CIO and AFL Ranks Support The Miners

J. P. Cannon Speaks On

'End Of The Comintern'

The CIO auto workers and the AFL seamen put their important unions on record for full support of the miners' fight early in the struggle. And in doing so they were undoubtedly speaking for the overwhelming majority of the membership of all unions, and gave the lie to the boss press claim that the miners stood alone.

One thousand delegates representing directly 350,000 Michigan members of the United Auto Workers, meeting in conference in Detroit May 2, rejected a resolution of their International officers condemning John L. Lewis and the miners' use of the strike weapon, and instead adopted a forthright resolution completely solidarizing themselves with the militant stand of the miners.

Likewise 1,000 delegates representing all eastern locals of the United Auto Workers, meeting in New York on May 6, adopted a resolution, specifically defending strike action by the miners, as follows:

"Whereas the miners are now engaged in a bitter struggle for a decent living standard and whereas this struggle MAY CONCEIVABLY BREAK OUT INTO INDUSTRIAL WARFARE of the old kind, and whereas the miners will be opposed in their just demands by various antilabor forces, and the fight against John L. Lewis is not the issue in this particular case, and whereas it is evident that the miners' fight, involving as it does the struggle against lowering the living standard, is actually the fight of every working man and woman of America; therefore be it resolved that the delegates here concerned go on record as endorsing the demands of the miners."

the union as a whole.

Likewise the Seafarers Log, official organ of the Atlantic & Gulf District of the Seafarers International Union (AFL) declared in an editorial on May 14:

"The miners' struggle against the WLB, a 'court packed against labor,' is all labor's struggle. A miners' victory over the WLB and the Little Steel Formula would be a victory for all union men from coast to coast."

Akron's rubber workers demonstrated their solidarity with the miners by emulating them in a five-day strike last week. Chrysler workers did likewise in a four-day walkout.

Don't believe the lies of the boss press! The workers, both AFL and CIO, are for the miners -even where the top union officialdom and the finky Stalinists, servile agents of Roosevelt, are preventing the masses in the unions from expressing their solidarity toward the miners.

THE MILITANT

Significance Of The Akron-Detroit Strikes

By M. Stein and J. Andrews (Special to THE MILITANT)

TWO-

Within one week the major rubber plants of Akron, the rubber capital of the country, were shut down by a strike of over 50.000 workers. In Detroit, "the arsenal of democracy," 29,000 workers of the Chrysler Corporation concluded a four day strike. To this can be added lesser strikes in recent days in the Ohio-Michigan industrial area, which got only scant notice.

These strikes have been stigmatized as outlaw - without the sanction of the international union officials, in violation of their no-strike pledge, and in defiance of the elaborate government machinery that is supposed to be strike-proof.

When the coal miners struck May 1, the government, the press and radio blamed it on John L. Lewis and his alleged personal grievance against Roosevelt. What about these strikes? To whom are they attributed by these gentlemen? There is no answer forthcoming to this question. Unlike Lewis, R. J. Thomas of the Auto Workers and Sherman Dalrymple of the Rubber Workers have left no stone unturned to keep the workers in the plants.

But let us put aside the question of personal responsibility which was so much emphasized in the coal strike in order to sow division in the ranks of the miners and break their fighting morale. Let us turif instead to the real cause of the strikes a cause powerful enough to have the effect of an explosive in breaking through the anti-strike dams and safeguards so carefully constructed by Roosevelt in cooperation with the top union officials.

Real Cause of Strikes

The monopoly corporations have been having a Roman holiday with the no-strike pledge of the AFL and CIO leaders. Bloated with swollen war profits, they took the no-strike pledge as a license to trample over the hard-won union conditions of the workers, to make a mockery of collective bargaining and contractual relationships. The grievance committees in the shops have been given an endless run-around every time they have tried to meet with the company representatives. We had a dramatic demonstration of this in the Ford Highland Park plant in Detroit on May 21 when the grievance committee representing 12,000 workers staged a sitdown in the offices of the company and sat there for 23 hours in the hope of getting a hearing. The Chrysler Corporation also has been completely cynical in its defiance of the union. The defiance of the corporation has incensed the workers, who have not known defeat and are cognizant of their own strength.

