Dobbs Protests Inclusion of SWP On N. Y. Blacklist Police-State Law in Michigan

NEW YORK, Oct. 22 — Farrell Dobbs, National Sec retary of the Socialist Workers Party, today sent a letter to J. Edward Conway, President of the N. Y. State Civil

Service Commission, protesting inclusion of the SWP on its "subversive" blacklist. The text of the letter is as follows:

Vol. XVII - No. 44

The press reports that the State Civil Service Commission proposes to strike from its rolls and otherwise penalize members of 35 organizations listed as "subversive" by the U.S. Attorney General. Among these is the Socialist Workers Party.

This is our first notice of its ruling designed to deprive public workers of employment and their good name solely because of their political views and associations. The action is doubly arbitrary. The Civil Service Commission did not offer our party any opportunity for a hearing; it simply made a selection, on unknown grounds, from the Attorney General's blacklist.

HEARING REFUSED

But the Socialist Workers Party, along with the other groups included, was placed upon that list without prior notification, specification of charges, or hearing. Our Party's repeated re- 1951 termed the Attorney Genyear, Attorney General Brownell tions." rejected the Socialist Workers

THE

By Murry Weiss The East German Stalinist regime announced on Oct. 26 a widespread reduction in prices covering some 1,200 consumer items. The cut in prices is announced as a prelude to the elimination of rationing some time next summer. Will this satisfy the insurgent East German workers?

Since the June 17 uprising, the workers have been demanding a 40% cut in state prices. While the announced reduction does not meet this demand it is a fairly drastic cut in the prices of commodities basic to workers' living standards. Considering items most in demand by workers, the announced cuts are as follows: lard, 22%; margarine, 25%; milk,

These price cuts have not been tested as yet. Serious dislocations exist in agriculture. The flight of the peasants during the last year will result in an estimated 10% decrease in farm production. No less alarming is the Ordinarily this would exert an ficient food imports are expected

"This contract, other than its real culprits are the milk companies. They cheat the upstate wage and welfare provisions, has farmers on the price of raw milk, not been substantially revised underpay and overwork the inside during these many years of war workers and drivers, and then limitations," Cohen declared. "The overcharge the consumer." industry no longer can offer the

The Socialist Workers Party excuse that some government mayoralty candidate singled out board stymies genuine bargainfor praise the demand of the milk ing."

He outlined the companies' strikers for a 35-hour week with no reduction in pay. "This is strategy as one of stalling and carrying the ball for the whole refusing to negotiate on contract labor movement because it is the revision and then "buying us off kind of demand needed by labor with a few dollars of wage innow to meet the threat of layoffs creases offered at the very last and a possible increase in unem- minute." (For more on New York elecployment."

Fifteen thousand milk drivers and posteurization-plant workers. belonging to five locals of the AFL Teamsters union, went out on strike in the greater New York area yesterday. Beside the 35hour week, the milk strikers are demanding a \$15 weekly pay boost, 11 paid holidays, longer vacations and sweeping changes in their antiquated contracts with the 200 milk companies. The strike affects New York City, Long Island, northern New Jersey and part of Fairfield

County in Connecticut. It was immediately apparent that the strike action was very effective. The only milk deliveries being made are those arranged by the union to schools, hospitals, child-care centers, homes for the aged, and similar institutions.

Samuel J. Cohen, negotiator for the striking milk workers, told reporters that government controls during the war and during the post-war period had made

DEFENDS CP RIGHTS

UAW Secretary Treasurer Emil Mazey made the most principled defense of civil liberties heard from a top CIO spokesman in recent years. He castigated those who are for civil liberties only "for those who agree with us." He insisted it is "essential to defend the rights of all groups including the Communist Party in spite of fundamental disagreements with them and their the denial of rights to their opponents." He referred to the support the Communist. Party gave the government in its first use

of the Smith "Gag" Act, against the Socialist Workers Party in the 1941 Minneapolis Labor Case. Now the government is using this same law with deadly effect against the CP.

Mazey cited the increasing domination by the military and Big Business as the source of the attacks on civil liberties and alled for a struggle to eliminate he stranglehold of militarists and monopolists on this country.

