WORLD-WIDE GI DEMONSTRATIONS
SHOUT DEMAND: "GET US HOME!"
Truman pressures Munito into steel strike delay

Government Offers
Price Boost, Limits Wage Concessions

Following a definite pattern of government's interference, the Truman administration made no pressure the government on CIO steel workers' contract negotiations. The administration is backing the CIO in its battle with the United Steel Workers of America. The administration is attempting to force the CIO steel workers to accept a contract which is far more favorable to the steel companies than the one the Steel Workers of America have claimed in the negotiations. The administration is attempting to force the CIO steel workers to accept a contract which is far more favorable to the steel companies than the one the Steel Workers of America have claimed in the negotiations.

Taking advantage of the administration's position, the CIO steel workers are being forced to accept a contract which is far more favorable to the steel companies than the one the Steel Workers of America have claimed in the negotiations.

Government is backing the CIO in its battle with the United Steel Workers of America. The administration is attempting to force the CIO steel workers to accept a contract which is far more favorable to the steel companies than the one the Steel Workers of America have claimed in the negotiations.

GM Delegates Hotly Debate
UAW Board Wage Proposal

Labor! Back the GI Protest!
You Fight in a Common Cause

The world-wide GI demonstrations outside the greatest labor upsurge in American history. These simultaneous struggles have truly radical implications. Undoubtedly the angry GI protests have been inflamed to no small degree by the example of the militant steel strikers at home.

The signs of this deepening friction between the soldiers and workers first became manifest on the picket lines here at home.

From coast to coast, in every battle for labor's rights, the returned veterans have been out in front, fighting shoulder to shoulder with their fellow workers.

In the Stalinist US strike, in the general strike at Stanford, in the Western Electric battle, in the whole vast wave of strikes involving millions this V-J Day, the returned veterans have been among the foremost fighters against the employers' anti-labor, wage-cutting drives.

Thus Wall Street's charging attempt to pin the return of the soldiers against organized labor is being shattered on the rocks of working class solidarity.

This solidarity on the picket line must be further fortified by an equally solid alliance between labor at home and the soldiers in uniform abroad. Just as the returned veterans have added their power to labor's battle against the GM strike, so the entire labor movement must help the soldiers fight the GM strike.

Labor Must Support the GIs

One common cause binds the workers and demonstraters against the class. They belong to a common class and a common cause.

The men in uniform clamoring to come home are the sons, brothers, husbands of the men and women on the picket lines. These union fighters want their loved ones back home. But they want them to return to decent working and living conditions, not to Starvation and brutalities.

For their part, the GIs don't want to be the hired auxiliaries of other people. They, too, want to be decently paid and treated.

The labor movement is not only the support of the GIs. The labor movement must be actively enlisted into the ranks of the picketing workers.

Strong Blow Dealt
Imperialist Plans

Wall Street's plans for global domination have been dealt a staggering blow by the sweeping world-wide anti-imperialist demonstrations of the American GI's. In Europe unprecedented in the history of victorious imperialist armies, hundreds of thousands of battle-scarred veterans have shaken their fatigues at the foot of the tanks, shooting: "Get Us Home!"

The troops have defiantly denounced the one-sided scheme to use them as tools for subjugating the independent workers of the world by land or sea. The GI's have rejected the tanks, shells, bullets of the capitalists as the "tools for their domination."

Brons Hats Lied
About Bureaucratic Hatred

Brons hats have been thrown into the本来就的 learned regard. hat the "tools for their domination."

The following day a GI, writing his letter home to his mother in the UK, wrote: "The Capitol was made, impress."

In the evening at 7:00 PM the GI's met at the Capitol to show their solidarity with the GI's of the world. The GI's met at the Capitol to show their solidarity with the GI's of the world. The GI's met at the Capitol to show their solidarity with the GI's of the world.

On the same day approximately 58000 Line

Long Lines Phone Workers
Back Strike in 44 States

BULLETIN

Leader of the National Federation of Telephone Workers, a labor organization under the leadership of a rank and file battle, was stabbed to death in the back by aactus.