The Chrysler workers, who gave vent to their feeling of outrage in a four day strike, voted to go back to work. But they are still defiant, they are more than ever aware of their own strength and they most assuredly did not return in a spirit of defeat. They were promised that the company would negotiate in "good faith" and they have returned to see if the magnificent four' day demonstration of their strength has impressed the company sufficiently to effect a change of attitude.

The strike in the rubber plants in Akron was different from the strike in Detroit only in that the War Labor Board was more directly involved. The War Labor Board, which has been acting more and more openly as the labor relations agency for the' corporations, added insult to injury in a decision granting only a 3 cent an hour increase. Basically, it is the no-strike pledge

which made it possible for the WLB to ignore the needs and demands of the workers.

The Stalinists, who tried to break the strike of the miners, have carried on their despicable activity with just as little success in Detroit and Akron.

Stalinist Strikebreaking

In Detroit they were the only ones who tried to inject the element of personal responsibility into the strike — that is, to find a scapegoat in an individual charged with responsibility for the strike. The choice of the individual has been very unfortunate for them. They branded Walter Reuther as the man responsible for the strike. Edelen, president of the Plymouth local, and Nat Ganley, Secretary of the Tool and Die Local 155, both Stalinist spokesmen, made haste to issue a press statement denouncing the strike and accusing Reuther of engineering it for inner union political reasons.

When charging Lewis with responsibility for the coal strike, the miners' enemies were able at least to point to his renunciation of the no-strike pledge. In the case of Reuther, however, a man who is publicly on record in support of the no-strike pledge,

and who boasts of the success which he has had in preventing strikes in the General Motors division of the UAW, of which he is the director, this brazen falsehood had the effect of creating a storm of indignation among the striking workers.

Walter Reuther was chosen as the butt of attack by the Stalinists not because he backs the strikes, but because he opposed the Rickenbacker-Browder incentive pay speedup scheme.

The Stalinist method of blaming strikes on "agitators" is not unfamiliar, since it is borrowed from strike-breaking textbooks of the bosses.

While the striking workers had no means of settling scores with the Browder gang, they did not forget on the very day they voted to return to work to settle accounts with UAW Chrysler director Leo Lamotte, who had echoed the Stalinist line in the strike. A resolution was unanimously passed demanding that the UAW Executive Board remove Lamotte from his post without further delay.

In Akron the workers remained just as unconvinced by the Stalinist strikebreaking line as the Detroit workers. Browder's antistrike speech, delivered in St. Louis, was

that \$2."

reprinted and widely distributed as a full page ad in the Summit County Labor News, the best known labor paper in the area. The speech appeared in the issue of May 20. The next day the strike broke.

Powerful forces were lined up against the workers. The fact that the workers dared to strike in defiance of all these forces underlines all the more the genuine character of the workers' outrage and indignation. They revolted against the way in which the no-strike pledge has been interpreted by the corporations and the government as a green light to ride roughshod over the conditions and standards of the workers won over a period of years in hardfought battles.

The Detroit and Akron strikes, coming shortly after the mine strike, and being a direct continuation of it, have challenged both Roosevelt's wage-freezing order and the no-strike pledge. These are the pillars upon which depends the whole administration policy of unloading the war costs on the workers' backs. As yet the struggle has not been resolved. Both sides have measured forces, have had skirmishes, but have not come to real grips.

puppets met only at Stalin's behest and decided only upon his borders. Will it be so difficult for C.I. presage the dissolution of him to find a way to "suggest" to the Stalinist parties in the counist parties of this country or of England that they follow certain policies? And will not these oureaucrats fall all over themselves to abide by the "suggestion ?"

dissolution.

It is true that no more proclamations, statements or nanifestos will be issued in the name of the Executive Committee of the C.I. If we take into consideration, however, that, since Hitler's attack on the Soviet Union, no statements have been forthcoming from that body, it can be seen that even in this minor aspect of the situation there is no actual change.