In 1950, a similar group already arrived at, such as the etc. And we are ready to defend

Clarence B. Randall's new book Freedom's Faith, which I reviewed last week, says, "We know so little about freedom. It is the most precious part of our heritage from the past, the very inner core of our greatness as a nation, vet its essence continues to elude us." The essence of freedom may elude the Chairman of Inland Steel, but I'm sure it doesn't elude the steelworkers or the rest of American labor.

Anyone who works eight hours a day producing the wealth of this country knows that freedom doesn't begin until after that eight hours is up. For one third of every working day, you do as the boss or the foreman tells you to do. The real freedom bell is the one that rings at the end of the shift.

Now this elementary and universal observation can lead us to the answer to Randall's perplexed question about the "essence of freedom." The first law of life is that man must produce the means of subsistence. Until the necessities are obtained there can be no talk of freedom. This precious stuff will be less "elusive" when working the Chinese Trotskyist movement instances, these wholesale arrests hours are reduced. And that is why socialism will mean, more freedom for America, not less, as Randall claims. The system of "free enterprise" forces people to work longer hours, accept less freedom, despite the fact that ing the incessant persecutions one knows their fate. the progress of science has made it possible to produce your party has inflicted on our I am thus obliged to lodge the an abundance for everyone with much less labor.

Even the hours in which man must labor need not be oppressive if working conditions were democratically determined by the people who work instead of the profit- Why the Secrecy? hungry bosses.

Now it's true that the American workers have fought for and won many democratic rights in their long history of struggle against the capitalists. But the rulers of this country today are trying to destroy even these advances in freedom. I'm referring to all the witch-hunt legislation and extra-legal practices that are fast destroying freedom of speech, freedom of press and freedom of assembly. Mr. Randall is in the forefront of this assault on democobjective of the witch-hunt is the organized labor movetycoons."

Randall isn't referring here to the bureaucratic rule of union officials and their tendency to conciliate with the bosses at the expense of the rank-and-file members He's talking about the union itself. The union's control of hiring, the union's fight against speed-up, the union's enforcement of upgrading through seniority lists, all this, according to Randall, "is alien to us. It is not America."

The growing power of the workers that is used today only to share in deciding the conditions under which they will work is regarded by Randall as a catastrophe. "Labor monopoly comes to its full power in the frightening modern phenomenon of the nation-wide strike."

When dealing with the ability of the workers to bar-gain for a freer life with such an effective weapon as the that since the defeat of the Government" and thus moving national strike, Randall rises to heights of oratorical wrath. "Where in all the long and selfish history of control of this defeat, or in fundamental Meanwhile, we criticized and of the many by the few, robber barons included, has there attitude toward the bourgeois warned you that your opportunist general in favor of and in sup- most resolute fighters on been anything to approximate the arrogance of these men Kuomintang and imperialism, or compromise policy not only would port of the revolutionary move- same front, the Trotskyists? as they cry, 'Stand and deliver,' to an entire nation? Vol. XVII - No. 44

Why Wait for a Labor Party?

Last week David Beck, President of the AFL Teamsters Union, made some strong statements at a National Press Club luncheon. He said, "Those who seek to put the chains of the Taft-Hartley Act and other anti-union legislation around labor will live to see the day when American Labor will follow England's (example) and tie progress to political action."

This was a threat to Big Business. He asked them if they wanted to pay such a price in exchange for "the momentary and minor advantages of anti-union legislation." To reinforce his threat Beck declar- ϵd : "Don't tell me that a labor movement of 16,000,000 workers can't develop a political machine."

Why threaten and why wait? Does Beck think that Big Business will call off the dogs on the basis of the mere hint that the labor officials may break with the policy of supporting the capitalist political parties? After all, the Democratic and Republican parties have good evidence that the labor leaders like Beck will take anything rather than release the political power of American labor for independent action.

