### 800,000 To Stage Protest **Against Rising Living Cost**

JULY 15-Some 800,000 members of the CIO United Automobile Workers are scheduled to go on a one-to two-hour nation-wide work stoppage at 3 p.m., Tuesday, July 16, as a protest demonstration against soaring living costs and to demand effective price control.

This huge stoppage-demonstration has been called for the purpose of putting pressure on Congress to establish a "strong" OPA. But UAW President Walter Reuther told a meeting

### **Camden Union Pickets Fight Price-Gougers**

#### **By James Dolan**

(Special to The Militant) CAMDEN, N. J., July 10. -Union picket lines before stores of price-gouging merchants here have brought some results.

Before the first morning's picketing was over today, scores of shopkeepers called CIO Shipbuilding Workers Local 1, at the New York Shipyard, pleading for the local to call off its pickets and agreeing to lower prices.

Local 1 members and sympathizers picketed butcher shops, real estate offices, dairies, groing: "The owner of this business is an enemy of the American way of life. He is helping inflation. Don't patronize him."

#### PRICES SOAR One store against which union prices on cured ham from 69 cal members. cents to \$1 a pound and on pork chops from 39 to 85 cents. Anham from 43 to 83 cents a pound. jump from 60 cents to \$1 a

in Chicago yesterday that "if our fight against increased prices fails we will begin a fight on the wage front." Closing of the plants tomorrow has brought heated protests from the profiteering auto corporations who claim the union would be "violating its contracts" if UAW members walk out. The auto moguls conveniently forget that wages in these contracts were approved by the Wage Stabilization Board on the principle that prices would be kept under control.

#### RALLY PLANNED

However, UAW leaders in Detroit and elsewhere are proceeding with arrangements for the stoppage, which has the authorization of the union's International Executive Board.

A tremendous rally is scheduled for tomorrow afternoon in Cadillac Square, Detroit, to which the 300,000 Detroit auto workers, cery stores, etc., with signs read- as well as members of other CIO and AFL unions, have been called.

The CIO United Retail, Wholesale and Department Store Employes union in Detroit has also proposed to close down retail stores for the day and picket members complained had raised them with the union's 10,000 lo-

### May's Anti-Labor Record

Representative Andrew J. May of Kentucky, Chairman of the House Military Affairs Committee, who is deeply involved in the fraud perpetrated by the Garsson arms-production combine, has voted for every anti-labor measure in Congress.

May was the co-author of the infamous May-Bailey "work or jail" bill introduced in January, 1945, which provided penalties of five years in prison, a \$10,000 fine, or both for

He voted for the Case Bill. He supported the Smith-Connally anti-strike bill on June 4, 1943, providing prison terms for strikers. He voted for the amendment to that bill prohibiting union contributions to campaign funds.

May is a fervent supporter of the anti-labor Dies Com-mittee; he voted for its continuation, on February 10, 1943. and to make it permanent, on January 3, 1945.

May 25, 1943, and again on June 12, 1945. He opposed the soldier vote bill, on February 3, 1944.

While attacking labor, May has also struck out at the small farmers, opposing the crop insurance bill and the rural electrification bill, on June 23, 1943.

Rents are skyrocketing as 155,000 members in 175 locals, much as 280 per cent in this is dispatching roving picket area. # **Our Program To Fight Price Rises**

#### By the Editors

briefly reviewed the price situation following the expiration of the OPA and outlined a program to safeguard the workers' living standards in the face of rising prices. The Daily Worker of July 12 prints an article by George Morris, "R-r-revolutionary Fight on OPA," which pretends to be a "reasoned" criticism of our analysis and program. The purpose of Morris' article is to indoctrinate the readers of the Daily Worker against our program by distorting its content, while at the same time, covering up, the shameful role of the Stalinists in the fight against rising prices..

'The "trick" in Morris' article is very simple. Our editorial said that Truman, the labor leaders and the Stalinists are trying to preserve the illusion that OPA controlled prices; and we warned the workers not to be deceived into believing that revival of the OPA would protect their living standards. Morris quotes part of our criticism of OPA -and says that this is the same as opposition to price control! Because we expose the OPA, we are really "sabotaging" the struggle for price control and using "seemingly revolutionary" demands to cover this up. Being a Stalinist, schooled in the game of distortion and falsification, he naturally does not indicate what our demands are.

#### What We Stand For

But we didn't equate OPA with price control in that editorial, and we don't do so now. Every worker and every housewife knows that the cost of living kept rising all the time under the OPA; that the OPA granted price rise after price rise to the corporations; that real prices climbed steadily upward through deterioration in quality, tie-in sales, black market operations, etc. Will Morris or anyone else dare to dispute the truth of these statements?

The Militant has been and is in favor of effective price control-that is precisely why we are against the illusion that the OPA controlled prices. The government never had any interest in the welfare of the consumers-all it was ever concerned with was protecting the profits of Big Business. It pretended to control prices through the OPA only in order to provide hypocritical justification for the wage freeze, to restrain the workers from demanding wage raises to meet the rising cost of living. This double-dealing was aided all through the war and since its end by trade union leaders and the Stalinists.

### Two weeks ago The Militant in a front-page editorial STOCK MARKET REPORT- 1946

We want prices effectively fixed, controlled and policed and we know that the OPA never did that and never will. telling the workers the truth-which is that they can depend only on themselves and their allies, the poor farmers, the small shopkeepers, etc., to control, fix and police prices in the interests of the consumers.

Today, in many parts of the country the unions together with consumer organizations are conducting picketlines and holding demonstrations to prevent price and rent step in the right direction-the first efforts of the masses to take price control into their own hands.

tions, we call on the workers and consumers to extend this ions themselves. activity on a local and national scale; to give a permanent

which persist in extorting price rises by withholding the scale of wages in the form of a cost-of-living bonus. commodities the masses need.

do the Stalinists propose? Are they in favor of mobilizing the masses to take price-fixing out of the hands of Wall Street's agents in Washington? No, their answer is the OPA, effective price agency it never was. And to revive the OPA, they call for-a buyers' strike!

To buy or not to buy-is that really the question now facing the workers? Shall we refuse to buy food for our children, or go without shoes, or move to tents in the park? What nonsense it is to advise workers to do without "unnecessary" items when their present income does not enable them to buy even the prime necessities to properly feed, clothe and house their families. Yet that is the reactionary, utopian program offered by the Stalinists. We denounce and expose that program at the same time we participate in the price control struggles of the workers and consumers, seeking to emphasize all the progressive features of that struggle and to raise them to higher levels. Not by "passive resistance" but by mass action and militant action will the consumers solve their problems.

Meanwhile, prices soar. And, since the debate in Congress is only over how much to let them rise, prices will Instead of pandering to illusions on this score, we insist on continue to soar. What should the unions themselves do about the degradation of living standards through skyrocketing prices? Our editorial of two weeks ago gave the answer to this burning question too when it advocated a struggle for the sliding scale of wages.

This proposal The Militant has made a thousand times since the beginning of the war. Insert a sliding-scale-ofwages clause into every union contract, we said; establish rises. We Trotskyists are 100 per cent in favor of such a fixed minimum wage, and then every time prices go up, action, we support it and we participate in it. This is a automatically adjust wages upward to compensate for the increased cost of living. This sliding scale of wages, of course, would not be based on the government's false price In addition to hailing and participating in such ac- index, but on a reliable index worked out by the trade un-

This program is winning more and more support among

character to such activity by creating mass consumers' | the unions as the workers come to see how they were hoaxcommittees which will intervene everywhere that the cor- ed by the promise of "price-freezing" during the war. A porations attempt to gouge the people; to draw into this number of auto, steel and rubber unions have declared activity the small shopkeepers themselves, who are also their support for it in the recent months; the CIO packthe victims of the big profiteering trusts; to demand the inghouse workers union is at this moment negotiating a expropriation under workers' control of the industries new wage contract containing a variant of the sliding

But what about the Stalinists? Not a word from them. That is what we advocate on price control. And what Both Morris and the unions under Stalinist influence are as silent as the grave when it comes to this fighting program for protecting the workers' living standards against the blows of inflation. Every member of the Communist glorified beyond recognition and dressed up as the kind of Party and every militant unionist has the right and duty to ask why.

