Petitions To Pardon 18 Presented To President

Trotskvist Prisoners Reaffirm Their Revolutionary Principles; Over 2,000,000 Workers Support CRDC Petition to Release the 18

The 18 Trotskyist and CIO Truck drivers Local 544 leaders convicted in the Minneapolis Labor Case and railroad ed to prison last January 1 under the infamous Smith "Gag" Act, last Wedne sday reaffirmed the revolutionary socialist principles for which they were prosecuted. This restatement of the views they defended at their trial was conveyed to Daniel Lyons, U. S. Pardon Attorney, in Washington, D. C., by Geo rge Novack, National Secretary of the Civil Rights Defense Committee, who presented the prisoners' formal appli-

cation for immediate unconditional pardon.

All the Minneapolis Labor Case prisoners have records of many years of devoted service to the labor movement. Among

them are the outstanding trade union leaders and militants who built the powerful truckdrivers organization in Minneapolis and inspired the tremendous upsurge of unionism throughout the Northwest. The honor roll of prisoners includes:

James P. Cannon, National Secretary of the Socialist Workers Party; Grace Carlson, Minnesota Organizer, SWP; Jake Cooper, former organizer, Youth Workers Section; Oscar Coover, former officer, Local 544 Federal 544-CIO.

Workers Section; Albert Gold-THE REAL CRIME

Boss Aims

The bosses' hopes that all unions will be smashed by wartime measures were laid bare in the August 2 issue of Local 599 Headlight, official paper of UAW-CIO Buick Local 599, Flint, Michigan. At a recent War Labor

Board hearing, the report says, the personnel representative of the Chrysler company was asked: "Are you going to get along with the unions, after the war is over?"

"Certainly, we must get along with the unions-if they are here after the war," was his reply.

Wall Street's Reconversion Plan

New Michigan Party Launched **By** Constitutional Convention

By John Saunders

DETROIT, Mich., Aug. 5. — More than 100 leading trade union militants, representing yer 6000 members enrolled in more than 30 clubs, gathered in convention at Lansing on July 28-30 to officially launch the Michigan Commonwealth Federation. The convention adopted a constitution, declaration of principles and a political platform. A small slate of about halfdozen candidates for U. S. Congress and the State Senate and Legislature was nominated to oppose the nominees of the two boss parties. County conventions were scheduled to consider adding county candidates. Matthew B. Hammond, temporary

chairman of the MCF since last March, was reelected as permanent chairman. Hammond assured the convention "it will be a fighting campaign."

It would be an exaggeration to call the MCF a full-fledged Independent Labor Party. What the convention disclosed, however, was that the nucleus for such a party was firmly established.

Bridges Won't Help On July 27 Harry Bridges, prominent Stalinist union of-

ficial, discussed post-war problems with Adrian Falk, presi-

to ease some of the restric-

tions putting San Francisco at

a disadvantage with the rest

Here is how Bridges an-

swered this open-shop threat:

"Any union planning a big

fight with the bosses after the

war won't get the support of

much of labor," Bridges said,

adding parenthetically that he

spoke only for "his" union.

"Strikes won't help."

of the country."

Philadelphia Walkout Aims To Smash CIO Transport Union

Company Union Leaders Head Jim Crow Move to Split Labor Unity by Inciting Hatred

By Art Preis

PHILADELPHIA, Aug. 7. — In a desperate move to smash the CIO Transport Workers Union, the Philadelphia Transportation Company, acting in collusion with leaders of the former company union, last week inspired a 6-day municipal transportation stoppage against the training of 8 Negro workers for operating jobs on street-cars and busses.

Using the time-worn device of "divide and rule," officials, taken by surprise, were the company and its agents provoked this anti-labor race-hate action with the aim of splitting the ranks of the CIO union, which a few months ago won a of the Jim-Crow action. collective bargaining election against the company-sponsored PRT (Phila. Rapid Transit) Employees Union. This company out- pany's executive offices, pushed fit for years had upheld the PTC's flagrant Jim-Crow policies and styled "strike leader." His chief

JIM-CROW AGITATION

Following the election victory of the CIO, the former company union leaders intensified their open Jim-Crow agitation. This agitation was conducted on com-

pany property with the tacit consent of the union-hating bosses The pretext for the action was provided when the company, after months of protest, was compelled to abide by an FEPC order to hire

unable to prevent the walkout. The hand of the company was almost immediately revealed when at the first meeting of the workers, held on the company's property at the 10th and Luzerne Streets car barn, the last two heads of the PRT Employes Union assumed open leadership

CHURCHILL SHOWS FEAR OF IMPENDING REVOLTS

By William F. Warde

A spirit of uneasiness, reflecting deep antagonisms between the three leading powers in the alliance of the so-called United Nations, and an evident anxiety in face of the looming socialist revolution in Europe, emerged clearly in the speech of Prime Minister Churchill before the House of Commons on August 2.

Churchill confessed that British foreign policy was an extremely "delicate subject" which he approached "not without natural anxiety." One reason for this anxiety, he remarked, was the triangular character of dip-

lomatic relations among the Al- proved too embarrassing and reslies. The allies of imperialist | trictive for the deceitful maneuv-Britain, Churchill wistfully ad- ers of British imperialism. And mitted, "are larger and, in some Churchill burned his tongue in his respects, more powerful than we last speech to the House when are.'

