How To Destroy One Of Hitler's Chief Weapons

The United States government has been greatly aided in its conduct of the war by the propaganda use it has been able to make of the crimes committed by the enemy governments. Hitler's extermination of the trade unions, his oppression of the Iewish people, his seizure of Poland, etc. — all these undoubtedly made it easier to convince large sections of the population of the necessity for supporting the war program and making all kinds of sacrifices to ensure its victory.

But this powerful weapon can be and is used on both sides in this war. An examination of Hitler's speech on Jan. 30, at a celebration in Berlin of the ninth anniversary of Nazi rule, shows that the fascists too know how to try to justify their policies and seek popular support for them by pointing to the reactionary acts and policies of the enemy.

In fact, the greater part of Hitler's speech was devoted to such demagogy as a denunciation of the British government be cause it "subdued country after country, by force," because it seized Arabs, of the Indians," because "they did not care about the carrying out of their promises," etc.

We are not in a position to state authoritatively what effect such denunciations of the British government have on the German masses. We doubt that many of them are persuaded thereby that Hitler's criminal acts against them and the other people of Europe are any the less criminal.

But although Hitler's speech is filled with lies, it nevertheless remains a fact that the British government has been guilty of the crimes referred to above, and the German masses | gram know that it has been guilty of them. And so while the recitation by Hitler of these crimes of British imperialism may not convince the German masses that Hitler is any better than the the idea, put forth by the com-British government, at least it does have the effect of repelling mittee, that the dollar-a-year true whether or not they are on them from the British government and a British victory.

The Versailles Treaty

But Hitler has an even more effective propaganda weapon than the recitation of the crimes of British imperialism in general or against the colonial people - and he did not fail to use it last week any more than he or Goebbels have failed to use it on every possible occasion since the war began.

That weapon is the Versailles Treaty and the effects it had on the German people themselves. With this weapon Hitler can ernment salary.' do more than neutralize the German masses - he frightens many of them with the prospect of a victory by the allied nations into support of his own war program.

From beginning to end Hitler hammered away at this question in his speech. Recalling Wilson and the promises he made "that secret diplomacy would be abolished and that a new era of peace, equality and reason would arise," Hitler declared that ness mentalities any. "the peace treaty which followed (the armistice) completed the looting of Germany and the deprivation of all her rights. . Germany was deprived of her colonies, her merchant fleet was taken away from her. . . In short, all promises made by Wilson e broken shamelessly."
And then, he reminds the German people, "Germany did And then, he reminds the Makes"

And then, he reminds the German people, "Germany did And then the German people, "Germany did And the German people, "Germany did And then the German people, "Germany did And then the German people were broken shamelessly."

not get in the economic field what she was promised at Versailles." Instead, she got ruin from inflation, her unemployment grew, complete financial disintegration, etc.

What the Masses Fear

His purpose in repeating all this was to remind the German Blow to Irish Independence and Neutrality masses that if Hitler is defeated in this war, they will get the same thing all over again, if not worse. While on the other hand, he says: "The German people must know that so long as I live there will not be another 1918.

This kind of argument is peculiarly effective for two reasons: 1. The German people still remember very sharply the suffering been consulted either by the British or the American governimposed on them by the Versailles Treaty. 2. In spite of the ments with regard to the coming of talk about "democracy" and "four freedoms", the leaders of the "United Nations" have made it clear that when they win the war, counties." Rocsevelt had con- will of the Irish people. they intend to disarm "the aggressors" and place Germany in such sulted only with the British gova position that it will be unable to threaten their interests "for ernment which rules the six

The German masses have known for nine years now how terrible it is to live under Hitlerism, but to many of them the prospect of another Versailles must seem no better.