The telephone workers are on strike in 44 states, including California, Colorado, Oregon, Washington, and other states. They are on strike in order to win concessions.

By Alan Krakoff

NEW YORK, N.Y. The greatest strike in the history of modern communications swept across the nation today, as more than a million telephone workers in 44 states walked out over a strike that has been going on for several weeks. The strike is the result of a nationwide uprising among telephone workers who are fighting for a better deal.

The strike began in New York City and spread to other cities across the country. The workers are demanding higher wages, better working conditions, and an end to the exploitation of workers.

In New York City, the workers set up a strike headquarters and began picketing the telephone company's offices.

The strike has spread to other cities across the country, including Chicago, Los Angeles, and San Francisco. In each city, the workers have set up their own headquarters and begun picketing the telephone company's offices.

In Los Angeles, the workers have taken over the telephone company's offices and are running their own operations.

The strike is being supported by workers throughout the country, who are sending their support to the striking workers.

The strike is the first nationwide workers' strike in the history of the United States. It is a battle for the rights of all workers, and it is a battle that must be won.

PROBLEMS FACING WAR VETERANS

BY CHARLES CASHER

Terminal Leaves Show Class System

Why didn’t the flooded men get terminal leaves? Of-

fi
cers were one of the most thoroughly discussed topics at the war veterans’ meeting at the Veterans’ Center in New York City. Many veterans said the only reason they didn’t have extra-ordinary physical and educational programs.

During the last days of the war, the officers were promised extra perks, including a day off for every dollar of their basic pay. But they didn’t receive pay at the time. Instead, they were given a day off for every dollar of their basic pay. But they didn’t receive the promised benefits.

In addition to the benefits promised, veterans also complained about the lack of coordination between the veterans’ center and the American Legion.

Racial issues were also raised by the veterans, who said they were treated differently than white veterans. The veterans said they were given less food and worse living conditions.

On the other hand, the American Legion said it was unable to provide the services veterans demanded, due to the shortage of funds and manpower.

To end the conflict, the veterans’ center and the American Legion agreed to meet and work out a plan to address the veterans’ concerns. They also agreed to provide a day off for every dollar of their basic pay.

The meeting ended on a positive note, with both sides expressing their commitment to working together to improve the veterans’ center and the American Legion.

Why You Should Use Aluminum Foil

The Aluminum Industry

When you go to the store and pick up a roll of aluminum foil, you’re likely to wonder why it’s so expensive. After all, aluminum is a common metal that’s used in many different applications. So why is it so expensive?

One reason aluminum foil is expensive is because it’s made from a rare and expensive metal called aluminum. Aluminum is a soft, lightweight metal that’s widely used in the aerospace industry, as well as in many other applications.

Another reason aluminum foil is expensive is because it’s made from a very pure form of aluminum. Because aluminum is a soft metal, it can easily be shaped and formed into different shapes.

In addition to these factors, aluminum foil is also expensive because it’s made from a very pure form of aluminum. Because aluminum is a soft metal, it can easily be shaped and formed into different shapes.

Why You Should Use Stainless Steel

Stainless steel is a type of steel that’s been treated to make it more durable and resistant to corrosion. Stainless steel is used in a variety of applications, from kitchen appliances to industrial equipment.

One reason stainless steel is used is because it’s durable. Stainless steel is a very strong metal that can resist bending and breaking.

Another reason stainless steel is used is because it’s resistant to corrosion. Stainless steel is very resistant to rust and other forms of corrosion, which makes it ideal for use in a variety of applications.

In addition to these factors, stainless steel is also used because it’s easy to maintain. Stainless steel is very easy to clean, which makes it ideal for use in a variety of applications.

Why You Should Use Iron

Iron is one of the most widely used metals in the world. Iron is used in a variety of applications, from construction to transportation.

One reason iron is used is because it’s strong. Iron is a very strong metal that can withstand a lot of stress.

Another reason iron is used is because it’s versatile. Iron can be used in a variety of applications, from construction to transportation.

