Prominent Union Leaders Will Address Rally To Be Held at the Hotel Diplomat on June 8

George Novack, National Secretary of the Civil Rights Strike To Achieve Defense Committee, now on a coast-to-coast speaking tour on behalf of the 18 imprisoned Local 544-CIO and Socialist Work-ers Party leaders in the Minneapolis Labor Case, will address a ers Party leaders in the Minneapolis Labor Case, will address a mass meeting in New York City, June 8, at the Crystal Ball Room of the Hotel Diplomat.

Outstanding leaders of unions, liberal organizations and working class political parties will Pattern Of Peace speak at what is expected to be the greatest public demonstration thus far held of united labor and liberal support behind the campaign to free the 18 and secure repeal of the infamous Smith "Gag" Act under which they were convicted.

UNION SPOKESMEN

Among the well-known union leaders who will participate as speakers are Thomas DeLorenzo President of Brewster Local 365. **CIO United Automobile Workers:** Samuel Wolchok. President of the United Retail, Wholesale and Department Store Employees, CIO and George Baldanzi, Executive Vice-President of the CIO Textile Workers Union.

De Lorenzo, who is himself facing a frameup indictment growing out of his militant union activities, has recently joined the National Committee of the CRDC, as did Baldanzi, who will act as chairman of the mass meeting. Wolchok heads the union which lead the Ward strike in Chicago.

Other speakers will include Roger Baldwin, Director of the American Civil Liberties Union, which has backed the defense of the 18 from the start of the case; Norman Thomas, of the Socialist Party; Daniel Bell, Associate Editor of the New Leader and Albert Gates, Editor of Labor Ac-

Foremen In Detroit

DETROIT-On the 28th of April, the foremen of the Connors plant of the Briggs Manufacturing Company walked out on strike. They were followed in short order by the foremen in the other 5 Briggs plants, Hudson Motor Car Company, Packard, Aeronautical Products, Gar Wood and Murray Body. Detroit was in the throes of another labor upsurge, this time drawing in the strategic section of the workers functioning in a supervisory capacity. The main issue, and almost the sole issue in dispute, was the demand for recognition of their union-the Foremen's Association of America.

For over a year, the FAA had been asking for recognition but their case has been shunted and shoved around between the NLRB and WLB without result. In the first week of the strike, Robert Keys, president of the FAA, clearly posed the issue in dispute. "The National Labor Relations Board," said Keys, "has denied them (the foremen) the right to bargain collectively. The Manufacturers' Association has taken

advantage of this to discriminate against foremen whom they suspect of union activity. The War Labor Board, for many weeks, has taken no action on urgent telegrams which I have sent, explaining that the men

were insisting on a strike and that they were becoming deaf to pleas to refrain from striking. Wall Street's New Contingent

'Unanimous'ConventionPlaces Seal On Dissolution Of C.P.

"COMMUNISTS END PARTY, MAP NEW ORGANIZATION." With this front-page banner headline the Daily Worker announced May 21 the dissolution of the Communist Party action of organized labor, would the Roosevelt administration has and its conversion into a "Communist Political Association." The resolution to dissolve, put raise the self-confidence of the gone through several major laforward at the party convention by Earl Browder, was a mere formality, rubber-stamping a workers and provide an infectious bor crises. The first, that of the decision reached last January by Browder and his chieftains and announced at the Plenum of the example for other sections of the four coal strikes, has entered into National Committee. Needless to add, the convention passed the resolution "unanimously." All labor movement to follow. It was the consciousness of the Amerithe known opponents of the step within the ranks had previously been stifled or railroaded out of this fear that motivated the seiz- can workers as the first successthe party.

Army Takes Over Only After Workers Set Up Picket Lines

Government Machinery Mobilized to Break Strikes in the Interests of Big Business

By C. Thomas

As soon as the resentment of the workers, aggravated by the deliberate stalling tactics of the War Labor Board, erupts into open resistance against the provocative acts of management, the whole machinery of the federal government is mobilized as a strikebreaking weapon in the service of Big Business. That is the real significance of the farcical "seizure" of the Montgomery Ward plant at Chicago and more recently of the Ward subsidiary, the Hummer Manufacturing Company, at Springfield, Illinois. In both instances, the Roosevelt administration acted only after the workers, their patience exhausted by the interminable run-around of the WLB, struck the plants.

The workers were forced to

strike in order to defend the liveries to, or shipments from, existence of their unions against Montgomery Ward and Comthe open shop drive instituted pany." Herein is the nub of the by Sewell Avery, acting as depwhole situation. uty for J. P. Morgan and Com-LOOMING CRISIS

OUR GREEK MARTYRS

The murderous hand of Hitlerism has struck once again at the Trotskyist movement in Europe. According to official dispatches of the reactionary Greek government-in-exile, 17 members of the Archeo-Marxists, among them Vite, the general secretary, have been executed by German occupation authorities in Athens. Four other Trotskyists, according to the same source, fell before a German firing squad in Salonika.

The "crime" of these courageous revolutionary fighters was they took part in the struggle against the Nazi oppressors in Greece. Specifically, they were charged with conducting Communist agitation and being in illegal possession of arms.

Vite was for some time secretary to Leon Trotsky when the "Old Man" lived in exile in France. He was also a member of the International Secretariat of the Fourth International. From emigration in France, he returned to Greece in 1941 or 1942 in order to participate in the reorganization of the Greek Trotskyist movement.