Here the British premier was acknowledging the patent and unpalatable fact that British imperialism has lost its world hegemony, that it must now play third fiddle in the concert of the Great Powers, and that the power of veto it once exercised in international affairs is now vested in others.

t

"It would be very troublesome imperialists and their real predto all of us here," said Churchill, atory aims in this war. These "if I made a pronouncement on have to be kept hidden from the the subject here and found myself people behind diplomatic doublecontradicted by our most consid- talk or a prudent silence. erable Allies." Thus Churchill acknowledges that the "United upon several important questions. Nations" are far from being harmoniously united and that there exist constant and deep-going conflicts of interest between them. But this is hardly a secret to anyone except the Stalinists with their blind faith in the "miracle" of Teheran.

REASONS FOR CAUTION

There are other reasons why the same kind of deal with Stalin Churchill would prefer to say as little as possible about foreign policy.

Previous pronouncements have already caused him considerable difficulty. Even the vague provisions of the Atlantic Charter

erg and of other city commanders Citing the opinion of over 300 | is proof that the army units with- No amount of conniving and main Germany gave wide support to the revolt.'

MASS FERMENT

Just as evidence is mounting more than the actions of a "small class reflects tremendous mass in the August 2 column of Wm. writer, who reports:

THE MILITANT

Friedrich Engels --- Co-Founder Of Marxism

(August 5 marks the 49th anniversary of the death of Friedrich Engels, co-author with Karl Marx of the "Communist Manifesto" and one of the two founders of the Communist movement. We reprint below excerpts from an article on Engels written nine years ago by Leon Trotsky as a review of "Engels' Letters to Karl Kautsky." The complete article was published in the June, 1936 issue of New International.)

By Leon Trotsky

During Marx's lifetime, Engels, as he himself put it, played second fiddle. But with his co-worker's last illness, and especially after the latter's death, Engels became the direct and unchallenged leader of the orchestra of world socialism for a period of twelve years. .

Engels' insight into military matters, based not only upon his extensive special knowledge but also upon his general capacity for a synthesized appraisal of conditions and forces, enabled him to publish in the London Pall-Mall Gazette, during the Franco-Prussian War, remarkable military articles, ascribed to one of the highest military authorities of the time (the Messrs. "Authorities," doubtless, surveyed themselves in the mirror not without considerable astonishment). In his intimate circle Engels was dubbed with the playful name of the "General." This name is signed to a number of his letters to Kautsky.

PERSONALITY OF THE REVOLUTIONIST

Engels was not an orator, or it may be that he never had the occasion to become one. Towards "orators" he displayed even a shade of disrespect, holding, not without foundation, that they incline to turn ideas into banalities. But Kautsky recalls Engels as a remarkable conversationalist, endowed with an inexhaustible memory, remarkable wit, and precision of expression. Unfortunately, Kautsky himself is a mediocre observer, and no artist at all: in his own letters Engels stands out infinitely more clearly than in the commentaries and recollections of Kautsky.

Engels' relations with people were foreign to all sentimentalism or illusions and permeated through and through with a penetrating simplicity, and therefore, profoundly human In his company around the evening table, where representatives of various countries and continents gathered, all contrast disappeared as if by magic between the polished radical duchess Schack and the not at all polished Russian Nihilist, Vera Zasulich. The rich personality of the host manifested itself in this happy capacity to lift himself and others above everything secondary and superficial, without departing in the least either from his views or even his habits.

One would seek in vain in this revolutionist for Bohemian traits so prevalent among the radical intellectuals. Engels was intolerant of sloppiness and negligence both in small and big things. He loved precision of thought, precision in accounting, exactitude in expression and in print. When a German publisher attempted to alter his spelling Engels demanded back several galleys for revision. He wrote, "I would no sooner allow anybody to foist his spelling on me than I would a wife" (page 147). This irate and at the same time jocose sentence almost brings Engels back to life again!

In addition to his native tongue, over which his mastery was that of a virtuoso, Engels wrote freely in English, French, Italian; he read Spanish and almost all Slavic and Scandinavian languages. His knowledge of philosophy, economics, history, physics, philology, and military science would have sufficed for a goodly dozen of ordinary and extraordinary professors. But even apart from all this he possessed his main treasure: winged thought.

OPTIMISM COMBINED WITH HUMOR

In June 1884, when Bernstein and Kautsky, affecting Engels' own likes and dislikes, complained to him of the incipient pressure of all sorts of "erudite" philistines in the party, Engels said in reply, "the main thing is to concede nothing, and in addition, to remain absolutely calm" (p. 119). While the General himself did not always retain "absolute calm," in the literal sense of the term on the contrary, he was wont on occasion to boil over magnificently - he was always able to rise quickly above temporary mishaps, and restore the necessary balance between his thoughts and emo-

FRIEDRICH ENGELS 1820-1895

Engels' optimism extended equally to political questions and to personal affairs. After each and any defeat he would immediately cast about for those conditions which were preparing a new upswing, and after every blow life dealt him he was able to pull himself together and look to the future. Such he remained to his dying day. There were times when he had to remain on his back for weeks in order to get over the effects he suffered from a fall during one of the "gentry's" riding to foxes. At times his aged eyes refused to function under artificial light which one cannot do without even during daytime in the London fogs. But Engels never refers to his ailments except in passing in order to explain some delay, and only in order to promise immediately thereupon that everything would shortly "proceed better," and then the work will be resumed at full speed