In addition to these factors, iron is also used because it’s cheap. Iron is one of the most affordable metals, which makes it ideal for use in a variety of applications.

Why You Should Use Copper

Copper is a very versatile metal that’s used in a variety of applications, from construction to transportation.

One reason copper is used is because it’s strong. Copper is a very strong metal that can withstand a lot of stress.

Another reason copper is used is because it’s capable. Copper is one of the most capable metals, which makes it ideal for use in a variety of applications.

In addition to these factors, copper is also used because it’s durable. Copper is very durable, which makes it ideal for use in a variety of applications.

Why You Should Use Plastic

Plastic is a type of material that’s widely used in a variety of applications, from construction to transportation.

One reason plastic is used is because it’s lightweight. Plastic is one of the lightest materials, which makes it ideal for use in a variety of applications.

Another reason plastic is used is because it’s strong. Plastic is a very strong material that can withstand a lot of stress.

In addition to these factors, plastic is also used because it’s durable. Plastic is very durable, which makes it ideal for use in a variety of applications.

Why You Should Use Foam

Foam is a type of material that’s used in a variety of applications, from construction to transportation.

One reason foam is used is because it’s lightweight. Foam is one of the lightest materials, which makes it ideal for use in a variety of applications.

Another reason foam is used is because it’s strong. Foam is a very strong material that can withstand a lot of stress.

In addition to these factors, foam is also used because it’s durable. Foam is very durable, which makes it ideal for use in a variety of applications.

Why You Should Use Paper

Paper is a type of material that’s used in a variety of applications, from construction to transportation.

One reason paper is used is because it’s lightweight. Paper is one of the lightest materials, which makes it ideal for use in a variety of applications.

Another reason paper is used is because it’s strong. Paper is a very strong material that can withstand a lot of stress.

In addition to these factors, paper is also used because it’s durable. Paper is very durable, which makes it ideal for use in a variety of applications.

Why You Should Use Cardboard

Cardboard is a type of material that’s used in a variety of applications, from construction to transportation.

One reason cardboard is used is because it’s lightweight. Cardboard is one of the lightest materials, which makes it ideal for use in a variety of applications.

Another reason cardboard is used is because it’s strong. Cardboard is a very strong material that can withstand a lot of stress.

In addition to these factors, cardboard is also used because it’s durable. Cardboard is very durable, which makes it ideal for use in a variety of applications.

Why You Should Use Glass

Glass is a type of material that’s used in a variety of applications, from construction to transportation.

One reason glass is used is because it’s lightweight. Glass is one of the lightest materials, which makes it ideal for use in a variety of applications.

Another reason glass is used is because it’s strong. Glass is a very strong material that can withstand a lot of stress.

In addition to these factors, glass is also used because it’s durable. Glass is very durable, which makes it ideal for use in a variety of applications.

Why You Should Use Fiber

Fiber is a type of material that’s used in a variety of applications, from construction to transportation.

One reason fiber is used is because it’s lightweight. Fiber is one of the lightest materials, which makes it ideal for use in a variety of applications.

Another reason fiber is used is because it’s strong. Fiber is a very strong material that can withstand a lot of stress.

In addition to these factors, fiber is also used because it’s durable. Fiber is very durable, which makes it ideal for use in a variety of applications.
The following letter on the Army's demobilization system was written to me by a soldier in Guam. It's a perfect example of the mood of our own soldiers, who are demonstrating all over the globe, to demand "Get Us Home!"

A Reader

Indianapolis, Indiana

November 19, 1945

Dear Sirs,

I am writing you to express the sentiments of a fellow soldier who has been stationed in Guam for the last five months. They are sentiments that are echoed through all the trenches of our country.

In Guam, the system of demobilization is a complete failure. The officers are completely unable to handle the situation, and the men are left to fend for themselves. The system is completely broke, and the men are suffering.

The situation is so bad that some of the men have even resorted to theft and violence in order to survive. The men are being treated like animals, and the system is completely broken.

I urge you to do everything in your power to help these men. They are our fellow soldiers, and they deserve better than this.

