# Four Negro Farm-Hands NEW OPA BILL LIFTS Lynched In Georgia

# By Evelyn Atwood

In a bestial Jim-Crow massacre, two Georgia farm hands and their wives were lynched on July 25 by a gang of 25 to 30 white storm troopers. The Negro couples were waylaid and dragged from an automobile on a dark and swampy road in Walton County, not far from Atlanta. They were brutally beaten and pumped full of bullets.

# Living Costs Soar Skyward As Profiteers Reap Benefits

401

# By Ruth Benson

The new OPA bill, signed by Truman on July 25, has already resulted in soaring prices on hundreds of food items, clothing, shoes, fuel and other necessities of life. For the future the OPA promises only more price increases through its elaborate machinery of price-changing and decontrol.

Final decisions on de-® to favor the profiteers. Under this fraudulent "price control" bill, there is no limit on the price of milk, eggs and tobacco for an indefinite period. But that's just a starter. Sixty

rinal decisions on de-control rest with a hand-picked three-man board "guarantees profits on the basis which can be counted on of 1940, more nearly representative of normal peacetime operations." The Taft plan had guaranteed all industries their 1941 profits, highest in history.

> Truman also cited the fact that the present bill gives distributors the markups prevailing March 31, 1946, instead of January 1. 1946, the date set in the Wherry amendment.

**TWO BANKERS, ONE BOSS STAFF DECONTROL BOARD** 

"I propose to appoint as members of the (decontrol) board men in whose judgment and fairness the Congress and the country will have complete confidence." That was what President Truman said on July 25 as he signed the new OPA bill.

But how could both the people and Congress have confidence in the same Board, when the people want price rises stopped and Congress wants price rises to continue?

President Truman settled this question when he picked the three-man Decontrol Board two day later-and he settled it in favor of the price gougers.

Not a single representative of the labor movement or consumers organizations is on this board, which will have final say over price ceilings. All of them are representatives of the banking and business interests, whose main concern is profit and not the needs of the consumers. The members of the board are:

Roy L. Thompson, president of the Federal Land Bank of New Orleans, who will be chairman.

Daniel B. Well, a banker of Washington, D. C., and former Undersecretary of the Treasury.

George H. Mead, of Dayton, Ohio, chairman of the board of the Mead Corporation, a pulp and paper company.

For their activities in decontrolling prices, that is to say, in raising prices, these men will be paid \$12,000 a year.

The selection of these people will satisfy Congress, but it will not satisfy"the workers or consumers.

What they need is not a Decontrol Board, but committees representing labor, consumers, farmers and small businessmen that will prevent corporation profiteering and will fix and control prices in the interests of the consumers.

# The Fight To Defend The Workers' Standard Of Living

The monopolists have launched an all-out offensive to bring down the workers' standard of living through skysocketing prices. Their pliant tools in Washington have accommodated them with an OPA which in reality gives government sanction to the upward spiralling of prices. The workers' purchasing power is declining rapidly while the war fattened monopolists continue to pick up billions in profits.

The terrific impact of the brazen price-gouging attack by Big Business is arousing ever broader layers of the workers and consumers generally to the realization that they must fight back through their own organizations and with their own program. Protest demonstrations have been held. Wage increases have been demanded. Buyers' strikes are spreading. Consumers' committees are forming. However, these struggles are as yet localized and uncoordinated both in program and in organization.

It is the task of our party and every class-conscious worker to introduce into this movement clear objectives and correct methods for an effective struggle. Toward this end we recommend the following:

# 1. The Sliding Scale Of Wages

Our central transitional slogan for the unions in this period of inflation has been and remains the sliding scale | tracts to provide automatic wage increases to meet the risof wages to meet the rising cost of living. This slogan has ing cost of living. already taken hold in some sections of the trade union movement.

The powerful Goodrich Local 5 of the CIO United Rubber Workers in Akron has raised a demand through its newspaper for the sliding scale of wages. In Detroit, the General Council of Ford Local 600 and the Briggs and Budd locals of the CIO United Auto Workers have likewise raised this demand. Similar action has been taken by the Executive Board of UAW Local 659 in Flint and the AFL Cannery Workers and Fishermen's Union in San Diego. Numerous other unions are bringing forward a demand for the sliding scale of wages. The CIO Packinghouse Workers Union has raised a modified version of this demand by calling for a cost-of-living bonus to meet the rising cost of living.

These concrete examples of the application of the demand for a sliding scale of wages should be freely applied in introducing the slogan within each local union and in the general agitation for the demand. Those unions which have already adopted this demand should be urged to bring pressure for its adoption by the rest of the trade union movement. For example, local unions should bring pressure on their parent bodies by means of resolutions, telegrams, letters, delegations, etc., as circumstances permit. Similar action should be taken to spread the demand within the central labor bodies in each locality and the various union conventions. Publicity should be sought both in the labor press and the capitalist press. This can be done through formal union statements, through articles by individuals and letters to the editor from unions and individuals. When the time is propitious,, organizational expression should be given to the campaign for this demand by forming interlocal caucuses of the unions favoring the demand.

The pressure of the workers has already compelled Murray, Reuther and some other top union officials to or less local in character. Nonetheless, they have already ing power. raise the issue of wage increases to offset rising prices. Every possible advantage of this opening must be taken to direct struggle against price increases. demonstrate that in the face of inflation limited wage

# 2. The Sliding Scale For Veterans

Inflationary prices play havoc with the standard of living of all groups in the population who are compelled to live on a strictly limited income. Especially does this apply to veterans who are receiving unemployment compensation, attending school under the GI Bill of Rights, or drawing disability pensions. In addition to the demand for trade union wages for veterans in the above categories, the workunions and veterans' organizations should raise an immediate demand for legislation to provide such a sliding scale Bill of Rights was passed.

This demand could be applied also to cover unemployment compensation for all workers and to cover old age pensions, widows' pensions, etc., both state and federal.

