Trotsky's Ideas Stand Verified By World Events

By the Editors

Four years have elapsed since August 20, 1940, the day on which Leon Trotsky was struck down by Stalin's hired killer. By murdering the man he most hated and feared Stalin pursued a political aim: he hoped at the same time to deal a mortal blow to the organization which Trotsky had founded - the Fourth International; and to the system of ideas and the cause of which Leon Trotsky was the banner-bearer and the living incarnation. The ideas which Trotsky held, taught and fought for during his entire conscious life may be briefly summed up as follows:

Further progress of mankind is incompatible with the preservation of the existing system of capitalism. In fact, the perpetuation of this decayed social order threatens the complete destruction of civilization. Conditions have long ago matured for the reorganization of society on a new, socialist basis, which alone can assure the peaceful, prosperous and harmonious development of productive forces on a world scale, and with them Of Disintegration nomic life will not occur by itself. It can be accomplished only through the medium, leadership and transitional rule of the only progressive class in modern society - the working class. All other perspectives are reactionary and utopian. For the accomplishment of this task the vanguard of the working class must be organized into a revolutionary proletarian party, internationalist in spirit and scope. There is no other way of mobilizing the overwhelming majority of the workers, of winning the support of other oppressed masses in both the advanced and colonial countries, and of breaking the rabid resistance of the ruling classes to the establishment of socialism.

TROTSKY'S IDEAS ARE VINDICATED

The events of our entire epoch are a verification of the truth of these ideas. In the space of a quarter of a century, the world working class, and the whole of mankind, has gone through the agony of two world wars with their train of incalculable most significant is contained in suffering and devastation. The interval between these world both AP and UP dispatches on holocausts was one of economic stagnation, decline and unprecedented crises, accompanied by unbridled political and cultural reaction. Declining living standards, the bestial rule of fascism and, as the inevitable culmination, war — this is the price that already has been paid for the continued rule of capitalism. This frightful price was paid because of the treachery of the working slass parties-those of the Second International and of the degenerated and now defunct Third (Communist) International. The workers paid this price, suffered all the terrible defeats of The past, for the lack of the chief instrument of the socialist overturn-a revolutionary party such as was built by Lenin and Trotsky in Russia before and during the first World War.

But the defeats of the workers have not altered the tasks that history has placed on the order of the day. The second World War is now drawing to its conclusion. Out of it, as out of the last war, a great revolutionary wave is beginning to emerge. For one year, since the downfall of Mussolini, the Italian masses have been seething in revolutionary ferment. The millions in Germany are beginning to rise. In their wake tens and hundreds of other millions must follow. That is the real perspective of the period ahead.

Nazi Army Shows Increasing Signs

VOL. VIII-No. 34

German imperialism's once-mighty military machine is disintegrating from within. Disaffection spreading among the soldier ranks, revealed in mutinies, desertion and violent clashes between the regular troops of the Wehrmacht and Hitler's own S.S. forces. Inside Germany itself, the Nazis are compelled to pile more draconic decrees on the war-

weary and resisting masses. Three separate reports have appeared giving details of mutinies within various sections of the German army. One of the August 10 from St. Malo, France, describing how German troops

Outdoing Hitler

The Rotary Club of England's big steel town, Birmingham, listened recently to a speech by a French business man and Rotarian, Marcel Ferel, who had escaped from France. Said he:

"As long as there is a German nation the civilized world will never live in peace. We must destroy the Pan-Germanic Empire and reconstitute the former duchies which existed before the Treaty of Frankfurt. Deport Germans to the countries which they have devastated and make them work there as slaves. Shoot all the Gestapo and murderers and then sterilize all the men and male children. Later, when the various duchies have proved themselves worthy of a place in the civilized world,

PRICE: FIVE CENTS

Measure Sponsored By Wall Street Provides Unemployment Relief As Low As \$2 A Week

By C. Thomas

By a vote of 55 to 19 the Senate has adopted the George "states rights" unemployment compensation bill after defeating the more liberal Kilgore-Murray measure 49 to 25. The political deputies of Wall Street ganged up to smother the Kilgore Bill which had the support of the entire organized trade union movement. The forces behind the George Bill were organized by Roosevelt's right-hand man, James F. Byrnes, Director of War Mobilization. Parliamentary maneuvers to facilitate its adoption were engineered by Roosevelt's majority leader in the Senate, Alben Barkley.

The Washington correspondent of the New Leader reports that: 'Assistant President Byrnes, who was once the Administration's Majority Leader in the Senate and knows the ropes in that

Leon Trotsky did everything in his power, everything humanly possible, to prepare and arm the vanguard of the world proletariat for the impending stiggle for socialism. For years before the outbreak of the war, the shout the two decades of reaction after Lenin's death, he continued the work of Marx, Engels and Lenin. The body of principles, which constitutes the granite foundation of the world party of the socialist revolution, has been preserved and enriched. All the lessons of the past are at the disposal of the vanguard and of the class as a whole. The indispensable instrument itself, the Fourth International, was forged before the war, and has withstood the test of the war. Its sections continue to exist and to fight in more than a score of countries, in the colonies and the metropoli alike.