Sincerely,

[Signature]

The War Department

November 19, 1945

Dear Reader,

Thank you for your concern regarding the situation in Guam. We understand your frustration and are working尽全力 to improve the situation.

The demobilization system is a complex process, and we are working with the men on the ground to improve it. We appreciate your concern and will continue to work towards a better situation.

Sincerely,

[Signature]
Lenin, International Leader and Teacher of Labor, Left Rich Heritage to Aid U.S. Workers’ Struggles

By Ralph Johnson

"This was the eighteenth of February. Russian revolutionaries, without any single voice of military dictators, drove the czar from his throne and from the heart of the Russian Empire."

Today, on this twenty-second anniversary of the Russian revolution, we remember how Lenin’s words and the events of that great day have set an example for all people. This is not the only revolution in the world. There are many more to come

Lenin, who led the workers of Russia to victory in the Russian revolution, was a great teacher of labor. His leadership was in the service of Russian workers who were fighting against czaristism. His vision and strategy were a model for the subsequent revolutions in Europe, America, China, and India.

Lenin’s legacy is not just about winning the battle against czarism, but about the importance of the worker’s role in the struggle for freedom. His ideas and strategies are still relevant today, as we continue to fight against oppression and exploitation.

The Lessons of October

The Russian revolution was a turning point in the history of the world. It demonstrated the power of the working class and the potential for a socialist revolution. Lenin, however, was not satisfied with the victory of the revolution. He continued to work for the development of a socialist society and the elimination of exploitation.

Lenin’s vision was not just about overthrowing the czar, but about creating a new society that was based on equality and freedom. He believed in the power of the working class and the importance of organizing and educating the masses.

Lenin’s legacy is a reminder that the struggle for freedom is an ongoing one. We must continue to fight against oppression and exploitation, and work towards a society that is based on equality and freedom.

Chicago SWP Joins Militant Demonstration Against Jim Crow Policy at Skating Rink

By Clara Hay

CHICAGO, Jan. 15—The Chicago branch of the Socialists’ Workers Party joined the National Committee on Civil Rights to stage a 3-hour protest at the Big Ten Skating Rink, 2510 N. Clark St., and the Blackstone Rink, 3725 N. Clark St.

The protest was to draw attention to the segregation and discrimination that exists in the skating rinks, which are primarily attended by black and Hispanic youth.

The demonstration was organized by the SWP’s Committee on Civil Rights, which is working to challenge segregation and discrimination in all aspects of society, including in public spaces such as skating rinks.

The demonstration was peaceful and well-organized. The participants were able to highlight the issue without resorting to violence or disruption.

The demonstration was a success and the participants were able to raise awareness about the issue. The Big Ten Skating Rink and the Blackstone Rink have since taken steps to address the issue of segregation and discrimination.

The Chicago SWP has been active in organizing demonstrations and protests to challenge segregation and discrimination. The group has been successful in raising awareness about these issues and in encouraging the authorities to take steps to address them.

Nazi Rule and Allied War Aims

Cable "Grab" Reveals Sordid Allied War Aims

WASHINGTON, D.C., Jan. 15—A cabled revelation of the sordid aims of the Allies in the war against Germany has been made public by the War Department.

The cable, which was sent to the War Department by the Allied High Command, revealed that the Allies were planning to seize and occupy all the German factories and factories of the恢复正常社会秩序 and to seize and occupy all the German factories and factories of the恢复正常社会秩序.

The cable also stated that the Allies were planning to use the German labor force to build up a new industrial empire for the Allies.

The reaction to the cable was swift and strong. The American people were outraged at the sordid aims of the Allies and the War Department was put under severe pressure to take action.

The War Department finally took action and the Allies were prevented from carrying out their sordid aims.

Los Angeles CIO Demands Return Home of Chinese Glis

By Al Lynn

LOS ANGELES, Calif., Jan. 15—A demand for the return of Chinese who were laid off at the CIO offices in Los Angeles was made today by the CIO leadership.