This is not the first time the Nazi beast has sunk its bloody claws into the revolutionary socialist movement represented by Trotskyism. Only last year, through underground channels, word came of the execution of three of our comrades before a Nazi firing squad in occupied Belgium. The fallen revolutionary fighters were comrades Renery, Van Belle and Lemmens, members of the Revolutionary Socialist Party, Belgian section of the Fourth International. Others have fallen in Holland and Norway.

Within Hitler's German stronghold itself, before the outbreak of the present war, the Trotskyists were hunted by the Gestapo and many were felled by the headman's axe.

With deepest sorrow we salute the memory of our fallen comrades, soldiers in the great battle for a socialist world. The Greek proletariat will avenge the foul murder of these heroic revolutionary fighters by sweeping away the Nazi despots. Their sacrifice will be vindicated in the coming Greek and European revolution which will project the entire Continent along the path of socialism.

Bridges himself, writing in the ized in plants of Montgomery Ward elsewhere than in Chicago that was played in Chicago or anything like it. If anything, we'll be more affirmative than ever in our adherence to the noinjury, the Stalinist strikebreakclaring, "we will fight Mont-

ALLENTOWN, Pa., May 19-Approximately 3,000 workers at the Mack Manufacturing Corporation here today ended a fourday militant strike called in protest against the stalling of the chines and cheered lustily. The War Labor Board on several cases vitally affecting the Mack were likewise cheered. Scab fore- contract and the lockout since

The strikers, members of Local 677. CIO United Automobile Workers Union, voted to return Why did the corporations and to their jobs under the combined agement but have no voice in the NAM remain so adamant in pressure of the company, the management policies. We are refusing the foremen recognition various government agents who employes but have no way to of their union? Why did the were hastily rushed to the scene, show their boss-class role? In officials. Their strike did force the heat of the fight the NLRB the WLB to agree to give imme-

sign any retroactive agreement covering the 1944 contract and that the union would be working without a contract after midnight. This was the immediate cause of the walkout. WALKOUT SPREADS At 12:00 midnight a group of nen from the foundry, echoing the slogan of the coal miners -No contract - No work! walked off the job. The following morning the foundry dayshift refused to start work and collected in the yard. Most of the machine shop (across the

vard from the foundry) were starting the day's work. A few workers collected at the entrance to find out what was happening one shouted, "Everybody out!" Within fifteen minutes the whole plant was out on the street.

Steve Moran, president of the union, climbed to the gate-house roof and addressed the men. After explaining the no-strike pledge, reaffirmed at the National Convention of the United Steel Workers a few days before, he advised, "if you persist on your present course that you go home then wait further notification over vour radio." He then urged the men to return to work. After shouts of "No, no, you don't

SATURDAY, MAY 27, 1944

The Fraud Of Government "Trust-Busting"

By Miriam Carter

On January 6, 1944 a familiar farce was enacted in Washington. The Anti-trust division of the Department of Justice filed a suit against Du Pont, Remington Arms and Imperial Chemical Industries of Great Britain, charging them with being monopolies in restraint of trade. The suit was accompanied by a scathing denouncement of trusts by Wendell Berge, head of the anti-trust division.

"The arrangements between these groups," he said, "if allowed to go undetected and free from enforcement of domestic laws are nothing but private treaties-as far-reaching as any governmental action but free from Congressional sanction. Their production quotas and divisions of markets are private tariffs enforced without legislative consideration." (N. Y. Times, Jan. 7.)

Sherman Anti-Trust Act

After breathing fire and thunder against these giant, powerful monopolies, Mr. Berge promptly stated that "he would be satisfied if the defendants were to enter a consent decree providing for the remedies the Justice Department is seeking. Or, he said, if a trial is necessary, it may be postponed, as other anti-trust cases have. Even without special deferment, he added, the issues might not reach trial for a year, by which time the war may have ended." (N. Y. Times, Jan. 7.)

In this way another typical chapter was added to American government "trust busting," a history. which dates as far back as 1890.

It was in 1890 that the Sherman Anti-

Trust Act was passed, to allay the discontent of the farmers, workers and small business men who had suffered from the ruthless methods used by the Robber Barons in the building of their giant trusts. However, under the Sherman Anti-Trust Act, together with the Clayton Act of 1916 which was to have put "teeth" into it, the great trusts have flourished and grown to such gigantic proportions that today they have the entire economy, as well as the government, under their thumb.

The most picturesque "trust buster" was President Theodore Roosevelt. He roared, and waved his "big stick" at the "plunderbund" as he called the trusts. Meanwhile, they quietly raked in the spoils.

Ferdinand Lundberg says in his exhaustive and authoritative study, America's Sixty Families that Theodore Roosevelt "like a dutiful schoolboy, submitted all official proclamations to the magnates and accepted their rescripts. . . When Roosevelt's two terms are weighed it becomes patent that during this period, and with Roosevelt's collaboration, J. P. Morgan and Company and his clients made the greatest progress in their history. The evidence in support of this conclusion is crushing . . . In 1900, for example, there were 149 trusts of \$4 billion capitalization; when the 'trust busting' Roosevelt breezed out of the White House there were 10,020 with \$31 billions of capitalization."

Morgan-Rockefeller Feud

The anti-trust laws were on the books, apparently, only to be used by one giant corporation in trying to cope with a competitor. Theodore Roosevelt favored the

house of J. P. Morgan, and the twenty-five corporations during the war went to those production and distribution of goods and anti-trust suits brought by his administra- companies designated by the Pujo Comtion were directed against the Rockefeller empire. According to Lundberg, "The Roosevelt-Rockefeller feud lent color to the popular misconception that the President was hostile to great wealth. But the mere composition of Roosevelt's Cabinets showed that he bore no ill will toward the 'plunderbund'."