Hasn't labor been sold down the river time and again by both capitalist parties? And haven't the labor officials threatened before? Beck refers correctly to the symptomatic importance of the recent vote in Wisconsin. When a Democrat won in a traditionally Republican district the high com mand of the Republican party were thrown into panic. "Ike went out of the White House," says Beck, "faster than Paul Revere jumped on his horse."

Beck magines that the solution is for the workers to follow the lead of the Wisconsin farmers and vote Democrat in the next election. He is barking up the wrong

for the Democrats but rather against the Republicans. The Gallup polls show that Eisenhower's popularity went down 10% this month. Less than a year ago the Democrats suffered a catastrophic decline of industry and its growth in fifths of the total agricultural in popularity among the people in the the post-war years as against the output consists of industrial country.

To keep jumping back and forth from the Democratic frying pan into the Republican fire is a losing game. The labor officials may want to keep it up, but in our opinion the workers are going to put a stop to it.

Big Business is fully aware of the risks it is taking in trying to choke the labor movement to death with legislation like. the Taft-Hartley Act. But it sees no alternative. Signs of depression and the needs of the war drive force its hand. The ruling billionaires must prepare to deal with the threat of mass radicalization which will inevitably arise from either depression or

war. The labor officials are afraid that a bold policy of independent class politics contains the danger of a run-away movement. to-1, that is, industry has been Once the workers embark on the road of a Labor Party the program of revolutionary socialism will make rapid progress in the party.

But the fear of the labor bureaucracy cannot long retard the movement. One of these days the threats of a Beck to form a Labor Party will be taken up by the base. workers and put into action. Such a pros- BIG INDUSTRY AFFECTED pect is not far off because the alternative has narrowed down. It is either fight with independent political action or allow Big Kremlin liars. They pretend that tion in agriculture has declined tenor of Malenkov's report last Business to cut the labor movement to ribbons. We have no doubt which course the workers will take.

Next in Line for the Witch Hunt

Business Week of Oct. 24 brings some glad tidings to the anti-labor industrialists: "Getting rid of a Communist sympathizer can be a sticky business. But developments last week will ease the situation considerably - even though, technically speaking, these developments concern only government employment." The developments Business Week speaks of is President Eisenhower's "executive order making it a discharge offense for a federal employee to refuse to testify before a Congressional committee on the ground of possible self-incrimination." The article then proceeds to discuss the question of framing and hounding private industry workers for their political beliefs as if it were discussing the problem of slaughtering and marketing cattle. The reasoning is simple. The ability of private employers to fire "subversives" has been dependent on what Business Week calls "public opinion." They trace the rulings of the arbitrators in cases involving such victimizations and demonstrate that "both the National Labor Relations Board and arbitrators have shown a tendency to follow public opinion in deciding on case-bycase discharges.' "Public opinion," according to these people, is the degree of witch-hunt hysteria in the country. From this standpoint they believe that Eisenhower's order will create the proper climate for moving in on the of the Fur and Leather Workers Union of Cincinnati." In this case a whole union local is given the treatment on the basis of the shift in "public opinion," that is, the improve living conditions for the

"public opinion" of Eisenhower. This new incentive for thought-control terror in the factories is a mortal danger to the security of the labor movement. What is a "subversive," according to an True, this is only a formality. In effect this purges 1,000,000 and fissures will appear in the anti-labor employer? Is there any doubt The bureaucratic machine pushes party members in one broad Stalinist monolithism. And with LIIT DOULCE CTATE IAW that the barons of American industry re- through its proposals at factory gard anyone who believes that the work-meetings in an atmosphere of ers have any rights is a "damned communist." And under the guidance of "public opinion" what is to prevent employers from getting rid of shop committeemen and stewards who have long been a thorn in their side? The rule of the witch-hunting inquisition is that all definitions, all rules of evidence, all rights to be judge, jury and executioner are concentrated in the hands of the inquisitors. Now this inquisitional ployers throughout the country will be given a clear go-ahead signal and union contracts will become so many scraps of paper.