COLLABORATION OF MARX AND ENGELS

One of Marx's letters has a reference to Engels' habit of playfully winking during a conversation. This helpful "winking" passes through Engels' entire correspondence. The man of duty and of profound attachments bears the least resemblance to an ascetic. He was a lover of nature and of art in all its forms, he loved the company of clever and merry people, the presence of women, jokes, laughter, good dinners, good wine and good tobacco. At times he was not averse to the belly-laughter of Rabelais who readily looked for his inspiration below the navel. In general, nothing human was alien to him. . .

Was he, perhaps, an epicurean? The secondary "boons of life" never held sway over this man. He was genuinely interested in the family morals of the savages or in the enigmas of Irish philology but always in indissoluble connection with the future destinies of mankind. If he permitted himself to joke trivially, it was only in tions. The elemental side of his personality was optimism com- the company of untrivial people. Underlying his humor, irony and bined with humor towards himself and his enemies. In his optimism | joy of living, one always feels a moral pathos --- without the slightthere was not a modicum of smugness - the term itself rebounds | est phrase-mongering or posturing, always deeply hidden but all from his image. The subsoil springs of his joy of living had their the more genuine and ever ready for sacrifice. The man of comsource in a happy and harmonious temperament, but the latter was merce, the possessor of a mill, a hunter's horse and a wine cellar Kautsky does not exaggerate in the least when he states in his

commentary to the correspondence that in the entire history of the world it would be impossible to find a parallel instance of two men of such powerful temperaments and ideological independence as Marx and Engels who remained throughout their entire lives so indissolubly bound together by the evolution of their ideas, their social activity and personal friendship. Engels was quicker on the uptake, more mobile, more enterprising and many-sided; Marx, more ponderous, more stubborn, harsher to himself and to others. Himself a luminary of the first magnitude, Engels recognized Marx's intellectual authority with the self-same simplicity with which he generally established his personal and political relationships.

The collaboration of these two friends - here is the context in which this word attains its fullest meaning! — extended so deeply as to make it impossible for anyone ever to establish the line of demarcation between their works. However, infinitely more important than the purely literary collaboration was the spiritual community that existed between them, and that was never broken. They either corresponded daily, sending epigrammatic notes, understanding each other with half-statements, or they carried on an equally epigrammatic conversation amid clouds of cigar smoke. For some four decades, in their continual struggle against official science and traditional superstitions, Marx and Engels served each other in place of public opinion. . .

If in his younger years Engels withdrew into the shadows of the textile industry in Manchester in order to provide Marx with the opportunity to work on Das Kapital, then, subsequently, as an old man, without complaining, and one can say with assurance, without any regrets, he put aside his own researches in order to spend years deciphering the hieroglyphic manuscripts of Marx, painstakingly checking translations, and no less painstakingly correcting his writings in almost all the European languages. No. In this "epicurean" there was an altogether uncommon stoic!

REVOLUTIONARY ACTION ABOVE ANY BOOK

Reports about the progress of the work on Marx's literary legacy provide one of the most constant leitmotifs in the correspondence between Engels and Kautsky, as well as other co-thinkers. In a letter to Kautsky's mother (1885) — a rather well-known writer of popular novels at the time - Engels expresses his hope that old Europe will finally swing into motion again, and he adds, "I only hope that sufficient time will be left for me to conclude the third volume of Das Kapital, and then, let her rip!" (p. 206). From this semi-jocular statement is clearly to be gathered the importance he attached to Das Kapital; but there is also something else to be gathered, namely, that revolutionary action stood for him above any book, even Das Kapital. . .

In 1885, Engels, referring to the German Social Democracy, which was scoring rapid victories, wrote that it was a party "free from all philistinism in the most philistine country in the world; free from all chauvinism in the most victory-drunk country in Europe" (p. 154). . . The subsequent course of events proved that Engels had visualized the future course of revolutionary development too much along the straight line. Above all he did not foresee the mighty capitalist boom which set in immediately after his death and which lasted up to the eve of the imperialist war. It was precisely in the course of these 15 years of economic full-bloodedness that the complete opportunistic degeneration of the leading circles of the labor movement took place. This degeneration was fully revealed during the war, and in the last analysis, it led to the infamous capitulation to national socialism. .

Historical reality is infinitely richer in possibilities and in transitional stages than the imagination of the greatest genius. The value of political prognoses lies not in that they coincide with every stage of reality but in that they assist in making out its genuine development. From this standpoint, Friedrich Engels has passed the har of history.

Testifying Against Wage Freeze

-THREE

Testifying to the hardships suffered by workers' families under the wage freeze, the Zach family (above) of Bloomfield, New Jersey, appeared at a recent War Labor Board Panel hearing in Washington. Zach is a member of the United Electrical. Radio, and Machine Workers Union which is attempting to secure a 17c an hour increase for workers at the Westinghouse Electric plant by which he is employed. Walter Zach pointed out that he could pay medical expenses for his family only by spending small sums previously saved. Mrs. Zach testified that meat, dairy products, clothing, and other expenses had skyrocketed until her husband's \$42.50 for a 48-hour week could no longer pay their bills. The two children are 5 and 31/2 years old.