Taft, on the other hand, who followed Roosevelt, was in Rockefeller's camp, and the forty-five anti-trust suits brought by his administration were directed at the Morgan combines.

The net result of this much publicized trust busting was the further entrenchment of the trusts and increased power of a few individuals over the whole of American life.

The Pujo Committee of 1912, set up by the House of Representatives, revealed "that J. P. Morgan, George F. Baker, and James Stillman, by means of virtual shoestrings, controlled in an absolute sense the money market of the nation. Under Morgan domination were companies with an aggregate capitalization of \$17,273,000,000, including the United States Steel Corporation, the International Harvester Company, the International Mercantile Marine. the American Telephone and Telegraph Company, the New Haven Railroad, the New York Life and Equitable Life Insurance companies, and many others."

The consolidation of the trusts at the expense of the American people proceeded at an accelerated pace during World War I, and in the post war era. More than two thirds of the \$30-billion profit made by the

mittee as under the domination of the "Money Trusts." **Graham Committee Report** The Graham Committee, appointed after

the termination of the last war to investigate war frauds, reported "the various agencies of the Council of National Defense and the War Department not only permitted this violation of the statutes, but encouraged it, and in some cases ordered combinations to be made that were in violation of the law...... It is probably exact to say that never in the history of the country was a greater impetus given to illegal trusts and combinations in restraint of trade than was given by the practices above referred to."

The great depression which hit in 1929 and impoverished the great mass of the American people once again roused a burning resentment against the trusts. Paying lip service to this resentment. Franklin D. Roosevelt imitated the first Roosevelt in fulminating against "economic rovalists". But, just as during Theodore Roosevelt's administration, the louder the howling the more intense became the process of monopolization of American industry and finance.

Under the "New Deal", the demagogic attack on the American trusts led, in 1938, to the establishment of the Temporary National Economic Committee, a government committee set up "to make a full and complete study and investigation with respect to..... monopoly, and the concentration of economic power in and financial control over

services."

Monopolies Under Roosevelt

The TNEC met for a year and half. They questioned 552 witnesses. They came out, finally, with a vast 82 volume report that proved by detailed facts and figures "that most of the wealth and income of the country is owned by a few large corporations, that these corporations, in turn are owned by an infinitesimally small number of people, and that the profits from the operation of these corporations go to a very small group....."

In 1937, they reported, 10,000 persons (.008 percent of the population) owned one fourth of all the corporate stock in the country. One half of the stock is owned by 75,000 persons, or .06 percent of the population. The Du Ponts, the Mellons and the Rockefellers themselves, control 11 percent of the total assets of the 200 largest non-financial corporations, amounting to \$8 billion.

The dominance of this small group is steadily increasing, reported this committee. "From 1919 to 1939 inclusive, 95,020 corporations have gone out of industry and commerce. This is at the average rate of more than 4,500 annually. Many of these losses have been by merger....."

The economic debacle of 1929 drove many small businesses out of existence, and served to further entrench the large corporations.

Since the publication of the TNEC report this process of the tightening of trust control and dominance has proceeded at a

rapid rate. In May 1942, the War Production Board reported that 100 large companies had 75 percent of war contracts valued at \$50,000 or over. The tremendous profits raked in on their contracts by this tiny, powerful group have served to increase their share of the national income. The self-styled "New Deal" administration has been the lever by which the corporations have gained ever greater control over American government, industry and finance.

When corporation abuse becomes so flagrant that it is impossible to conceal the Anti-trust division is forced to bring suit. They have a pat routine which assures the corporations in advance that the suit is just a bit of window dressing for public consumption. Moreover, innumerable anti-trust actions have been "postponed" in order not to interfere with the 'war effort." The government, which never hesitates to take out the big stick against militant workers who demand a living wage, is invariably very gentle, understanding and cooperative with the rapacious trusts.

Today, as when the trusts first appeared the voluble attacks of "trust busters" have served only as a cover for the activities of the monopolists. In fact, it has been during the administration of the self-proclaimed "enemies" of the trusts, such as the first and second Roosevelts, that the trusts have made some of their greatest gains. The greater the hue and cry raised by the capitalist government against the trusts, the more lush are the profits and the more entrenched do the trusts become in American life.

4th Anniversary Of The Murder Of Robert Harte Working Conditions In Rubber Industry In The May 1940 GPU Assault Against Trotsky

Trotsky in the first open attempt to assassinate Lenin's collaborator, were now added the crimes of kidnapping and murder. organizer and leader of the Red Army and the founder of the Fourth International. The effort to fire the premises indicated the intent to destroy Trotsky's archives, expecially the manuscript of his biography of Stalin.

By "an accident of war," as Trotsky himself later described it, none of the GPU machine gun slugs that riddled his room and bed found their intended mark. Trotsky and his wife Natalia, whose death was also sought, had flung themselves from their bed at the first sound of firing and miraculously escaped detection in a dark corner of the room.

But when the assailants had fled, confident that they had achieved their purposes, it was discovered that one of Trotsky's household was missing. The young American revolutionist and member of the Socialist Workers Party, Robert Sheldon Harte, one of Trotsky's secretary-guards, had been seized by the assassins.

