The film "Mission To Moscow" is an example of the kind history through distortion, omission or pure invention of facts," according to a letter in by John Dewey, noted American and secretary of the International Commission of Inquiry into the Moscow trials. The Dewey-LaFollette letter

also declares: "'Mission To Moscow' deals essentially with three things: Soviet history since January, 1937: international relations since that time, and American history since 1939. It falsifies all three...

"In this synthetic trial (shown in the film) the accused confess that their alleged crimes were directed by Trotsky. What is omitted is the testimony in the actual trials to specific alleged in the world press and conclusively disproved by evidence offered in rebuttal before the international commission of inquiry of which the undersigned were respectively chairman and secreafter painstaking investigation, concluded that the Moscow trials were frameups—a conclusion endorsed by intelligent world opinion at the time of its anouncement."

Administration this week announced that starting June 1, prices of seven items would be reduced by 10%. The items include meats, butter and coffee. The "roll back" in prices is to be achieved through a subsidy to the meat packers, dairies and coffee processors.

At the same time the OPA promises stricter enforcement of price ceilings.

These promises will not succeed in the least in changing the workers' minds concerning the urgent need for wage increases to meet the rising cost of living. COMPLETELY INADEQUATE

First of all, the workers know that the increases in the prices of necessities have been far greater than 10% on a few items. On May 7 President Roosevelt told his press conference that he regards workers in the mines which have been taken over by the government as government employes who have no right to strike. This was understood as a sign of the administration's readiness to use every means at its disposal to break another coal strike and to uphold the authority of the greatly discredited War Labor Board.

But Roosevelt was answered only a few hours later when John P. Busarello, president of District 5 of the UMW, declared that unless an agreement covering the Appalachian mine field was reached by midnight, May 18, "there will be no bituminous fuel produced in this district at least." He reported that the union's district board, covering the de-3

MINNEAPOLIS, May 11 (By wire) - V. R. Dunne, Socialist Workers Party candidate for mayor in yesterday's primary election, was credited with 779 votes in the first election returns. The primary vote was the lowest in the city's history, constituting a decline of 27% from 1941. Dunne's vote represents a substantial percentage increase over what he received as mayoralty candidate in 1937. He finished eighth among the ten candidates. The incumbent Republican, Kline, and H. Humphrey were nominated for the regular election to be held next month.

held at the YWCA in New York City on May 7-9. A conflict occurred between the iberal bureaucrats who run the organization and the Stalinist bureaucrats who'd like to run it. There was no real ideological conflict between the two groups, both of which agreed on supporting the war. This was demonstrated most forcibly by the fact that despite the shellacking of the Stalinists at the Conference, the Daily Worker for May 11 hailed it as a "victory for the war effort."

Students, and youth in general, will find nothing to solve their problem in this conference which abounded in generalizations about "dynamic revision of society," "new America," etc.

No really progressive and militant opinion was represented except possibly for John Loeb, a delegate from California, who was hardly able to represent a working class viewpoint. Loeb was unable to get a resolution put forward warning liberal and labor groups against the Stalinists, nor was he allowed to present a resolu tion defending civil rights for minority political parties. Among the many reactionary

resolutions passed was one calling John L. Lewis a "psychotic labor leader" and bracketing him with "discrediting labor." When Loeb tried to protest and defend the mine workers, he was not recognized by the chairman.

neart of every true believer in working class democracy. The miners were not alone in their fight. Wherever the rank and file workers had the chance to express themselves, they spoke up in no uncertain terms in solidarity with the miners. The Detroit conference representing 350,000 auto workers was a splendid example of this. There is the only one real guarantee against the triumph of totalitarian rule in this country: A working class that acts in solidarity and refuses to be intimidated by the bosses and their agents.

There is one more lesson the American worker must learn from the coal crisis: The need for independent working class organizations in the political field-the need for an Independent Labor Party and an independent labor press.

- LEON TROTSKY

Morality And The Davies' Film

One of the basic factors in the degeneration of the *Soviet Union has been the Stalinist bureaucracy's attempt at reconciliation with world capitalism at the expense of the world working class. In this is to be found the true explanation for Stalinism and its purges, frameups, falsifications, murders and assassinations. Because of the revolutionary traditions of the Soviet masses, the Stalinists had to carry out this program of reconciliation with capitalism in the name of socialism. Thus Stalinism has a lie and a frameup at its very core.

We fight Stalinism and its frameups in the name of socialism and the international working class, whose cause can be advanced by the truth alone and never by lies. This is the basis of our militant attack against all frameups, including the Davies' film, "Mission To Moscow."