# **3.** Committees On Prices

Committees for struggle against high prices, originally sponsored by the Stalinists and some sections of the trade renewed fight for higher wages. Price committees operating with a correct program are effective as a means of struggle parallel to the fight for higher wages, but they cannot be a substitute for the fight on the wage front.

The activities of these committees have included protest demonstrations, buyers' strikes, picketing of merchants. demands for government price control, etc. These mounting prices that are fast committees have so far been loosely organized and more had the effect of drawing large numbers of people into

The program imposed by the Stalinists and the trade lowing the militant action of demands on a fixed basis are utterly inadequate. There is union bureaucrats is false and can lead only to disillusion- UAW locals in Detroit and other only one effective wage demand in this period-the sliding ment and frustration among the masses. Buyers' strikes cities last week, the Bell workers

By The Secretariat Of The Socialist Workers Party -

one step toward the exposure of the real robbers, the big the market and deliberate destruction of goods to create trusts.

It is the task of every class-conscious worker to participate in committees on prices, to initiate them where with militancy in action. Through these committees an collar workers, veterans, professional people, and even the farmers and small merchants in their capacity as conown control over the fixing of prices, since the government has already demonstrated that its price-fixing measures are a fraud.

The following are some of the steps the committees on prices could take in their struggle against high prices: They should demand the cooperation of the retail merchants in the fixing of prices. Those merchants agreeing to cooperate could be supplied special display cards to indicate their pledge of cooperation. Regular checkups on prices should be made to see that the pledge is kept. Merchants refusing to cooperate should be picketed. Experience has shown that independent merchants usually cooperate, while chain stores most often refer the committees to the "home office." Thus the role of the trusts quickly reveals itself in this limited form.

Even if the retail merchant is willing to cooperate, he is limited by the price he must pay to the wholesaler. The committee must therefore demand that the retailer open the movement on a regional scale. And at a further stage, his books and reveal the price lists of the wholesalers with whom he does business. This step brings the committee face to face with the wholesaler from whom they must ikewise demand a pledge of cooperation to control prices. tions into a national body of struggle.

The wholesaler in turn is limited in his ability to cooperate by the prices he must pay the manufacturer or processor. Therefore, the committee must demand that the wholesaler open his books and reveal the price lists of the manufacturers and processors with whom he does business.

ers must raise immediately a demand for a sliding scale beginning at the point of distribution and extending of compensation to meet the rising cost of living. The trade to the point of production. Finally they will reach the big monopolists and demand of them that they open their books. By this means the workers will be able to prove that based retroactively on the price index at the time the GI the real reason for high prices is the exorbitant profits of for a sliding scale of wages to meet the rising cost of livthe capitalists.

> dence to prove who are the real big-time profiteers. In thermore, a broad United Conference of Labor would give these books will be found proof of withholding goods from an impetus to the building of an independent labor party.

> artificial scarcities; collusion to corner markets; adulteration of products; super profits; fantastic executive salaries and bonuses; stock swindles; huge expenditures for antinone exist and to imbue them with a correct program and labor propaganda; payrolls for industrial spies; huge sums spent for advertising as a means of controlling the press alliance can be forged among the industrial workers, white and radio; lavish expenditures for lobbying in state and federal legislatures; huge contributions to the capitalist political parties; mammoth tax steals; funds used to corsumers. The object of this alliance must be to demand its rupt officials; and numerous other devices for controlling the government, the press, and the radio in order only more ruthlessly to plunder the general population.

The struggle for control over the fixing of prices has meaning only if linked to the demand for the opening of the books. This demand, which will be fiercely resisted by the profiteers, will thus become the point of departure for the whole unfolding struggle. This struggle will assume the most variegated forms, such as picketing, demonstrations, boycotts, publicity exposes, demands upon the politicians to support the committee in its struggle, proposals to clean house on the non-cooperating politicians, etc. We can best develop the present unfolding struggles along these lines.

As recent experiences have already demonstrated, these struggles have been essentially local in character. As the local struggles assume a sharper and more politically defined character, we will have an opportunity to broaden as the struggle between the workers and the profiteers becomes intensified in character, the question will necessarily be posed of uniting the local and regional organiza-

# 4. A United Conference Of Labor

Only the labor movement can rally the broad mass of consumers to carry on this fight. This pressing task, along By this process the committees ascertain the financial with the other key problems of the workers, emphasizes operations and profit margin of each capitalist in the chain again the urgent need for a broad United Conference of Labor embracing the CIO, AFL, Railroad Brotherhoods and other unions. Such a conference could coordinate and broaden the struggle to defend the workers' standard of living. Such a conference could launch a united struggle ing. with intent to deal death being accompanied by an unall opponents of Chiang's bloody

It is necessary to understand that the new military drive and the reign of terror are aimed not merely at the Stalinists. They are directed toward the wiping out of the spearhead of the popular opposition to the Kuomintang dictatorship which the Stalinists represent in the present stage of Chinese political development. Every oppositional element is in danger. What is occurring is an attempt to strangle the beginnings of the new Chinese revolution.

**OPPOSITION SEETHES** 

Opposition to Chiang's rule is eething throughout the length and breadth of China. Never in the 19 years of the Kuomintang dictatorship has hangman Chiang's regime been so weak, so isolated, so universally hated by

the masses as it is today. One thing and one thing only tands between Chiang and the revolutionary wrath of the Chinese people: American imperial-**Strikes Spread Across India** ism which maintains its armed forces in China to hold open Chiang's lines of military supply and communication, and which In Reply To High Living Costs furnishes Chiang with the implements of war.

We

possessed such a right!), Koo said he "could not understand" why demands were voiced for the withdrawal of American troops from China, because "the great bulk of the Cinnese people know that the Americans are there for the specific purpose of disarming and repatriating Japanese soldiers." (N. Y. Times, July 25). This professional list added that "the Chinese are grateful for the American assistance." Meanwhile, supplementing the military drive against the Righth

Route and New Fourth armies, Chiang Kai-shek has loosed a reign of terror in the cities, reminiscent of the "purge" which he carried out in 1927 after the Wall Street and converted into crushing of the Chinese revolution.