All the forces of reaction recognize who their mortal enemy | rialists. is. Trotskyism has been from its birth the most persecuted movement in working-class history. Trotskyists have fallen under the bullets of Stalin's GPU and under the axe of Nazi executioners in Germany and in occupied Europe. On the eve of Wall Street's entry into the war, Roosevelt turned the machinery of capitalist oppression against the American Trotskyists, jailing 18 leaders of the Socialist Workers Party. Only a few weeks ago, the British imperialists, with Churchill at their head, unleashed their attack against our English co-thinkers, clapping in jail four leaders of the Revolutionary Communist Party of England. In the colonial countries of Asia and Latin America the hounds of reaction pursue the Trotskyists.

TROTSKYISM IS INDESTRUCTIBLE

In this way the blood-stained rulers of "democratic" and fascist imperialism, aided and abetted at every step by the traitors and criminals in the Kremlin, hope to prevent the oppressed masses from rallying to the banner of Trotskyism, the banner of the socialist emancipation of mankind. They labor in vain. They can destroy individuals, but never our movement.

1 1

On this fourth anniversary of the death of our great teacher and leader we march confidently ahead. We know our task. It is to accomplish the fusion of the Trotskyist ideas and program with the awakening and onward-surging masses. In the titanic nation of the Missouri Senator." This is cited by Pearl events that lie ahead, this fusion can be accomplished at lightning speed. Once this occurs no power on earth will be able to obstruct the triumphant march of the socialist legions of the working class. The second wave of the world revolution now emerging will complete the work begun by the first wave of "non-partisan" policy is about the cleverest device ever 1917-1921, when the first workers' state was founded under Lenin and Trotsky in the territories of the former Czarist empire. This time the October revolution will be extended throughout Europe and the whole world. It was to this end that Trotsky worked and fought side by side with Lenin, continuing after Lenin died. This is the task he entrusted to his co-workers and co-thinkers throughout the world. This is the task to which the Trotskyists summon the American workers.

the German women will intermarry with other nationalities. From this, perhaps, will spring a united European civilization."

The Manchester Guardian, which reported the speech, did not say whether the assembled British capitalists applauded this highly civilized plan for civilizing Germany.

shot their officers and surrendered. This is a sign of the breakdown of discipline, the refusal of soldiers to continue being cannon fodder for the Nazi impe

NORTH ITALY CIVIL WAR IS SPREADING

By Harry Martell

After a brief two months in office the Bonomi "coalition" cabinet, the second Quisling government of Roosevelt and Churchill in Italy, is on the toboggan slide, headed for political oblivion. Pounded by civil war between armed workers and fascists in Florence and throughout the north of Italy, undermined by a fierce economic crisis it is powerless to cope with, denied all real political authority by the Allied Military Commission, the Bonomi government is helplessly standing by while Churchill and his monarchist-reactionary allies are preparing to snuff out its pale existence.

Composed of capitalist "democ-I

ats," Stalinists, social-democrats, further need for this bankrupt Catholics, assorted politicians and crew, which has so quickly outlabor fakers, and supported by establishment, the Bonomi cabinet has dragged through its two suffering from slow starvation; they have been enslaved by a humiliating conquerors' treaty mine the fate of Italy. and are being made to pay for fascist partisans have been dis-

measure offering any degree of protection for the workers. The Mid-West Drivers **Strike to Enforce WLB's Wage Order**

Officials of the International Brotherhood of Teamsters, AFL, last Friday ordered the return to work of 50,000 striking over-the-road truckdrivers in 10 mid-west states, when President Roosevelt, at the behest of WLB Chairman Davis, ordered government seizure of 103 trucking companies in order to break the strike.

The walkout was provoked by the Midwest Operators Association which since Febraury 7 has defied a War Labor Board order granting a 7 cents-an-hour increase to the drivers. Despite the enormous increase in haulage and profits, 70 per cent derived from transportation of war materials, 03 of the 112 members of the operators' association claimed they could not "afford" to pay

the increase, which was only up to the limitation of the Little Steel formula. MILITANT TRADITION

Center of the strike movement was in Minneapolis and St. Paul, Minnesota, and Omaha, Nebraska, where the militant traditions implanted by the Trotskyist lead-

ership of old Minneapolis Local 544 still flourish despite the efforts of Daniel J. Tobin, Teamsters Czar, and the Roosevelt Administration to stamp out a fighting drivers' movement by framing and imprisoning 18 Socialist Workers Party and Local 544-CIO leaders.

Mass Gathering at Trotsky's Funeral

The Life Of A Revolutionist

The brief biography of Leon Trotsky which is reprinted below with our emphases inserted, appeared in a note to the first edition of Lenin's Collected Works, Volume XIV, part 2, page 481. Lenin was then still alive.

"L. D. Trotsky (N. Trotsky): born in 1879, active in the Workers' Circles in the city of Nikolayev; in 1898 exiled to Siberia, soon after escaped abroad and participated in the Iskra. Delegate from the Siberian League at the Second Congress of the (Russian) Party. After the split in the Party, adhered to the Mensheviks.