But if, for the present, the dissolution of the C.I. means no essential change in the Stalinist system, it does not mean that it has no significance. It is, in the first place, an indication that Stalin will go a long way to yield to the pressure of the capitalist states. It must be recognized that in dissolving the C.I. he has not given up anything important, even from his own standpoint and surely from the standpoint of revolutionary soialism.

other hand, if the situation be-He has surrendered something tween the Soviet Union and its hat is of importance only to the present allies should become sincere rank and filers of the tense, he will utilize his parties Stalinist parties, who mean to be as his fifth column.

revolutionary. They like to think Should Stalin decide to dissolve of themselves as internationalists his parties he will, in all them the bureaucrats will undoubtedly intimate that the dis-

tries where they still exist? These parties are a convenient, if not a powerful, weapon in Stalin's hands. Through them he is assured of a certain amount of support in countries outside of the Soviet Union, regardless of the character of his actions. They are his propaganda mediums. They are also a form of insurance against the growth of Trotskyist, parties. Dissolve the Stalinist organizations and those workers who want to join a revolutionary party and

* *

mistakenly consider the Stalinist parties as such will have nowhere to go except into the Trotskyist movement. All these factors favor the proposition that Stalin will not dissolve his parties unless he

stands to gain something important thereby. It all depends on his needs, on how much pressure is exerted on him by the capitalists and on what price they are willing to pay in return for the dissolution of the parties. If, after the war, or even before the war is over, he is in desperate need of economic help he will not hesitate to dissolve the parties n return for such help. On the

body of a dozen or more in-

dividuals is one thing; to dissolve

a party with thousands of mem-

bers is quite another thing. Dif-

ferent methods must be follow-

CHARLES PAMPHLET HIGHLY PRAISED

The second edition of the best-selling pamphlet by C. Charles, Your Standard of Living - What's Happening to It?", came off the press last week, Pioneer Publishers announced. At the same time the pamphlet was highly praised by a reviewer, Thelma Thurston Gorham, in the May 22 issue of the prominent Negro weekly, the Pittsburgh Courier. Her review is printed below in full:

"Clamorings of the Farm Bloc focus our attention on the food situation and the rising tide in prices...but we hardly need to look as far afield as Congress to view with alarm what is happening to the old standards by which we used to live. You feel like moving to the outskirts of town and raising your own foodstuffs every time you go to the market. But you can't move and you'd like to figure out some way to protect your rapidly-falling living standards. For you, we recommend a 32 page pamphlet, 'Your Standard of Living - What's Happening to It?' by C. Charles (Pioneer Publishers, 116 University Pl., New York).

"With charts and estimates based on information made available by the Consumers' Union, it not only points out how the attack of frozen wages, skyrocketing prices, food shortages and mounting taxes is affecting the working classes but suggests a protective program for the workers who pay and pay. For your own enlightenment and that of your friends, you'd make no mistake to get several copies of this informative little pamphlet (price 5 cents)."

The history of our century Women Get teaches us that a navy is an ex-WLB Run-Around cellent political barometer. We need only recall the revolutionary Editor:

Your article on the Akron rubman sailors occurred; and on Oc- my mind a similar action recently

In the Buick Aviation plant at Melrose Park, Ill., the management had been chiselling on its agreement to pay women the same wages as the men. After six months, the women could stand it masses will finally arise, destroy no longer, and introduced a re solution at a membership meeting a Saturday. This action was overwhelmingly approved, and then endorsed by the stewards and com New York City mitteemen. Almost at the same time, the management proceeded to flaunt the protests by an order stating that hereafter women hired for machine jobs would be paid 10 cents below the hourly rate for men. This set the local on fire.

> The regional office, seeing the temper of the membership, com municated with the International office who got after Simpkin of the WLB and obtained a promise from him to proceed immediately to hear the case. Thereupon the demonstration was called off, a the last moment.

But many people in this new local learned some very importan things. First, that the Interna tional's do-nothing policy gets on nowhere. Secondly, that the employers and the WLB can b rought to heel when they see th vorkers are determined to carry through militant action.

Rising Living Costs

С. Н.