And although the opportunities for revolutionary struggle against Hitler may have increased in Germany since his reverses determination on the Soviet front, the masses have not yet dared to attempt such struggles because of their fear that even if they overthrew Hitler and set up a socialist government, the allied powers would still hold them responsible for the war and still impose after the last war was a rectionon them a peace treaty that would crush them and their revo-

Will Not Halt Or Control **Rising Prices**

Problem of War-Time Scarcity Is Unsolved In "Control" Bill

Fraud is the only word to describe the War-Time Price Control Bill signed last week by President Roosevelt.

Instead of halting price inflation, this measure will induce further price rises and protect the price-fixing practices of the big monopolies. It will give a legal cover to pricegouging.

Not even its sponsors have been able to say an unconditionally kind word for it. Roosevelt had to admit that he has "doubts. as to the wisdom and adequacy of certain sections of the act." His Price Administrator, Leon Henderson, had previously confessed the bill would prove ineffective.

The capitalist press of every political hue sneered at the bill. Said the Feb. 2 New York Post, The inflationary fires were stoked by this precious legislation which compels government to set arbitrarily high ceilings;" the New York Herald-Tribune, Feb, 2, spoke of "the fallacy of ly bungled and discreditable id a mere mockery of its own de-

Our program against Hitlerism and for a Workers' and Farmers' Government is today the program The Marxist analysis which de- man masses to overthrow Hitler of only a small minority. The great majority actively or pasto that majority in action. We do not sabotage the war or obstruct the military forces in any way. The Trotskyists go with their generation into the armed forces. We abide by the decisions of the many. But such guarantees majority. But we retain our opinions and insist on our right to express them.

INTERNATIONALISM

Our aim is to convince the majority that our program is the only one which can put an end to war, fascism and economic convulsions. In this process of education the terrible facts speak loudly for our contention. Twice in twenty-five years world wars have wrought destruction. The instigators and leaders of those wars do not offer, and cannot offer, a plausible promise that a third, fourth and fifth world war will not follow, if they and their social system remain dominant. Capitalism can offer no prospect but the slaughter of millions who will not hear us now. The wartortured masses will adopt our clearly see the socialist future

close vote on the Symes' stand with regard to war.

Every one of us would be satsfied with the way Clement would edit The Call. One or two nembers of the committee were tempted to change their votes simply to keep him as editor. I should be inconsolable except that as National Secretary of the Party, and contributor and adviser to The Call he can do as valuable work for us all in a field where we desperately need him especially since the illness of Robert Parker.

AGREED ON PROGRAM OF IMMEDIATE ACTION

The NEC was unanimously agreed on the program of immediate action already outlined in The Call. It was almost unanimously agreed on its analysis of the situation. The Party has been and is struggling against all forms of totalitarianism and the capitalism which breeds totalitarianism: against the war system tied up with totalitarianism, and against all imperialism. We specifically condemn the Administration's policy which brought us to this crisis, and restate our conviction that our own program for staying out of war offered far more hope to America and

The CANNOT EMANCIPATE ITSELF WHERE LABOR WITH A BLACK SKIN IS BRANDED A KARL Negro Struggle

"Lynching Could Have Been Prevented!"

The Call, a leading Negro weekly newspaper of Kansas City, Missouri, sent two reporters to Sikeston to investigate the recent lynching of Cleo Wright. Many startling facts and circumstances were uncovered. The following is part of the report sent back by the investigators.

"The lynching of Cleo Wright could have been prevented. The plan to drag him over the streets in the Negro community and then burn him alive was known beforehand and could have been stopped had the officers of the law used the resources at their command. There was plenty of time to call for state troops. There was plenty of time and opportunity to spirit Wright away.

"Two hours before Wright was lynched. . . a city policeman and a state patrolman drove through the Negro community ordering Negroes seen on the street to go indoors and stay there.

"'There's going to be a little demonstration down here and we don't want you to get hurt,' the officers told the Negroes. One of them was heard to say, 'We're going to have a little fun. You'd better get inside.'

"Some of the Negro citizens went indoors, particularly those with children. But others stayed where they were and saw the whole disgraceful procedure.