"Even prior to the revolution in 1905, he advanced his own and today particularly noteworthy theory of the permanent revolution, in which he asserted that the bourgeois revolution of 1905 must pass directly into the socialist revolution, being the first of the national revolutions; he defended his theory in the newspaper Nachalo, the central organ of the Menshevik faction published during November-December, 1905, in Petersburg.

"After the arrest of Khrustalev-Nossar, he was elected Chairman of the First Petersburg Soviet of Workers' Deputies. Arrested together with the Executive Committee on December 3, 1905, he was sent into life exile to Obdorsk, but escaped en route and emigrated abroad. Trotsky chose Vienna to live in, and there he issued a popular labor newspaper, Pravda, to be circulated in Russia; he broke with the Mensheviks and attempted to form a group outside of all factions; however, during the factional struggle abroad he made a bloc with the Mensheviks and the Vperedovists against the bloc between Lenin and Plekhanov who fought against the liquidators.

"From the very beginning of the imperialist war he took a brilliant internationalist position, participated in the publication of Nashe Slovo and adhered to

WORKERS SOLD OUT ower at this time, had, and still nave, one all-consuming desire Stalin chose the second road ... -to be left alone by the outside world so that they can enjoy heir power and the comfortable living it affords them at the expense of the Russian masses. They made the Communist Parting tool, and time and again used them as an agency to sell out the workers to the world desire to maintain their own reactionary military dictatorship among whom are the Stalinists. comforts transcended every

other consideration. Trotsky fought this reactionary policy tooth and nail. The Soviet Union cannot divorce itself from the world about it he pointed out. The Soviet Union, first of all, has to trade on the world market. It was a terribly backward country, and needed machinery and consumers goods that only the capitalist countries, with their advanced technology, could supply. Not only were they dependent on the capitalist countries, but these countries themselves looked upon the Soviet Union with covetous eyes. The capitalist countries, in order to maintain their profits, are constantly looking for new

sources of raw materials and new markets in which to sell their goods. The Soviet Union is a juicy plum for them-a vast

country, covering one-sixth of the

earth's surface, with a population of 160 millions and vast stores of rich natural resources The huge potential profits lying there are forever tempting. But the October Revolution put a big working class. sign around the boundaries of the

IN LENIN'S DAY

The historic document we reprint below is an order of the day issued to the Red Army on June 13, 1921 in Moscow by Leon Trotsky, in his capacity as Soviet Commissar of War. This order of the day reflects the spirit of internationalism which imbued the Soviet Government and the Red Army in Lenin's lifetime. Today, the Kremlin tramples all this underfoot. In place of internationalism, Stalin has put the Czarist program of Pan-Slavism. The text of the order was first published in issue No. 128 of "Izvestia," Moscow, June 14, 1921.

Warriors of the Red Army!

For the third time the World Congress of the Communist International convenes in Moscow.

It is a great joy and honor for the workers, peasants and Red soldiers of Russia to greet within the walls of the Red capital the best representatives of the world

Red warriors! For three and a half years you have defended the first Toilers' Republic in the world against the incessant attempts and attacks of the brigands and

Zimmerwald. Deported from France he went to the United States. On his return from there after the February revolution, he was arrested by the English and set free only on the demand of the Provisional Government, which was forced to intervene under the pressure of the Petersburg Soviet.

"In Petersburg he entered the organization of the Mezhrayontsi, together with whom he joined the Bolshevik Party at the Sixth Party Congress, in July, number of them made full con-1917, in Petersburg. After the July days, he was ar- fessions.

rested by the Government of Kerensky and indicted for KREMLIN AIDS KILLERS "leading the insurrection" but was shortly freed under the pressure of the Petersburg proletariat. After the Petersburg Soviet went over to the Bolsheviks, he was elected Chairman and in this capacity he organized and ers of the May 24 attack and led the insurrection of October 25.

Only a few sars, first holding the post of People's Commissar of Foreign Affairs, then People's Commissar of War."

As Commissar of War, his post until 1925, Trotsky led the Red Army to victory in the Civil War of 1918-22. He formed the Left Opposition of the Communist Party of the Soviet Union in 1923, exposed the treachery of Stalin's opportunist zig-zags in the Chinese Revolution and fought Stalin's reactionary 'theory of socialism in one country.' Expelled from the party in 1927, Trotsky wrote the brilliant "Criticism of the Draft Program of the Comintern" to be read at the Sixth Congress of the Comintern in 1928. The document was suppressed and Trotsky exiled to Alma Ata.

Under the leadership of Trotsky, the Left Opposition in the Soviet Union fought for and succeeded in establishing the program of industralization and the Five Year Plan which developed Soviet industry.