Bosses Fear Threat To Political Monopoly Involved In Labor's Independent Action

The slightest hint of a possible breach in the political monopoly exercised by America's Sixty Families leads to a furious assault by the agents of the ruling capitalist class. Even so timid and halting a step toward labor's political "independence" as the organization of the CIO Political Action Committee calls forth bitter opposition from the political deputies of Big Business and the kept press. Reaching a convulsive fury during the recent Democratic National Convention, the boss-controlled politicians and press have kept up a running fire against the PAC since its formation.

"NO THIRD PARTY"

they have no intention of challenging the two-party system ed to allay the fear that the PAC contains within itself the germ of labor's independent political action which, under certain circumstances, will blossom into a "third party", despite all assurances to the contrary.

ORIGINS OF PAC

PAC was intended to head off the formation of an Independent La- power, the PAC serves to bolster bor Party. The reactionary anti-labor m e a s u r e s accompanying Business. Not only do machines put men out of work under capitalism, "danger" that the workers will but men put machines out of work, too. become conscious of their class

interests as counterposed to the Remember when we were on W.P.A.? Fifty of us would grade interests of the employing class park lawn with spades and picks. One man with a bull-dozer and destroy forever the fiction of could have done three-fourths of the work. But we sweated away, the non-class character of the and the bull-dozer rusted. In the depression, nearly all the machin-Democratic and Republican parery rusted, and people starved. What kind of a crazy system do ties. It is this development that you call that? But lots of people figured that was all right, because the employing class fears. For if you used the bulldozers and other machinery, still more people once the American working class would be thrown out of work, and there would be still more starvabecomes conscious of its position in society as a political class, the tion.

And it works that way at other times too. Take those fellows in the lime pit at the steel mills, bent over all day long, throwing tons and tons of limestone by hand into the iron coffins. (Giant charging pans filled at different times with scrap iron, lime, manganese, etc. The contents are emptied into an open hearth furnace by a big floor crane.) Mike, the oldest, has been at it for 23 years. Henry, the youngest, is just up from the South. There are five of an identity of interests between them, all hefty guys. But if you watch them a minute, you can see the working class and the exploitthat it's not an easy job even for them. Young Henry is six foot ing class. That these interests can two, with bulging muscles and big shoulders but he sweats in streams and rivers, while the lime dust sticks uncomfortably to his brown skin. The cotton fields were never like this! And old Mike. for all his being used to the job, has to stop and straighten up every agents of Big Business in control so often. Shocking up the wheat in a Sicilian field is only a forgotceiving the workers, by hindering ten dream now.

consciousness, the labor bureau-They're Putting a Machine Out of Work crats facilitate the victory of re-

How many times they sneak a look over at the railroad crane But the fears of Big Business oading the limestone into the big gondolas from the huge stockare well grounded. The formation pile at the dock. It's so quick and easy, the way those cars are of the PAC testified to the fact loaded by the crane. And here they strain their guts to heave the that the Democratic and Repubstuff from the platform over into the coffins. Nearly a ton to a lican parties were hopelessly comcoffin. It's heavier than coal, and more awkward to handle. Fifteen to twenty coffins per man to load in a day. They take a couple erable section of the workers. In of hours to load four or five apiece. Then the engine comes, hooks spite of the wishes of Hillman onto the buggies, takes them to the furnaces, and in a few minutes and Murray the class consciousness of thousands of CIO milicomes back again with another bunch, and they start all over tants will be stimulated by the again.

They feel funny when they look at that crane over there picking up half a ton at a time. But year in and year out, sunshine, storm and freeze-ears weather they will load by hand and the crane will labor bureaucrats, will lead the be over by the dock.

Well, they're putting a machine out of work, aren't they? There's five in the gang. The crane with one man outside, and one inside could do all the work. The bosses say there's a labor shortage launching their own Independent | don't they? Here's a chance for them to get three extra men. Why don't they put a crane in the lime pit?

The answer is simple. It wouldn't pay them. They don't see any profit in it. They can hire a man for 80 cents an hour. If they Michigan Party Launched By any profit in it. They can hire a man for 80 cents an nour. If they went to hire a crane, it would be \$8 an hour. So if five men can do the work by hand why should the company spend an extra four dollars per hour? Over where they're loading the big gondolas, the crane is saving the labor of 15 or 20 men. So it "pays" to use it there.

Even the Army Is a Relief from That Work

For years and years in the open hearth, the third helpers used to have to stand for hours at a time in front of the white hot furthe trade unions. a second of the second of and

that was invented the stretcher carriers had it easy for a while. Of course the third helpers still had to shovel in to build up the spoke of "returning" some to sides and the front where the gun couldn't reach. But the company made more profits and everybody was happy.

