too late to think of its defense.

"He who does not outstrip the enemy while he is still weak; who passively lets him strengthen and reinforce himself, protect his rear-guard, create an army for himself, receive support from abroad, assure himself of allies; who leaves to the enemy the complete liberty of initiative; such a man is a traitor, even if the motives for his treason are not to render service to imperialism, but consist of petty bourgeois weakness and political blind-

"The 'justification' of a policy of waiting and evasion under these conditions can only be WEAKNESS. This is a very serious argument, but we have to give a clear account to ourselves of it. We must say: the Stalinist policies in the USSR have so thoroughly disorganized economy and the relations between proletariat and peasantry, have so badly weakened the party, that the necessary premises for an active foreign policy do not exist today.

"We draw the conclusion: a fundamental change in the policy, the methods, the leadership of the party is necessary, in order to assure the Soviet State, in addition to everything else, of a real capacity for defense and freedom of initiative internationally."

(The Militant, April 8, 1933).

JUNE 28, 1941

(The following article was written before the Nazi-Soviet war began. As it indicates, Stalin's present foreign policy will soon lead to a cessation of Stalinist strike activity-EDITOR.)

#### What Motivates Stalinist **Trade Union Policy?**

The role that the Stalinists have been playing in a few of the recent and important strikes brings into sharp focus the question of the relationship between Stalin's foreign policy and the trade union tactics of the Communist Party of this country. Especially has this question come up and been much discussed since the strike at the North American Aviation plant. in Inglewood California.

Those reading our press need not be reminded that we have nothing against strikes because they are under Stalinist control. Here it is simply necessary to recognize the fact that some of the recent strikes were under Stalinist leadership, as much as we may regret that fact from a point of view altogether different of course from that of those who attack the strikes as interfering with the war industries.

What motivates the Stalinist leaders in calling strikes at the present time? For Roosevelt and all of his supporters-from the extreme reactionaries to the liberals and social democrats of the New Leader -the answer is simple. Stalin wants to help his partner Hitler and therefore has instructed his agents to interfere with the "defense" industries by calling strikes.

#### The Roosevelt "Explanation" Is False

This contention is given the widest publicity and is used as a pretext by Roosevelt administration officials to label strikes as subversive. On that proposition, too, all the liberals and social democrats are basing their condemnation of strikes in so-called defense industries. They are justifying even the use of the army to break the North American Aviation strike on the ground that it was led by C.P. members. conspiring to sabotage defense.

Reactionaries, liberals and social democrats, in attributing to the Stalinist leaders the specific intention to sabotage defense industries, utilize a correct general principle but distort that principle in order to serve their own purposes. The principle that the trade-union policies of the Communist Party, just as all of its major policies, are, in general, determined by the foreign policy of Stalin, is absolutely correct. But to conclude from this correct general principle that the Stalinists call strikes at this time for the specific purpose of sabotaging defense industries means to use a correct general principle not as a guide to explain events, but as an excuse for a reactionary and red-baiting policy.

People who reason mechanically would expect that because Stalin changed his foreign policy with the signing of the pact with Hitler he would therefore issue instructions for a campaign of strikes in all democratic capitalist countries. But these people forget that in the period of Stalin's great friendship for the capitalist democracies there were strikes led by his followers in this country and in France.

True, the Stalinists put the brakes on the militant strikes of the French workers. Stalin feared a revo-

ing class, this victory of the Ford workers has as profound implications as the military battles of the imperialists.

The demonstrated might of the organized Ford . workers is a heartening symbol of that power which is destined to determine the final outcome of the war.

For the fate of humanity does not rest upon the immediate achievements, the gains and losses, of the various armies of imperialism, bourgeois democratic or fascist. The fate of humanity is dependent upon the revolutionary might, and the will to conquer power, of the workers of the world.

Not the armies of Churchill and Roosevelt will save the Soviet Union and destroy the menace of fascism. The international proletarian revolution, shattering root and branch the whole world system of capitalist imperialism, alone will put an end to the devastations of imperialist war and to all human exploitation.

Every advance in the organized power of the workers in any nation in the world, every victory over any sector of the ruling classes, prepares and strengthens the workers for that hour when they, and they alone will put an end to the bloody shambles perpetrated by capitalism.

That is why we hail the victory of the Ford workers over the greatest industrial tyrant in America.