Another significant section of our brief editorial which Morris "neglected" to deal with was our proposal for united labor action against the menace of runaway inflation. We said:

"Now more than ever, all the unions - CIO, AFL and Railroad Brotherhoods - must join in united action. They must immediately convene a National Conference of Labor to put forward a program of joint action and mobilize the workers for a real fight . . . Forward to the United Labor Conference! Stop the profiteers by the independent action of the working massess!

That was one of the main points of our editorial. It has been one of our chief calls for action. This action has been supported by many sections of the union movement: conferences on a local scale have already been held in many areas. Where do the Stalinists stand? Every two or three weeks they have an article paying lip-service to the proposal for a United Labor Conference. But in the unions where they have influence they do not lift a finger in its behalf because to do so might bring them into conflict with Philip Murray who is against it. And they have the nerve to accuse us of sabotaging the struggle for price control!

#### Stalinist Smear Artist

George Morris is the Daily Worker's Trotsky-baiting smear artist. During the war he wrote a scurrilous pamphlet denouncing the Trotskyists for opposing Wall Street's imperialist war aims, for fighting against Jim Crow in the army, for opposing the wage-freeze and the no-strike pledge. If "under Browder" Morris denounced every progressive demand advanced by us as playing into the hands of the Nazis, then "under Foster" he continues the same poison-pen work under new conditions.

The Militant and the Socialist Workers Party stood out alone during the war in defense of labor's cause. We are doing the same work today. The inflation now scourging the workers and the middle class is the direct consequence of the war. These truths the Stalinists must conceal. Those who conceal the real causes of inflation cannot engage in a genuine struggle against it; they must hire scoundrels to lie about those who do engage in such a struggle.

### **Locomotive Engineer's Views On Rail Union Consolidation**

#### By Henry Adams

Robertson's "strikebreaking order to members of the Brotherhood of Locomotive Firemen and Enginemen to get back on the job during the recent national railroad strike underlined for many railroad men the disastrous effects of the division of railroad workers among 21

## Sidney Hillman--An Appraisal

#### By M. Stein

The death of Sidney Hillman became the occasion for glowing tributes - from President Truman as well as from William Z. Foster; from the Democratic National Committee as well as from the Communist (Stalinist) Party. Sidney Hillman is eulogized alike by clothing manufacturers, by labor leaders, by Democrats, Social Democrats and Stalinists. What was the true stature of the man who receives such wide acclaim? What were his views, his contributions?

Amalgamated Clothing Workers, of The which Hillman was president from its birth in union President, Rickert, Gompers' right-hand man, an autocratic old-line AFL bureaucrat with gressive, but this venture was short-lived. It lasted craft outlook uninterested in organiz-

through speed-ups, the employers would be assured of greater profits while the workers got a few extra pennies per day. These schemes gave rise to dissatisfaction in the young Amalgamated Clothing Workers Union. A left wing came into existence. It was inspired by the ideas of the Bolshevik revolution; and it was led by the young Communist Party in this country. Here, too, Hillman was able to find a compromise. Once the Russian Revolution proved success-

ful, once it was firmly established and all its enemies were defeated in a bloody war, Hillman took a trip to the Soviet Union where he effected which Hiliman was president from its birth in 1915, grew out of a split in the United Garment Workers Union, AFL. The rank and file of the United Garment Workers rebelled against the United Garment Workers rebelled against the

the crisis with the aid of the Hillmans, just as it survived the war with the aid of the Hillmans. Drunk with power the capitalists now feel far less need of compromise or compromisers. As a matter of fact, they are now busily engaged in a vicious offensive against labor, seeking to take away even the meager gains of compromise. When Roosevelt began to prepare in earnest

for war he called upon Hillman to be co-chairman of the Office of Production Management. Hillman's talents were invaluable to Roosevelt in subordinating the trade unions to the war effort, in keeping-them docile. Hillman helped put over the wage-freeze, the job-freeze, the no-strike pledge, and all the other measures that served to shackle the workers while the monopolists coined billions out of the war.

#### Role of the PAC

the PAC of which Hillma

ing the workers in the then barbaric sweat-shop industry.

The birth of the Amalgamated in 1915 was in opposition inside the union. many respects an anticipation of what was to the Amalgamated with great hope. They saw in union movement of Gompersism, and thus revitalizing it. They saw in it the first important They saw in it the dawn of a new day for the American labor movement.

Other industries tried to emulate the Amalgamated Clothing Workers. Thus, an Amalgamated Textile Workers Union was set up, an Amalthem had any real success; they failed to survive. Hillman thereupon set out to prove that his union is "respectable," that it maintains "good" relations with the employers, etc. In brief, he became a foremost advocate of business unionism.

The narrowness of his outlook was crassly exemearly twenties as the norm of American economic official labor leaders were positive that all probstruggle could be eliminated if only the workers bought shares in the corporations, set up their But meanwhile many workers' hard-won earnings on several occasions. were lost in these ventures.

#### SIDNEY HILLMAN

The truth is, however, that the collaboration between Hillman and the Stalinists was made possible not by Hillman's "progressive role" but by the reactionary role of the Stalinists. It is by no means accidental that the period of the closest collaboration between Hillman and the Stalinists coincided with the wartime "comrade-Hillman's meteoric rise in the labor movement ship" between Stalin and Roosevelt and Churchill. The Stalinists embraced Hillman and leaned on him most heavily during the so-called Browder Era. which Foster himself characterized as a complete surrender of even a pretense of struggle in behalf of the workers. Foster now omits to mention this rather embarrassing detail.

#### Lacked Political Perspective

Hillman lacked any kind of social insight or political perspective. He was not an eloquent speaker, nor did he ever contribute anything as a writer or thinker. His skill was that of a tradeunion boss. His method was compromise. He sought to find a way out of all difficulties through panacea for all problems. In this he did not differ tinguished by a certain boldness of method, which is often confused with the pursuit of bold objectives.

The deep social crisis resulting from the economic collapse in 1929 brought Franklin Delano Roosevelt to the fore. In behalf of capitalism Roosevelt sought to soften through compromise the social paroxysms engendered by the crisis. He found inside the labor movement his counterpart, Hillman, and so a "partnership" was formed. All the profits of this partnership went to the capitalists, thus enabling them to survive bankruptcy. The trade unions were thrown a few sops public works projects, etc. Capitalism survived for all.

was chairman and the moving spirit, was a perversion of the idea of an independent labor party The workers wanted to assert themselves politically through their own party. The PAC frus- the miners with a solid indus- @ trated them.

More and more the workers feel how limited victory. The long-standing desire is the scope of purely economic struggle. Trade of the men for amalgamation is unions - grown into powerful organizations em- beginning-after years of stagbracing some 15 million members - find them nation-to find new organizaselves powerless in the absence of their own poli- tional forms.

The PAC set out to mobilize the political power of labor, but - for what purpose? It was not in behalf of labor's own candidates, but in behalf of President Roosevelt, running for a fourth term, and in behalf of Congressmen - "labor's friends" - running on the Democratic and Re-

pletely when President Truman and the Congressrecent railroad strike.