Five hundred government police, armed with tommy guns armed forces in China, and the and machine-guns (made in the United States!) surrounded the campus and dormitories of Futan University in Shanghai at dawn on July 22 and after a thorough search carried off two students suspected of anti-Kuomintang activity. The Chinese press was not permitted to report the raid, but news of it was cabled abroad by the United Press.

Additional hundreds of Chiang's uniformed thugs carried In a statement issued July 22 out raids on bookstores and magin Shanghai and addressed to azine stands, the news agency the American people, Mme. Sun reported, stripping them of "dandeclared: "The United States ap- gerous" reading matter. At one Shanghai bookstore all books that bore such words as "democracy," "people" and "emanment, which is permeated with cipation" were seized and carried away.

—Leon Trotsky

# **Reuther's Promise**

One month ago United Auto Workers President Walter Reuther promised to lead a fight "to re-open all wage contracts if a new and better OPA is not passed by Congress."

Since then a new OPA has been passed, but nobody who wants to prevent price rises would ever call it "better." On the contrary, it legalizes price rises.

After the new OPA became law, it was up to Reuther to make good on his promise. But so far he has remained silent.

Why? One explanation has been offered in a July 27 report from Detroit to the N.Y. Times. This report says that UAW leaders "have abandoned any thought at present of new wage increases in favor of an all-out effort to preserve the present purchasing power of the dollar." It also says that adoption of such a policy is on the agenda of the UAW International Executive Board meeting, beginning August 5.

If this report is true — and Reuther's silence up to now lends support to it - then the UAW and the labor movement generally are faced with a terrible danger.

The struggle for price control is a necessary and progressive struggle today. But as long as control over prices is in the hands of the corporation agents on the OPA and the Decontrol Board, this struggle cannot be effective. To be successful, control over prices must be vested in mass consumers' committees really interested in protecting the consumers.

Neither Reuther nor Murray nor any other national trade union leader is trying to secure that kind of price control. They are content to leave price control in the hands of

pled and homeless veterans. But it passed a bill appropriating almost 12 billion dollars for the Army and Navy for the next year. This money will be used to prepare for World War III — and for the creation of more crippled and homeless veterans.

Congress refuses to raise the minimum wage for workers, but it voted itself a 50 per cent increase in salary.

This is only part of the record of this capitalist Congress. Yet its members have the nerve to request re-election!

It is high time for labor to place its own candidates in Washington.

It is high time to build an Independent Labor Party.

# **Bikini And Paris**

Washington carefully timed the explosion of atomic bomb No. 4 to coincide with the Foreign Ministers' Conference in Paris last month. The June 22 Militant explained, "The Paris conference table at which Byrnes sits will be lighted up by the frightful glare of the atomic bomb explosion at Bikini." At the meeting of the Foreign Ministers, said The Militant, Wall Street was developing "a ruthless power play against the Soviet Union."

The capitalist press denied that the explosion of bomb No. 4 had anything to do with the Foreign Ministers' Conference.

But Washington repeated this power play on the opening of the Paris "Peace" Conference! This parley was scheduled to open July 29. Byrnes left the airport on July 27. Just two days before, on July 25, atomic bomb No. 5 was exploded at Bikini.

This bomb was touched off under water with far more spectacular results than bomb No. 4, which was a kind of curtain raiser by comparison. The Paris "Peace" Conference is a more important gathering than the Foreign Ministers' parley and requires a more impressive demonstration of Wall Street's military power.

The first bomb at Bikini had left doubts in the minds of some about the colossal destructive power of the atomic bomb. These doubts were probably removed by the second explosion. The \$400,000,000 guinea pig fleet was battered and ruined, the ocean floor at Bikini littered with the hulks of mighty ships that could have carried food to the faminestricken areas of the earth.

In Wall Street's drive for world power, the atomic bomb demonstrations are designed to terrorize and intimidate the peoples of the earth. The demonstrations underline the ominus meaning of Washington's continued manufacture of atomic bombs.

The mushrooming columns of radio-active gases and mist at Bikini were set off to impress on the world that Byrnes sitting down at the "Peace" Conference at Paris represents the most powerful military force the world has yet seen. When Byrnes speaks, back of his words lies the threat of the atomic bomb.

The fearful shadow of Bikini rests over the Paris meeting.

### Congressmen At Work -

SATURDAY, AUGUST 3, 1946

# Withdrawal Of The **Occupation Troops**

An important resolution on the Withdrawal of Occupation Troops, unanimously adopted by the International Executive Committee of the Fourth International in June 1946, is reprinted in full in the August issue of Fourth International, monthly magazine of the American Trotskyists, now on sale. The resolution characterizes the occupation policies and the holding of millions of prisoners of war as a direct continuation of war. "Consequently the continuation of the struggle which the Fourth International and its sections have carried on throughout the war for the disintegration of the armed forces of capitalism, for the fraternization of the workers of all countries; 'Allied' or 'Enemy,' in uniform or out of uniform, must find its expression in a struggle against the maintenance of the military apparatus, against military occupation, for the liberation of all prisoners of war, and for the international solidarity of the proletariat.

"In this struggle the Fourth International denounces any and all pretexts which cover up this reactionary policy of the imperialists and of the Soviet bureaucracy. In opposition to the machinations of their secret diplomacy, it sets up the slogan of the right of self-determination of the peoples of the European and colonial countries.

"The Fourth International demands the withdrawal of all foreign armies, including the Red Army, from all occupied territories. It opposes all annexations, reparations, forced transfers of populations and the detention of millions of German and Japanese workers as prisoners of war, either by the imperialists or by the Soviet bureaucracy. The Fourth International recognizes no other frontiers than those drawn by the culture and freely expressed preferences of the populations concerned."

# **Revolutionary Policy**

In opposition to the bankrupt policies of the imperialists and the Stalinist bureaucrats, the resolution continues, "the Fourth International counterposes the revolutionary struggle of the exploited masses of all countries for the triumph of the world socialist revolution and the Federation of the Socialist United States of Europe and of the world." In demanding the withdrawal of the Red Army from the countries it occupies, the Fourth International does not at all abandon its. policy of unconditional defense of the Soviet Union against imperialist attack.