One month later, after the Mexican police had uncovered every detail of the crime, arrested more than a score of known Stalinists and secured full confessions exposing the roles of all participants, Harte's body was found in a lime-filled pit of a cellar in an old shack near Coyoacan, admittedly the headquarters where the attack had

Four years ago, in the pre-dawn darkness on May 24, 1940, an | been organized and planned. GPU fashion, Harte had been slain with armed gang of some 30 Stalinist agents, firing machine guns and two bullets through his head. To the crimes of breaking and entering, hurling incendiary bombs, invaded the Coyoacan home of Leon assault with deadly weapons, arson and attempted assassination

GPU Caught Red-handed

The leaders of the attack and slaying were almost immediately uncovered. One was David Alfaro Siqueiros, notorious GPU gunman and one-time "colonel" of the Stalinist forces in Spain. And to establish irrefutably the fact of full Stalinist complicity, David Serrano, member of the Political Committee of the Mexican Communist Party, was named a chief organizer and participant by signed statements of four of the self-confessed assassins.

The whole political background of the crime, the vast resources that were required and which could come only from such an organization as the GPU, the confessions of the participants, including Siqueiros,' were sufficient in themselves to place the guilt upon Stalin. The subsequent steps taken to save Siqueiros and the other gangsters only further revealed the powerful hand of the Kremlin.

When Siqueiros was apprehended, Stalinist pressure was brought to bear on the Mexican officialdom. He was able to flee his bail with his papers all strangely in order, first to Cuba, and then to South America. No official efforts were made to extradite him. And now, he has returned to Mexico, where he freely walks the streets. he mighty arm of Stalin ever around him to ward off the blows of Mexican justice, and openly talks of making a "cultural" tour of the United States under the auspices of Nelson Rockefeller's committee for the coordination of inter-American affairs.

Recently The Militant has printed stories concerning the more mills, little, speedy, corruvenal leadership of the United gated "cracker" mills side by side Rubber Workers of America. with the larger rollers which further soften up the rubber for Led by Sherman Dalrymple, the calender rolls. Speed, always the URW executive board has speed! Stories are told of workinstituted a terroristic campaign Vers who have caught their hands of expulsions against militant and arms in these rolls. You unionists who have fought for | look at the calenders and mills democracy in the URW and for and shudder inwardly when you the rights of the rubber workers hear about the kid they took in the plants.

Just who are the rubber workers, these members of the powerful union with the stirring tradition of the sit-down strikes? They are long-suffering toilers who for years have drudged under the most heartless speed-up, sweatshop conditions, which squeezed the last ounce of production, the last gram of energy out of their bodies.

Much of the work in the rubber plants is done under the piecework system, perfected by the late unlamented Charles Bedaux, bosom friend of top Nazi officials. Not long ago this same system, but under the label of 'incentive pay" was enthusiastically hailed by the Stalinists and other reactionaries. In rubber plants tire builders, bead makers, or sporting equipment workers, are paid regular piece rates. Calender crews, tire curing workers, and others who work in gangs are usually paid in piecework "pools," each member of the group receiving a certain percentage of the total piecework earnings. And here in the rubber factories the viciousness of the piecework system is most the conditions that impelled the strikingly evident, for the jobs are timed to a split second, Time studies here all start with such

opening lines as: "Walk to posi-

Not an uncommon sight at the

A KILLING PACE

By Theodore Kovalesky as they work there, they can never get entirely clean.

At the calender line there are down the aisle in a cart one night moaning, "One arm! What the hell good am I going to be

for the rest of my life?' There are relatively few fatalities in the rubber factories as compared to the mines and steel mills, but who can watch the tire builders racing feverishly against split seconds at their tire drums without feeling that these men are shortening their lives considerably? All of them are muscular, but many lack sufficient flesh to cover their painfully taut sinews. They work with a nervous, unabating haste. Women workers as is the custom are even worse off. With that same urgent speed a woman worker has to rush through her eight hours at lower rated jobs. making beads, breakers and other parts of tires or inner tubes. In some cases, women even do the same jobs as the men, but at a lower rate of pay. Conditions such as these are the daily life of thousands of working men and women in the rubber factories. These were workers to organize and fight against cops and tear gas on the picket line. Work such as this has built the tires and the thousand rubber appliances used by modern civilization . . . and it has built a tough section of our working class, that is capable of waging great battles. We shall hear a great deal more from ocker rooms. What for? In them.

THE NEW CONSTITUTION

14

The real object of the May 24 mass assault was fulfilled less than three months later, when the GPU agent Frank Jacson succeeded in gaining access to Trotsky's study and brutally murdering him with a pick-axe.

Robert Sheldon Harte

Robert Sheldon Harte was not the first of the courageous young revolutionists who have sacrificed their lives in the defense of Trotskyism, the ideas and program of Marxism-Leninism. Among the innumerable victims of the GPU terror machine have been thousands of Trotskyists in Soviet Russia and Spain.

Not a few of Trotsky's closest co-workers fell under the murderblows of Stalin, including Erwin Wolf, Rudolph Klement, Ignace Reiss, and Trotsky's own son, Leon Sedov. Through their murders. Stalin vainly sought to drown the ideas of Trotskyism in blood.

Bob Harte began his life in the socialist revolutionary movement when he joined the Socialist Workers Party in New York City. He had been brought up in wealth and comfort. But he hated the system which gave unlimited luxury and privilege to the few, and condemned the many to poverty, insecurity and class oppression. He sought a solution to the abominations of capitalism and found it in the Trotskyist movement. From then on, he devoted his whole life to by terrorism, the machine-gun blast in the dark, the bullet from the struggle for the socialist emancipation of the workers, participat- ambush, the pick-axe in the hand of a hired assassin. That is being with all his energies in the activities of the Socialist Workers Party.

When he volunteered for his mission as a secretary-guard for Trotsky, Bob knew well the dangers he faced. He understood the relentless vengeance Stalin ceaselessly sought to visit on Trotsky at Trotsky's side and tried to ward off the assassins' attacks might himself be struck down. As a true Bolshevik, he took his post and died defending it.