Hillman rose to a position of prominence in the trade union movement and the political life of the country at the very time when the capitalist class found it necessary and possible to soften the class struggle through compromise. Capitalism that method alone. The conference table was his prefers this method so long as it serves to keep the working class docile and dormant. The Sixty from other trade union leaders. But, he was dis- Families controlling the wealth of this nation, its production, its political parties, its newspapers and its radio are perfectly satisfied to rule through compromise, so long as their mastery remains unchallenged. But the American working class is awakening to a realization of its own power.

and push to the fore leaders made of different clay from Hillman. Leaders who are not compromisers but fighters. Leaders who are not satisfied with crumbs but who genuinely safeguard and raise the living standards of the workers. Leaders who will organize the attack upon the citadels of the whole system of wage slavery and in the form of the Wagner Act, social insurance, usher in a society of peace, freedom and plenty

trial union gain an outstanding

One important move is the Consolidation Committee of Enginemen, which aims to unify two big operating unions - the Brotherhood of Locomotive Engineers and the Brotherhood of

Locomotive Firemen and Enginemen. The sentiment behind this move is forcefully expressed in a letter sent out by an engineer on the Wheeling and Lake Erle Bailroad, the General Chairman of the BLFE on the Wheeling Road. He writes in part:

"Within the last few days we have witnessed the tragic consequences of having many, instead of one railroad labor organization. As the last and final salute in this miserable fiasco, we have been invited by our International President to go out and scab against our fellowworkmen . . . This strike was being supported 100 per cent by the rank and file of the men in

all organizations and not one train or engine made a move on the Wheeling and Erie, which proves that the men are loyal to each other regardless of the power hungry labor leaders that head our organization . . .

#### OFFICER FOR YEARS

"I have been an officer in this organization for a good many years and while I have made many mistakes in the trial and error method of handling grievances, I have supported the Grand Lodge in every honorable movement that they have engaged in and I have been their outspoken champion on this rail-

road. "I was raised in the coal mining country in southern Ohio and saw the many struggles the mine workers had to endure and out of this bitter experience of being hungry and without shoes and proper clothing, I was trained to be a union man and not a damnable scab. "When our International President signed his name to that telegram that you all received on

Saturday, May 25, he wrote the

craft organizations. Within four days after Whitney and Johnston were forced to capitulate, the railroad workers saw

> been written in the history of the American Labor movement: he actually ordered you and me and all the members of this honorable organization to go out and scab against honest, honorable union men that were out on strike for better wages and better working conditions ....

DIVISION SPELLS DISASTER

"Under the capable leadership of Mr. John L. Lewis the United Mine Workers at the same time and under identical circumstances and conditions got \$11.75 per 6-day week increase for the coal miners, while our stupid overpaid boneheads got us a total of \$8.88 for the 6 day week. All of which proves that in the labor movement division spells disaster.

"Having regard for the miserable failures produced because these brotherhood heads are fighting among themselves while the men pay the bill and take a beating, what are we going to do about it?

"Here is what I am going to do about it. I am going to make application for membership in the Brotherhood of Locomotive Engineers. I am going to use what time and effort I can to promote the CONSOLIDATION COMMITTEE OF ENGINEMEN. headed by R. R. Walker, Organizing Director, 1101 Hippodrome Building, Cleveland 14, Ohio. I am asking every local Chairman to assist me in this movement: I am going to ask every member of the BLE and the BLFE on the Wheeling and Erie to join in this movement to consolidate both these organizations into one.

TIME TO UNITE

"We have taken a beating too long now. It is up to every one of us to get into the Consolidation Committee of Enginemen and compel the consolidation of the two organizations into one. . . . The time to strike against personal prestige and internal destruction is now. . . . With one organization, we can move forward in dignity, justice and in blackest pages that have ever peace."

India, while England has

people per square mile. From the agricultural stand-

point. India raises annually feed herself but she feeds others. in the sense that she has to feed was about \$35 per capita. many souls other than her own. The food problem is only a

lem of the country. The starvasons: first, the present govern-

India's per capita national income is about one-tenth of the average income of other civilized nations. To improve the situation, the national economy of India should be properly planned. It has always been stressed too much, particularly by the present government, that India is primarily an agricultural country and her agriculture should be improved in order to avoid star-

vation of the nation. This is wrong, and utterly misleading. For, it has been shown here that India's food deficiency actually amounts to a small fraction of her requirements. Further, agriculture plays a subordinate role, while industry plays a major role in a national economy. India, it is true, has been an agricultural country, but she has tremendous industrial resources, too. Her industrial possibilities are not less than her agricultural possibilities - in

fact, greater. duction is worth (in dollars) now and general economic situation more than 10 times her agricul- can never be brought up to a tural output; Britain's industry satisfactory level under British is about seven times as impor- rule.

-By Kamalesh Ray India is often talked of as an over-populated country, whose economic salvation lies in keeping the population

down to a proper level. Yet, considering the population density on each square mile of land area, India is better off than other more advanced countries. Thus Germany is 30 per cent more congested than en itant as her agriculture; while

India's industrial economy is far more than twice as many tinier than her agriculture.

Industrialized Britain can feed her people by purchasing more than double the amount of local about \$18 worth of agricultural food production, while the Inproducts per capita, while Eng- dian people cannot afford to buy land produces \$20 worth. This the foodstuffs which they prodoes not explain India's chronic duce on their own soil. In 1929. starvation and Britain's normal the United Kingdom made a baldietary situation - India cannot ance import (i.e., over her export) of foodstuffs of about \$2 .as we have seen. India can be 300 million, which meant \$50 per said to be "over-populated" only capita of her people; in 1931 #

It was estimated that the minimum daily requirement of a part of the entire economic prob- 2,600-caloric diet for a person costs in India at prewar price tion of India is due to two rea- level, about \$25 per year, which is barely the average per capita ment's bungling and its drain- income. This figure immediately tells us that the people of India ing of available supplies; sec-ond, the general low economic cannot afford to buy even half level of the people, for which of their daily meals since they the government is likewise re- have to meet such other necessponsible. We now consider the sities of life such as housing, clothing, fuel, medicine, etc.

The price of rice, the most staple food grain of Bengal, has been fixed by the government for the last two years at 300 per cent higher than normal (16 rupees in place of 4 rupees per Maund) with the result that the food grain is inaccessible to most of the people. The average cost of living in India for the past three years has gone well above 100 per cent over the normal level, whereas national income has hardly increased 20 per cent during this period.

To sum up: India's food problem is not an outcome of her natural condition. India does not need a reduction of population for her economic rehabilitation. She does not need to worry about increasing food production to prevent death from starvaticz, but rather about the fact that she is denied what she already produces. She could certainly plan to produce more food crops to raise the standard of national diet provided she were free to To compare with other coun- control and consume the prodtries. America's industrial pro- uct. In other words, India's food

#### The SWP's Greatest **Election Campaign**

This summer and fall the Socialist Workers Party is conducting the greatest electoral campaign in the 18-year history of the American Trotskyist movement.

SWP branches in five states are running candidates for Congress ,governor and other posts. These campaigns, in New York, New Jersey, Ohio, Minnesota and Washington, will bring the Trotskyist message of revolutionary socialism to new hundreds of thousands of workers.

These campaigns have more than local or state-wide significance. They are of national and international importance. The Trotskyist candidates everywhere will be advancing a program of struggle designed for the whole American working class. The success they achieve in these five key states will influence powerfully the future political development of American labor.

By supporting and voting for the Trotskyist candidates and program, the workers in these five states will be able to record their desire for genuine independent working class political action through a workers' party and candidates.

One of the main planks of the Trotskyist election program in each state calls for the building of an independent labor party. By voting for Trotskyists, the workers will be voting for the formation of a labor party and for the only genuine labor candiates now in the field.

It is a tribute to the enduring sound program of Trotskyism and to the consistent, uncompromising struggle the SWP has waged in

vinist Czech and Polish elements, and to pogroms against the Jews which surpass all the vile deeds of Russian Czarism." In sum, declared Lenin, Trotsky and their

comrades at this historic Congress, "The 'democratic' States of the Entente follow a policy of extreme reaction."

The Bolsheviks ended their 1919 document with a grave warning: "The continued domination of finance capital, can lead only to the complete destruction of civilized society through the intensification of exploitation, the growth of slavery, political reaction and armaments, and finally the eruption of new destructive wars."

This warning of 27 years ago received the most tragic and terrible confirmation in the Second World War. Today the words of Lenin and Trotsky apply with redoubled force. Unless the workers intervene and establish socialism, the politics of "extreme reaction" will lead inevitably to a Third World War. The Kremlin with its demands for reparations and the partitioning of Germany is aiding world imperialism in preparing the ground for that war.

#### Victims Of Inflation

During the war, the workers were pressured into buying billions of dollars worth of government bonds. Glowing propaganda was poured forth about the wonderful "investment" war bonds represented. Just think, for an \$18.50 bond, a worker could eventually get back \$25.