Trotsky was deported from Alma Ata to Turkey in 1929, from Turkey to France in 1933, to Norway in 1935, and finally to Mexico in 1936. In 1938, he founded the Fourth International, World Party of the Socialist Revolution, which today continues the struggle for the ideas of Marx, Engels, Lenin and Trotsky.

vered Jacson, who in his fear cried out: "They made me do it. Otherwise they would have killed my mother." "They" were the GPU, Stalin's police-murder apparatus. This was further conirmed by a prepared "confession" on the assassin's person, which clearly was fabricated by the Kremlin's police agents. The assassin was also armed with a rev-

olver and dagger. The complicity of Stalin was shown by previous assassination On May 24 of the attempts.

same year, a gang of Stalinist gunmen broke into Trotsky's home at night, machine-gunned his bedroom and kidnapped his young American secretary-guard. Sheldon Harte, whose slain body

was found a few days later. Subsequently, most of the murder gang were rounded up, and a

ican law for premeditated murder. On August 21, 1940, Trotsky

They Fear Trotskyism!

To the capitalist class the name of Trotsky epitomises the world movement of socialist revolution of which they stand in mortal fear. Capitalist statesmen, observing the signs of the approaching revolution above the carnage of their imperialist battlefields, unfailingly connect them with the name of the great founder of the Fourth International.

In the past five years the name of Trotsky has been on the lips of Winston Churchill, Henry A. Wallace, Sumner Welles and even Adolf Hitler. On August 25, 1939, just prior to the outbreak of the imperialist slaughter, the French ambassador to Berlin, Coulandre, was in conversation with Hitler.

Coulandre warns Hitler: "The real victor (in the event of war) will be Trotsky. Have you thought of that?"

"I know," responded Hitler, "but why did France and Britain give Poland complete freedom of action?"

Commenting on this instructive episode, Trotsky wrote: "The gentlemen like to give a personal name to the spectre of Revolution . . . Both of them, Coulandre and Hitler, represent the barbarism which advances over Europe. At the same time neither of them doubt that their barbarism will be conquered by socialist revolution. Such is now the awarness of the ruling classes of all the capitalist countries of the world."

oppressors of all countries. On the Volga and the Obi, ion. But this did not keep Hitler and will not keep Roosevelt and on the Northern Dvina and the Neva, on the Berezina Churchill from trying. They must and the Dnieper, on the Don and the Kuban, you have find new markets.

FEAR REVOLUTION

There is one more reason for the fundamental antipathy between the Soviet Union and the capitalist world. The Soviet Union is a constant reminder to the exploited workers of other countries that they too can throw out the capitalists and take destiny into their own hands. The capitalists live in mortal fear that the work ers in their countries will some day follow the Russian example. The Soviet Union could exist independently of world capitalist pressure only if it were on another planet. As long as it re-mains in this earthly sphere it must deal in some way with world capitalism. There are only two roads that it can follow. The first, advocated by the Trot-

fought and died under the banner of the International. With your blood you have defended Soviet Russia, the fortress of the world proletariat. Together with this you have hurled back the attacks on the heart of Soviet Russia-Red Moscow. You have assured to the representatives of the working class of all countries the possibility of gathering together under your protection in order further to work out the ways and means of struggle against capitalist oppression-in the name of the brotherhood, freedom and happiness of all oppressed mankind.

On June 17, in the name of the entire Red Army, the garrison of Moscow will solemnly greet our dear guests, our brothers in struggle. Revolutionary warriors -Red Soldiers, Commanders, Commissars! Let us join in a fervent cheer for the Communist International!

By V. Grey =

"Forty-six dollars and fifty cents," said the blast furnace man. 'What kind of a check is that? And Eugene Grace gets ten thousand smackers a week. Now there's a check for you!"

"Sure, but you just get paid for what you do. He gets paid for what he knows "

But how much does he know? A lot of workers have the impression the boss must know a hell of a lot to get all the gravy he does.

Well he does know enough to hold onto his money. That's the reason they call Bethlehem Steel a holding corporation. All it does is hold onto shipyards and steel plants all over the country and hold the workers down to a minimum wage. The boss knows enough to hire thugs and scabs when there's a strike. He knows enough to wire the governor for national guard troops if you beat the thugs, and he knows enough to bribe the courts and buy up the newspapers. He's still got union fighters from 1919 on his blacklist that have never worked in steel since then. He's not so dumb when it comes to that. But just how smart is he-or any other steel magnate -when it comes to his own business, making steel? Does he know enough to be a blast furnace foreman? Or an open hearth melter? Does he know enough to engineer the construction of a blast furnace? Could he run the bar mill or the strip mill? Could he even describe the processing of a steel ingot?

"But," someone could object, "These things are all specialized activities. No one man can do them all. The Boss's job is to supervise them. He's an organizer. He puts the right man in the right place and he's always on the lookout for better processes and better methods of production. He goes out and gets the business."

bor's traditional non-partisan That's the picture of these captains of the steel industry that policy and by gambling their some people have. But even if he were that good, his salary is kind of high. The president of the United States is supposed to be pretty smart too, and do all the things for the whole nation the president of the steel company does for the plant, but he doesn't get a third of Eugene Grace's salary. We're going to have administrators and organizers for the plants when we workers take over. too. But we don't figure they'll need quite so much money to get along on as Eugene does.

But as a matter of fact neither Grace. Morgan, nor any of the rest of them is really so hot when it comes to organizing. They organize their own wealth OK. But that's not the same thing as making steel and making it right. Five years ago "U.S. Steel Magazine" had an article by some scientist working for U.S. Steel who said steel rails could now be made to last a hundred years. Neither the rails nor the scientist have been heard from since.