The Ford victory comes at that very moment in history when all the forces of capitalist reaction are bent upon the total destruction of the organized defenses of the working class everywhere. The class-conscious bosses, no less than the class-conscious workers, are aware of the profounder meaning of such victories for organized labor. If, at a given moment, they appear to yield to the workers, as in the case of Ford, that is not because the

"In my opinion this is how the Soviet government OUGHT to act in case of a Fascist coup in Germany. Upon receiving the telegraphic communication of this event I would, in their place, sign an order for the mobilization of army reserves. When you have a mortal enemy before you, and when war flows with necessity from the logic of the objective situation, it would be unpardonable lightmindedness to give that enemy time to establish and fortify himself, conclude the necessary alliances, receive the necessary help, work out a plan of concentric military actions-not only from the west but from the east-and thus grow up to the dimensions of a colossal danger."

It was in this period that Trotsky tirelessly worked to prevent the victory of Hitler in Germany and to assure the victory of the German working class. Those were the days in which he urged the broadest united front of the Social Democrats and the Communists to form a bloc against Fascism. He was dubbed a "counter-revolutionist" for this policy by the Stalinists. Stalin was still seeing the Social Democracy as "the main enemy" and the German Communist Party was helping the Nazis batter away at the Social Democrats and thereby encompassed the Communist Party's own doom when, on January 30, 1933, Hitler took power. The German Communist Party capitulated without a struggle and Stalin began his long and tortuous "realistic" course which took him through the period of the "People's Front" to his pact with Hitler in 1939.

#### After Hitler Came To Power

As opposed to Stalin's catastrophic policies, Trotsky's course opened the road, at the very least, to the revolutionary transformation of the European continent.

#### Warned Of Attack On USSR

Trotsky warned over and over again that the coming of imperialist war in Europe, whatever its initial form, would develop into an attack on the Soviet Union. In 1933, he said:

"Allowing for all diversion, the foreign policy of Fascist Germany is essentially directed against the Soviet Union." (The Militant, April 24, 1933) Again in the theses War and the Fourth Inter-

national, issued on June 10, 1934, Trotsky wrote: "Every major war, irrespective of its initial

motives, most pose squarely the question of military intervention against the USSR in order to transfuse blood into the sclerotic veins of capitalism."

After Stalin entered into his bargain with Hitler-a move that Trotsky had long foreseenand got paid off with the Baltic states and half of Poland, Trotsky warned again:

"In spite of the Kremlin's territorial seizures, the international position of the USSR is worsened in the extreme. The Polish buffer disappeared. The Rumanian buffer will disappear tomorrow. Mighty Germany, master of Europe, acquires a common frontier with the USSR. Scandinavia, a place of weak and almost disarmed countries, is occupied by this same Germany. Her victories in the west are only preparation for a gigantic move toward the east." ("The Kremlin's Role in the War," June 17, 1940, FOURTH IN-TERNATIONAL, October, 1940).

This was the revolutionary realism of Trotsky. Stalin's hired assassins struck Trotsky down nearly a year ago. He is not here to lend his mighty hand to the struggle to save the Soviet Union. But his strength was also the strength of his ideas. And those are ever with us. And with them we shall embark with confidence on the great struggles before us.

lutionary upheaval in France because that would endanger not only the French capitalist democracy but also the rule of the bureaucracy in the Soviet Union. Nevertheless there were many strikes in France led by C. P. members.

For it must not be forgotten that Stalin's power rests partly on the influence he can wield through the various Communist parties over sections of the working masses. And to gain influence among the workers it is necessary for the Stalinists to assume leadership in the struggles of the workers.

With the shift in Stalin's foreign policy, as symbolized by the pact with Hitler, the brakes on working-class militancy were released. The militancy of the rank-and-file Stalinists was permitted full play. It is therefore correct to say that in the last analysis the fomenting of strikes at the present time is a result of Stalin's foreign policy.

#### Soviet War Would Lead To

#### A New Situation

But this does not mean that the immediate purpose of the Stalinists in leading the strikes is to sabotage the war industries or to exert pressure on Hitler or to prove that Roosevelt is just as much of a fascist as Hitler. The fact of the matter is that the Stalinists cooled down considerably and definitely retreated after the North American Aviation strike was broken by the army. It is even probable, judging by their subsequent actions, that they realize that they made serious errors in strike strategy in the North American Aviation strike.

Should Stalin join Hitler in a struggle against Britain and America, then Stalinist-led strikes could be attributed to an intention to sabotage war industries but Stalin has not as yet been compelled by Hitler to become the latter's ally in actual warfare.

Naturally, had the war assumed a different aspect, had Stalin been allied with France and England against Hitler, the Stalinists would have tried to prevent any strikes in the countries of the capitalist allies of the Soviet Union.