But the same thing is happening to the interest and principal of the bonds bought by the workers as is happening to their pay envelopes. Their pay enveloes are being robbed through inflation and soaring prices.

Today, \$25 is worth less than \$15 in terms of 1942 purchasing power. And day by day, the value of currency is shrinking. Those workers who may be "lucky" enough to hold on to a few bonds until they mature, may get back "\$25" that will be equal in purchasing power to \$10 or \$5 of what they originally invested in a bond. Most workers, however, are being forced to cash their bonds before maturity. The \$18.50 they get back represents only about \$10 in former purchasing power.

This is only part of the sharp slash in purchasing power and standard of living which the capitalists and their government are perpetrating through inflation.

Old folks living on pensions, the sick and disabled on compensation, those receiving unemployment insurance, veterans drawing \$20 a week jobless compensation, find their standard of living rapidly declining.

When Congress passed the GI bill it said veterans needed a minimum of \$20 a week for mere subsistence at the prices prevailing several years ago. That \$20 today will buy only what about \$12 could when the bill was passed.

What those on small fixed government incomes are receiving is a piece of paper bearing the same figures as before. But the worth of these pieces of paper has shrunk tremendously, and is shrinking more with each passing day.

Like the wage-earners who are beginning to demand a sliding scale of wages to meet the rising cost of living, old-age pensioners, the unemployed and the veterans forced to live on compensation should fight for a sliding scale of pensions and compensation that rises automatically with the cost of living.

"You'd think if people must keep dogs, they'd have the decency to feed them?"

### IVAN THE TERRIBLE -KREMLIN VERSION -By Joseph Hansen-

According to a July 7 Moscow dispatch, Sergel Eisenstein, the famous film director, is suffering a heart attack. The sudden seizure came just after he had finished cutting the second part of a film on Ivan the Terrible. By strange coincidence, the Stalinist authorities reveal in the same dispatch that the picture has been condemned.

"Oddly," continues the dispatch, "heart attacks seem to haunt those interested in the life of Ivan the Terrible. Alexei Tolstoy suffered a heart attack just after he had finished the second volume of his trilogy written around Ivan's life, and Nicolai Khmelov, the actor portraying Ivan in the play written by Tolstoy, had a heart attack on the set one day."

What is the reason for this extraordinary epidemic of heart attacks among Stalinist artists assigned to depict Ivan the Terrible?

The Kremlin censors offer no explanation for Eisenstein's collapse. They confine themselves simply to a lofty defense of art and history and a carefullyworded explanation for the dooming of Eisenstein's film. Says Culture and Life, speaking for the Central Committee of the Communist (Stalinist) Party:

"Contrary to historic truth, Ivan the Terrible has not been shown as a progressive statesman, but as a maniac and like a scoundrel who behaves in a crazy manner, surrounded by many young cutthroats he has assembled. It is clear that this film is antihistorical and anti-artistic and could not be released for distribution."

This statement, however, instead of shedding light on the wave of heart attacks, only deepens the mystery. Why is Stalinist officialdom so sensitive about the history of the 16th century? Moreover, what caused Eisenstein to lose his head and become "anti-historical" and "anti-artistic" in filming precisely the historical period of special interest to Stalin? Hasn't Eisenstein faithfully trimmed his films all these years according to the pattern of history furnished by the Kremlin?

The solution to this bizarre mystery, strangely enough, can be found in the coldly factual pages of the Encyclopedia Britannica. "Ivan IV, called 'The Terrible' (1530-1584) . . , had a neurotic strain in his character," declares the Encyclopedia. "He grew up in a brutal and degrading environment where he learnt to hold human life and human dignity in contempt." The mystery begins to clear. Is it possible that the Soviet people sitting down to enjoy a film of Ivan the Terrible might get the hero mixed up with the beloved genius now in the Kremlin?

In the first part of his reign Ivan consolidated Muscovy and extended his territories on a wide scale. Then, continues the Encyclopedia, "Ivan entered upon the second and evil portion of his reign." After the death of his wife, he became "infuriated" against "God and man." During the next ten years (1560-1570) "terrible and horrible things happened in Muscovy. The tsar imagined that every man's hand was against him."

#### ENIGMA UNRAVELS

The enigma is unraveling before our eyes. Obviously no Stalinist official in his right senses could permit the people to see a true picture of Ivan the Terrible. The parallel with the present day tyrant is too obvious.

Ivan the Terrible strangled Phillip "the saintly metropolitan of Moscow" and murdered "St. Philip" of Tver, the Encyclopedia informs us."In 1570 Tver had to endure, for some reason now difficult to understand, the vengeance of Ivan the Terrible, who ordered the massacre of 90,000 inhabitants of the principality."

This should make it apparent why Eisenstein was hauled away to a "hospital." The audience would have mistaken such scenes for a newsreel of a purge under Stalin. Let us hope that the Kremlin physicians do not poison Eisenstein as their pre poisoned the great writer Gorky in June 1936.

the interests of the working class, that the party has grown to the point where it is able now to make this great advance

This reflects the growing influence of the SWP among the workers, the Negro people and all sections of the oppressed. It demonstrates that despite all obstacles the ideas of Trotskyism are penetrating deeper and deeper into the masses.

Every reader of The Militant is urged, to rally behind the candidates and program of the Socialist Workers Party. Sign and circulate petitions to get the SWP candidates on the ballots. Help in the organization of campaign meetings. Spread the SWP literature. Contribute funds. Join the Socialist Workers Party.

#### **Politics Of Reaction**

On July 9 Molotov demanded that the German people be forced to pay ten billion dollars in reparations to the Soviet Union. This is in addition to the 14 billion in resources already seized. Molotov insisted that occupation armies be quartered in Germany until this astronomical sum is paid in full. That would mean in practice the partitioning of Germany.

In the days of Lenin and Trotsky the Soviet Government and the world Communist movement denounced the demand of the Allied bandits for reparations and annexations. In March 1919, in the "Theses on the International Situation and Politics of the Entente," the First Congress of the Communist International explained to the workers of the world:

"The policy of reparations has been pushed to the point of complete pillage of the vanquished. Not only are bills presented to the vanquished mounting into billions upon billions, not only are all the methods of war inflicted upon them - but the Entente countries also take locomotives, railways, ships, agricultural instruments, gold reserves, etc., etc. In addition the prisoners of war are forced to become slaves of the victors. Under discussion are proposals for forced labor from the German workers. The Allied powers intend to convert them into miserable, starved slaves of Entente capital."

These words might have been written about the postwar situation today, including the counter-revolutionary role of the Kremlin. The founding Congress of the Communist International continued: "The policy of nationalist incitement is carried to the extreme by a constant barrage against the defeated nations in the Entente press and by military occupation authorities, as well as by the hunger blockade, condemning the peoples of Germany and Austria to extermination. This policy leads to pogroms against the Germans, organized with the support of the Entente - by chau-

### **Get The Big Crooks!**

Why is Senator Mead's War Investigating Committee putting on its big exposure of the Illinois arms combine which started with nothing and ended up with \$78,000,000 in government contracts through the friendly offices of Rep. May, head of the House Military Affairs Committee?

Everybody knows, or pretty well suspects, that what these small-fry crooks grabbed was peanuts compared to the tens of billions looted from the U.S. Treasury by the really big corporations. Comptroller General Warren, for instance, charged in April, 1944 that the "graft" on the war contracts would amount to 50 billion dollars.

If the Mead committee were really interested in investigating war fraud and corruption it would ferret out first of all the facts about the 117 billion dollars in war contracts handed out to the top 100 corporations which secured almost 70 per cent of all war contracts.

But Senator Mead isn't at all interested in exposing the big crooks. He is just making a bit of favorable publicity for himself in preparation for the elections next November. He is being pushed by the Democrats as an opponent of Dewey, New York's Republican governor and highly-touted "gang-buster." What better opponent to run against Dewey than a "war-profiteer. buster"?