The CIO leaders stated that the workers who were laid off had been wrongly accused of theft and that they were entitled to a fair trial.

The CIO leaders also stated that the workers had been mistreated and that they had been denied their基本人权.

The demand for the return of the Chinese workers was supported by a number of other unions and organizations.

The CIO’s demand was met with a strong response from the company, which stated that it would not be able to return the workers without a trial.

The CIO leaders stated that they would continue to fight for the rights of the workers and that they would not give up until the workers were returned.

Detention for Lenin’s “No Accident,” Declares Expert

By Leon Simon

"After the killing of the great socialist leader, Lenin, the workers of the world are facing a serious crisis."

The killing of Lenin has caused widespread震惊 across the world. The workers of the world have been shocked and saddened by the loss of this great leader.

Lenin was a great socialist leader who dedicated his life to the cause of the working class. He was a master strategist and a great orator. His words and deeds have inspired generations of workers across the world.

The killing of Lenin has caused a great sense of loss across the world. The workers of the world are determined to carry on his legacy and to continue the struggle for a socialist society.

The killing of Lenin has also caused a sense of urgency. The workers of the world are determined to secure a peaceful and just society.

We must remember Lenin’s words and deeds and continue to fight for a socialist society.

Los Angeles Socialists’ Workers Party
Notes Of A Seaman

By Art Sharon

Second week's The Militant reported the strike against the Penn Marine Corporation by the National Maritime Union leadership. The split in the Brotherhood is the result of the federation's membership campaign to build a "white" union and absorption of the rank and file through its own organization. The Penn Marine Corporation operates a fleet of deep-sea cargo ships and is one of the largest ship operators in the world. The strike is the result of the Federation's attempt to organize the workers and negotiate a fair contract for them. The strike is supported by the International Longshoremen's and Warehousemen's Union, the Teamsters Union, and the United Mine Workers Union.

A GM Striker's Story

By Grace Carson

I talked with Boeing Stricker, a UAW millwright, who is one of the leaders of the General Motors strike. There was an interview by the Michigan Daily newspaper on October 26, 1937, and it was published the next day. The strike started on October 18, 1937, and the workers are asking for a fair contract and an end to the lockout. The strikers are determined to win their demands and will continue the struggle until they are victorious.

BUFFALO CIO SPONSORS NEW PRO-LABOR VETERANS' GROUP

BUFFALO, N.Y. — A veterans' committee has been set up by the Buffalo Industrial Club, both union and non-union, in the face of opposition from the Nationalist Party and its supporters. The committee is trying to establish a non-partisan organization to promote unionization and social justice among veterans. The committee is open to all veterans, regardless of their political affiliation, and is working to build a strong and united voice for all veterans.

Western Electric Pickets Cheered Phone Strike

By Ray W. O'Brien

DETROIT, Jan. 31—When the 25,000 Michigan CIO members, including the 13,000 Western Electric workers, went on strike yesterday, the whole city seemed to be in a state of excitement. The pickets were cheered by the crowd as they marched through the streets. The strike is expected to last for at least three days, and the workers are determined to win their demands.

Briggs UAW Local Scores Union-Busting Strike Fines

By Ray W. O'Brien

DETROIT, Jan. 31—The 25,000 Michigan CIO members, including the 13,000 Western Electric workers, went on strike yesterday, the whole city seemed to be in a state of excitement. The pickets were cheered by the crowd as they marched through the streets. The strike is expected to last for at least three days, and the workers are determined to win their demands.

The Militant

SATURDAY, JANUARY 19, 1946

T saturd ay's fell on the Western Electric workers, who were victimized by the CIO, with a small group of CIO members, who were the leaders of the strike. The workers were asked to return to work. The strike is expected to last for at least three days, and the workers are determined to win their demands.

The Line Held Firm!

On the second day of their strike against the Western Electric trust, picketing continued. The workers have been asked to return to work. The strike is expected to last for at least three days, and the workers are determined to win their demands. The workers have been asked to return to work. The strike is expected to last for at least three days, and the workers are determined to win their demands.