"But the defense of the planned state economy of the USSR as well as that of the progressive reforms carried out in Eastern Europe cannot be assured by purely military means, and especially not by occupation of territories for a strategic purpose.

"Real defense is based first of all on the free revolutionary activity of the masses which must assure the total victory of the proletarian revolution. The masses of the countries at present must feel absolutely free, without any pressure, to determine their own fate. The occupation of these countries. by the Red Army, the burdens imposed upon them. their treatment as defeated countries can only harm the fundamental interests of the world socialist revolution and dangerously compromise in the eyes of the masses the defense of the USSR against imperialist attacks." Examples of this were seen in the elections in Hungary, Austria and Germany.

"Consequently, the unconditional defense of the

This is a play of uncompromis-

ed by the phony preachers of

government officials who want higher prices and profits. As long as that remains the case, prices will keep going up and the workers' living standards will keep going down. Under these conditions, an economic disaster lies ahead for the workers - unless the unions fight to win back on the wage front what they are losing on the price front.

The struggle for price control must continue, but it cannot be separated from the struggle for wage raises to offset rising prices. Whoever tries to separate these struggles, whoever offers the fight for government price control as a substitute for the wage fight, is leading the labor movement into a trap, where its living standards will be drastically reduced.

Reuther, Murray and the others are responding to the pressure of the government and the capitalist press. It is now up to the members of the unions to exert their own pressure, by demanding immediate wage raises. This demand is best expressed in the slogan of the sliding scale of wages — an escalator clause in all union contracts to provide automatic wage raises to meet the rising cost of living.

# Congress' Record

The members of Congress are preparing to close shop in Washington and get home for the 1946 election campaigns. Then the air will be filled with long and loud speeches about how the members of Congress labored in the interests of the American people.

But these speeches will be filled with lies and falsifications. The actual record of Congress during just the last two months proves that it legislated not for the American people but for their masters in Wall Street.

First of all, on the price issue. The consumers made it plain to all that they were opposed to any further price rises. Congress gave them a new OPA which guarantees both higher prices and higher profits for the corporations.

Housing has been one of the nation's most pressing problems since the end of war. But Congress has steadfastly refused to pass the Wagner-Ellender-Taft bill to clear away slums and build low-cost homes.

Congress used to say that nothing was too good for the boys in the armed forces. But it has thus far refused to even permit a vote on the Amputees Auto Bill to provide speciallyequipped automobiles at government expense for veterans who lost limbs during the war.

Lynching and mob violence against Negroes increase daily, and millions of white and Negro citizens are denied the right to vote by the poll tax. Meanwhile the Anti-Lynching Bill

In the February 1946 Political Affairs, organ of the American Stalinists, Max Weiss called for ruthless struggle against The Militant and the Trotskyists. To aim the fire more effectively, he directed the Stalinists to "end certain tendencies toward bandying about the word 'Trotskyite' as an epithet against all forces that oppose us in the labor movement."

Here are some recent examples of how the Stalinists have carried out this directive.

A June 13 editorial in the Daily Worker called Max Eastman "a follower of the notorious Trotsky." Eastman is not a Trotskyist. He is a bitter opponent of Trotskyism.

The June 29 Daily Worker called Herbert Solow a "professional red-baiter and Trotzkyite.' Solow too is an opponent of Trotskyism.

On June 15, Mike Gold declared in the Daily Worker that the "little rodent of a phony newspaper man. Victor Riesel of the New York Post played his usual Trotskyite role by repeating this fascist slander." As is well-known in the labor movement, "rodent" Riesel is no more a Trotskyist than is sewer-rat Gold.

On June 4 Gold listed as "Trotskyites" -Capt. Joseph Medill Patterson, owner and editor of the Daily News, James T. Farrell and Edmund Wilson. Patterson before his death was a leading isolationist who supported World War II, just as Gold did. Patterson was not a Trotskyist. Edmund Wilson is not a Trotskyist; in fact he is not a political figure at all. James T. Farrell is not a Trotskyist but a novelist who has actively opposed the Stalinist mud-slinging machine.

The latest Stalinist smear is an editorial on China in the July 27 Daily Worker. "There was the statement yesterday," says this editorial, "from a committee of 38 made up of assorted reactionaries - among them prominent Trotzkyites - demanding that the United States cease aiding the Chinese Communists. Only the Trotzkyites and Social Democrats could think that one up."

Truly only a Stalinist editor could think that one up. Not a single Trotskyist signed the statement referred to. They couldn't, because the Trotskyists have been in the forefront demanding that the United States cease aiding Chiang Kai-shek.

In our last issue, The Militant ran an editorial opposing U.S. aid to "the hated reactionary regime of dictator Chiang Kai-shek." This editorial carried the unmistakable caption: "Withdraw the Troops."

How could the Stalinist hacks have mistaken our position on China? There was no mistake. It's simply a case of the Stalinist smear technique - what Trotsky-baiter Max Weiss calls "bandy in about the word 'Trotskyite' as an epithet."

# Making The Next War Scientific

In the debate over Senate Bill 1850 to subsidize the training of some 18,000 American youths as basic scientists, Wall Street's Congressmen revealed how education under capitalism is tied to the most reactionary aims.

On July 1, Senator Harley M. Kilgore (Democrat of West Virginia) argued for the bill along the following lines: "The Civil War was fought with probably a minimum of scientific effort on both sides . . . The Spanish-American War was a rehash of the same situation . . . World

War I , . . was really the first scientifically waged war . . Finally there came World War II. destructive weapons can be pro-On that occasion we set up sevduced!

The sponsors of the bill include talist system. He wanted to give the professors in this field a cans, since both capitalist part- little recognition for their valuable services.