"Had the 'peace' officers used half as much effort and spent as much time in trying to protect Cleo Wright as they did paving the way for the mob, there would have been no lynching."

A Negro who witnessed the entire lynching reported: "A state policeman led the mob through Sunset (the Negro community of Sikeston). . . The officers must have been in on it because a state police car was in front. Then came the truck dragging Cleo's body. Then there were four cars of state policemen. I don't know how many cars came afterward."

There was absolutely no proof that Wright's intent was rape. Mrs. Sturgeon, the white woman whose home was entered and who was stabbed in the side, said that no demand was made

Her husband, an Army sergeant in California, was sent \$160, contributed by citizens and the city council, to enable him to fly home.

No funds were collected for Wright's widow, who is an expectant mother. Because of her condition, she was not able to visit her husband as he lay semi-conscious in the basement of the General Hospital a few hours before the lynching. Although he was dying from bullet wounds inflicted by a policeman, he was put in the basement because there were "no beds for Negroes."

Two large mills, the Sikeston Cotton Oil Mill Co. and the Sikeston Cotton Compress and Wholesale Co., which employ mostly Negro labor, did not operate Monday, the day after the lynching. Negro workers did not report for work, feeling it necessary to stay home to protect their fami-

The school in front of which the lynching took place did not hold classes either, also because the children did not report. Many of them had been sent to relatives and friends in nearby towns for safe-keeping in case of further trouble.

All too often, the Negro people of the South have seen a lynching start off a series of widespread attacks and atrocities against anyone and everyone with a dark skin.

Not Yet the Last Word

This question of blood for wounded soldiers and sailors has still not been satisfactorily settled by any means. The Red Cross has finally retreated under pressure, and announced that it will accept donations from Negro blood donors.

But — and there seems to be some but the blood plasma of Negroes, after it is dried and stored, will be segregated! Although even the Red Cross admits that there is absolutely no scientific difference, the cans of plasma will be labeled "white" and "colored". Plasma from whites will be given to wounded whites, and plasma from Negroes will be given to wounded Ne-

According to the Pittsburgh Courier, this Jim Crow policy was insisted on by the Army Surgeon General, Major General James Magee. This is the same Magee who is responsible for the Jim Crow policy applied to nurses.

Although trained nurses are desperately needed, and a call has been issued by the Army for 10,000 additional nurses, the quota for Negro nurses is 56. These colored nurses will be allowed only two camps, both in the South — Fort Bragg in North Carolina, and Camp Livingston in Louisiana. In addition, they will be permitted to treat only Negro soldiers!

There are approximately 8,000 registered Negro nurses who would be eligible for service, if it were not for this policy of segregation. Yet as the Courier says: "It would seem that the army high command would prefer to have soldiers die from lack of adequate nursing care rather than discard its Jim-Crowism."

Housing Officials Reverse Detroit Decision

FEB. 3. - The New York Post today reported that the Sojourner Truth Houses in Detroit are now to be used for the housing of Negro war industry workers, as originally intended, following "one of the fastest about-faces on record."

Although in this instance vigorous pressure and public exposure has secured their homes for 200 Negro families, this does not invalidate the chief point raised in the above article about the necessity for Negro and white workers to fight against segregation and for the right of the Negro people to live anywhere on the basis of equality with the rest of the population. For as long as segregation remains the policy of the housing administration, the danger continues that other and perhaps more successful incidents of this nature will occur.

Exposure of the GPU's terror campaign both in the United ren are trying to claim that be-BALLOT IN NLRB VOTE

Bulletin

MINNEAPOLIS, Minn., Feb. 3. - A decisive majority was recorded here for Local 544-CIO over the AFL in the election held under the auspices of the NLRB to determine the union to represent the men in the Waterman-Waterbury Company. The vote between Local 1140 of the U.E.R.M.A., CIO, and Local 357 of the AFL Warehousemen, in the same plant, also resulted in a substantial majority for the CIO.

