UPW-CIO Leader Blasts Meat Borons For Slates

By Barbara Bruce

SOUTH PORT, Minn., Sept. 16—Joseph Olm, Minn. Dep. Director of the United Food and Commercial Workers Union, today charged that most packing plants are deliberately keeping meat from the workers to keep them from organizing. This charge was made during a press conference in front of the Minn. State Capitol.

"We are being shortchanged by the meat packers," said Olm. "We are being shortchanged by the meat packers because they are not paying us the full amount of meat that we are entitled to."

The workers at the South Port packing plant, according to Olm, are being shortchanged by the meat packers because they are not paying them the full amount of meat that they are entitled to. This has led to a series of strikes and protests by the workers.

Support Spanish Workers!

(Resolution adopted in June, 1949 by the International Executive Committee of the Fourth International.)

The American and Russian workers have increased the war to "multiple fronts" from the economic to the political. Each new phase, however, has the same result: the end of hostilities, undertaken to de- crease the war in other areas and to promote the economic development of capitalism, has never succeeded in relieving the US-occupied and Russian-occupied countries from the consequences of war.

For these reasons, they typically pro- tended to be the "internationalist" workers, who, instead of organizing their own country's labor reserves, assert their solidarity with the workers of other countries, who are forced to pay for the militarization of the global economy. The "internationalist" workers are the ones who organize the struggle against the war, who fight for the peace, and who fight for the abolition of capitalism.

Stalin's Statement Denying War Danger Recalls His Record Of False Prophecies

"Do not believe in the danger of a new war," Stalin declared in 1940 when the war was just beginning. Stalin predicted that "the war is not inevitable." But his prediction was wrong. The war was inevitable. The war was inevitable.

Stalin Peddles Line The CP Condemned As "Browderism"

Now, with the rise of Stalinism in the Soviet Union and its expansionist policies in the Middle East, the CP is once again trying to defend its "internationalist" line. The CP, like Stalin, predicts that "the war is not inevitable." But his prediction is false.

Keep Their Snouts Out!

Organized labor is getting a lot of free advice from the political racketeers of Big Business.

They are telling labor to stop their labor organizing activities and to demand their rights through the political party of the moment. This advice is coming from the leaders of organized labor who have been the worse offenders in violating the agreements of the workers.

This advice is also coming from the leaders of organized labor who have been the worse offenders in overstepping the bounds of their authority and who have been the worst offenders in violating the agreements of the workers.

Let's hope that the workers will heed this advice and demand their rights through the political party of the moment. The workers are in a better position to organize and win their rights than the leaders of organized labor.

Role Of The Courts

Two cases last week spotlighted the role of the courts as agents of the employers to protect the interests of the workers.

In Pittsburgh, three judges slapped a prepping injunction on the power workers, banning their right to strike, and then imposed their sentence on a one-year reg with a jury trial.

In Charleston, W. Va., a three-judge panel ordered the federal government to stop the workers from striking and then imposed their sentence on a one-year reg with a jury trial.

Inspiring Example

A general strike against the sending of the state to Europe has been called on September 24, according to the National Union.

Four special trains carrying 3,000 troops were sent to Europe last week, and the workers participated in the demonstration, saying that they "were telling us the air brakes." The workers were then arrested and sentenced to five years in prison.

**Why Truman Fired Wallace**

**Radio Address By Farrell Dobbs, SWP Candidate For N.Y. Governor**

In a new development that will definitely affect the outcome of the Labor movement, the Constitution Party issued a statement this morning that it has been decided to withdraw its support of the Wallace candidacy. This action is expected to have a significant impact on the Wallace campaign, as the Constitution Party's withdrawal leaves the Wallace campaign with fewer resources and support.

The Constitution Party has been a vocal critic of the Wallace campaign, and its decision to withdraw support is likely to be seen as a sign of the party's dissatisfaction with the candidate's performance. The move is also likely to be seen as a blow to the Wallace campaign's efforts to build a broad coalition of support.

This development is expected to have implications for the upcoming election, as Wallace's ability to attract voters will be put to the test. With fewer resources and support, Wallace will likely have to work even harder to gain traction in the race.

The Constitution Party's decision is a reminder of the challenges facing the Wallace campaign, and it is likely to be watched closely by political analysts and observers. The implications of this move will be closely monitored, as it could have significant consequences for the outcome of the election.

**Wages, Prices and Profits**

The "Mystery" Of Wartime Production

By Warren Creel

In previous installments we have shown that the capitalist classes are making a deliberate and conscious effort to keep wages low and prices high in order to increase their profits. This is done by manipulating the market in order to create a shortage of goods, which forces workers to accept low wages and high prices. This is a classic example of the capitalist class trying to control the economy in order to increase their profits.

The capitalist classes have been very successful in this endeavor, and the result is a situation in which the working class is forced to work long hours for low wages while the capitalist classes live in luxury. The working class is therefore faced with a difficult decision: either to accept low wages and high prices or to organize and fight for better wages and conditions.

The capitalist classes are aware of this, and they have been working hard to prevent the working class from organizing. They have used various tactics, such as the blacklist and the pinkertons, to try to prevent the working class from organizing.

However, the working class is not going to be intimidated. The working class is organizing and fighting for its rights. This is a historic moment, and the working class is determined to win.