So the administration has picked out one gang of relatively small-time crooks who managed to break into the munitions racket and a political scape-goat in the form of Rep. May. They are the fall-guys for the build-up of Mead in his gubernatorial campaign.

But this very investigation and hubbub about the Illinois arms combine serves the additional purpose of diverting attention from the bigtime corporation crooks and their agents in the very summits of the government. With this investigation, the administration hopes to satisfy the people that it is "going after" the war profiteers.

There is still buried in Washington a scandal bigger and dirtier than the world has ever seen. It would involve every capitalist politician from top to bottom and every big capitalist and corporation in the United States.

The exposure of the Illinois arms combine and Representative May gives a tiny hint of the monstrous steal engineered during the war by Big Business and its government.

But the full facts of that steal will never be brought to light by capitalist politicians like Senator Mead. It will only be uncovered when genuine labor representatives, put into office by a labor party that has no ties with Wall Street, are sent to Congress.

Bill Morgan

Now we come across still more remarkable facts in the Encyclopedia about the bloody despot who had himself crowned the first tsar. He set out to "destroy the second wealthiest city in his tsardom -Great Novgorod. A delator of infamous character, one Peter, had accused the authorities of the city to the tsar of conspiracy; Ivan, without even confronting the Novgorodians with their accuser, proceeded at the end of 1569 to punish them. After ravaging the land he entered the city on Jan, 8, 1570. and for the next five weeks, day after day, massacred batches of every class of the population. Every monastery, church, manor-house, warehouse and farm within a circuit of 100 miles was plundered and left roofless, all goods were pillaged, all cattle destroyed."

The Encyclopedia continues its calm recital of Ivan's ghastly purge almost four centuries ago: "No fewer than 15,000 were massacred at Novgorod alone (60,000 according to some authorities). A famine ensued, and the district of Novgorod fell into utter desolation. Thousands of families were transported to Moscow, Nijni-Novgorod, and other towns of the principality of Moscow."

How the eyes of the Stalinist censors must have bugged when they saw such scenes in the preview of the film! What was Eisenstein trying to do, pull their leg, running in documentary shots of the great purges under Stalin?

The Encyclopedia reports other nasty little items about Ivan like killing his own son "in a fit of ungovernable fury." And then concludes with nice restraint that "His brutal and vicious manners prepared the way for the horrors of 'the Great Anarchy ''

If Eisenstein included such facts, small wonder Stalin decided the film had better be classified as "anti-historical." After all, if the Soviet people are comparing Stalin with Ivan the Terrible, it's politically advisable for him to prove the comparison is really flattering. What better way than to show a film of Ivan the Terrible as "Generallssimo Ivan the Progressive"? And by the way, who's responsible for the failure to expurgate the Encyclopedia Britannica?

### World War II And The Monopolies

# Big Business Grows Bigger Workers Produce A

#### By Art Preis

World War II didn't bring the promised "four freedoms." It didn't bring lasting peace, plenty and security. But it did make American Big Business bigger. It did increase the concentration of wealth and economic power in the hands of the giant monopolies.

These monopolies-owning most of America's industries, transport, raw materials, food processing and distribution, financial institutions-are controlled by a tiny oligarchy of America's sixty richest families. They own most of this country. They rule it. And it is their armed forces and economic penetration which are reaching out to rule the whole world too.

How much of this country this ruling oligarchy owns and how much they have increased their ownership and control through World War II, is the subject of a recently-published report prepared for the Senate Small Business Committee by the Smaller War Plants Corporation (SWPC), entitled Economic Concentration In World War II. Packed into the 358 pages of this report are facts which confirm to the hilt the contentions of The Militant and the Socialist Workers Party that the war was inspired by and benefitted only Big Business.

#### "Economic Royalists" Get Fatter

Roosevelt, at the start of his presidential career in 1933, promised to "drive the money-changers from the temple" and assailed the "economic royalists." But, as the conclusive evidence of this Senate report shows, the "economic royalists" fattened during his peacetime regime and during his wartime rule grew to unprecedented wealth and power.

'The relative importance of big business particularly the giant corporations, increased sharply during the war, while the position of small business declined," the report demonstrates.

In September 1939, start of World War II, the value of all usable production facilities in the United States was about 40 billion dollars.

BUT-just 250 of the largest corporations had 25.9 billion dollars of these capital assets-65.7 per cent!

During the war, 26 billion dollars of production facilities were added-two-thirds from the pockets of the American people by way of the U. S. Treasury, Of these facilities, says the report. "about \$20,000,000,000 of the \$26,000,000.000 wartime plant is usable for the production of peacetime products either immediately or after only minor conversion." Thus, there is today "a total of some 60 billion dollars of postwar usable facilities.'

"Who then controls this vast productive plant?" asks the report. "The answer to these questions may be obtained by examining the holdings of the Nation's 250 largest manufacturing companies-31 of which are controlled by five financial interests groups."

"If these 250 industrial giants finally acquire the 8.9 billion dollars of usable federally financed facilities on which they generally hold purchase options, their facility holdings will come to 38.5 billion dollars, 66.5 per cent of total usable facilities and almost as much as the entire 39.6 billion dollars held before the war by all of the more than 75,000 manufacturing corporations in existence.

250 GIANT CORPORATIONS OWN 2/3 OF MANUFACTURING PRODUCTION FACILI-TIES IN AMERICA TODAY.

#### World War II And The Monopolies

### WHO OWNS AMERICA

The following are extracts from Economic Concentration and World War II, the report of the Senate Small Business Committee:

The relatively few giant corporations of the country which have come to dominate our entire economy are, themselves, largely owned by only a few thousand stockholders and are controlled by a mere handful of huge financial interests . .

The National Resources Committee was able to determine upon eight more or less clearly defined large interest groups. Each of these exercise common influence and control over many of the giant corporations

The control of these eight interest groups over the 250 largest corporations represented approximately 29 per cent of all non-financial and banking assets. Together the eight interest groups controlled 106 of the 250 larger corporations and nearly two-thirds of their combined assets. No attempt was made to include the assets of smaller corporations falling under their control, though there are many of them

The largest of the eight interest groups is that known as Morgan-First National . . . J.

But that isn't all. Just 31 of these corporations | CLEVELAND GROUP," OWN THESE 31 CORown a total of 18.2 billion dollars of facilities-30 per cent of the nation's productive plant and equipment. AND FIVE FINANCIAL GROUPS, "NAMELY. MORGAN-FIRST NATIONAL, MEL- shown by other illuminating figures. LON. ROCKEFELLER, DU PONT, AND THE | Corporations with manufacturing assets of The war was good to them.

P. Morgan & Co. and the First National Bank of New York . . . The group includes 41 of the 250 large corporations, 10 of which had two or more directors in common with J. P. Morgan & Co. It is made up of 13 industrial corporations headed by the United States Steel Corporation . . . 12 utility corporations, including the American Telephone & Telegraph Co. . . . 11 major railroads or railroad systems ... and five financial institutions ...

The Kuhn-Loeb group . . . includes 13 major railroads or railroad systems, the Western Union Telegraph Oc., and one bank.

Three interest groupings derive principally from family interests well established in the industrial field - Rockefeller, Mellon and du Pont, The largest of these, the Rockefeller group, includes six large oil companies and one bank - Chase National Bank, the largest in the country. The Mellon group includes nine industrial corporations, one railroad, two utilities, and two banks . . . The third family group, du Pont, includes four of the Nation's largest companies - three industrials and one bank . . .

PORATIONS.

The direction in which Big Business has been heading-aided by two bonanza world wars-are

more than \$50,000,000 each-"the giants of industry" as the report calls them-in 1934 controlled 37 per cent of all such assets in the coun-1007 try, By 1940, these "economic royalists" con- clothing and shelter, which workers also produce. trolled 44 per cent. In 1942, blessed by war, these 205 corporations owned 49 per cent of all corporate manufacturing assets.