The significance of the vote lies not so much in the number of men involved as in the fact that in the first teamsters' election in Minneapolis where the name of Local 544-CIO was permitted on the ballot, the workers chose it over the Tobin-dominated outfit.

MINNEAPOLIS, Minn. Construction Workers has finally won the right from the NLRB to appear on the ballot for a collective barbaining election among sixty employees of the Waterman-Waterbury fur-

nace manufacturing company, The election will mark the first time since last June that any Minneapolis drivers and ware-housemen have had the chance to express themselves in a labor express themselves in a labor board election as to their choice

Local 1140 conducted a successful joint organizing campaign at Waterman's. All fifteen employlabor movement, challenged the ees in the shipping department, jury to deny our right to these including receiving clerks, drivers and helpers, signed up with 544-CIO. Hawaii-The Island Where Democracy Is Hard To Locate

By RUTH JEFFREY

Half way between Japan and the United States there is an island empire comprising 400,000 inhabitants virtually all reduced to the status of serfs. Their imperial rulers are known as the "Big Five", and when these gentlemen pass, the humble people are frequently seen to remove their hats. Yet the ruled as well as the rulers are citizens of the United States, and are presumably equally free men under the Bill of Rights. This strange outpost of the Four Freedoms is the Island Paradise of Hawaii, annexed as American territory nearly half a century ago.

The United States Government has considered democracy on this valuable portion of American soil so much worth defending that to date it has spent nearly one hundred million dollars on the naval base at Pearl Harbor alone. Yet the democracy to be defended is difficult to lo-

Fortune magazine six months ago quoted Ray Stannard Baker as writing, "I have rarely visited any place where there is so little Democracy as in Hawaii." And E. J. Eagen, an NLRB representative, wrote back, scandalized, in a report to his superior in 1937, made public only eight months ago, "If there is any truer picture of Fascism anywhere in the world than in the Hawaiian Islands, then I do not know a definition

As Fortune (August, 1940) put it: "Legally. there is no serfdom; practically speaking however, a laborer who is fired by one Big Five employer 'must eke out a living fishing or go as a suppliant to one of the other enterprises."

Economic Power of the Big Five

To understand the reason for the oppression and grinding poverty under which Hawaii's working masses live, it is necessary to have an idea of the economic power wielded by the Big

Hawaiian economy is based on the growing and marketing of two highly profitable crops sugar and pineapple. Both crops are raised on vast plantations controlled by the Big Five -Alexander and Baldwin, American Factors, C. Brew and Company, Castle and Cooke, and Theo H. Davies Co.

The relationship between man and "master" in Hawaii may appear feudalistic, but there is nothing feudalistic about the grand pyramid of corporations by which the Big Five extends its control into every corner of island economy. The neat technique of the interlocking directorate enables the same handful of men to gather around every important conference table in the Islands, presenting a picture of monopoly capitalism at the zenith of its development.

The Big Five start out as buying and selling "agents" for thirty-six of the territory's thirtyeight sugar plantations, and as "agents" for Hawaii's gigantic pineapple industry, which provides the world with 80% of its canned supply of the

The executives of the Big Five are also the officers of the plantation companies, cutting themselves another piece of profit. And not only are the Big Five stockholders of the plantations, but the plantations are stock-holders of the Big

Further, twenty-nine of the plantations (83% of the total production), own the Hawaiian Sugar Refining Corporation, the largest sugar refinery in the world, at Crocket, California. Big Five executives are on the refinery board.

They are steamship "agents" for the freight lines, collecting commission on a \$200,000,000 annual business. They also control the Matson Line.

Other Fields for the Big Five

To profit from consumers' needs on the Islands, the Big Five engage in extensive merchandising. They stock the plantation-owned stores (from which the workers must buy); and several thousand independently owned stores. Moreover, they own outright a chain of wholesale and retail stores, and the largest department store in Hawaii, which they also stock.