> Senator George L. Radcliffe (Democrat of Maryland) opposed this provision. He was "appalled social sciences without any charting of what the investigators are about it." He admitted that the program could not be "used to any considerable extent to foment various kind of insidious doctrines" but "if an allotment is made to a certain university, and the head of a particular department is a man addicted to certain isms, he might use the

fund for that purpose." Senator J. William Fulbright (Democrat of Arkansas) tried to tip off Radcliffe on the real score: "... I think it will be very difficult, as a practical matter, for the social scientists to get very big slices of pie, if that is what the Senator means." Fulbright outlined the kind of projects the "social scientists" would be confined to - re-writing history in an "objective way' and so on. "I think the Senator will agree that that type of project is not very revolutionary."

In Fulbright's view, research in the sodial sciences "would have nothing to do with communism, socialism, or any matter of that kind." Instead, the scientists would be put to work on problems of concern to Big Business and its military caste such as "psychological warfare."

USSR cannot, in the zone occupied by the Red Army, lead to any policy of support even provisional or temporary, with this or that bourgeois 'or pettybourgeois clique or organization which banks on the bureaucracy, as against bourgeois or petty-bourgeois parties which bank on imperialism.

# **Real Defense Of USSR**

"It can be applied only by an energetic carrying out of uncompromising class struggle of the proletariat against its own bourgeoisie. That is why the slogan 'immediate departure of the occupation troops' and an energetic campaign against the barbarous methods of the bureaucracy are alone capable of rehabilitating the policy of the defense of the USSR by clearly indicating that the defense of the USSR nowise justifies the crimes of Stalin."

Where reactionary movements backed by imperialism attempt to overthrow the more or less statified economy in the occupied countries in order to establish a base for attacking the Soviet Union. "we oppose such a movement and fight alongside the Red Army for the defeat of the imperialists and their agents, until the workers in that country are able to stand alone against the bourgeois counterrevolution.'

The resolution concludes by indicating how this policy should be applied in different countries and calling for internationalist fraternization with the soldiers of the occupying armies. It warns that in the occupied countries the policy must be applied "in such a way that it cannot be used against the Soviet Union to the advantage of the imperialists."

# **Ruptured Duck Now** A Homing Pigeon

That famous bird the ruptured duck, emblem of honorable service in Uncle Sam's armed force. is rapidly becoming a homing pigeon headed for a spot in the dresser drawer beside other souvenirs of war.

A survey of more than two dozen men out of service more than three months revealed one wearing the button. He explained: "I put it in the lapel of this suit when I got out. Now I wear the same suit every day, because it's the only one I've got."

Two buttonless veterans had definite, thought-out reasons why they did not wear the emblem. One said:

"Why let on you're a veteran? It doesn't mean anything-no housing, the OPA kicked to hell, and the big dealers already talking about the third war \* \* \* the ruptured duck, my eye, a badge for suckers is a better name for it."

The other, a tall Navy veteran, said: "I didn't wear the ruptured duck because I didn't like it. I had five years in the Navy and the way things look maybe I'll be back in soon. Who knows -I might prefer the War Three design."

# **Injuries to 30** "No Excuse" For

### **Going Home** Editor:

On June 26 I was putting labels on bottles at a plant in the Publicker Alcohol Distilleries in Philadelphia. The time was 1:40. In 20 minutes the bell would ring for our 10 minute relief period, when we could get outside that sweat factory (there are no fans).

The building, covering an entire city block, has two large rooms on every floor. Suddenly, from the room back of us a woman ran screaming—"Fire!" In that room are several 1,000 gallon tanks of alcohol. We didn't know how soon an explosion would kill us all. Everyone not petrified ran for the doorway; some fainted. The stairway was jammed. No one could move. There was pushing, shoving, screaming. Several women fell. One girl was stopped from jumping out of the third floor Eyewitness Report window.

The episode ended abruptly. Our foreman ordered: "Everyone Editor: back to your seats. It's all over.' Four minutes to relief time! More than 30 women had been and I visited the Senate. The injured. Some were taken to Senators were debating Price the hospital, others to the nurse. Control. I was deeply struck The rest of us went back to our by what I had been reading in seats. The belt started. The Senate Small Business Committee, in its voluminous study, "Economic Concentration And World War II." shows with a wealth of data how World War II benefited only Big Business and how the giant monopolies became even more powerful and dominating. (See The Militant, July field of influencing public 20 and 27.)

"What will be the effect of this wartime con- Business Committee's report, centration (of wealth and economic power) upon the peacetime economy?", asks the report. "Will the wartime gains in concentration be retained, or increased, or will the economy return to its prewar state? — which, it should not be forgotten of newspapers, periodicals, and was already highly concentrated."

The report states: "During both World Wars, the relative importance of American big business rose sharply. War contracts were issued predominantly to the large concerns, and they accumulated huge profits and controlled the destinies of great numbers of workers."

#### **Pattern Continues**

World War II not only continued this historical concern (1) that citizens in so pattern, it developed it more rapidly than ever. many communities can buy only "The evidence is compelling that big business will one daily paper and (2) that in be able to use a number of other wartime devel- so many cases these single dailopments to increase its relative importance in ies present the point of view of the postwar economy. time in the previous decade and a half."

What to do about this tremendous and ever growing concentration of economic power, the very power of life and death over the American people, in the hands of a tiny oligarchy of wealth and privilege?

this point. In a couple of brief sentences it summarizes its position. It merely states, without any atempt to argue its point that while the facts it ness will grow still bigger, it should not be concluded that this is "inevitable." "Concentration not only can be held to its present position; it can be reduced substantially below that level."

### **Crumbs for Small Business**

How? The answer of the committee is given in one sentence, "This would require an anti-trust program, a small business program (including financial aid), and a surplus-disposal program directed, specifically, to assist small business on a scale never before contemplated."

Boiled down to its essence, this program for "substantially" reducing monopoly is-throw a few crumbs to the small businessmen, turn some government-built facilities over to them, help the little capitalist to become bigger and more able to resist the competition of the big corporations. As for an "anti-trust program" — the anti-trust laws on the statute books now cannot be enforced. Big business controls the government too.