But wait! They cooked up other methods too. And pretty soon mittee. It was made clear that the furnaces could be tapped oftener than before. This meant recthe MCF favored government ord-breaking steel production in 1943. But they rode hell out of the furnaces. As a result, not only the banks of the furnace crumbled plants as public utilities. A clear from the heat and weight of the steel, but the bottoms blew out too. statement on labor's rights was More bad bottoms — the bane of a third helpers life. They have set forth and progressive demands to shovel a heavy slag mixture into the furnace for hour after hour, with no time off for lunch. And as the other furnaces are tapped, a couple of third helpers go over and take care of them, short-handed. This happens at least once a week.

On the bulletin board by the time-clock are a lot of post cards from fellows in the army, some in basic training. Every other one This is an extremely dangerous says, "No bad bottoms here," or "No more bad bottoms!" So they provision which can be used by even look on the army as a relief from that work.

Since the dolomite gun was invented the third helpers have wished many times, when they were wilting, open-mouthed and glassy-eyed in that heat, that someone would invent a machine to repair the furnace bottoms too. Sometimes they discuss how one could be constructed. But suppose it could be. It would be used only once a week or so. A machine has to be used constantly to pay James Duke, tobacco mil- machine for its war. The schools party into an effective political together since only by permitting for itself. And an open hearth furnace should have a "rest" once in a while anyway. So where would the profit be for the company?

Machines Will Work — If There's Profit Gained

You find the same thing on the other side of the furnaces, down in the pit, where the ladles stand to catch the steel and slag, when they "tap out." There's always a labor gang cleaning up the slag with pick and shovel. Sometimes they'll struggle an hour or so with a tough pile they can't loosen up. Finally a railroad crane will come posed to the formation of a for political knowledge and have along and dig it up with a big scoop-shovel in about ten minutes. What do you suppose the guy with the pick feels like? Why he feels like a damn fool for having bothered with it at all.

But the bosses aren't going to have the crane standing there all the time. For one thing, they'd have to build a special track for it, so it wouldn't be in the way of the ladle cars and ingot buggies. And the other reasons that exist in the case of the limestone would have the same effect here, too.

Another Reason for Booting Out the Bosses

Here in this country is the most gigantic machinery ever created. But the Morgans, Duponts and Rockefellers will only use it or install it where they see a profit in it. You can fill your lungs with lime ing the labor party nucleus thus the Michigan Farmers Union; or coal dust, you can get rheumatism or water-on-the-knee in the rich. With the rapid expansion of directors of education keep an Recurring wars, recurring far established, and made it pos- Carl Giese, labor leader of Van mines, pneumonia working on the furnaces - you can strain yourself industry came a great demand especially watchful eye and a firm depressions and the steady en- sible for the MCF to present its Dyke; Ben Garrison, former blue in the face to do a job that a machine could do without half trying. And you can keep right on doing it just so long as there's no profit for the boss in the machine. It's your funeral, not his.

That's another reason we'll have to give the capitalists the boot. We're in the great majority and our lives have got to have more consideration than their nickels. We're not going to go around with the shakes when we're not even old. And you can bet your last cent we're not going to doom our kids to it either. We're going to nationalize the factories, mines and shops and run things through our own elected committees. We'll run them in such a way that their professorial chairs by the the antidote to the poisonous lies ers and their allies. The delegates Local 659, UAW-CIO, Flint; and every workingman can hold up his head and not feel like a horse

That the only way to racial equality is down the road of working class solidarity has often been pointed out by The Militant. A review of the racial planks in the official MCF platform adopted at Lansing should further convince us of the correctness of this formulation. Section XI on Civil Rights reads as follows:

"We demand the enactment of federal, state and municipal laws making it a criminal offense for any public institution or individual to discriminate against any person for reasons of race, color, religion, nationality or sex, or for any public institution, private business, organization or individual to set forth segregation of races as a part of any social contract.

CRIMINAL OFFENSE

"We call for the elimination of the poll tax by act of Congress, the passage of anti-lynching legislation, the unsegregated integration of Negroes into the armed forces and the establishment of a permanent federal and state committee on fair employment practices.'

The flatfooted demand for laws making SEGREGATION OF RACES by any public institution, private business, organization or individual a CRIMINAL OF-FENSE is the fulcrum of the entire race question. A program must include this demand if it is intended 'to really pull up racial oppression by its vicious roots. Halfway platforms which take a few noisy steps but do not reach this balance point will not tip the the political wings of capitalism, board to the other side.

UPROOT SEGREGATION

America's "60 Families" are able to maintain their stranglehold on the masses by splitting the working class into different segments based mainly on custom, only 173 delegates representing halted only after the Army, under

10 Years Ago In The Militant

AUGUST 11, 1934

MINNEAPOLIS - As the third week of the General Drivers' Union Local 574 strike drew to a close, the bosses, frightened by continued loss of profits, began to break ranks. While the employers' Citizens' Alliance made new proposals for a "settlement" discriminating against pickets, scores of small companies signed the arbitration agreement previously accepted by the union.

40.000 workers gathered in a tremendous protest meeting on Monday, August 9, to hear union representatives flay Governor Olson's decree of martial law, which, under a false cloak of impartiality, aided the bosses and terrorized the workers. While hundreds of permits were issued for scab trucks by the military, strike leaders Vincent Dunne, Miles Dunne, and William Brown were imprisoned by the military forces. The three leaders were released under the pressure of the united workers, but 120 pickets were arrested as a final effort to "show the union" that the Citizens' Alliance was not yet broken.