They are agents for hundreds of mainland corporations releasing products, ranging from sardines to locomotives, exclusively through the Big Five.

They are agents, too, for scores of insurance companies, dealing in all types of coverage.

They not only are financial and purchasing agents for island companies supplying transportation, electric power, gas, water, ice and so on, but are their actual officers and stockhold-

In addition, Big Five executives sit as controlling interests on boards of the luxury tourist hotels, banks, trust companies, theatre syndicates, newspapers and radio stations.

They are also on the boards of the YMCA, the YWCA, the Community Chest, the Salvation Army, on university and school boards, on the Chambers of Commerce, and on numerous educational and welfare committees.

Finally, they control the political life of the territory, members of the legislature being linked with the Big Five either through former association, or as in the case of the Speaker of the Lower House through being legal counsel for the sugar industry, or through actual blood ties.

Churchill Explains **About Pacific War**

In its efforts to pin the responsibility on Kimmel and Short for the success of the Japanese attack on Pearl Harbor, the report of the Roberts Commission showed in detail that Washington had fully expected the outbreak of war in the Pacific. The report stated further that Washington had believed that the war was "inevitable" because "the policy of the United States as to affairs in the Pacific was in conflict with the policies of other governments."

From this we concluded last week that the Japanese attack on Pearl Harbor was not the cause of the war, but merely the first military step of

Since then Winston Churchill's speech in the House of Commons debate on Jan. 27 has furnished additional material for consideration of

In defending the course of the British government in the Far East, and in justifying the decision of that government to concentrate its forces in Libya rather than disperse them between Libya, the Far East and other potential war fronts, Churchill explained that although he had been aware of the dangers inherent in such a policy, he had followed it because:

"On the other hand, the probability since the Atlantic conference, at which I discussed these matters with President Roosevelt, that the United States even if not herself attacked would come into the war in the Far East and thus make the final victory assured, seemed to allay some of these anxieties. . .

"It fortified our British decision to use our limited resources on the actual fighting front. As time went on we had the greater assurance that if Japan ran amok in the Pacific we would not find ourselves alone. It must also be remembered that over the whole of the Pacific seas brooded the powerful United States fleet concentrated at Hawaii. . ."

In short, Churchill now claims he got assurances at the Atlantic conference from President Roosevelt before the attack on Pearl Harbor that "the United States even if not herself attacked would come into the war in the Far East."

If Churchill is to be believed, and if Roosevelt's assurances to Churchill were made in good faith, then this information reinforces the conclusion we drew from the Roberts report.

To understand the basic causes of this war, to understand why Japan launched the attack on Pearl Harbor, to understand why Roosevelt gave Churchill assurances that the United States would enter the war in the Pacific even if not herself attacked, workers must consider more than the first military acts of the war. They must also study and come to understand the conflicting policies, economic and political, as to affairs in the Pacific and elsewhere, which motivated the contending governments in their acts before the outbreak of military hostilities.

On Parasites

President Roosevelt last Friday jokingly invited the "parasites" to get out of Washington. By parasites, Roosevelt meant only one particular species, wealthy idlers who take up living space needed for war workers in the over-crowded

We're for cleaning out such parasites, of course.

But that's only a beginning. We'd like all the parasites to be driven out. We're for giving Washington a major fumigation and de-lousing.

A particularly vicious parasitic breed is the dollar-a-year man. This insect swarms throughout the war production agencies. It thrives best in an atmosphere of government contracts, sucking profits out of the war.

Another nasty species is the Congressional Southern Democratic Poll-Taxer. This insect runs wild at the smell of Negro flesh or the blood of

. Then there are the brass hats, found usually around the War and Navy Departments, particularly in the procurement divisions. These have a peculiar generosity instinct and are always busily engaged in leading the dollar-a-year parasites to juicy morsels.