This has been the utopian program of the weaker and smaller capitalists since the trusts began to grow. It is, in reality, a program for a 21 per cent of total daily circu- iness of news gathering and dis- return to the era of small-scale production. Those days are gone forever.

The only road is forward. The people want and These big newspaper corporahave a right to more and better things. These are the things which can be secured only by mass trolled" as of December 31, 1944, production, by organized production on a vast and concentrated scale.

> The problem is not the bigness or concentration of production. The problem is Who controls production.

Monopoly in the hands of a few tremendously wealthy and powerful families and groups is an inevitable development under capitalism. Under the system of capitalist "free enterprise" the big sharks devour the small. That is what the facts in the Senate committee's report prove beyond strain in different ways. question.

day are used to benefit only the ruling monopolists can also be used to benefit the masses - provided the control is taken away from private individuals and groups and placed in the hands of the working populace.

# By V. Grey Growth and Decay

We have seen that wealth in society is created by the physical and mental labor of the working class. We have

The Senate committee's report breaks down at seen that capital-which is a surplus wealth over and above the capitalists' personal expenditures-is created by labor too. All the things that parade under the fancy has biled up show that it is "probable" big busi- names of interest, dividends, rents, profits of enterprise, and so on, are only parts of the huge surplus value produced by the workers.

> Now we must see why the workers must wrest the surplus from the capitalists. We must see why the capitalist system is breaking down to the point that the workers have to do this even just to defend what they already have.

> We learned that factories and machinery, the capitalist method of production, were something new under the sun. We saw that wage workers were something new, too. They displaced the wandering craftsman, the "journeyman," the tinker, the spinner, the weaver and the rest. More accurately, all these things were new once, but now they are old.

Readers of The Militant know we predict that these old things, once so new, must give way to still newer things. Privately owned sweatshops shall become modern, airy factories owned by all, under Socialism. Wage slaves shall become free men-masters of nature-joint owners of this planet.

But this may sound like a good program for the dim future. Some people, especially the capitalists, just cannot see it taking place in the present. Others, going a little further, may see such things, for example, as recurring strikes, but fail to see how and why these are the seeds of profound social change, of socialist revolution.

It is by grasping both the growth and the growing old of capitalism itself that we can get the clue to this. The elements of capital: machinery, raw materials, labor power that capital has bought-and the surplus value that is produced-these things constantly undergo change. One begins to eat the other up.

It is like the processes in a human body. It is constantly building up and wearing away. In youth the body is building up faster than it is wearing away. In old age it is just the opposite. Different organs begin feeling the

We have to study the organs of capital more deeply now The same giant plants and facilities which to- in order to analyze the decay of capitalism and understand why it is doomed. We have to see just how and where it is changing, and what has already changed. We have to distinguish one part of capital from another. We have to learn the connection between machinery and labor power. We have to distinguish the dead from the living.

Karl Marx teaches us to do this in the first volume of "Capital." He carefully shows the changing role of machinery in modern industry. He shows why this change. which should be a blessing, has become a curse to the workincrease in liquid funds and general financial ployment, its withholding of goods for inflation- er. And more important, he shows why it becomes transary price rises, its restriction of production — the formed from a lever of capitalistic progress to a millstone around the neck of society, including the capitalists.

He shows the feverish mad rush of the capitalist to 'expand or die." He explains that one capitalist must kill many (wipe them out) not just from greed and orneriness, but from the nature of the capitalist system itself. Capital, when it first expanded over the earth, brought new goods, new ideas, science and many other benefits

of the workers themselves. Production for the pro- to the world. Now its expansion is like a spreading blight Significantly, the report notes: "The rate of fit of a few must give way to production for the pushing living things over the borders of death.

What is inside capital, turning it against itself in this

# Wages, Prices And Profits

# The Working Class Method In Economics

# By Warren Creel

are producing more goods but they are not getting more wages. Between the two world wars production per worker doubled but real wages did not go up.

During World War II productivity kept on growing. The U.S. Department of Commerce reports that American industry has gained in efficiency since 1940 so that today it is able to produce the same amount of goods as in 1940 with eight million fewer workers. They say that adding those eight million to the unemployed it had then would make a total of 19 million unemployed at the 1940 level of output (Markets After the War, page 3).

The margin between labor's output and labor's wages keeps on increasing.

The difference between what the worker produces and what the worker gets is called "surplus value" in Marxist economics, which is the economic science of the world working class movement. Marxist economics uses methods which are different from ordinary capitalist economics, such as we read in the newspapers.

The economic theories of the capitalist class stem from the mental habits of the capitalists, and the middle class followers of the capitalists. It comes natural to them to think about the things they deal with. That is, they think first in terms of money and prices, and interest rates and profit margins and sales, etc. So they try to build their economic theories around these problems.

Workers are producers, so they tend toward different mental habits. They tend to think first in terms of production, in terms of the amount of useful goods available. They look to the supply of useful workers, and the total ment of Justice is dodging be- amount of useful work done. They regard economics as a problem of fitting together the various types of useful labor, so that the farmer, the miner, the weaver and all the rest can supply one another with the needed goods. These two methods lead in entirely different directions. One leads to right answers and the other to wrong answers. Workers, who start by looking at production,

It is a fact that the controlling factor in economics is ful labor done and the amount of useful goods produced. The problems of the capitalists (such as money and ernment uphold the Lynch Law prices, profit margins and so on) are derivative matters, know them now, and I think that nickel." They dare not talk, of its Southern Bourbon sup- controlled by production. In truth, they are, in the final analysis, only flickering and distorted reflections of pro-

We have looked at facts which shows that the workers | duction. A method that starts with these reflections cannot interpret even the reflections themselves, let alone show where they really come from.

Thus, even to understand prices and profit margins, we must use the worker's method. We must begin with the amount of useful labor done and the amount of useful goods produced.