Everybody knows about the ships that crack in the middle because of defective plates. This happens because the steel doesn't have the right carbon content. When a "heat" of steel is being made in an open hearth furnace, it is sometimes hard to get the exact percentage of carbon required. If the time has come to "tap out" and there is too much carbon, more liquid iron has to be added and a lot more time is lost while the extra carbon is absorbed. So naturally, brittle steel that breaks like cast iron, is cheaper to make than good steel. Every furnaceman knows this and a melter can make a good product if he's not hurried. He's only a working man, but he's smart enough to make good steel. But who's going to let him do that if it means less profits for Grace? The trouble is that the big bosses are smarter at making money than they are at making steel.

THEIR BUSINESS IS MAKING PROFITS

Here's just how smart they are at steel making: They're so smart that in 1932 they could only operate three open hearth furnaces out of thirty in this plant. They're so smart that in the fabricating shop they use junior I-beams from Jones and Laughlin that have to be carried hundreds of miles, when the mills across the street could produce them by the thousand. "Why, they don't even know their own business!" you might say. But they do know it. Because their business is not steelmaking at all. It's profit making. If, in peacetime, they couldn't make profits, they wouldn't and couldn't make steel. If in war time the government will pay a high price for the steel in the capitalist murder-machine, why they will make plenty of steel, even if half of it is only cast iron in disguise. We workers wouldn't need half a brain to run the business that well. Even Louie, the "stump jumper" could do as well as Grace. He might not be able to steal such a big profit and salary, but he couldn't do any worse job as far as mixing up depressions, steel and murder, are concerned. However, it isn't because we're smarter than Eugene Grace or J. P. Morgan that we're going to run things so much better. It's because our system is different. Just like some of those old-timers were great hands at cutting a steel plate with a cold chisel and and sledge hammer. Nowadays, a young squirt who works after school can learn to use an oxygen cutting torch in a few days and do twenty times as much as they could in the old way. poses and to ardently support Our system differs from Grace's system in the same degree. The their friends and punish their bosses' system is as out-of-date as the sledge hammer and cold enemies." That is quite a conceschisel. It can't keep going. It can't produce enough (except in war). sion, but anything more than It's a terrible waste all around, when they let so many furnaces go that, warns Labor, will lead to down, as they did before the war-and as they'll do after the war. The first question Grace and Morgan ask before they make any steel is, "Who's going to buy it and has he got the money?" In a case like that it doesn't matter how smart they are, if nobody's got the money to buy, the bosses can't run the steel plants.

WHEN THE WORKERS TAKE OVER

We working people may not be such geniuses. We're just ordinary folks that know enough to come in out of the rain. And we figure we're smart enough to use the tools we have and not let them get rusty. But the big bosses are starting their layoffs already. They conditions. More important, the dates of the employing class and can't use all the tools they have. It's up to us to use them. We have workers have pitted their own to the formation of labor's own about enough sense to figure that someone who can make good steel shouldn't be told to make peanut brittle, because we're the ones who'll be using the steel, and sailing the boats.

When we workers own the country, we don't figure it will take so much brainwork to have prosperity and jobs for everyone without killing off all the kids in a war. If we see ten thousand hungry people living in the shadow of a plant that has only three furnaces out of thirty going, why we'll ask those people to start the other furnaces. That's all. The whole world needs steel. Farmers need steel products, and will be glad to give the city workers food in return.

Anyway, one thing is sure. These puffed-up phonies don't get paid for what they know or for what they do. They get paid for what you know and what you do. And they don't collect their fat checks just because they're smart, but only because, and as long as, we're dumb enough to let them get away with it.

Capitalist laws, courts and deal came to light a few months ordered by the FEPC, which followed the victory of the C.I.O. whose stand is clear on the question of negro job rights.

A REACTIONARY STRIKE

Nevertheless, this small reactionary group of company stooges, through a well-planned and wellfinanced program of slander and hate, was able to keep enough workers off the job to effect a full-fledged strike. Contrary to strikes against the company which gain economic concessions and build solidarity, this strike was anti-labor because it carried the seeds of intra-working class division.

What are the consequences DOWN WITH RACIALISM! when the union fails to wipe out such bigotry? Many black workers may lose faith in the labor unions. They may return to the Negro chauvinists who tell us no whites are any good. Also, our drive for industrial equality receives a set-back because other fight against race discrimination employers will surely point to the is part and parcel of the strug-"chaos" resulting from upgrad: sleifor full employment, job seing according to merit alone. curity and a decent standard of Furthermore the liberals are po- living. Diary Of A Steel Worker

By Theodore Kovalesky

Every day in the steel plant you see something or other that catches your imagination, and you think you'll remember it, but

USSR-THE STORY OF SO- Trotsky, the champion of viks, in particular of Stalin, VIET RUSSIA, by Walter Du- planning and industrialization, Zinoviev and Kamenev, during somehow or other it usually seems to slip away. Sometimes it's part of a conversation you hear, sometimes a particularly dangerous or and one of the originators of the the October days. This docuunpleasant job, or sometimes it's just a picture, a silhouette of the Dnieperstroy, finds no place in ment appeared in 1924, while stacks in the sunset, but it carries with it an idea. Most of these Duranty's history. That Stalin the fight over "socialism in one things, as I say, slip away from you, but some do remain. fought stubbornly against these country" did not develop until