But the main type of parasite is the corporation monopolist, who can usually be found in consort with the dollar-a-year variety. This particular parasite thrives in all climates and is found everywhere. To rid Washington of parasites, it would be necessary to rid the whole country of this particular breed, for as long as it survives anywhere, it will creep back again into Washing-

Yes indeed, we're for cleaning out the parasites, big and little, all varieties, the whole blood-sucking swarm - starting in Washington and going right through the land.

And that's just what a Workers' and Farmers' Government will do.

It will take over and operate all the war industries under the control and management of the workers. It will drive the biggest parasites from their feeding places. And when these main parasites wither away from lack of nourishment, all the lesser parasites, who feed off the bigger ones, will also starve to death.

CIO Wage Demands

The CIO officials have called on their affiliated unions to demand wage increases and union security clauses in all forthcoming contract negotiations. CIO President Philip Murray backed up this call with the statement that the CIO will continue to fight for the demands of the industrial workers during the war.

This sounds determined and militant on the surface. But the only program suggested for realizing these demands is contained in Murray's insistence that the War Labor Board act upon them. In short, what Murray and his lieutenants really mean by "fight" is to throw the demands of the CIO workers into the lap of the War Labor Board.

It is no accident that the ClO's demands are raised only after the CIO leaders have agreed to a no-strike policy and the WLB has been es-

Now these leaders can appear to serve the workers' interests without risking governmental displeasure for becoming identified with strike ac-

In this way, the CIO leaders hope to reassure the ranks while yielding to the policy of surrender dictated by the Administration. Their call for wage increases is thus an attempt to cover up an actual betrayal of the workers' interests.

This is a conscious and deliberate policy. The workers have been permitted to say nothing about it. It is a policy contrived behind the backs of the rank-and-file and is now being imposed on them by the union officials, who have completely usurped the policy-making powers of the membership. It is a policy deliberately calculated to forestall militant expression by the workers.

These union officials, therefore, are not acting as leaders in trade union struggles. On the one hand, they have set themselves up simply as attorneys, who will appear before the WLB to beg crusts for the workers. On the other, they will serve as agents of the government to restrain the workers from taking strike actions.

The workers can have no confidence in such officials. The union ranks want officers who will lead them in genuine struggle against the present serious threat to their rights and living standards.

In a relatively brief period, mounting prices and taxes have snatched back every wage gain won by the CIO in 1941 and have imposed additional reductions in real wages.

The workers' economic position is imperiled. It can be protected only through uncompromising struggle, struggle which makes use of every effective weapon possessed by labor. Above all, the strike weapon must not be surrendered.

This means that the workers must repudiate the policies of the union officialdom which are, in effect, a retreat and capitulation in the face of the boss offensive.

The rank-and-file owe it to themselves to elect as their leaders those who put the interests of the workers before everything else. Without such a leadership — a fighting leadership — the unions will degenerate from the status of independent organizations to defend the workers into instruments for binding the workers to the government and leaving them defenseless before the employers.

The Court Clown

Some Reflections On Royalty And the War

By M. STEIN

There was a time when all serious literature revolved around the royalty of the day. The crowned heads supplied the heroic characters for drama and tragedy. The plain folk were used only as characters for comedy. This was also the time of the court clown — the man who supplied the comic relief in the most tragic situations, who always managed to get a laugh by saying the wrong thing at the right

Today, however, while humanity is being bled white for the second time in our generation, the plain folk supply the elements of heroism and tragedy. The crowned heads on the other hand have assumed the role of court clown and supply whatever comic relief there is.

Crowned Heads of Both Camps

To prove the point let us make a brief survey of the fate of some of the crowned heads, demonstrating our impartiality by looking at both the camp of the Axis and the camp of the "United Nations.'