The bigger the corporations, the increasingly bigger proportion of all profits gravy they have been lapping up. The report states: "The largest income recipients-those receiving \$5,000,000 annual net income and over-have grown steadily in importance. For example, in 1918 they accounted for 34.2 per cent of the total net income received by all manufacturing corporations. During the depression the largest income recipients declined in importance. SINCE 1934, HOWEVER, THE LARGEST INCOME RECIPIENTS HAVE INCREASED THEIR POSITION, AND IN 1942, THE CORPORATIONS WITH \$5,000,000 AND MORE ANNUAL NET INCOME ACCOUNTED FOR 50.7 PER CENT OF THE TOTAL." (Our emphasis)

#### **Own 49 Per Cent of Assets**

By contrast, the small businessmen, those whom Roosevelt and Truman after him promised to save, are being forced more and more to the wall. "The smallest income recipients-those with annual net income of less than \$250,000-have total net income of all manufacturers corporations. Their proportionate share had decreased to 19.1 per cent in 1929 . . . and by 1942 their share had decreased to only 11.6 per cent."

The only group which improved its relative position in the economy as a whole consisted of the largest firms, with 1,000 or more employes, In 1939, these firms employed 30 per cent of all to 44 per cent.'

But those "few giants" employing 10,000 or more, "accounted for 13 per cent of total employment in 1939, and for fully 31 per cent of the total in 1944.'

Thus the war gave the big monopolies not only a greater share of the wealth and productive facilities-it gave them an immeasurably greater direct control over the lives of the working people.

Deadly Blow At "Little Man" At the same time, the war struck a deadly blow at the little business men. "The record of the war years shows a constant increase in the importance of big business and a constant decline in that of the little concerns. This was due, in part, to the COMPLETE DISAPPEARANCE OF HALF A MILLION SMALL RETAIL, SERVICE, AND CONSTRUCTION FIRMS." (Our emphasis)

The same tiny gang who owned most of America and ruled it in 1919 and 1939, own more of it today.

Only 10,000 persons (0.008 per cent of the population) owned one-fourth, and 75,000 (0.06 per cent of the population) owned one-half of all corporate stock in 1939.

The top one per cent of shareholders owned 60 per cent of the outstanding stock of the 200 largest non-financial corporations.

Just eight families and interlocked financial groups-including the Morgans, Mellons, Rockefellers, Du Ponts and Kuhn-Loeb-controlled outright 106 of the 250 largest corporations and two-thirds of their combined assets.

They are the ones who own most of America.

Workers Produce All Wealth By V. Grey

The wealth of the rich is made up entirely of surplus values produced by the poor. All profits, rents, interest, dividends, etc., are produced by the working people. They all come from the surplus over and above their own food,

For one rich man there are many poor. And so, the argument is often heard that none of us would be much better off if all the wealth in the world were divided "evenly."

The Woolworth millions were made from billions of five- and ter-cent purchases. The labor of thousands of stock-girls and stock-handlers was necessary to transfer this fortune into the Woolworth hands. It does take many workers to make one capitalist, and many small contributors of surplus value to make one huge capital. Why all the suss about the ten, twenty or thirty dollars a week that each worker gives his capitalist in profits? That ten, twenty or thirty dollars would not make the worker rich. Why should we socialists write books, organize parties, and spend our lives in the effort to abolish this system for just a matter of ten, twenty or thirty dollars a week more income?

Of course, even this small amount of extra money would make a tremendous difference in the worker's life. Some of the people who got well-paid jobs during the war managed to get out of debt for the first time in their lives. That was something!

But it is still not living as human beings should—to ride flivvers when fine cars can be made, or to live in tumbleshown a decrease in importance over the years. down houses when modern insulated, air-conditioned homes In 1918, this group received 23.4 per cent of the can be provided. If the rich can live in luxurious homes today, why should not the poor have comfortable homes tomorrow? But an extra few dollars a week would not accomplish this for the worker.

The whole point is that Socialism would not just divide up the wealth, but would increase the production in order to divide up the things that are produced.

There were 45 billion dollars in corporation profits durwage earners. "By 1943, these figures had risen ing the war. This would go pretty far toward buying groceries if the working people had it. But it would still be only a drop ir the bucket compared to the more than 300 billior dollars worth of war goods that was produced. The workers produced food, clothing and shelter - such as they were - for themselves, and instead of producing nice things and luxuries besides, they made 300 million dollars worth of smoke.

> Profits alone do not reveal how great a surplus product is produced. The example of the war production proves that. And what is even more important, war production figures do not fully reveal how great a surplus can be produced. For the profit system has its slack times when things cannot be sold, and workers cannot be put to work creating surplus values - or any values at all.

> Had there been no war, there could never have been all the production there was - under capitalism. Unemployment would have been tremendous. Only the war could put capitalism to work. And yet if peacetime goods could have been produced if only to the same extent as the goods of war, what a wonderful age we would all have said it was! . We produced 300 billion dollars worth of materials

> over and above our own necessities and the capitalists' luxuries. Three hundred billion hours of working time were spent making things to go up in smoke.

Suppose now, that we could have spent those hours making the things to make life better instead of worse. Suppose the factory doors are flung open for the poor to enter and make what their hearts desire. Would anyone go ragged or hungry? Not in the whole world. In fact we all could live like human beings. (Next week: How much is Three Hundred Billion?)

# Rising Prices Do Not Result From Wage Costs

#### By Warren Creel

spokesmen for the capital- of high wage costs? ists, in making their drive against wages, talk as if the employers had free choice on the prices they charge. They say if the workers get more wages the employers can and simply must raise prices. They will do this and pass the cost on to the consumer. That implies that the employer is free to raise prices when he wants to. Or to put it another way, it means that prices come, not from market conditions, but from the employer's free choice.

WARREN CREEL

Looking at it from the other direction, if prices come

from market conditions then an employer is not at all free to pass on to the consumer the cost of a wage raise. The rise in his wage payments will not change market conditions, so he'll have to keep on selling at the old price. It will still be the best price. Therefore he will have to take the cost of the raise out of his profit margin. He will not be able to pass the cost on to the consumer.

Something else follows if prices come from market conditions. We see today that the employers are anxious to raise prices. That only means that they know that the market conditions will allow higher prices. They see a chance, under these conditions of an inflation market, to take more money and make more profits. That's all it means. This rush to raise prices does not at all mean that they are pushed by higher wage costs.

It also follows that under the market conditions we have today they are going to raise prices anyway. They are only doing it slowly from political caution, to keep from arousing the workers by a too sudden increase. All their efforts to blame wage increases for higher prices are just a smokescreen. They are raising prices to get high American Veterans Committee, to the aid of many families profits, and they can get even higher profits if they can keep wages down.

The furious way the bosses fight against wage raises is the best proof that the raise comes out of the employer's p.ofits, and not out of the consumer. They wouldn't care at all about a cost that really went on the consumer.

As Karl Marx said in the pamphlet Value, Price and Profit, on this same question of wages and prices, "The gouging landlords. will of the capitalist is certainly to take as much as possible. What we have to do is not to talk about his will, but to Council had voted unanimously this was one of the principal enquire into his power, the limits of that power, and the to re-install in their homes any causes of the present inflation. character of those limits."

We can start this inquiry by looking at the facts of Again the available evidence suggests that there has been The newspaper and radio today. Does the demand for higher prices come because

During the war the government promised to freeze both wages and prices. The government's Bureau of Labor Statistics put out a cost of living index, called by its initials the BLS index. Through this the government claimed all through the war, and still claims, that prices were kept down. But such government statistics are faked to serve the employers. When the government statisticians put out statistics for business men they sometimes need to come closer to the truth.

In the February, 1946 issue of the Survey of Current Business, put out by the U. S. Department of Commerce, they comment (page 26) that the BLS index shows only a 44 per cent increase in food prices from 1940 to 1945. Yet, they say, in 1945 consumers spent almost twice as much money for food as in 1940, and there was only just about the same amount of food to buy. So food prices really went up 100 per cent, they conclude, "the average consumer obtained very little more in 1945 than he did for half the expenditure in 1940."

In clothing the BLS index shows only a 33 per cent rise. Yet the same Survey reports: "Consumer expenditures in 1945 for clothing were more than double those in 1940. week.)

very little increase in physical volume." In fact they must admit the records show "an actual decline" in the amount of clothing that people got for twice the money.