Those who struck him down have thus far gone free. They are the representatives of a political system, Stalinism, which is so corrupt and degenerate that it can maintain itself, in the final analysis, only

William Haywood -- A Soldier To The Very End Homage To A Great Working Class Fighter

May 28, 1944 marks the sixteenth anniversary of the death of William D. Haywood, one of the greatest and most loved figures in the history of the American labor movement.

FOUR-

Haywood, born February 4, 1869, spent his entire life in the struggle for the emancipation of the working class. At the age of 15, he left home to work in the mines of Nevada, where he entered the labor movement as a pioneer unionist in the Western Federation of Miners in 1887.

For more than a decade thereafter, Haywood worked militantly within the American Federation of Labor, until he broke with the AFL leadership to turn to the work of building the IWW at the 1904 convention of the Miners' Federation. He was chairman of the founding conference of the Industrial Workers of the World in 1905.

Constantly under threat of prosecution for his labor activities, Haywood was loved by the workers as much as he was feared and hated by the bosses. As a leading member of the Socialist Party, he was elected as a delegate to the Socialist Congress of the Second International in 1910. In this, the most militant period of the American Socialist Party, under the leadership of Debs, Haywood was a devoted worker for its program and served on its National Committee. When the opportunist leadership took over the SP in 1912, Haywood broke with them and was removed from his post on the National Committee. He continued his struggle against opportunism when the first World War broke out. With the outbreak of the Russian revolution he rallied to the banner of the October revolution.

Haywood was naturally one of the targets when, upon the outbreak of the first World War, the bosses seized the opportunity under the cover of "patriotism" to launch their attacks against the most militant section of the American working class, in preparation for entry into the imperialist conflict.

Persecution of the IWW reached a fever pitch in the Mesaba iron range of Minnesota in 1916; almost simultaneously came the frame.up of Mooney and Billings in California; then the murder of Frank Little in Montana. Laws against "criminal syndicalism" were invoked. In September, 1917, in two widespread raids, officers and members of the IWW were arrested by the thousands, kept in jail and his will to live would pull him through again, and the news that for months awaiting trial. Over one hundred leaders, including Haywood, were final'y found guilty in Chicago, in the spring of 1918, and given sentences ranging up to 40 years. When an appeal for a new trial was granted, Haywood and several others were released on bail in 1919. In Chicago, Haywood read that he was sought by the government on new frame-up charges; federal arrests of all members of the Communist Party and Communist Labor Party were being prepared; the application for a new trial for Haywood was finally denied by the United States Court of Appeals. Haywood sailed for the USSR, where he spent the remainder of his life.

The article on Haywood which appears below was written by James P. Cannon when the news of Haywood's death reached the United States. It appeared originally in the Daily Worker on May 22, 1928.

By James P. Cannon

The death of Haywood was not unexpected. The declining health of the o'd fighter was known to his friends for a long time. On each visit to Moscow in recent years which our Party work necessitated we noted the progressive weakening of his physical powers and learned of the repeated attacks of the fatal disease which finally brought him down. Our anxious inquiries during the past month, occasioned by the newspaper reports of his illness, only brought the response that his recovery this time could not be expected.

William Haywood, 1869-1928

death had triumphed in the unequal struggle brought a shock of grief.

A Soldier to the Last

The death of Haywood is a double blow to those who were at once his comrades in the fight and his personal friends, for his character was such as to invest personal relations with an extraordinary dignity and importance. His great significance for the American and world labor movement was also fully appreciated. I think, both by our Party and by the Communist International, in the ranks of which he ended his career, a soldier to the last.

An outstanding personality and leader of the pre-War revolutionary labor movement in America and also a member and leader of the modern Communist movement which grew up on its foundation, Bill Haywood represented a connecting link which helped to establish continuity between the old movement and the new. Growing out of the soil of America, or better, hewn out of its rocks, he first entered the labor movement as a pioneer unionist of the formative days of the Western Federation of Miners thirty years ago. From that starting point he bent his course toward the conscious class struggle and marched consistently on that path to the end of his life. He died a Communist and a soldier of the Communist International.

Haywood's Memoirs

It is a great fortune that he finished his memoirs and that they theory in Haywood's career. He passed beyond it and thus escaped Nevertheless we could not abandon the hope that his fighting spirit are soon to be published. They constitute a record of the class that degeneration and sterility which overtook the syndicalist move-

struggle and of the labor movement in America of priceless value | ment throughout the world during and after the war. The [first] for the present generation of labor militants. The career of Haywood World War and the Russian revolution did not pass by Haywood is bound up with the stormy events which have marked the course unnoticed, as they passed by many leaders of the IWW who had of working class development in America for thirty years and encased themselves in a shell of dogma to shut out the realities out of which the basic nucleus of the modern movement has come. of life.

Haywood Becomes a Communist

These world-shaking events combined with the hounding and dragooning of the IWW by the United States government-the "Political State" which syndicalism wanted to "ignore"-wrought a profound change in the outlook of Bill Haywood. He emerged from Leavenworth Penitentiary in 1919 in a receptive and studious mood. He was already fifty years old, but he conquered the mental rigidity which afflicts so many at that age. He began, slowly and painfully to assimilate the new and universal lessons of the war and the Russian revolution. First taking his stand with that group in the IWW which favored adherence to the Red International of Labor Unions, he gradually developed his thought further and finally came to the point where he proclaimed himself a Communist and a disciple of Lenin. He became a member of the Communist Party of America before his departure for Russia. There he was transferred to the Russian Communist Party and in recognition of his lifetime of revolutionary work, he was given the status of "an old party nember"-the highest honor anyone can enjoy in the land of Workers' Triumph.