Hirohito of Japan has an advantage over all the rest of them. He is not only emperor, but also the son of God. But although he is thus truly omnipotent, this advantage can quickly turn into its opposite at a future stage of the war when the Chinese soldiers will deliver even stiffer blows against his heavenly work than heretofore. When the Son of God cannot prevail over an "inferior" nation that has no God Emperor to guide it, there certainly will be cause for seditious thinking and agnostic con-

Then there is Victor Emmanuel, King of Italy. After Ethiopia was overrun by Mussolini's blackshirted legions, he was proclaimed emperor with great fanfare and much trumpet-blowing. King Victor Emmanuel is diminutive in stature. In all ceremonial parades and in every other way he is overshadowed by Mussolini. His blue blood no doubt rushes to his face with a feeling of deep shame every time he thinks of himself as emperor now that he has lost his empire. Of course this feeling of shame is not unmingled with fear, the fear of a gambler who has experienced a change of luck and who cannot pull out of the game.

Outstanding on the Allied side is His Imperial Majesty, George VI, sovereign over a quarter of mankind, who has retained his privileges as a monarch without its powers. He has watched the resources of the Empire shrink from month to month in this costly war, as bases are traded for old destroyers, and he has seen the center of gravity shift to the new world, and the Soviet Union and China. He has heard members of his Parliament speak up and voice their fears "that the British Isles eventually might become merely an American outpost in Europe" or "a western outpost of totalitarian Europe." Who knows what George would say today, if he eguld afford himself the luxury of speaking out loud and telling how it feels to be king over an empire that is on the rocks? For without the Empire the King becomes a "luxury" that Britain will no longer be able to afford.

The Royal Racketeer

We will skip going into detail about the humiliation of King Leopeld of Belgium who is a prisoner of Hitler; or of King Haakon of Norway who is trying an army on British soil out of recruits the British manage to snatch in their spectacular but not very fruitful raids on isolated Norwegian islands; or of Queen Wilhelmina of the Netherlands who manages to get her name into the papers by visits to the White House when the calendar is not too

We wish to confine the balance of our remarks to the supreme king-clown of them all, Carol, exiled monarch of the unfortunate Rumanian people.

Prior to the war, Carol was reputed to be one of the richest men in Europe in one of the poorest countries in Europe. He attained this distinction by the most ruthless exploitation of his people. He had a hand in all the more profitable business enterprises in the country, and he exacted tribute from those he did not control outright. In short, he was a racketeer on a royal scale.

He was so thoroughly hated by his people that even Hitler was unable to use him and preferred to place Carol's son, Michael, on the throne as a puppet monarch. Carol was permitted to flee the country, and subsequently after a prearranged comic-opera escape over the Spanish-Portugese border, he finally landed in Mexico to settle down with his mistress and chamberlain. Hitler saved Carol's life from the angry Rumanian masses, but, ingrate that he is, Carol has again reappeared in the public prints. . . where he poses as a victim of Hitlerite aggression.

The Declaration of "United Nations" was signed in Washington early last month, with the adherence of 26 governments and governments-in-exile. It was to serve as a bombshell exploded in the face of the Axis, and as pressure as well on those Latin-American countries who are not exactly toeing the mark. Everything was working per schedule when Carol jumped out of his Mexican obscurity and shouted, 'Me too, I want to be in on the cut."

Denying he has ever abdicated his throne and stating he was thinking of declaring himself regent and prime minister of Rumania, Carol, in his modest but royal way, insists on adhering to the "United Nations" pact and thus joining the "war for democ-

Carol's act was a little embarrassing, and his pledge of adherence may not be accepted. For it revealed how many parasites of all calibres there are, plotting to return to their former places on the bleeding body of Europe just as soon as the super-parasite Hitler is removed; and there are others who had already signed the Declaration who felt it might attract toc much attention to their own status if they let Carol in on it too.

But they are all making their calculations prematurely. Once the suffering masses of Europe get rid of Nazi oppression and terror, they will not want the Carols to come back and rule over them. Instead they will fight on toward a social order where there will be no room for the Carols, whether they be kings or commoners.
