And the officials of the trade unions and workers parties remain in their posts.

In these respects everything looks the same as before August 7; yet everything has changed. What is profoundly different is the balance of social forces which has shifted in favor of the workers. With one stroke they ripped away the facade of stability and strength that screened the capitalist regime of France. Rarely has history witnessed such a display of working-class power. The new consciousness the workers have of their own power and

the weakening of capitalist rule is a major factor in the immediate political outlook for France.

But just as the workers showed their magnificent capacities to launch a struggle and carry it to the door of victory, so their official leaderships displayed the most cowardly urge to curb their offensive and save the day for capitalism. They fumbled, wavered and betrayed. The bureaucracies

Detroit One-Party Press Scored by SWP Candidate

DETROIT, Aug. 25 - Frank Lovell, Socialist Workers Party candidate for mayor, today scored the one-party press here which unity of action among the split-up appears to be deliberately excluding news about all the mayoralty candidates except Republican wheel-horse Cobo.

As an example, Lovell referred election story in the to an Detroit News which was "so flagrantly biased that it failed even to mention all but the choice ers in the Socialist and Catholic of the Democratic Party machine among the opponents of Cobo." At this evening's meeting which I was privileged to attend. Division 192 President V. F. Stambaugh described the latest developments in the 35-day strike of Key bus drivers and trainmen against the lowest wage rates for transit workers anywhere on the West Coast.

President Stambaugh told the meeting that Key System has been accusing the Strike Committee of not keeping the union members informed about the latest company offer. The company claimed the membership would "gladly accept" this offer. Stambaugh showed how the Key System had used every possible

"Just as at one time it was recessary to legislate the Federal Communications Commission into existence to ensure certain democratic rights for radio and now television," said Lovell, "similar legislation should now be considered in regard to the monopolized press."

The explanation for this studied policy of the press is not difficult to determine. Cobo is the choice of the big corporations. Under administration, rents in his Detroit have reached an all-time peak. Street railway fares have soared to among the highest in the country. Schools are scandalously inferior and social services are neglected.

The SWP candidate held that the working people of Detroit should administer the affairs of the city through their own organnizations. FOR WORKERS IN **NEW YORK ELECTIONS**

Page Two

By Murry Weiss

This is the election policy of the Communist Party in New York City: Regardless of whom you intend to vote for in November, get into the Democratic primaries on Sept. 15. Bysupporting Wagner against Impellitteri we can defeat the worst danger — the Dewey-Impellitteri machine. Thus we will knock the reactionaries out of the elections during the primaries and needed to carry out a successful everyody can feel free to vote for whatever party he chooses attack on the Soviet Union when in November without fear of a reactionary getting in. This will pay off with a bigger vote for the American Labor Party, Liberal Party, etc.

This latest gimmick on how to beat the capitalists at their own game is as worthless as all the past slick opportunist elec- all convincing the American peotion tricks of the Stalinists and the labor bureaucrats. The main trouble with these "clever" schemes is that they overlook win a war of such a scope, the the class interests of the workers and put the workers behind minimum requirement is a people thoroughly convinced of its justice the eight-ball — that is, behind their worst enemies on the and inevitability. If possible, their political field, the capitalists.

Wagner and Impellitteri represent two wings of the cor- drive the American people into rupt capitalist political machine known as Tammany Hall. It's a case of heads I win, tails you lose, in the contest between these, two nominees so far as the workers are concerned. The Stalinists claim that Wagner's silence about McCarthyism shows he is a ruling families. liberal while Impellitteri's allegedly "outspoken" support for the Wisconsin demagogue makes him a reactionary. Even if true, does this provide a choice for the working class? It's as much a choice as between hanging and shooting for a condemned man.

The real choice before the workers of New York as everywhere in the United States is not between one capitalist politician and party or another but: either to continue the ruinous policy of company unionism in politics; or make a complete and prin- rights. In fact, to the capitalists, cipled break with capitalist politics and launch a Labor Party

As long as the workers remain trapped in the hopeless game of supporting "progressive" Tammany politicians against "reactionary" Tammany politicians, the road to a Labor Party will be blocked.

Even if Wagner were a "good man" (the Stalinist only claim that he is "less bad" than Impellitteri) he couldn't change the basic character of the Democratic-Tammany machine which is owned and operated by Big Business and Big Gangster interests.

The real purpose of the Stalinist election policy is to corral the left-wing vote into the Democratic Party camp. They are laying the basis for the next pitch when they can say after the primaries: "Wagner is a lesser evil than the Republican candidate We must choose him instead of the worse evil of a reactionary Republican." And even if they don't say this publicly, the end result of supporting Wagner in the primaries is to start a bandwagon trend for him that can slash deeply into the vote which might otherwise have gone to the ALP, the Liberal Party or the Socialist Workers Party.