Yet the clothing manufacturers, the meat packers and other food processors, who have cashed in on a 100 per cent rise in prices, are pressing for still higher prices.

The Department of Commerce report showed, by clear evidence, that in 1945, "Prices were ample to cover costs and leave a satisfactory margin of profit." Figuring everything on the employers' side, still it is clear that any wartime increase in wages "is appreciably less than the actual Party grew. As honorary member increase in prices paid by consumers." They conclude that of our National Committee she there is enough room in the employers' profit margin to pay wage raises without any increase in prices. Instead, prices could be reduced, "bringing these prices more nearly in line with the official index."

Clearly, it is not the wage cost of production that leads the employers to seek higher prices.

(The above is the second in a series of articles on Wages, Prices and Profits. The first appeared last week, with the author's name omitted through an unfortunate typographical error. The third, "High Productivity Doesn't Raise Wages," will appear next

# Stalin's New Blood Purge Recalls **Frameup Trials Of Ten Years Ago**

#### By Joseph Hansen

The present purge in the Soviet Union and the Balkan areas under Stalinist domination does not seem to have excited much surprise anywhere. Concentration camps, prisons, firing squads and the pickaxe to silence political opposition are now universally recognized as one of the distinguishing characteristics?

of the Kremlin regime. But a decade ago it had not

yet become common knowledge that Stalin's rule represents a complete break with the Marxist program and tradition of Lenin and Trotsky. Thus the second Moscow Frame-up Trial, like the first one, created a world-wide sensation. Only a few months before, Zinoviev, Kamenev, Smirnov, Ter-Vaganyan, etc., after making the mistake of supporting Stalin's faction, had received a bullet in the brain. Now a second group of Lenin's comrades who had made the same mistake were headed for the GPU slaughter house.

#### FIGURES IN FRAME-UP

The Stalinist prosecutor, Vy-Trotskyist whom the Nazis had shinsky, was a Menshevik during pursued from country to counthe Civil War days. Facing this try until like Trotsky he found former opponent of the Bolshevik exile in Norway. On September regime were figures who had 30, 1936, shortly after the first played a heroic role in founding Moscow trial, Held summarized the Soviet Union: the frame-up of Zinoviev, Kam-

### **STALINIST HACKS KEEP** SILENCE ON NUREMBERG

"Trotsky was an agent of German fascism," asserts Samuel Sillen in the July 7 Worker. With this slander, Sillen proves once more that the favorite weapon of a Stalinist hack is muck. Here is how Sillen tries to "prove" his slander: Max Eastman was a "translator" of some of Trotsky's works. Eastman in turn wrote an article for the Reader's Digest in 1943 "attacking Russian war relief." Then

for an anti-United Nations propaganda broadcast to Asia." You still don't believe this makes Trotsky "an agent of German fascism"? All right, Sillen lets go with the works:

If this makes Leon Trotsky "an agent of German "Considered in the mirror of fascism," what was Stalin when he signed a pact with Hitpublic opinion, the Moscow trial ler which the Nazis triumphantly broadcast throughout the is a terrible fiasco. Not for nothworld? ing was the vesterday still om-

Yet the "proofs" submitted by Sillen are precisely the kind submitted by the prosecution in the notorious Moscow frame-up trials. It is self-evident how quickly they would Posts and Telegraphs. The task

Small wonder the Stalinists are discreetly silent about Natalia Trotsky's demand to the Nuremberg court to permit her attorney to cross-examine the Nazi defendants order the better to motivate the such as Rosenberg and Hess. In the Moscow Trials Hess was alleged to be the contact man between Trotsky and Hitler. The lie was an essential part of the frame-up. > By C. Peters (Special to The Militant) YOUNGSTOWN. O., July 10. - Meeting on the public square last night, 1,500 CIO members and sympathizers demonstrated their determination to find a way of keeping down prices. The rally was organized by the Mahoning County CIO Council, with its president Carl E. Beck acting as hairman.

The main speakers were Robert Lamb, Washington legislatve representative of the CIO employed. Anti-eviction commit-United Steelworkers, and Tom Downs, Ohio PAC legislative representative. Their statements pointed directly to the need for a labor party, yet they ended up weakly by proposing support for such discredited Democratic Party politicians as U. S. Sen-In the coming struggles against ator Huffman and anti-labor Governor Lausche.

Their only proposal on fightvantage over previous years: ing inflation was to send letters powerful labor organizations to Congressmen. This proposal called forth little enthusiasm from their listeners.

> The meeting was highlighted by the remarks of C. B. Howard, president of the Youngstown Branch of the National Association for the Advancement of Cólored People, which had informed the CIO Council of its hearty support of the mass meeting and its purpose. Howard, who is also

president of his AFL local in a railroad shop, pointed out that the Negroes are the first to have their standard of living lowered by price increases. He said that therefore the unions can depend upon them to enter fully into the struggle against the rising cost of living.

#### Diary Of A Steel Worker -A Worker's Child Is Born - By Theodore Kovalesky -

The earth is parched and ore-stained near the steel plant. The earth has the look of poverty and barrenness; but with each spring the green things push their way

through the scarred crust and shove upwards toward the sun. And the joy of birth is in the air of springtime. . . .

A door slammed, and I looked up to see my neighbor, Tony Gor-

dini, coming out of one of the blistered, warped, rusty wooden houses. "What are you doing down here, Tony?" I

asked. "That's where my sister Anna lives," he said.

"She's going to have a baby." "Soon?"

"Yeah, I gotta tell ma to get ready."

We walked up Ames St. side by side not slowly, not quickly. I saw the expression of calm joy upon the face of Tony, my neighbor. He had four kids of his own and loved them. His sister, Anna, already had two and now was about to have her third.

I caught myself wondering why it was that we, who have nothing other than the power of our two hands to earn us our scant ration of life's necessities, should rejoice at the coming of other little bellies to be fed, other little bodies to be clothed and looked after and guarded from disease and hardship.

"How's Joe making out now?" I asked. Joe Scarelli was Tony's brother-in-law, Anna's husband.

"Not so bad," Tony said. "He's on the hot metal cranes in the open hearth now. Makes better money than we do.

God knows he needs it, I thought, recalling the condition of Joe's house and the demands on his wage that this little newcomer would make.

Tony guessed my thoughts. "It's a good thing, though," he said, "having kids. You come home from work tired and feeling mad, and there's

**Underline Wall Street Drive For New War** the wife and kids . . . Maybe you feel like a broken-down, no good bum, but, to the kids, you're the old man, the biggest, swellest guy in the whole world. Then, when you get older they grow up, and it ain't so lonely. Must be hell to be all by yourself . . . oh hell!" He broke off embarrassed as he remembered how Mary and I had waited long and alone for our kid to come home from the capitalist war, how we had waited, waited and hoped, then despaired, then realized.

I broke the pause as we reached Tony's place where he and his family lived upstairs over his mother and father in one of the countless houses of tarred shingles colored to look like brick. "It is a good thing, Tony. It's what a man wants, and a woman too, I guess. But it's hard to see them hungry. And it's tough not to be able to buy them the toys they want. Sometimes it almost seems a workingman shouldn't have any kids."

Tony's face was grave with understanding. "I see what you mean. Only you don't really mean that."

Hell, no, I thought. If the workers didn't have kids, what would happen to the world? Surely the future would be black if the race had to rely upon the rotted seed of the capitalist class. From the gaunt and rugged loins of the workers spring the masters of tomorrow's golden world of socialism!

But before I could tell Tony that I didn't really mean it, Gus Miller ran out of his house. "Hey, Tony," he bawled. "I just got a phone call from your sister's. Tell your ma to drop everything and get over there."

Tony's eyes widened. He bolted for the house, yanked open the door and shouted inside in Italian. "She must be giving birth," he called back to me. On his face were pride, awe, and joy. He went quickly into the house.

A little later I saw old Dominick Gordini, Anna's father, leave the house dressed in his good black suit. Very erect and dignified he strode down Ames St. in the dusk toward the home of his daughter to rejoice at the birth of his grandson.