Starting with productive labor is the method of Karl Marx. For any item produced, or for any quantity of production, Marxian economics begins by estimating the amount of useful productive labor that it represents. The given article's rating in human labor is called its "value," or "labor value." The money price, which is a derivative factor, is called "exchange-value."

A capitalist economist sees all the goods of the world with price-tags on them, representing money-prices, or exchange-values. That is enough for him, and he looks for no more. A Marxist, on the other hand, sees all the goods of the world with value-tags on them, standing for the amounts of useful human labor they represent. The Marxist sees money-prices or exchange-values also, but he understands that they are actually reflections of productive labor, generally distorted reflections.

The national production, we have been talking about in this series, is the output of all the productive labor. That's the total value. We have seen that the employers pocket a part of this total, called surplus-value, and that their part is increasing.

Does the employer show on his books all of "his share" as profit? What does the employer do with his increasing amount of surplus value?

He can do three things with it:

- 1. He can pay himself bigger open profits.
- 2. He can pay himself bigger concealed profits.
- 3. He can increase wasteful methods of competition.

All three operations are generally employed. Using Marx's method, we intend to trace what happens to surplus-value in its course through the economic system. We will find that this supplies the answers we are seeking on wages and prices. The general lines of our discussion are, taken from two pamphlets: One is Marx's Value, Price and Profit, dealing with wages and prices; the other is the programmatic pamphlet of the Fourth International, The Death Agony of Capitalism.

# How The GPU Tried To Discredit Condemn Police The Dewey Commission Of Inquiry Auguint Against Negroes

### By Joseph Hansen

(Tenth in a series on the Moscow Trials and their significance.)

Leon Trotsky's reply to the charges levelled against him in the Moscow Trials took place in Coyoacan, a suburb of Mexico City. The venerable John Dewey, world-famous philosopher and educator, headed the Preliminary Commission of Inquiry. Seated with him on the Commission were Otto Ruehle, one of

Karl Liebknecht's comrades; Benjamin Stolberg, noted journalist; Suzanne LaFollette, well-known liberal, and Carleton Beals, author and former socialist. A court reporter took down the proceedings word for word. Newspaper reporters crowded the hearings together with representatives of Mexican trade unions.

The advanced workers centered their attention on the hearings. Obviously this was a serious Commission of Inquiry. Here the element of a frame-up was excluded. Everyone was free to -say what he wanted; to ask any questions he wished. The Commission had even publicly invited the Stalinists to participate.

# AIR OF SUSPENSE

Party are disappointed with the trial of the Nazis at Nuremberg. They had expected the Stalinist prosecution would produce evidence substantiating the charge in the Moscow trials that Leon Trotsky had plotted with the Nazis against the Soviet Union. Rudolph Hess, named as contact man between Hitler and Trotsky, was in the dock.

What the rank and file Stalinists expected can be judged from a leaflet they distributed at a lecture of John G. Wright in St. Louis on December 14. This leaflet declared that "documents discovered in Berlin" and produced at Nuremberg trial of Nazi high criminals" show that the "Trotskyites" organized a "Nazi fifth column in the Soviet Union."

The trial is now entering its ninth month. Yet not a single document of this nature has been produced. In fact the Stalinist prosecution has not breathed a word about the charges levelled in the Moscow trials.

Perhaps this explains why the July 16 Daily Worker complains in an editorial that the Nuremberg "trial creeps forward at a snail's pace." Nine months is a long time to keep answering questions of the rank and file about the failure of the Stalinist prosecution to even mention the Moscow trials at Nuremberg!

By Robert L. Birchman

(Special to The Militant)

(Special to The Militant)

A check for \$318.50 was presented by M. J. Meyer, attorney for the Steering Committee of the Conference to Combat Terrorism Against Minorities, to the attorney in charge of legal affairs for Mrs. Grace Hardy. The check pays in full the mortgage payments on Mrs. Hardy's home for the months of May, June and July. This definitely forestalls any attempt to institute closure proceedings against the house and maintains the right of Negroes to live in the neighborhood.

Mrs. Hardy's home was bombed on the night of May 2. Mrs. Hardy is still in the hospital suffering from the third degree burns she received. She is a postal clerk. widow of a World War I veteran, with two teen-age sons. As a result of her injuries she was unable to work and thus unable to meet the payments on the house.

The Socialist Workers Party with the support of the NAACP persuaded Mrs. Hardy not to sell the house, and promised her financial aid. The total raised to date for the Grace Hardy fund, from organizations and individuals, is now \$383.59.

In the entire 59 cases, only four terrorists were apprehended and not one convicted. Seven cases of vandalism occurred while the police were on guard. Police were assigned to guard homes in 26 cases only after one or more terrorist acts had been committed.

The Independent Investigating Committee established by the Conference will take the following measures:

#### PAGE EIGHT

#### THE MILITANT

SATURDAY, AUGUST 3, 1946

When I walked into the shanty after cast up n No. 4 yesterday, the first thing I noticed was the smoky odor of burning cloth. The second thing that came to my

attention vas the won-

word that he left out;

in fact, I think he im-

provised a lot of new

ones. Finally lapsing

into ordinary English,

he informed me that when the fifth iron gate had blown up, he had caught a good spattering of the molten iron on the seat of his new work pants, as a result of which there was now no seat in the pants.

"That's all right," Jimmy said helpfully. "You can eat your supper standing up.'

Slim took the advice in cold contempt and didn't answer. Then, to nobody in particular he grumbled, "Prices sky-high and that damn iron has to burn up my pants the first damn time I wear them!"

Jimmy was in a helpful mood. Not at all discouraged by the attitude Slim took toward his last bit of advice, he came forward cheerfully with some more . . . in fact a little too cheerfully. "Slim," he said with a kindly smile on his face. "your troubles are all over. I am glad to tell you that we will have all the prices down in a week's time. Then you can buy anything you like and have plenty of money left over.'

"Yeah?" Slim muttered suspiciously. "How?" "Easy. We go on a buyers' strike. We cut out buying everything we don't need, and when the stores can't sell anything, then the prices take a dive, and there's no more inflation.'