In this way the Stalinists add their weight to the treacherous policy of the labor bureaucracy which has led to one defeat after another for labor on the political field and made American labor despite its power politically helpless before the Big Business Eisenhower administration.

The Stalinists are having some difficulty selling this policy to their followers. That's why it's being dished up in this stepat-a-time, easy-to-take, it-won't-hurt form.

The Stalinists lie when they pretend that it is only a question of the primaries in New York. In Los Angeles just a few months ago they pulled a similar trick. They supported the "lesser evil" Republican Bowron against the "worse evil" Republican Poulson.

To Safeguard Your Wages

Another rise in the cost-of-living index between mid-June and mid-July gave more than a million workers who are protected with an escalator clause in their contracts an additional one cent an hour in their paychecks.

No matter how inadequate the escalator clause is, as it has been formulated by the labor bureaucracy, it still constitutes a measure of protection against inflation. About 98% of the working class has not yet won even the principle of automatic wage adjustment to accompany increased living costs. That means that the overwhelming majority of American workers took another cut in their real wages with the new rise in the cost of living.

The need to fight for protection against inflation is emphasized with every new wave of price increases. But in this struggle the working class will not get the help of the American Stalinist newspaper, the Daily Worker, which has opposed the escalator clause from the very beginning. The Stalinists have not confined their opposition to the obvious weaknesses in present contracts but have attacked it in principle. And naturally they attempt to ridicule an automatic wage adjustment to rising living costs as a "Trotskyist" invention.

The argument of the Daily Worker has been that the escalator clause constitutes a "wage freeze."

However, the Wall Street Journal which

is also opposed to the escalator clause. complains that just the opposite is the case. In an editorial Aug. 28 the Wall President of the 5,500 member were reinstated. The to this settlement were Arthur cause he was the president of the editorial concludes that "when existing wage contracts that include the clause have expired, employers will be disposed to take Griffin, district director of the another look at escalation."

Those workers whose unions are strong enough to win an escalator clause are also in the best position to increase their basic pay; and thus not only protect existing liv ing standards but improve them as well

The opposition of the Wall Street Journal, spokesman for big business, is to be expected, for every pay increase the workers win comes out of the profits of the instated on probation. capitalist. But the opposition of the Daily Worker shows how far removed the Stalinists are from the real interests of the American workers.

As inflation eats into the standard of living of the working class, all obstacles harmonious relations to increas to the extension and strengthening of the escalator clause must be overcome. The URGE ACCEPTANCE conception of automatic wage adjustment must also be extended to include automatic pension increases with living costs. The Bar Commits a Crime

The American Bar Association, meeting in Boston Aug. 26, committed a serious crime against civil liberties. We say this despite the fact that they passed two good resolutions - one against "book burning" and another upholding the right of lawyers to defend anyone regardless of his political beliefs.

It's a fine thing to speak out against "book burning." The Militant is always eager to hail any step, however small, against the reactionary McCarthyite tide. But we can't stand hypocrisy and double talk. The American Bar Association policy committee passed a measure calling for a political blacklist of the legal profession. A preliminary blacklist has already been drawn up and submitted to the attorney general.

With this blacklist they open a political heresy hunt in the field of legal practice. Lawyers who don't hold the "right" ideas are subject to disbarment, likewise lawyers who don't cooperate with Congressional inquisitorial bodies.

for getting off the blacklist require that a victim turn stoolpigeon.

The ABA's witch hunt measure is a big victory for the McCarthyite forces. It has been their aim all along to drive the witch hunt deep into national life by blackmailing organizations, unions and professional groups into establishing a voluntary, selfimposed purge.

The union bureaucracy has been playing this game for many years. The reasoning they used was that "If we don't clean our own house, they'll do it for us." This only resulted in feeding the demands and appetites of the witch hunters. It didn't save the union bureaucracy from becoming a target for the McCarthyites.

The American Bar Association is playing with fire. They have set a precedent that will be seized upon by the McCarthyites. They will attempt to follow up in the medical and other professions. That's why the ABA's declarations against "book

These are the same people who passed a pious resolution against "book burning." They say they believe that the "truth can be counted on to prevail in a free competition of ideas." But it is clear they want to supplement "free competition" with coercion and blacklists.

He showed how to make cheap meaningless protests against "book burning" and then cover up the real witch hunters and book burners with silent consent or measures of his own.

The legal profession has a big job on its hands to reverse these reactionary moves. Lawyers will hardly be in position to fight for civil rights of their clients if they are to be straitjacketed by their own professional organization.