And Gets the Bum's Rush When the N. Y. Times, the authoritative organ of

Browder Woos the 'Times'

American capitalism, greeted Stalin's order dissolving the Comintern by demanding that the American Stalinists immediately follow suit, Earl Browder promptly replied that "we are prepared to discuss. . . that the Communist party should also dissolve itself." (N. Y. Times, May 29.)

For his part, Browder then placed on the agenda "for discussion" two additional proposals: 1) "The offer of the Communist party of cooperative effort to lay the 'specter of communism'." 2) To further cooperate in introducing a totalitarian dictatorship in, this country, or, in Browder's words, if "our responsible war leadership should consider it necessary to victory the normal operation of our political party system should be suspended. . .we are prepared to discuss that also." (Idem.)

The Times dismisses Browder's grovelling with a curt contemptuous answer. The Times editors know who has the final say on this and all other really important matters in connection with the C.P. Why should they discuss with all the Browders, big and little, who must do the bidding of their master in the Kremlin and perform any chore, no matter how dirty, in the labor movement? The capitalist Times has the same kind of contempt for the Stalinist sell-out artists that the police have for stool-pigeons.

The very same thing applies to Browder's offer to "lay the specter of communism." Why discuss with Stalin's flunkeys the plans to crush the German and European revolution, and the movements of the Asiatic peoples for emancipation? Such questions are discussed with the Kremlin itself. As regards establishing a dictatorship in this country, that is something that the American capitalists will discuss only among its top circles, and least of all with hirelings like Browder.

But Browder's proposals will indeed become the subject of discussion not only within the Stalinist party and its periphery but among the American workers as well. Even the most politically backward can now appraise the Stalinist scabs in their true light. Today, they are the most vicious strike-breakers in the trade unions. They are ready to surrender whatever democracy the American people still possess and bow down to the totalitarian rule of the capitalist class. They are not communists as Browder admits, but anti-communists.

A federal grand jury, in session in Pittsburgh since the beginning of April, voted last week to indict the Carnegie-Illinois Steel Corporation, subsidiary of the powerful U. S. Steel, for selling the government substandard steel armor plate and thus endangering the lives of thousands in the armed forces and merchant marine of the United States and its allies.

The monopolists of U. S. Steel have tried to shift the blame for this crime onto the shoulders of four of its employes, and government officials had tried to secure an indictment against these four. But the grand jury refused to indict them, thus indicating indirectly at least that the evidence it had sifted showed the responsibility for the criminals frauds lay with the steel corporation itself.

The indictment accused the corporation of falsify

9. The defense of the Soviet Union lawyer. against imperialist attack.

Historic Meeting

The mass meeting in New York City last week addressed by James P. Cannon derives its importance above all from the fact that it comes as an affirmation of international solidarity in the midst of the Second World War. It testifies that the internationalism of the working class is indestructible.

To philistines a public demonstration of infernationalism by more than 300 revolutionary workers is something to scoff at. In the same way, their predecessors jeered at a handful of internationalists during the first world war, assembled in a little Swiss village, Zimmerwald, and later at Kienthal to reaffirm internationalism and to begin building the Third International in place of the dead Second International.

Lenin and Trotsky were hardly able to mobilize thirty co-thinkers in the whole of Europe. They could only project the need of a new international, which was not formed until 1919, that is, two years after the victorious Russian revolution. But today, even pedants in capitalist universities understand the historic importance of Zimmerwald and Kienthal where internationalism was reaffirmed in the last war. Moreover, Lenin and Trotsky had to begin their fight for the new international, only after the collapse of the old one had caught the entire revolutionary generation by surprise.

But it is twenty years since the Russian Left Opposition began its heroic and unprecedented fight against the bureaucratic degeneration corroding the Soviet Union and the Communist International. It is almost fifteen years since the American Trotskyists, headed by James P. Cannon, initiated the struggle for the program of the Russian Left Opposition in the Communist movement of this country. It is almost five years since the Founding Congress of the Fourth International, the only International that met on the eve of the war, and during it; the only International that has continued the work of Marx, Engels, Lenin and Trotsky in their spirit and according to their ideas; the only International that has survived the war; and the only one that will survive in the days ahead.