For instance, there is in my mind a picture of an old furnace He fulsomely describes Trotkeeper. You see him going about his work bent over, as though the only to accept them later and sky's abilities: "He shone so heat of many years on the job had warped his body like a piece of misapply them-is, of course, bright in the sun, has done metal. His every move is well-learned and methodical. He does the never mentioned. We find Trot- brave deeds." But all this is job so well now, that it doesn't look very hard. But still, you know it have been a mouthpiece for sky is usually referred to in only cover for justifying Stais. I wonder how much longer he'll be able to last, and if he'll die Stalin and the GPU. To create this history when some alleged lin's murder of Leon Trotsky. while still on the payroll or just be thrown out into the streets when statement puts him in an un- "He (Trotsky) spent his declinthere is no more work left in his worn-out body. favorable light, such as a sup- ing age in spiteful twilight, and

Then there is another portrait, the kid who lost an arm in the mill. They gave him a fairly easy job (there are some fairly easy jobs in the steel plants), and they say that he doesn't need to worry about being laid off. I heard one fellow say, "I don't know, I think I'd trade an arm for job security." No arm, but-what the hell!-he's sure of his job . . . or at least he thinks he is.

- P 1 V L

And then I remember one day in the labor gang, when there were quite a few of us working monotonously near a railroad track. One man was going back and forth with a wheelbarrow. Each time he

passed us, a middleaged man at my side would howl some stupid insult at him in fun. Finally after one such banal jibe, he turned to me and said with an almost pathetic expression on his face, "You gotta say something!", and he went on yelling his foolish jokes trying to shorten the day by saying "something."

Labor United

But I guess the thing that touched me most was something that one of the colored fellows I work with said to me one day. I had gotten to work a little late, and when I arrived I found him doing some of my work. I thanked him and said, "Look, Jimmy, you didn't have to do that. You could have finished up your work and then taken it easy."

He smiled a little and said, "Well, I'll tell you. You're not like a lot of people. You believe everybody else is a human being like yourself.'

I wanted to say that I had been trained to be that way, to understand, that there were lots of other workers who felt the same way, and there were hundreds of thousands of others who had never learned, who didn't know that we are all human beings, none of us inferior, none of us superior as a race, but who can and will learn that most of the boys pull together in a crisis like a strike, and that the day will come when all peoples, yellow, brown, black and white will live together in brotherhood . . . but how in hell can you talk when a lump suddenly jumps right into the middle of your throat? All you can do is grin and give the fellow a light punch on the arm and get busy doing something or other. And that's what I did.

NEW YORK-By an overwhelming majority, delegates to the United

Textile Workers Convention in session in New York, voted for

a general strike to begin on or about September 1. The call for

a general strike, made over the heads of the bureaucratic top.

leadership, included major demands of the rank and file. In-

cluded were "a wage scale ranging from \$13 to \$30 . . . uniform

on a national scale," the elimination of the "stretch-out, an

inhuman speed-up under which workers are required to operate

more looms per person than is physically possible," and recogni-

tion of their unions, with destruction of the company unions

in Alabama, 2,000 in Georgia. It was estimated that the general

rank and file members of the striking General Drivers Local

574, defeated attempts of federal conciliators Haas and Dunnigan

to foist off on the union a "compromise settlement." The "com-

promise" was worded to enable bosses to discriminate against

militants who had been active on the picket line. Challenged

by questions from the rank and file, Haas and Dunnigan were

forced to admit that their proposal offered no guarantees to

20,000 Workers **Strike at Wright Aircraft Plants**

A four-day strike of 20,000 workers at five of the Wright plants Aeronautical Corporation in the Patterson, N. J., area was voted suspended Thursday evening of last week at a stormy meeting of CIO United Automobile Workers Local 669, after Richard Frankensteen, UAW vice president, pleaded with the strikers for two solid hours to return to work and accept an agreement negotiated earlier the same day between the company and union officials.

The strikers were finally swayed when Frankensteen, no torious for his strike-breaking actions, was compelled to promise that if the company did not adhere to "every iota" of the agreement, "I will come back and personally lead you in a strike.

Although company officials at first refused to negotiate, they finally agreed, in the face of the spreading strike and the militancy of the workers, that ions. there would be no wage-cuts or

only upon themselves, their independent organizations and their independent revolutionary actions. Only in their own revolutionary actions lies the guarantee for protection of the Polish revolution from the Stalinist hangmen. Only through their independent revolutionary actions will they be able to organize fraternization with the Red Army soldiers and help the Soviet masses to settle accounts with the bloody Bonapartist dictatorship of Stalin.

Forging A Labor Party

The Michigan Commonwealth Federation was formally launched at its first constitutional convention in Lansing, Michigan on July 28-30. Despite a number of obstacles, the MCF met in convention, adopted a constitution, declaration of principles and platform and nominated a number of candidates for public office against the candidates of the two capitalist parties.