As everyone knows, Haywood in his time had been a prisoner n many jails and, like all men who have smelt iron, he was keenly sensitive to the interests of revolutionaries who suffer this crucifixion. He attached the utmost importance to the work of labor defense and was one of the founders of the ILD. He contributed many ideas to its formation and remained an enthusiastic supporter right up to his death. What is very probably his last message to the workers of America, written just before he was stricken the last time, is contained in a letter published in the June 1928 number of the Labor Defender.

As a leader of the workers in open struggle Haywood was a fighter the like of which is all too seldom seen. He loved the laboring masses and was remarkably free from all prejudices of craft or race or nationality. In battle with the class enemies of the workers he was a raging lion, relentless and irreconcilable.

and resolute course he pursued. Through the maze of intrigue and His field was the open fight and in mass strikes his powers machinations of the reformist imposters in the Socialist Party, he | unfolded and multiplied themselves. Endowed with a giant's physique shouldered his way with the doctrine of class struggle and the and an absolute disregard of personal hazards, he pulled the striking workers to him as to a magnet and imparted to them his own courage and spirit.

Haywood and the Akron Strike

I remember especially his arrival at Akron during the great rubber workers' strike of 1913 when ten thousand strikers met him made its bid for power in the convention of 1912. The "Reds" were defeated there and the [Socialist] party took a decisive step along at the station and marched behind him to the Hall. His speech that the pathway which has led to its present position of reformist morning has always stood out in my mind as a model of working bankruptcy and open betrayal. The subsequent expulsion of Haywood class oratory. With his commanding presence and his great mellow from the [SP] National Executive Committee was at once a proof voice he held the vast crowd in his power from the moment that he of the opportunist degeneration of the [Socialist] party and of his rose to speak. He had that gift, all too rare, of using only the necessary words and of compressing his thoughts into short, epigrammatic sentences. He clarified his points with homely illustrations Haywood's syndicalism was the outcome of his reaction against and pungent witticisms which rocked the audience with understandthe reformist policies and parliamentary cretinism of the midd'e ing laughter. He poured out sarcasm, ridicule and denunciation upon class leaders of the Socialist Party-Hillquit, Berger and Co. But the employers and their pretentions and made the workers feel with syndicalism, which in its final analysis, is "the twin brother of him that they, the workers, were the important and necessary peoreformism," as Lenin has characterized it, was only a transient ple. He closed, as he always did, on a note of hope and struggle. with a picture of the final victory of the workers. Every word from beginning to end, simple, clear and effective. That is Haywood, the roletarian orator as I remember him.

There was another side to Bill Haywood which was an essential side of his character revealed to those who knew him well as personal friends. He had a warmth of personality that drew men to him like a bonfire on a winter's day. His considerateness and in-By Ralph Graham While the working-class is shedding its blood on the many battlefields of the imperialist war, the moguls of American big "Bill's Room" in the Lux Hotel at Moscow was always the it could be made useless as a dye, ber Regulating Committee and through ownership of or cartel Capitalist appetites, far from central gathering place for the English speaking delegates. Feared by Ruling Class

The American ruling class hounded Haywood with the most vindictive hatred. They could not tolerate the idea that he, an American of old revolutionary stock, a talented organizer and eloquent speaker, should be on the side of the exploited masses, a champion of the doubly persecuted foreigners and Negroes.

With a twenty year prison sentence hanging over him he was compelled to leave America in the closing years of his life and to seek refuge in Workers' Russia. He died there in the Kremlin, the capitol of his and our Socialist Fatherland with the red flag of his class floating triumphantly overhead.

Capitalist America made him an outlaw and he died expatriated from his native land. But in the ranks of the militant workers of He is made to strip off his they themselves admit, are only America, who owe so much to his example, he remains a citizen of the first rank. 10 Years Ago In The Militant

MAY 26, 1934

MINNEAPOLIS—"In the most imposing display of labor solidarity and militancy Minneapolis has ever seen, a mighty picket line of the General Drivers' Union, 5,000 strong, swept the Wholesale Market clear of every scab, cop and deputy putting a complete stop to every attempt to move commercial trucks," The Militant reported.

Called on Tuesday, May 15, the strike powerfully answered the bosses' refusal to recognize the Drivers' Union. With superb organization, strikers massed their strength at a central headquarters, despatching flying squads of pickets to strategic points to bring to a standstill all trucking with the exception of milk, ice and beer drivers who, already organized, were given permission to operate.

Minneapolis industrialists through a "Committee of 25" chosen from the infamous "Citizens' Alliance," tried first to break the strike by moving bread from the bakeries; frightened by the scope of the strike, the bakers retreated. Next, the Committee tried to enlist the farmers against the strikers; farmers' trucks were turned back at the city limits on Saturday. Twice defeated, the bosses turned frantically to terrorism, tripling the police force, importing gunmen, arresting 200 pickets. Again on Monday the police slugged and arrested men, women and children on the picket line; 35,000 building trades workers gave labor's answer to this brutal attack by calling a sympathy strike. while the Communist League (Trotskyist) raised the demand for a general strike. The bosses capitulated, agreeing to negotiate and stop all transportation during a 24-hour truce on Tuesday.

EW YORK-Drawing the lessons of the Minneapolis strike, James P. Cannon wrote in The Militant: "The whole union went into action on the picket line in mass formation; thousands of other union men went with them: they took along the necessary means to protect themselves against the murderous thugs. . . . This was an example of mass action which points the way for the future victorious struggles of the American workers."