Malenkov's Promises of "Abundance

By John G. Wright the light and food industries but When Malenkov - Khruschev & heavy industry as well. The Negro Struggle Separate But Equal KKK

By Jean Blake

The recent announcement by the Ku Klux Klan of Florida that it now invites Negroes to join its ranks — in separate klaverns, of course — was treated in many daily papers as a "man bites dog" kind of story. Negro commentators also treated it as a ludicrous proposition. Many of the weeklies printed a picture captioned "The Harlem Branch Ku Klux Klan" showing the radio character Amos in full KKK regalia discussing the matter with Andy.

But jokes aside, why is it so hard to imagine a "reformed" Klan? Why shouldn't this most notorious race-hating crganization modernize and legalize itself by conforming to what has been the accepted doctrine of the South, upheld by the U.S. Supreme Court, that segregation is "the American way" so long as "separate but equal" facilities are provided for colored people?

Race discrimination in America has maintained itself since the days of chattel slavery by adapting its forms to changing conditions. Old-fashioned mob lynching of Negroes has given way to violence by police officers under the cover of legality, and to bombing and dynamiting of Negro homes in Chicago as well as Florida. "Lilywhite" organizations and institutions in some cases have granted a few individuals membership, have made a few exceptions so long as the general rule is maintained that the mass of Negroes remain segregated.

Many unions have admitted Negroes, either in Jim Crow locals or some other form of second-class citizenship. Even maior CIO and AFL unions, which have felt the pressure of the need to unite all workers, regardless of color, to strengthen their bargaining power, still maintain distinctions by subtly barring colored workers from decisive policy-making positions.

But the most important force in maintaining Jim Crow has been the government. Politicians have given lip service to the principle of equality, but whenever the chips are down, they make it clear they mean a different kind of equality for black and white.

The National Association for the Advancement of Colored People is challenging the "separate but equal" doctrine through the school cases now before the Supreme Court. The NAACP will demonstrate that separate facilities in practice are always inferior. The Court is quite likely to concoct some legalistic principle to the effect that separation should be illegal where it can be proven that equality does not exist. Then segregation can continue undisturbed, and Negroes will have to engage in lengthy and costly legal battles to prove inequality in each individual case.

Or, even if the Supreme Court were to reverse its traditional position that segregation is legal, and rule against "separate madge of Georgia have said they'll eliminorganize education on some private basis. (And Eisenhower appoints Byrnes as U.S. representative to the UN!)

It's no more ridiculous for the KKK to stand on the "separate but equal" doctrine than for other American institutions. The action of that openly anti-Negro organization merely points up the falseness of the doctrine itself for those who claim "democratic" principles.

Push-Button Factories

By Lynn Marcus

Our tired, rotting capitalist system no longer has any serious interest in providing society with the benefits of modern science. Atomic bombs, hydrogen bombs, cobalt bombs, guided missiles, multi-million-dollar toys for the military brass, but virtually nothing that is useful or will make man's daily job easier. It is not only Marxists that point this out; almost daily, some hireling of the capitalist class makes a public statement in which he admits that capitalism is no longer interested in society's real progress.

One of the latest confessions of capitalism's failure comes from Henry F. Dever, President of the Brown Instruments Division of the Minneapolis-Honeywell Regulator Company in Philadelphia. In a dispatch published in the Oct. 21 N.Y. Times: "....Henry F. Dever insists that there is no reason to believe that American industry will ever reach a point at which machinery will fully displace manpower. To arrive at such a plan, he said, all the best brains in the industry would have to agree on both the methods of bringing this about and on plans to make it possible. Neither, he added, are at hand or expected in the forseeable future."

order to become a reality and the capitalists are incapable of that kind of national planning. We agree with Mr. Dever on this point: What Mr. Dever has learned from experience, Marxists have known and stated for over a hundred years. Marxists do not need Mr. Dever's word to know that socialist planned production is far superior to the national economic brawl called capitalism.

Mr. Dever is wrong, however, when he says we will have no push-button factories in American industry. Under a Workers' and Farmers' government, there will be no trouble in getting the management of industry at that time (the workers themselves) to agree on taking the steps that will shorten their hours of work and multiply their real wages.

A socialist America will soon free man municipal elections, to date have punitive sentences. from his slavery to the machinery of pro- spoken to 40 union meetings.