The first obstacle confronting the MCF was the vigorous opposition of the top CIO officials to any and all "third party" movements. Secondly, the timidity of the MCF leadership, which sought to compromise with the bureaucrats of the CIO Political Action Committee. Third, the lack of clarity which expressed itself in seeking to keep labor in a subordinate position in the new party. All of these factors found expression in the constitution, declaration of principles and platform adopted by the convention.

Underlying these manifestations, however, are the decisive factors which are pushing the workers along the road of independent political action. The probing for a solution to the political problems confronting the workers, the inevitable disillusionment with the Hillman-Murray political fraud, the pressing need to find a way out of the blind alley into which the official union leadership has led the labor movement, will hasten labor's development toward independent action.

The real impetus for the building of an independent labor party must come from the militants active in the union movement. These militants provided the active core of the Michigan Commonwealth Federation. They showed a firm grasp of the problem by directing the attention of the MCF to the powerful Michigan trade union movement, primarily to the most militant section, the UAW-CIO.

The main task of the MCF still remains to win the support of the rank and file unionists in the Michigan ClO and cut through the mumbo-jumbo of a "people's party" and "people's program," to build an independent labor party based on the trade unions.

'Philadelphia Method

The anti-Negro strike of the Philadelphia transport workers stands condemned in the eyes of the progressive labor movement as a reactionary abuse of the strike weapon. However, the capitalist press has seized upon the incident to point the lesson that now "Uncle Sam" has established a precedent that must be used to smash all strikes whatever their origin, purpose or aim may be. They

Why Jim-Crow Policies Flourish in Industry

Government officials have been clucking around in righteous" indignation about the misguided, company-inspired anti-Negro municipal transportation walkout in Philadelphia. But they remain strangely silent about the government's own Jim Crow hiring and up-grading policies which are establishing precedents for racial discrimination in industry.

A typical example is cited in the Los Angeles California Eagle, Negro weekly. The Eagle, July 27, reports that "recruiting for workers at the U S. Naval Drydocks, Terminal Island, is going on at a fast pace, but the 2,000 Negro workers among the 8,000 workers already employed see no prospects for their being of greater service to the yard, for they are in the same menial jobs for which they were hired."

Efforts are being made to recruit 15,000 workers for the naval yard. New white workers, claims the Eagle, are being placed in the better jobs, while qualified Negro workers with longer service are denied upgrading rights. "All the jobs at the U.S. Naval Drydocks," states the Eagle, "are civil service jobs, and the Negro workers there ask only that the regular Civil Service procedure for the upgrading of workers be carried out in their cases."

A deliberate policy of discouraging the hiring of qualified Negro workers is pursued, although many white workers must be recruited from other sections of the country. White workers at the yards are urged to go out and recruit other white workers, "but no Negro has been asked to recruit other Negro workers. . . while qualified Negro workers already in this area are not apprised of the job opportunities existing there in other than menial capacities."

When 28 Pennsylvania anthracite coal companies virtually pleaded guilty to conspiring to fix prices in violation of the Sherman anti-trust law. Federal Judge John Clark Knox, appointed to the bench by the late President Wilson, publicly displayed his bleeding heart at the prospect of having to impose sentence on the criminal coal barons.

The companies pleaded nolle contendere-refusal to contest the government's suit. Judge Knox thereupon suspended sentence against the guilty coal bosses, and set minimum fines for the companies of from \$750 to \$5000, a mere bagatelle compared to the millions they looted through their conspiracy. Then the worthy Judge wound up with an abject apology because he was forced by law to impose even these chicken-feed fines.

The tender-hearted Judge declared that "one might plausib'y argue that the defendants, instead of being evil-minded malefactors were animated by worthy motives and accomplished good ends," and he "doubted that the public had been made to suffer because of the misdeeds of the defendants."

Sure, sure, what consumer could possibly object to these profiteers picking their pockets? After all, they had "worthy motives" of price-boosting, squeezing out extra war profits and establishing a monopoly.

We can only wonder now how Judge Knox, would have acted toward striking coal miners, who risk their lives daily to provide the profits for these same coal barons, if they had been hauled into his court. We doubt that he would express regrets as he "threw the book" at them.

Warsaw Betrayal

No sooner did the Red Army approach the outskirts of Warsaw, than the Warsaw proletariat rose up and, arms in hand, launched a full-scale battle to drive out the Nazi oppressors. The Warsaw proletariat, rich in socialist traditions and revolutionary training, has thereby served notice that five years of Nazi butchery have not tamed its fighting spirit nor destroyed its fighting powers.

Undoubtedly, the Warsaw proletariat expected that the Red Army would hasten its assault on the city, and thus through their joint efforts, from within and without, the Nazi tyrants would be driven out and destroyed.

But instead of launching more energetically the military onslaught and redoubling their efforts, the Red Army attack was brought to a sudden standstill, by order of Stalin's generals. Just as Badoglio had turned the Italian proletariat of the North over to the Nazi invaders a year ago, so Stalin determined to permit the Nazis to crush the uprising of the Warsaw proletariat in blood.