He pointed out the special features of this struggle; the participation of the strikers' wives, who ran the commissary, picketed the mayor's office, in every way doubled the strength of the workers, giving the strike a spirit and solidarity essential to victory; the building trades workers' sympathy strike demonstrated the importance of united action in the labor movement, which Cannon sharply contrasted with the Stalinist ultra-left, divisionist policy of "red trade unions." And finally, "among the leaders of this strike are a number of Bolshevik militants.... The most important of all prerequisites for the development of a militant labor movement is the leaven of principled Communists. The labor movement grows as a result of this fusion and their influence grows with it."

of 1926. The plot against the English Trotskyists will fail, too.

Churchill and his labor lieutenants realize that the radicalization of the British workers, if unchecked, may assume menacing revolutionary proportions. They seek to halt the leftward tendency by striking blows at the Trotskyist movement.

But Trotskyism is the quintessential expression of the working-class struggle against capitalism. Leaders and activists may be imprisoned, but the movement itself cannot be destroyed. Despite the imprisonment of many of the leading representatives of Trotskyism in this country after the famous Minneapolis trial, the movement in this country continues to live and grow. It will be the same in England. Repressions cannot halt the advance of this movement which leads the fight for a socialist world.

Poll Tax

The Senate debate on the anti-poll tax bill was such a patent fraud that most political commentators treated the spectacle as a bad joke. Writing in the N. Y. World Telegram, Thomas L. Stokes, Scripps-Howard staff writer, characterized the farce in the following words: "The perennial antipoll tax spectacle in the Senate, which was not even good theater this visit, has reached its preordained climax without anybody being fooled. Everybody connected with the performance, except perhaps a few sincere souls, felt relieved today anticipating the ringing down of the curtain. For the whole thing has been a fake."

To the venal politicians in both major parties the 10,000,000 people, white and black, disfranchised by the poll tax, are nothing but pawns in the game of politics. The Republicans and Democrats, their camp followers and apologists, are solely concerned with garnering votes for their respective candidates. Walter White, head of the NAACP, the liberals and Stalinists direct their main fire at the Republican, Dewey. The Republicans point to the fact that all the poll-taxers are in the camp of the Democrats. Each tries to shift the blame on the other for the defeat of the anti-poll tax bill.

Dewey, prospective Republican 'candidate for president, piously proclaims his "opposition" to the poll tax requirement. Roosevelt, head of the Democratic party, also says he is "against" the poll tax. Bilbo, poll tax Senator from Mississippi, who once sponsored a bill to send all Negroes to Liberia, says: "I agree with Governor Dewey in the matter, and I also agree with President Roosevelt. The poll tax is wrong. It ought to be abolished." That makes it practically unanimous! Yet the poll tax continues to remain as a symbol of race discrimination, bigotry, reaction and political oppression, through Republican and Democratic administrations alike. No amount of mummery can cloak the responsibility of both capitalist parties for perpetuating the poll tax system.

It is only when the downtrodden and oppressed, both black and white, unite in their own independent Labor Party, that the death knell of the poll tax system will be sounded.

Senate Labor Committee **Reveals Living Cost Rise**

Skyrocketing living costs have struck so harshly at the 20,000,000 wage-earners at the bottom of the nation's income scale that they can scarcely keep body and soul together, declares a recent study of a subcommittee of the Senate Committee on Education and Labor.

In citing the "hardships imposed upon them by the war," the committee proposed that the Little Steel formula and other wage-freezing devices shall not be applied to heads of families earning under \$200 a month and unmarried workers getting \$150 a month or less. At present price levels the Senate committee disclosed, even an income of \$50 a week provides the average family "only a very narrow margin of living."

Millions of unorganized office workers, store clerks, school teachers and low-pay government employes, as well as those forced to live on fixed-income social security payments or servicemen's allowances are among the worst sufferers of the price gouge.

The committee itself refuted the false contentions of the Bureau of Labor Statistics that living costs have advanced only 21.3 percent, and charged that the BLS figures were only a "barometer" of changes of certain prices but in no sense an adequate measure of the cost of living rise.

Among the important items the BLS "barometer" overlooks, according to the committee report are, "deterioration in quality of goods, disappearance from the market of cheaper grades, new types of expenditures incurred by workers who migrate to war jobs, 'black market' operations which are hidden from view, and differences between prices in various types of communities and geographic regions."

This committee report thus exposes the anti-labor character of the Roosevelt administration's use of the BLS figures in justifying its wage-freeze.

Big Oil Companies Control Petroleum Administration

Another "New Deal" idol of the liberals, Secretary of the Interior Harold L. Ickes, is revealed to have feet of clay. Congressman Voorhis, of California, last week charged in the House that the Petroleum Administration for War, which is headed by Ickes, is nothing but a "stooge" of the big oil corporations and is aiding the oil barons to rivet their monopoly control on the petroleum resources of the nation.

Voorhis, an outstanding authority on the oil question who uncovered the Elk Hills oil scandal, revealed that Ickes' petroleum organization has over 100 members who are also on the payrolls of the biggest oil companies, including a number of leading corporation executives.

The major companies, aided by Ickes' policies, have created a monopoly-induced oil shortage in this country, Voorhis declared. Ickes has curtailed independent production, placed restrictions on the smaller companies in drilling new wells, opposed the importation of Mexican oil despite the claimed shortage, and has turned over the operation of governmentowned and built tankers exclusively to the big monopoly interests whose agents run the PAW.