Denouncing the settlement proposed by the Citizens' Alliance, Vincent Dunne declared: "Local 574 is never going to agree to a 'preferential list' which puts the rights of scabs above the rights of union men. . . Doesn't it take colossal gall for people who sent out squads of murderers to shoot our pickets in the back, to talk about 'unlawful acts'?"

DETROIT - "Revolt against American Federation of Labor policles is rising in accelerated tempo throughout the automobile centers and in the newly formed Federal Unions in the United Automobile Workers Union of the AFL," The Militant reported. According to press reports, 7,000 workers in the Hudson Motor Company in Detroit had broken with the AFL. The break was an outgrowth of rank-and-file opposition to the March 25 sellout perpetrated by AFL leaders which the AFL magazine, The Federationist, had called "a patriotic duty. . . accepted on the assurance of President Roosevelt that it was the best way out. . .

The Militant said, "There is no doubt that the action of the Detroit workers in the Hudson plant is an expression of a forward movement of the rank and file. . . that may herald big doings in the automobile industry which will have immense repercussions throughout the entire labor movement."

NEW YORK - The Textile Workers Convention, scheduled for September, was advanced to August 13 as a result of mass unrest among the textile workers of the nation. Workers in the Paterson, New Jersey silk mills were taking the lead in fighting for autonomy and a militant program.

We just received your last letter, and we're both as enthusiast-

ic as you about your furlough. We hope it comes through soon.

Address City and State

papers there was a picture of Commando Kelly's homecoming, ban ners and crowds to welcome him. . . but what struck me was the shoddy looking shack, a typical fire-trap of a house for him to come back to. It was something like our house.

Home, Sweet Home

It seems a shame, an awful shame for a fellow to be over there going through hell every day, and then to come home to what the social workers and the "uppah clawsses" would call "the slums". It seems a terrible shame that when the fellows come home at last into unemployment and all sorts of privations that these old frame shacks will be a little shabbier, a little creakier and saggier than they were before all of you left. But that's the way it

will have to be, because, even if a

worker could get enough material

to fix up his place, or even if he had a chance to get another house. he certainly wouldn't have enough money to pay for it under the President's Little Steal Formula.

Sometimes you forget about these things. Mom and I have lived so long in this place that we don't notice very much any more how lied forth to exterminate the pro- crummy it is. But last week on my day off we thought we'd have an outing. We packed a lunch and took a streetcar to the park. (You know, Joey, it did my heart good to see Mom out in the open air. She forgot all about everything and just enjoyed herself, got about ten years younger.) I hated to take Mom home again to our house after the day was over.

Out there, near the park, there are a lot of beautiful homes. big lawns with smooth soft grass, tall trees, long driveways. everything to make a home beautiful. That is the way men should live. When you get out of the factory, out of the noise and grime, you want a clean, cool place where you can relax and live a little, where you can take a breath without smelling the coke oven, where you can go outside with a clean white shirt on, and it won't get covered with brown dirt in ten minutes.

These Things Are Worth Fighting For

With all the riches in the country, I should think it would be possible to have workers' homes some place where there were trees. That's what I wish you had to come back to, Joey, a little white place with shutters, trees, and maybe one of those white wooden fences around it. Mom would have roses all over the fences. She even manages to get a few sickly ones here, but they get all covered with dust and look pretty bad, although I always praise her about what swell roses she raises. Poor Mom tries so hard to get a little beauty here.

Well, Joey, there are two ways of looking at a thing like this. You can gripe, or you can do a little punching and fight for what you want. I've been punching for so many years now that I guess I'll have to keep it up. You can't teach an old dog new tricks, you know. Yes, I'm planning on keeping on plugging, and maybe we WILL wind up that way, with a little fresh air and cleanliness for the workers and their wives and kids. It certainly is worth fighting for.

Well, Joey, we can hardly wait to see you again. . . and I suppose you feel pretty much the same way about getting home, even if "home" is pretty shabby. Dad

sanction, why not in the workshop and the car barn?

No wonder these misled and miseducated workers howled and snickered when U.S. Army officers appealed to them to go back to work! As the fate of the eight Negro workers since the return to work and the taking over by the Army has shown, they had good grounds to snicker. They could not take seriously the intention of officers who enforce Jim Crow in the Army to do the exact opposite on company premises.

No wonder the Stalinist T.W.U. leaders' appeals to patriotism fell on deaf ears! This patriotism is soaked through and through with Jim Crow.

There was yet another reason for the effectiveness of the bosses' plot and the ineffectual efforts of the Stalinist union leadership to stop the strike. Because of their no-strike pledge and slavish subservience to Roosevelt's policies, the trade union officialdom has completely failed to provide the workers with any program of resistance to the encroachments of the capitalists, to stop profiteering and the mounting cost of living. They have failed to provide them with a program of struggle for security in face of the threat of unemployment which stares at them through all the "postwar" plans of the bosses. That is why fascist demagogues and preachers of race hatred and violence can receive a hearing even from some workers.

These ultra-reactionary forces are trying to divert the justifiable indignation and unrest of the workers away from the real causes and authors of their misery. In barring the road of struggle against the capitalist perpetrators of labor's hardships, the union officials play into the hands of these reactionary forces. They leave the road open to that despair in which anti-Negro demagogues find a fertile soil. Similar circumstances enabled the Nazis to hoist themselves to power in Germany on the backs of a divided working class.