"That's very good," Slim said heavily, "Oh, that's fine! But tell me one thing." His voice rose passionately. "WHAT THE HELL DO I BUY NOW THAT I DON'T NEED TO?"

"Now take it easy, son," Jimmy said soothingly. "What do you do with all your money, anyhow?"

like to eat sometimes and wear clothing when we go out. And then, we kind of got used to derful stream of curses living in a house, and that costs money for pouring out of Slim's rent. Maybe we ought to cut out these things, mouth. There wasn't a huh?'

"Slim," said Jimmy again with a beautiful Christian smile spreading over his face. "your troubles are all over. Just quit eating and wearing clothes. Remember how the Bible says, 'Look at the lilies of the field. They toil not, neither do they spin, but Solomon in all his glory didn't look half so sharp,' or something like that,"

"It's gonna be hard working barefoot in those red-hot runners," Tom murmured.

Jimmy turned toward him reassuringly. "You'll get callouses.

"Well, look, Jimmy, "I protested mildly. "Don't you think we'll get sort of hungry on this buyers' strike?"

But Jimmy's enthusiasm could not be quenched. 'It'll only be a week or two," he beamed at me, "a month or two at the most. Who ever got hungry just going without eating for a month or two?

I never knew anybody who went two months without food, so I couldn't answer Jimmy.

'Well," I said at last, admitting defeat, "The way I had it figured, the best thing we could do was get a clause in our contract calling for a sliding scale of wages, so that every time prices went up, wages would go up just as much. But the way Jimmy explains it, I guess I've been wrong all along."

"Don't feel too bad about it," he comforted "You just don't read the papers. If you did, you'd be as smart as I am."

But Slim was somehow untouched by the wisdom Jimmy had imparted to us. Slouching sideways on the end of the bench, he muttered grumpily, "Prices sky-high, and that damn iron has to burn up my damn pants first damn time I wear them!'

Hartford Workers Show Solidarity

Thousands of union men and women conducted the first general work stoppage in Hartford, Connecticut last week, demonstrating in sympathy with striking fellow-workers. Infantile Paralysis Vs. Profits - By Grace Carlson Poliomyelitis has reached the epidemic stage

in Minneapolis. Public health authorities report that in the first 23 days of July, 122 new polio cases occurred. There

have been 15 deaths from the disease during July. Also known as infantile paralysis, polio is the much dreaded crippler of children. In the present Minneapolis epidemic, more than 80 per cent of the victims are under 15 years of age. Frightened parents have been besieging the city health de-

partment for advice on how to protect their children from polio infection.

Doctors admit that they do not know just how infantile paralysis is transmitted but they are offering a number of practical precautions to help guard against the continued spread of the disease. They advise parents to keep their children away from crowds; to prevent overheating and over-exertion; to guard against chill after swimming; to see that children's hands are kept clean, particularly at mealtime.

These health tips have been given daily publicity in the Minneapolis papers during the polio epidemic. But much more and much better publicity is being given to the Minneapolis Aquatennial, which violates every one of the health

tournaments, public dances and music festivals are featured during the ten-day festivities. Children's bands, baseball clubs, and glee clubs are brought to Minneapolis from cities throughout Minnesota to take part in the Aquatennial contests.

Before the Aquatennial opened on July 19, groups of Minneapolis medical men, parents and teachers urged the city official to call it off. The polio outbreak was not yet at an epidemic stage, but the serious danger of bringing large crowds and children together in the Aquatennial events was pointed out to the city authorities. However, Minneapolis business men pút their own pressure on the officials of the city, and the Aquatennial went on.

That the crowds brought together by the Aquatennial have spread polio and that still more victims will be claimed in Minneapolis and throughout Minnesota can scarcely be doubted. Minneapolis authorities are pointing with pride to the fact that the city has good facilities for treating polio victims. Dr. Frank Hill, city health commissioner, said recently, "The Elizabeth Kenny institute, the best known institution of its kind in the world, has a full staff of competent, fully trained technicians, equipped to provide the most up-to-date treatment." Sister Elizabeth Kenny, originator of the polio treatment bearing her name, was reported to be flying to Minneapolis to aid in the fight to

Veterans' Problems Inflation Hits The Veterans

- By Alvin Royce

in the way!

and disfigurement.

Not so long ago we used to hear, now and then. about a piece of legislation called the GI Bill of Rights. Of late, however, the capitalist politicians have been soft-pedaling their boasts about this supposed Magna Charta for the veterans. Their silence has been prompted by good reasons. Virtually every chance of gaining any real benefits from this bill has been wiped out by the vicious inflationary drive of Wall Street.

Veterans on the campus have been among the first to get caught in this inflationary booby trap. The allowance for educational subsistence for a veteran with dependents is \$90 a month. As the veteran reads the newspaper accounts of million dollar handouts to non-existent corporations in the form of war contracts, that \$90 a month can hardly look very substantial.

The hardest hit are the two and one-half million unemployed veterans. No matter how many dependents he has, or how critical his financial problems, his total compensation is \$20 a week.

Already millions of veterans and their families have been forced to scratch vital necessities off the shopping list. Butter and meat have become a rarity on the kitchen table because of their incredible prices. When and if the rent is paid, there isn't very much left to buy even the most necessary clothes.

The Militant and the Socialist Workers Party have constantly stressed the need for a sliding scale of wages inserted into all union contracts.

Just as crucial is the sliding scale for all veterans' pensions and benefits. Over two years have elapsed since the GI Bill of Rights was passed. The benefits that were awarded at that time are worth little more than half, in actual purchasing power, compared to the period in which the legislation was passed by Congress.

other veteran organizations must demand that the government fix veteran benefit payments to a reliable price index. Every rise in prices retroactive so that the veteran can catch up on some of the debts he has been accumulating since he was discharged from the Army.

important force in the struggle against rising prices. How effective these committees will be in the present situation will depend on their scope, militancy and program. Veterans will unquestionably play a large role in them, and try to make them as effective agents for controlling prices as they can.