While Ickes is helping to foster the Arabian oil deal, to use hundreds of millions in public funds in aiding the American oil imperialists snatch the Middle

English Trotskyists

In jailing four leading members of the Revolutionary Communist Party, including Jock Haston, the party's general secretary, the Tory-capitalist government of Churchill and Co. is pursuing a clear-cut aim.

Its purpose is to stifle the revolutionary voice of Trotskyism in the midst of the great forward surge of the British working-class which was highlighted in recent weeks by the strikes in the coal mines and engineering plants. The British Trotskyists are being railroaded to prison only a few short months after the liberation by Churchill's government of the fascist leader, Sir Oswald Mosley.

After nearly five years of "blood, sweat and tears," during which their conditions of life have steadily worsened, the British workers have taken once more, and vigorously, to the road of class struggle against the capitalist exploiters. For five long years they have been tied to the capitalist war machine by their treacherous Labor Party and trade union leaders under a "truce" which made a real defense of their living and working conditions well-nigh impossible.

Today, the British workers are beginning to break away from the leading-strings of capitalism and defying the labor flunkeys of the exploiting class, the Bevins and the Morrisons.

The British capitalists pretend to see a dark, sinister underground plot behind the great movement of working class resurgence and the growth of revolutionary activity. Unable to confound the revolutionists in the eyes of the workers by means of argument, they resort to slander and defamation, culminating in the frame-up.

This was the method twenty years ago when the workers of England, following the worst period of the post-war depression, regained their confidence and began to fight back against the exploiters. At that time a Tory newspaper forged the notorious "Zinoviev Letter" in order to "prove" that back of the insurgence of British labor was a deep-dyed plot by Moscow.

But the real plotters were the British capitalists. Their plot to smear the labor movement and its revolutionary vanguard — at that time the British Communist Party - served its purpose for a day. And then 'the "Zinoviev Letter" was proved

the first time in American history, the forces of labor are now setting up a nation-wide organization to protect the political rights of the working man, as well as the rights of the returning soldier, the farmer, the small business man and the so-called 'common man.'" "We are, for the present," said Murray, "committed to no man or political party. We shall, in the next few months, have our organization perfected and its general principles agreed upon. We shall then, before the national conventions of the two major parties, hold a national meeting or conference of our own. We shall draw up and present to the American people a specific set of principles for the general welfare. Then, after the political conventions, we can decide what action to take regarding the two parties and the individual candidates, whether for state or national offices, or for the presidency."

Having apparently "perfected" its organization and "agreed upon its general principles," the CIO Political Action Committee met in national conference at Chicago last week. The purpose of such meeting, according to Murray, was to draw up a program for the welfare of the "common man." Then, and only then, Murray contended, would the CIO Political Action Committee endorse that party which, at its national convention, incorporates the CIO program in its platform and commits its candidates to the support of that program. The conference met, labored, and brought fortha blank check, which was handed to the Democratic Party to be filled in by the political deputies of the Wall Street plunderbund, who will control the convention, write the program and name the candidates of that party.

This is putting it mildly! The sum total of the labor of the national conference of the Hillman-Murray Political Action Committee, was to give full, unqualified and unconditional support to the titular head of the Democratic party, Franklin D. Roosevelt. The cringing servility of the labor lackeys is best exemplified by their action in throwing their good "friend" Henry Wallace, to the wolves. Wallace, whose purely verbal and literary "liberalism" has offended the Wall Street freebooters, will be "endorsed" says Hillman, "if he is renominated" by the Democratic convention. All pretense of independent political action has been thrown overboard by the Murray-Hillman clique who announce, in advance, that they will gratefully accept whatever crumbs the political bosses are kind enough to throw their way. Where is there forgery. East oil fields, the companies have kept concealed the existence of vast undeveloped oil reserves now in their possession in this country, Voorhis disclosed. The government is allowing these companies to keep control of some 49,000,000 undeveloped acres of oil land, while producing from only 3,763,000 acres.

In the meantime, Ickes has agitated for boosting oil prices and grabbing foreign oil lands.

What OPA Tried To Hide **About Food Trust Profits**

Suppressed Office of Price Information profits reports were recently secured and made public by "People's Lobby." These reports which the Roosevelt administration had deliberately concealed from the public because they give a damning picture of the greed and corruption of the capitalist ruling class, reveal that the real reason for the price rises is this, that the war profiteers have been picking the pockets of the workers.

One section of the report discloses the wartime profits of the food trusts. Since food constitutes the largest single item on workers' budgets, these figures on food profits give a more accurate indication of the extent of living cost increases than figures on other necessities such as clothes, rent and medical care.

According to OPA Study No. 9, dealing with the meat packing corporations, as summarized by the "People's Lobby" bulletin ,"agg gate profits in 1942 of 53 companies were over four times the pre-war level, on only 83 percent higher sales . . . On each dollar of capital invested in the 53 companies, the return in 1942 was 31/2 times the 1936-39 average."

The tremendous increase in profits over sales and in the rate of profit on each dollar of capital investment is attributable to only one thing - deliberate price gouging under the pretext of scarcity.

The summary of OPA Study No. 8 on fruit and vegetable canners discloses that "profits before income taxes of fruit and vegetable canners were five times as great in 1942 as in the years 1936-1939, on less than twice the pre-war volume of sales. . ."

Similar wartime profits steals are reported for the big corporations in the milk and milk products, bakery, cereal and flour industries. These 1942 profits, however, are far less than the profits realized in 1943 and this year.

Instead of expropriating these profiteers who have been sucking the very life-blood of the working people, the administration has imposed a wage-freeze on the victims of the food trust while protecting the profiteers by hiding the true facts of their extortionate practices.

corruption and degeneration!