The way to unity of the Negro and white workers lies only along the path of joint struggle against the common capitalist enemy. To lament over the tragic disunity displayed in Philadelphia is not enough. To confine oneself to castigating the selfbetraying conduct of the P.T.C. workers is not enough.

The disastrous policies imposed upon the unions by the present leadership must be discarded. American labor must be rearmed with a militant program which will effectively defend the real interests of all workers and strike at the roots of the Jim Crow system. The fight against Jim Crowism must go hand in hand with irreconcilable struggle against the plans of Big Business to foist unemployment and starvation upon the workers and to smash their organizations.

Such a program of struggle demands that along with the struggle on the economic field, the trade union movement break with the two capitalist parties which uphold the Jim Crow system. By asserting its independence and concentrating its forces against the common enemy, organized labor will cement the unity of the white and Negro workers, halt the union-busting offensive of the bosses, and move forward toward a real solution of the problems confronting the working masses.

ment of working conditions can only be obtained by the removal of the no-strike pledge, the nonadherence of labor men to the WLB, and striking out for Inde-

H. T.

'Wage Bracket System' Is Pay-Cut Formula

All sections of the union movement are complaining oitterly about the way in which the War Labor Board, under the orders of "Assistant President" James F. Byrnes, has been undermining union wage rates with its "wage bracket system," ostensibly put into effect to rectify "inequalities."

The WLB establishes certain "wage brackets" of "sound and tested" rates in a given area and occupation. It then subtracts 10 per cent from this figure to establish the "minimum" of the bracket. The WLB is supposed to permit wage increases up to this "minimum," which invariably is far below union standards.

Robert J. Watt, AFL representative on the WLB, recently denounced the "wage bracket system" as 'equally bad," and "in some instances worse" than the wage-freezing Little Steel formula. He charged that it is "based on unfair wage statistics, collected in painfully slow procedures, amid the hocus pocus of secret or confidential sources."

The figures, he pointed out, come from the Bureau of Labor Statistics, which obtains them mainly from aided in finding the correct road the employers. When the unions challenge the BLS on the accuracy of its data, it hides behind an "unwritten tion.

> Thus, Watt declared, the "wage bracket system" has become "a perfect haven for either an employer or an employer association to 'assist' the wage freeze by furnishing questionable wage rates which, because of their secrecy, may not be analyzed or exposed." Not only does the BLS accept the mere statement of the employer, without checking his records, but it "overlooks" the union wage shops and gives excessive weight to "small, back-alley shops." The unions themselves are seldom consulted.

Corporation Heads Given Huge Salary Increases

The Roosevelt administration has frozen workers' wages with the Little Steel Formula. Corporation executive salaries, however, have soared between 1940 and 1943 on the basis of a Big Steal Formula.

How Roosevelt's "equality of sacrifice" and "stabilization" program has affected the "earnings" of big business men is revealed by a recent list of corporation salary increases compiled by the Trade Union and constantly heckled and booed Accident and Health Association. Salary boosts of between 100 and 200 per cent are common.

Here are a few samples:

	Per cent of increase			
	1940	1943 ove	er 1940	
viation Corp.—V. Emmanuel	\$25,000	98,317	293.2	
urlington Mills-J. S. Love	91,940	170,180	96.5	
ow Chemical—W. H. Dow	50,000	100,000	100.0	
oodyear Tire-P. W. Litchfield	100,000	175,000	75.0	
mington Rand—J. H. Rand, Jr.	92,782	225,278	175.1	
avage Arms—F. F. Hickey	32,010	86,037	168.8	
mken-Detroit Axle-W. F. Rockwell	12,300	81,483	228.1	
illys-Overland-J. W. Frazer	60,000	123,184	105.3	

Of course, not all the bosses garnered such Big Steal increases. Poor Eugene Grace, president of Bethlehem Steel, found his 1942 salary of \$537,724 "stabilized" at the same figure for 1943.

He and others like him have some consolation, however. They're clipping off additional millions and bil lions in dividend coupons, and they have quite a few billions socked away under "undistributed profits." "contingency reserves," etc. So they're "content" to eke out an existence today on a few hundred thousand dollars yearly. The big melon is being saved to top off the war profits feast.

SATURDAY, AUGUST 12, 1944

against imperialist attack.

Philadelphia Strike

The strike of the Philadelphia Transit Company workers against the upgrading of eight Negroes is a danger signal to all of American labor. This is the gravest of recent manifestations that the unionbusting drive of the capitalist class is making head--way among layers of backward workers. A continuation of this trend, with white workers acting as tools of the employers against their Negro brothers, can only culminate in disaster for the whole labor movement.

For it would assure the success of the bosses' policy of "divide and rule" at a time when unbreakable solidarity of the working class is imperatively needed. With their ranks torn by racehatred, the workers will be helpless to fight against unemployment, insecurity and misery in the coming period which will be far worse than the conditions after 1929.