Other voices of criticism have been raised against this film on supposedly "moral" grounds. These people, even when they did denounce the purges and murders in the Soviet Union, never neglected to preach sermons on the superior morality of democratic capitalism to Stalinism, which this gentry-dropping their scruples for the occasionidentified with Bolshevism. The fact is, as they know very well, that Bolshevism and Stalinism

Anti-Poll Tax Bill Heads For A Vote

218 signatures have been secured for Discharge Petition No. 3 in the House of Representatives. This means that the House Judiciary Committee, dominated by the poll taxers, is deprived of its control over the bill to abolish payment of poll taxes in federal elections and that the House of Representatives will vote on the measure on May 24.

It will be remembered that it was also necessary. to get a discharge petition signed to force the anti-poll tax bill out of the Judiciary Committee in last year's House of Representatives. But there is an important difference: a year and a half of the last House's two year term had passed before the necessary 218 signatures were obtained; this year they were secured in four months. That was possible not because the present Congress is any less reactionary than its predecessor but because the masses of the people are more educated to the meaning of the poll tax and more determined to wipe it out.

It appears certain also that the anti-poll tax bill has a good chance of being adopted by the House this year. But the obstacles that the bill will then face in the Senate-where the members from Georgia have as much voting strength as the members from densely-populated New York (and a better strategic position)-will be even greater this year than they were in 1942 when the anti-poll tax bill was filibustered to death.

The Southern Democrats hold the balance of power in the Senate. Nobody, of course, expects them to vote to abolish the undemocratic poll tax restrictions which enabled them to be elected. But because they can swing a majority of the Senate on any given issue to either the non-Southern Democrats or the Republicans, they possess a strength greatly out of proportion to their numbers. By their performance of last year we can be certain that neither the Roosevelt administration nor the Republican leaders of Congress will be willing to offend the poll tax Senators unless such tremendous pressure is exerted on them by the labor, liberal and Negro organizations that they see no 'other way out. That is why one of the key tasks of these organizations in the coming period is to put as much heat as possible on both the national Democratic and Republican leaders.

Everyone acquainted with the history of the poll tax knows that its advocates pretended it was to be used to uphold "white supremacy" by disfranchising the Negro, but that actually it was used to take the vote away from even more Southern white workers than Negroes. But not enough workers are aware that the poll tax in one-sixth of the states directly affects the workers in all the states. They must be shown that the poll tax makes possible the election of the most reactionary spokesmen for Big Business and the large agrihave nothing in common and that the purges were – cultural interests who take the lead in adopting in fact an expression of the fundamental hostility anti-labor legislation which strikes at the interests of the workers in Michigan and California every bit as much as it strikes at those of the Southern

More Denunciations of **'Mission To Moscow' Lies**

SATURDAY, MAY 15, 1943

The falsifications in the film "Mission To Moscow" are so raw and crude that many liberals and even conservatives have been unable to swallow them. Thus, despite Warner Brothers heavy advertising for the film which resulted in generally favorable comment on the part of the movie critics, a number of protests are now beginning to be heard.

Dorothy Thompson was the first important columnist with the courage to speak out against the film. In the N. Y. Post for May 5, she wrote: "The characters are phony; the history is phony . . . The picture is full of fiction presented as fact. . . The famous purge trials are grossly fictionalized."

In the May 8 N. Y. Times Ann O'Hare McCormick calls it "the false picture of America, the false picture of Russia and the false picture of history that are combined in the distorted composite to which the former Ambassador unluckily gives his authorization in an introductory speech."

An editorial in the May 8 issue of The Nation calls the picture "whitewash" and asserts: "In the matter of the 'purges' The Nation has always held that the evidence on which the alleged Trotskyist conspirators were convicted was unconvincing and the film version of the trials does nothing to change this opinion."

The movie reviewer of the New Republic, Manny Farber, states in the May 10 issue of that magazine that the picture "makes up its own facts" for the history of the period of the purges and the Moscow trials. "Any truth that has ever been told about Russia heretofore now has this obstacle to face."

The Washington columnist of the N. Y. Daily News calls it a /"fact-defying propaganda film."

The New Leader of May 8 carries the comment of a number of liberals and ex-radicals, some of whom denounce it as "a blow to democratic unity in America" and "moral depravity." (See editorial on "Morality and the Davies' Film" in column 1 of this page.)

Were British Involved In **The Moscow Trials Plots?**

Last week's Militant told of many glaring omissions in the Hollywood-Davies version of "Mission To Moscow" and explained why the producers and authors of the picture thought it wise to leave them out. Here we add another:

In the third Moscow trial, held in March, 1938, Bukharin and others were made to confess that they had been plotting not only with Germany and Japan, but also with Britain and Poland.