Stalin is thus pounding home the lesson (that advanced workers learned long ago) to the whole Warsaw proletariat: That his aims are counterrevolutionary, that he intends not to liberate the Polish people but to subjugate them again under the yoke of the capitalists, landlords, and Polish "colonels."

After first denying the very existence of the Warsaw revolt, Tass, the Stalinist news agency, now seeks to justify Stalin's latest betrayal by issuing a press release that the Polish governmentin-exile in London is alone responsible for the cruel isolation of the embattled Warsaw proletariat. Of course, the government-in-exile, representative of the Polish capitalists, landlords and militarists, undoubtedly seeks to use the insurgent movement of the masses for its own reactionary ends. Of course, only treachery and reaction can be expected from that quarter. But Stalin cannot hide his crime against the Warsaw proletariat by retreating behind the skirts of the reactionary Polish capitalistlandlord clique in London.

The Warsaw proletariat must draw the lessons. They must organize completely apart from, and in opposition to, the Stalinists. They must mercilessly drive out of their ranks all Stalinist agents, as they would plague-carriers. They must depend

clamor for the application of the "Philadelphia Method" to all strikes. That is, to use federal troops to smash strikes, arrest strike leaders, induct strikers into the army, cancel gas rations of those ineligible for induction, blacklist strikers from jobs in all industry, etc. etc. After congratulating "Uncle Sam" for having established a" "successful precedent" in Philadelphia, the pro-Roosevelt Philadelphia Record asks: "Why can't this method now be a model for the nation?"

Pro-New Dealer and anti-New Dealer, poll-tax Democrat and Wall Street Republican, sweat-shop operator and corporation executive, have joined in chorusing the demand that the "Philadelphia Method" be applied universally, "without discrimination," to all strikers. They have seized upon an action whose origin, aim and purpose was reactionary to draw there from the conclusion that ALL strikes are evil and must be summarily crushed. The healthy revulsion of the progressive labor movement against such manifestations of race prejudice as the Philadelphia anti-Negro walkout, is perverted by the practitioners of exploitation and race hatred into a "model" to further their own end of smashing the labor movement.

For labor, the Philadelphia incident contains an important lesson. Race prejudice is a weapon of reaction. A strike which serves reactionary purposes is a blow against the entire labor movement. Labor condemns such actions, and rightly so. But we treat with the utmost contempt the nauseating hypocrisy of an exploiting class-which uses racial discrimination as a pillar to prop up its ruleand which now attempts to use the Philadelphia "precedent" as a strike-breaking pretext to smash the unions.

The strike is labor's most effective weapon for defending its existence against the predatory moneybags who rule the roost in Wall Street and Washington. A strike which pursues a progressive aim commands the sympathy and support of all classconscious workers and serves to advance the interests of the working class. A strike which unites the workers against their exploiters is progressive. A strike which divides the workers and serves the interests of the exploiters is reactionary.

This is a vital distinction. It is only by welding the solidarity of all workers, regardless of race, color or creed, into a united front against their common enemy that the labor movement will survive, flourish and grow stronger. That is the lesson of Philadelphia for the labor movement.

FRANCE

Capitalism's 'Post-War' **Future for the Workers**

The post-war prospects of the American working class under the "free enterprise" system of monopoly capitalism were disclosed in part by A. Ford Hinrichs, Acting Commissioner of the U.S. Bureau of Labor Statistics, before last week's "post-war planning" conference of the National Retail Dry Goods Association, U. S. Chamber of Commerce, National Association of Manufacturers and other big business bodies. Even while the war against Japan is still in progress, within six months after the end of the European phase of military hostilities there will be between 3,000,000 and 5,000,000 unemployed as a result of war production curtailments, Hindrichs asserted. Employment levels in war industries will decline at least 30

per cent and "possibly as much as 45 per cent" The real problem two years hence, when he anticipates the war with Japan will be over, will be to provide between 53,000,000 and 55,000,000 jobs, Hinrich said, instead of the 51,000,000 at present when over a million are unemployed, and 46,000,000 in 1940. He added that 53,500,000 jobs are the "bed-rock minimum to satisfy approximately what we mean when we say that there should be full employment." This "full employment," Hinrichs further explained, would not include 7,500,000 retained in the armed forces and a "maximum volume of permissible unemployment" of 2,500,000. But "present thinking," he complained, looks forward to a "probable employment" of around 49,000,000.

Even the most liberal administration spokesmen like Hinrichs are contented if the slack is pulled in by keeping a huge permanent military establishment and a "permissible maximum" of disemployed. But Hinrichs, like all other capitalist representatives, can offer no effective program to achieve the volume of employment he claims is the "bed-rock minimum."

American capitalism, under the ministrations of Roosevelt, could never reduce unemployment under 8,500,000 through ten years of depression, and then for only a brief period in 1937. In August 1939, it stood at 11,500,000. Despite war expenditures of \$250,000,000,000 or more and the drafting of over 10,000,000 men, unemployment is now rising.

Unemployment is a natural scourge of decaying capitalism. It will be eliminated only under a system of socialist planned economy in which the workers themselves will organize and control production for their own benefit and not the profit of a handful of owning-class parasites.