The Legion's Roman Holiday

The political atmosphere in the United States generated by Wall Street's war drive had its perfect expression at the American Legion Convention in St. Louis this week. Every war-mongering, witchhunting, race-baiting proposal was passed. It was a Roman holiday for reaction with the smell of a lynching bee against anything that doesn't conform with the war preparations.

Speeches choking with reactionary hatred for unions and "Reds," patriotic hysteria and the defense of "white supremacy" are not unusual features of a Legion convention. What is notable is that the Legion no longer stands out as a reactionary sore thumb. It is entirely in tune with the times as expressed in the official summits of the government — and in the top circles of the labor movement.

This is made graphically evident by comparing the Legion resolutions, the speech of John Foster Dulles, Secretary of State, and the speech of George Meany, head of the American Federation of Labor.

The American Legion called for the following measures: If peace "fails" in Korea, the United States should use its full military strength including "every weapon at its disposal" to open up all-out war. In harmony with this proposal to hurl the Hbomb it called for stepping up the witch hunt by investigating and prosecuting "if necessary" the American Civil Liberties Union. It pointed to the "communist and socialist" infiltration of unions as a "stark menace to our freedom." It called on Eisenhower to block entrance of "displaced persons" to the U.S. It defeated a proposed amendment to the Legion constitution barring race discrimination in Legion subsidiaries. It called for the disbarment of the attorneys for the Rosenbergs.

Having unburdened itself of this reactionary bile it settle down to listen to some showed that the decisive power "appropriate" speeches. Dulles didn't dis- was with the workers. The Negro Struggle -**Ralph Cooper's Parole**

By George Lavan

The New Jersey Parole Board has granted a parole to Ralph Cooper, last of the prisoners in the infamous Jim Crow frameup of the Trenton Six case.

The freeing of Cooper was predicted in the March 2, 1953, Militant which analyzed the court windup of the case as a symmetrical frame up — that is, the case began with fake "confessions" and it ended with a fake "confession."

It will be recalled that after three trials, four of the Trenton Six — who had been sentenced to the electric chair — were freed by a jury. This jury brought in a compromise verdict by which two defendants — Collis English and Ralph Cooper - were sentenced to life. The "evidence" against these two, however, was the same as against the four who were freed. These were the "confessions" to which the Trenton Six had been forced to affix their signatures in order to secure an end to the merciless grilling, terrorization and administering of drugs by the police.

Cooper and English went back to prison until eventually the New Jersey Supreme Court got around to hearing the appeal. Their conviction was too raw and a new trial was ordered.

Meanwhile Collis English, whose weak heart-had barely managed to keep going through the days and nights of police inquisition, a stay in the death house and three trials, died. The Trenton police and prosecutor, who wanted to end the running sore of their frame-up, which had become a political disgrace, somehow coerced or tricked Cooper into a deal.

When Cooper was brought before a judge for a routine setting of the date for his new trial he surprised reporters by stating that he wanted to change his plea from "Not guilty" to "No defense." Cooper said nothing more except to reply, "Yes, Sir," to several questions asked by the judge.

These questions with the answers were a "confession" that the police-dic-

VOLUME XVII tated "confessions" with which the trial began were true. The judge thereupon congratulated Cooper and announced that this "confession" vindicated the Trenton police and prosecutor. He then gave Cooper a six-to-ten-year sentence, retroactive to the time of his arrest. Since Cooper had already been in prison for over five years

this meant that he would be paid for his four "Yes, Sirs," by a parole in a matter of months. The announcement of Cooper's parole confirms what we said about the whole dirty deal.

No blame can be placed on Ralph Cooper - his "Yes, Sirs" endangered none of the other Trenton Six victims. Four had been acquitted and were thus beyond the reach of another trial. Collis English had succumbed to the American Way of Jim Crow frame-up and prison life (possibly his death was hastened by pressure put on him to make a "Yes, Sir" confession).

Cooper also knew there was no money for his new trial and this may have greatly influenced his decision to purchase his freedom with those "Yes, Sirs." Certainly there should be some soul-searching in the top NAACP offices and in the Jersey labor movement about this lack of money for a new trial.

The blame for this new mockery of justice and the official acceptance of a "confession" that everybody knows is a fraud rests squarely on the crooked, corrupt, Jim Crow Trenton police, district attorney and their abettors and protectors on the bench and in high political office.

saved face. They feel safe. If Cooper tells the truth they will revoke his parole, and after his parole is over, they think they can keep him quiet by threatening to prosecute him for perjury if he admits that his "Yes, Sirs" were lies to get out of prison. But the truth will out and out with it will go those blots on the face of the French general strike.