The New York meeting is important historically because it is striking proof that despite the be-

CIO President Murray has pleaded with Con-

gress to reject this tax-grab. But it seems that these ultra-reactionary Democratic and Republican politicians intend to pass the bill, despite the protests of organized labor. Organized labor has no reliable representatives of its own in Congress to expose and prevent the projects of the millionaires and their agents.

Thirteen million trade unionists and their families count for less in the eyes of the present Congress than America's 60 ruling families! Their tax 'steal' provides one more powerful argument for the building of an Independent Labor Party by the trade unions. Without the weapon of independent political action the workers cannot counteract the blows inflicted upon them by the profiteers and their Democratic-Republican agents in Washington. ******

Need For For Labor Party

Dobbs' Tour Stresses

(Continued from page 1)

War II, the speaker pointed out, the working class was more and more confronted with acute problems, no longer to be met and solved in the old way. The misleaders of labor surrendered the one really effective weapon of the trade union struggle-the right to strike. Every conflict, even those involving the most elementary union demands, found the workers no longer facing an individual employer nor an association of employers, but the executive committee of the capitalist class as a whole—the government. Under the impact of unbridled reaction, when the capitalists are trying to seize the opportunity of the war crisis to destroy the labor movement, the workers are becoming aware of the stupidity of giving political support to their would-be executioners, of both the Democratic and Republican varieties. In this situation the American working class is imtoward a complete break with pelled, in order to preserve its

to forge new instruments of struggle. THE NEW STAGE AND ITS NEEDS

In the space of this report it is of course impossible to reproduce the whole of Comrade

provides such à bridge.

Dobbs' analysis of the critical In this stage of development, period in the life of the American Farrell Dobbs emphasized, it was working class. It was a real treat necessary to intensify the camfor those able to attend the paign for independent labor action meeting and we all came away by transforming the Labor Party with a much better understandslogan from a slogan of propaing of the nature of the problem ganda to one of agitation. There and the necessity for mobilizing is a gap between the political all of our forces for a bang-up backwardness of the American campaign. working class and its revolution-

Just to start the ball rolling, a ary power, its militant tradition of struggle. The problem is to collection was taken at the meetoridge this gap; and the Labor ing which totalled \$100. Comrade

Warning to All Purchasers of **Bundle Orders**

The Militant has been informed by the New York Postmaster that placing copies of this paper, on which no postage has been paid, in mail receptacles used for the receipt or delivery of mail matter, is a violation of the postal laws, punishable by a fine of not more than \$300 for every such offense. The Militant has always scrupulously adhered to the letter of postal regulations. In the interest of safeguarding The Militant against persecution, we urge all purchasers of bundle orders of this publication to comply rigorously with the above-mentioned postal law.

ing its test records in order to hide its dirty work, of withholding its records for 24 hours from government investigators for the purpose of destroying some of them and thus "concealing from the government agencies the fact that numerous fictitious reports of physical tests (on the steel sold) had been made."

Meanwhile, another corporation which has been caught redhanded in the sale to the government of defective war material, on which the lives of soldiers depended, seems to be doing all right for itself. The Anaconda Copper Mining Company, which controls Anaconda Wire and Cable, indicted by the government early this year, last month reported a profit of \$9,085 359 after taxes for the first quarter of 1943.

There has long been a concerted drive in the press, radio and pulpit to convince us all that profits have been taken out of this war, or practically so.

Last week's New Republic publishes a table of figures, not its own, but those compiled by the National City Bank and based on the "net incomes of all active corporations in the United States." This table shows that profits of Big Business, even after federal taxes had been deducted, increased approximately 70% from 1939 to 1942. Furthermore, in the first quarter of 1943, profits were 7% higher than in the corresponding period of 1942.

K

Even the bankers can't hide these facts, but they can hide the fact that the profits of "all active corporations" go far higher than the estimated 70%. Hidden profits have zoomed the booty into the realm of astronomy.

There are many ways, legal and otherwise, to hide profits. One is through "property improvements," i.e., enlarging the plants at government expense. Other ways are: huge salaries to company officials, swollen advertising bills, long-term amortization, reserve funds, emergency funds, etc., etc.

What they really mean when they talk of taking profits out of this war is-keeping them out of the public record.