The Truman administration is methodically continuing its demonstration in the Pacific of the most frightful weapon of war yet produced by capitalism-the atomic bomb. As a curtain-raiser, Washington exploded bomb No. 4 in mid-air over a \$400,000,000 guinea-pig fleet. Now the militarists will explode bomb No. 5 under the surface of the

sea among the ships anchor-? ed inside Bikini atoll.

American imperialism had already demonstrated at Hiroshima and Nagasaki that a single bomb is capable of destroying an entire populous city. The present costly show is designed to remind the rest of the earth, particularly the Soviet Union, that Wall Street is continuing to manufacture and store these bombs. The Bikini demonstrations are being held under guise of "scientific experiments." But leading scientists have denied their value and labelled them as nothing but military tests. In the June 15 issue of Foreign Policy Reports, Dr. Harold C.

Urey, one of the scientists who worked on the atomic bomb, paints a frightening picture of the future as Washington attempts to maintain its present monopoly of atomic energy. "The consequences," he says, "will be an armaments race in the production of atomic bombs, and a feverish development of new modes of destruction, perhaps even more effective than atomic

When you follow the runaround the veteran has been getting in Congress, you can't help but wonder why the legislators haven't made some small concessions, at least, with the elections coming up in the fall. The GI Bill of Rights has turned out to be woefully inadequate. H. R. 6811 which would increase pensions and dependency allotments by 20 per cent has been kicked around and shoved aside. Eighty per cent of the disabled vets are jobless and receive less than \$60 a month in pension.

Just to make sure that everybody knows with what contempt they treat the needs of the veteran, these stooges of Wall Street have now decided the veteran must wait five years to collect his terminal pay. During the war these "representatives of the people" would appropriate billions of dollars at the drop of a hat to stuff the pockets of the war millionaires. However, when it comes to a veteran buying a new suit and extra pair of shoes, these gentlemen suddenly become worried about inflation.

Why has Congress refused to grant any real concessions? Because the veterans organizations haven't put up any real struggle. Three major veteran organizations have convened within the last couple of weeks and none of them has seriously dealt with the needs of the veteran.

The AVC, which poses as the most liberal of prophysicans refused to take

cent jobs at decent pay is a more important question, but that is no reason for ignoring the issue of the bonus. With the \$20 a week compensation running out this fall and jobs becoming increasingly scarce, the bonus is not a luxury, as the capitalist press pretends, but an immediate necessity for the veterans.

Three main points were discussed at the convention of the Catholic War Veterans. A resolution opposing a loan to the Soviet Union and another opposing socialized medicine were passed while a third resolution supporting military conscription was also adopted.

The convention of the Veterans of Foreign Wars was taken up in great part with vicious and hysterical red-baiting. The fact that five out of six of the officers elected at the convention are World War I veterans shows that the old bureaucracy is still firmly entrenched. The past record of this leadership indicates pretty conclusively that they will not lead a militant struggle in the interests of the veteran.

At none of these conventions were the real desires or needs of the rank and file reflected on the floor. Wall Street fears the potential strength of a militant veterans' movement. But its fears won't affect its policies as long as the veterans' organizations are tied to the apron strings of Big Business.

### Mr. Truman and Mr. Dooley

Atom Bombs Or TB Cure?

-By Evelyn Atwood-

President Truman last week reaffirmed the administration's support for an "international police force." In an address to the American Council on Education's conference on postwar emergency problems of education and training, he said:

"We don't believe in wars any more, of course, but I do believe that if we can implement the United Nations Organization with a police force behind it sufficient to make its mandates stand up, we can have world peace. . .

This question of an international police force is not a new one. In fact, it was analyzed in considerable detail over 40 years ago by Finley Peter Dunne's eminent old philosopher of Archey Road, Mr. Dooley.

The Russian Czar had proposed the settlement of all disputed problems through an international court at the Hague, Mr. Dooley said that at first he had regarded this as an excellent idea.

He had looked forward to the day when, if a king, emperor or czar started a roughhouse, the blue bus would come clanging down the streets and they'd be hauled off to Holland for trial. He had expected see the U.S. Senate

"If we spend \$10,000,000 I have no doubt

that we can have a cure for tuberculosis in two

years," said Freedlander, "We have the tech-

niques, the ideas and methods of evaluation.

All we need is the money to put more men to

Today there are 50,000 known active cases of

tuberculosis in the United States, and many

more unknown. It costs about \$2,000 for each

case every year for hospitalization, and the

economic loss for each is about \$3,000 a year.

This, said Freelander. "represents a \$250,000,000

annual loss to the community and it would be

worthwhile to spend a little money to end the

drain."

work on the problem."

pulled every month or two; and all the officers of the navy fugitives from justice; and great war editors, correspondents, statesmen and other disturbers of the peace walking around in lock-step behind bars; and the wagon backing up in front of the parliaments of the world; and the bullpen full of international grafters, get-rich-quick operators and strong-arm men; and the Monroe Doctrine condemned as a nuisance, and so on.

But it hadn't worked out that way, Mr. Dooley admitted. Perhaps, he said, the reason was that the court didn't have any police force to back it up. After all, one good copper with a hickory club is worth all the judges between Amsterdam and Rotterdam. He would like to see, when the German kaiser and the British king were preparing some kind of raid, a big policeman step up and say: I want you, Bill, and you might as well come along quiet.

However, Mr. Dooley supposed, the international police force would turn out to be the same as it is now in real life. How's that his friend asked. All the biggest crooks would get on the police force, said Mr. Dooley.

which formally opens on July minimum, to meet the rising 27. cost of living. This would protect

### Drive Launched to Put SWP Nominees On Minnesota Ballot

In the first two days of its eral hundred signatures to than one-fourth of that figure! place candidates on the state ballot. C. K. Johnson, SWP Campaign Manager, reported today that considerable interest has been expressed in the candidacies of Grace Carlson for U.S. Senator: Warren Creel for Representative from the Third Congressional District; and Dorothy

Schultz for Representative from the Fourth Congressional District.

> First returns in the Party's signature campaign have come in their formal endorsement. from the working class areas of St. Paul and Minneapolis. Petitions are also being circulated in other sections of the state. "The enthusiastic response which we

have received in the first 48 hours of the petition campaign assures us that we shall have more than the required number of signatures to file on August 1," said the Campaign Manager. Because of Minnesota election regulations, the Socialist Workers candidates cannot appear on

the ballot under the Party's own name. Revolutionary Workers Party has been chosen as the ballot designation for the SWP candidates.

The favorable response received in the SWP petition drive is an indication of the disgust

which large sections of Minnesota workers feel toward the present political set-up in the state. Although complete returns are not yet available, the light vote cast in the July 8 primary election shows that many Minnesota workers and farmers 'voted with their feet" - that they saw no choice among any

Even today it is spending half a bil-A sure cure for the dread disease of tuberlion a year to pile up atom bombs and tens of culosis, which rose to a new high during the five war years, can be speedily effected. "It is billions more for bigger and more destructive simply a matter of dollars and cents," stated bombers, rockets and other instruments of Dr. Benjamin Freedlander of Mt. Zion Hospital death. This same government cannot and will to 500 physicians from all over the world at a not provide the money or men necessary to conpreliminary convention session of the American quer tuberculosis, one of the worst scourges of Medical Association held in San Francisco on mankind.

The wartime research program set up to find a cure for malaria. Dr. Freelander pointed out. proved successful at a cost of only two million dollars. While there are only 50 persons engaged in tuberculosis research. "against malaria the government put 30 large organizations about 1,000 men - to work. Within two years they had evaluated 12,000 compounds and came up with two good ones which are effective against malaria."

But the government's interest in the cure for malaria was simply part and parcel of its whole wartime program. It was necessary in order to maintain U.S. troop and U.S. power in the numerous mosquito-infested island bases in the Pacific and elsewhere. But this same government has no more interest in finding a cure for tuberculosis, the poor man's disease, than it has in eliminating the filth, squalor and hunger which is the capitalist social soil out of which tuberculosis breeds.