Stalin's prosecutor at the trial, Vyshinsky, stated: "Implicated in this case are the remnants of. ... at least, as has been exactly established by the trial, four foreign intelligence services, the Japanese, German, Polish and British - and, it goes without saying, all the other foreign intelligence services which maintain friendly, so-called operative contact with the above-mentioned intelligence services."

Thus, if the official version of the Moscow trials is to be believed, the defendants were plotting to overthrow the Soviet Union with Britain and with

of Stalinism to Bolshevism.

Now the film "Mission To Moscow" has put the democratic capitalist moralists in a slight dilemma. For this film, which defends and continues the Moscow trial frameups and whitewashes the crimes of Stalinism, has been "made in America" with the obvious blessings of our highly moral democratic capitalist administration in Washington.

These critics denounce the film as a falsification of history, and in this they are right. They condemn it as an offense against morality, and there is something to be said for this thesis too.

But they leave unexplained how such a conglomeration of frameups and offenses against morality-which they themselves have hitherto explained as Soviet products-could make its appearance in the United States and get the nod from Washington.

They have, of course, a reason for remaining silent on this point. In order to tell the whole truth the liberal and social-democratic critics of "Mission To Moscow" would have to admit that, sad as it may seem, the political leaders of democratic capitalism are no less cynical, dishonest and immoral in pursuit of their aims than Stalin who learned his morals and manners from them.

But if they permit themselves to utter this simple truth, they would destroy their central thesis about the superior virtues of a system of capitalist exploitation, robbery and war under democratic forms. Therefore our highly moral ladies and gentlemen keep mum on this not unimportant point and, consequently, fail to tell the whole truth.

But isn't it well known that a half-truth is a form of falsification? And isn't this squeamishness and reticence on the part of our democratic moralists, this failure to tell the truth, the whole truth and nothing but the truth, isn't this-God help us-just a little bit immoral?

The poll tax issue should be raised in every trade union local in the country. The abolition of the poll tax will strengthen the labor movement. The fight to abolish it will help to further open the eves of the trade union members to the character of the Republican and Democratic Parties and to the need for building an Independent Labor Party.

Bookburning

May 10 marked the tenth anniversary of the infamous book-burning night when the Nazi party "cleansed" German culture of "subversive" literature, including the works of Leon Trotsky. The Nazis and their capitalist masters hoped that the burning of liberal and Marxist literature would remove all anti-capitalist thoughts from the minds of the workers.

What the Nazis failed to understand was that the workers' struggles against capitalism were not primarily the product of written words, but the bankruptcy of the system itself. So long as the root cause of poverty, unemloyment and war remains, the workers will continue to fight for their right to peace and bread - despite bonfire fed by "subversive literature."

Ten years after the Nazi bookburning the American ruling class employed a similar method for suppressing working class protests when it banned The Militant from the second class mails and destroyed a number of issues. As far as we know, no demonstrative bonfires have been made of The Militant, but this is only because the American labor movement is still strong and capable of defending itself.

But the authorities in Washington have shown that they share with the Nazis a police mind which thinks that truth and human progress can be prohibited by force.

That force can delay progress and make the creation of a just society more costly in human lives, is true. But all the night sticks and all the burning of "dangerous thoughts" cannot long prop up this capitalist system and its terror, hunger, and bloodshed,

If you catch a man in a lie, his whole story is placed in doubt. Davies should be compelled to publicly state whether or not he accepts this part of the official version of the trials; and if he rejects it, on what ground he pretends to accept the other parts.

The "democratic" press is now engaged in hailing the Moscow trial frameups. As we showed last week, the fascists also liked the trials which resulted in the execution of most of the leaders of the Russian Revolution and Mussolini even wrote an article declaring that by the trials "Stalin is rendering a commendable service to fascism."

There were other reactionaries who had opposed the Russian Revolution from the very beginning and who were ecstatically happy about the trials. After the first trial (Zinoviev-Kamenev) in August, 1936, the Golos Rossii, which advocated the overthrow of the workers' state and the restoration of the Czar, stated on Sept. 1, 1936:

"This is the first time that we are pleased with an execution among the millions of executions carried out by the Bolsheviks . . . They will not stop at Zinoviev and his associates any more than the French Revolution stopped at Danton . . . '

And the Vozrozhdenye, likewise monarchist, printed the following verses on August 29, 1936:

We think thee, Stalin! Sixteen scoundrels, Sixteen butchers of the fatherland, Have been gathered to their forefathers!

Today the sky looks blue, Thou hast repaid us for the sorrows of so many years!

But why only sixteen? Give us forty, Give us hundreds, Thousands. Make a bridge across the Moscow river, A bridge without towers or beams, A bridge of Soviet carrion. -And add thy carcass to the rest!