It is well established that the strike was directly inspired in the Company offices. The Mitten interests, which own and control the P.T.C., originated the policy of discrimination against the Negro transit workers and have applied it for decades. The reactionary leaders of the strike were officials of the Mitten-sponsored company union. The immediate aim of the strike was to discredit and break up the CIO-Transport Workers Union, which recently defeated the company union in a National Labor Relations Board election. Here is a clear case of the bosses plotting to excite reactionary prejudices among backward workers and sow dissension in labor's ranks in order to intensify their exploitation and increase their profits.

Why and how have the Philadelphia transit interests been able to apply their anti-Negro policy with such effect?

The reactionary leaders of the strikers supplied part of the answer. Faced with the threat of induction by the draft boards, they are reported to have exclaimed: "Very good; we'll fight side by side with whites in the Army." They thereby revealed that their prejudices flow from the whole Jim Crow system implanted in American capitalism and fostered by the present administration. If the government itself practices anti-Negro discrimination and segregation in the armed forces, why, they argued, isn't such a policy justifiable in the Company? If, in the face of death on the battlefields, the Negro is "put in his place" with official

The temporarily arrested strike wave which reached its peak in May of this year has resumed its upward curve.

All of the factors contributing to the intensification of the pre-invasion strike movement are still present but in aggravated form. Among these factors are: The rigid application of the wage-freeze; the imposition by administrative decree of the jobfreeze; the adoption by Congress of a mangled version of the Price Control Act which makes price control a mockery; cutbacks and plant shutdowns resulting in the practice of downgrading, elimination of overtime pay, disemployment, which reduces the "take-home" wage of the workers and lowers their standard of living. In the face of all this there is a constant rise in the cost of living for the masses and skyrocketing profits for the corporations.

In addition, the arrogance of the corporations increases in direct proportion to the craven capitulation of the labor bureaucrats to the contract violations, speed-up devices and provocations of the corporation executives. The policy of the labor bureaucrats offers no other solution to these problems than continued dependence on Roosevelt and his War Labor Board, the reiteration of the unconditional no-strike pledge, and the purging of union militants who resist corporation provocation. These measures can only worsen the condition of the workers, weaken the unions and make them easy prey to the union-smashing designs of the labor-hating corporations and their political agents in Washington.

The extensive outbreak of sporadic strikes is an indication that the workers are losing faith in the so-called "friends of labor" and are pressing for action. Experience has taught that only the strength and solidarity of the unions can wrest concessions from the profiteering corporations and their government. Evidence that this fact is impressing itself upon the workers was revealed by the recent Michigan CIO Convention where over one-third of the delegates voted to revoke the no-strike pledge. The movement to revoke the no-strike pledge will gather momentum as increasing numbers of workers record their discontent by "unauthorized" strikes to gain their demands.

Against the unconditional surrender policy of the labor bureaucrats the union militants are mobilizing around the following demands. Rescind the No-Strike Pledge! No faith in Roosevelt or his War Labor Board! Smash the wage freezing Little Steel formula by calling a conference of all unions to draw up a program of independent labor action. For a rising scale of wages to meet the rising cost of living!

general strike in Denmark last month is still obscured by censorship. Even in the course of the strike, information seeped thru that the ranks of the strikers held out despite the readiness to capitulate of the official leadership of the resistance movement, the nationalists, the trade union leaders and the Social-Democrats.

Liberals Disappointed --**But Support Roosevelt**

The liberals, who have been telling the world for 12 years that Roosevelt and his party are the answer to the "common man's" prayer, are suffering a bad case of hang-over since the recent Democratic Party convention. Bruce Bliven, editor of The New Republic, voices the anguish of his breed at the rotten egg they suddenly smelled in Chicago.

In the August 7 issue, Bliven bares the plight of 'The Liberals after Chicago." They are "down in the dumps" and "heartbroken" because "they fear that the conservatives are now in complete control of both the Democratic and Republican parties." In every sphere, the cause of "liberalism" has been routed. Even the "war for democracy" has turned sour in the liberals' mouths. "They see military victory not far off, but permanent world peace very far off indeed." Bliven confesses "there is nothing in the immediate prospect which should cause American progressives to throw their hats in the air. The Southern conservatives and the big-city machines of the North had their way at Chicago, with the acquiescence, if not

the active collaboration, of President Roosevelt." "Nearly all the top decisions in the government bureaus," Bliven complains, "are now being made by conservatives, and a large number of them by Republican conservatives." "Free enterprise"-unrestricted capitalist piracy-has become the hue and cry of Democrats and Republicans alike.

Churchill is "more completely Tory" than ever. Stalin cannot be counted "a good liberal along American lines." The "democratic impulse" in Chiang Kai Shek's China is "suspect, to put it mildly." The "Four Freedoms" are in for a bad shellacking.

But this is not "justification for pessimism." "If you are disheartened at this moment, it means only that you were unjustifiably optimistic a little earlier." For it now turns out that the "New Deal" was an 'accident." And with the war, Roosevelt "rightly or wrongly" had "no time" to bother with "a program of domestic reform."

But having finally uncovered this rotten egg and to evoke when they attempt to made a wry face, Bliven puts a clothes-pin on his crush the revolutionary activities nose and swallows the egg. For he ends up, "No of the masses elsewhere in Eur- progressive needs to be told that he should work and vote for the reelection of President Roosevelt."
