Socialists Begin Preparations for 1960

SWP Convention Calls For Political Challenge To Big Business Parties

By Murry Weiss

The Socialist Workers Party concluded its Eighteenth National Convention last week after three days of intensive work in an atmosphere charged with self-confident

realism and revolutionary socialist optimism. The participation election which the resolution country marked a high point for American socialist movement. the party since the 1946 Chicago Convention on the eve of the the class struggle as a result of

American communist movement, veterans of the trade-union movement and front-line fighters in the Negro struggle. Thus, the vitality and continuity of the Marxist movement in the United States was personified in the convention by socialists whose records go back to the IWW, the pre-1917 Socialist Party left wing, the early years of the Communist Party, the founding period of American Trotskyism, and by newer strata of youth coming from different tendencies in the more recent history of the American radical movement.

An active role was played by delegates who broke from the Communist Party after the Khrushchev revelations and who renounced the counsel of despair and capitulation to "democratic" capitalism offered by such former CP leaders as John Gates. These militants broke with Stal- an uncertain prospect." inism, not socialism, and they have learned that membership in the SWP is the path for genuine revolutionists who are determined to carry on the fight against American capitalism.

Another contingent of delegates came to the SWP as a result of the struggles of the leftwing youth within the reformist Social Democracy in the last few years. In the course of their battle with the "socialist" supporters of the State Department they fused with the SWP youth youth as a result of the recurand launched a new, nationwide rent boom-bust cycles of the socialist youth movement.

NAACP Delegates Face Crucial Policy Questions

Deny Equal Justice in Rape Cases

The International spotlight, which focused on the South's the idea of independent socialist double standard of justice in rape cases during the recent Tallahassee trial, continues to

In the Tallahassee trial, Florida makes a united socialist ticket maintained its tradition of the death penalty for Negroes only in rape cases by according ficulties and uncertainties of mercy to the four white attackers of the 19-year-old Negro der present conditions, the SWP co-ed. A flood of demands that Florida accord the same mercy to five Negroes facing execution didates so that in any event the for alleged rapes of white womessage of socialism can be men has brought partial results. A hasty second trial of a 16year-old Negro farmhand, Jimmy Clark, resulted in a life tional situation, the growth of sentence. Moreover, the State Board of Pardons, has ordered a 30-day delay in the execution of Samuel Odum.

This reprieve for Odum is, however, very short and telegrams and letters from organizations and individuals to the Board of Pardons in Tallahassee are still vital to save Odum and the three other Negroes now facing the electric chair on rape charges.

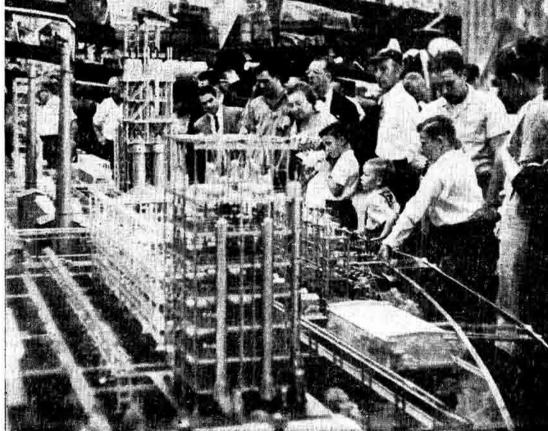

An aftermath of the Tallahasraping Negro women. Such com monplace occurrences are customarily hushed up by officials or ignored by the white press. In past weeks two white men in Little Rock were arrested for the rape of a 27-year-old Negro woman. She had been brutally beaten and all her front teeth knocked out. In North Carolina a white man has been arrested for raping an 11-year-old Negro

'Self-Defense,' Political Independence and Mass **Action Are Key Issues**

By the Editors

Some 2,000 delegates are gathering in New York City July 13 for the fiftieth annual convention of the National Association for the Advancement of Colored People.

Will this be just another routine yearly gathering at which delegates dutifully sit and listen to lengthy speeches by their top officials and by a long string of invited politicians and other dignitaries? Or will it be a convention at which the delegates. themselves do their share of the talking - and, what's more important, decide on policies for the organization's coming year of

There are a number of accomplishments in the past year on which the NAACP may congratulate itself, but these weigh little against the mountain of injustice crushing the Negro people in this country. An objective survey of the past year indicates that in the battle against Jim Crow, the NAACP is, at best, just inching along; and, at worst, standing still.

Let us hope that this fiftieth convention will adopt policies and plans suitable to the tasks ahead, so that the official slogan 'Free by '63" will regain its ring of confidence and the perspective of achievement.

Among the many issues facing the delegates three are para-

(1) Reversing the suspension of Robert F. Williams, president of the Union County, N. C., branch for his statement urging Negroes to fight back against racist attacks, meeting "violence with violence" if necessary. Most Negroes (and most whites who are for full equality for all) favor Williams' position, which is nothing more than the traditional and legal right of self-defense.

The NAACP national office appears to be straddling on this issue. In words it says that the NAACP is for armed self-defense where necessary. (These words lose most of their strength since the only place they appear is in the document suspending Williams.) But actions speak louder than words - and the action of the NAACP top brass was to remove Williams from his elected

What conclusion can those Southern branches, which are faced with the same racist violence as Williams' branch, draw from the national board's action against Williams? And this at the very moment when a survey by three unimpeachable national organizations shows a mounting wave of violence against Negroes

If the NAACP is the democratic organization it claims to be. the delegates can bring the issue of Williams' suspension to the convention floor, debate it and take a vote. (2) Should the NAACP remain an organization devoted almost

exclusively to lawsuits, lobbying and education; or should it ex-Workers of America to strike a union policy of pressing for ed increases in labor costs have pand its activities to include mass action? Why do movements like the Montgomery and Tallahassee bus boycotts, the Youth March for Integrated Schools, etc., have to organize outside the NAACP? So We Went to See The Slums of Glasgow

By Marvel Scholl

A small item in a recent issue of the British socialist weekly, the Newsletter, datelined Glasgow, tells of a fight brewing between the dock workers and the National Dock Labour Board and the employers.

Conditions are being undermined due to NDLB violations of an agreement limiting the number of men assigned to each dock. At the KGV docks there is little enough work for 150 men, yet the Board sends 50 additional men to vie for jobs. Dockers are granted 12 shillings a day when they do not work, but of late the employers have refused to grant even this miserable stipend (about \$1.70) unless the men sign in for all three shape-ups.

This small item brought back vividly the time we spent in Glasgow last year. Our hosts for that visit were 32 dockers, shipyard workers, machinists (they call them engineers), building laborers and other workers who belonged to the socialist wing of the Labour

They told us, "You must see the slums of Glasgow. Nowhere in the world are the slums

So we went to see the slums of Glasgow. We went into the homes of these friends. And this is what we found:

Abie and Betsy, with their three small children, occupied a "single end" apartment. The house, containing about 20 families, had not been repaired in 40 years. Great gaping holes in the concrete walls, broken sidewalk in the "close" (entry), a single toilet in a closet in the hall for each floor.

Abie and Betsy's apartment was unusual; it had two rooms -one a bedroom just large enough for a double bed for the two girls and a cot for the little boy. Most "single ends" have just one room.

The main room was about 12 by 10 feet, with a double bunk-bed sunk into the far wall for the parents. In one corner was a small fireplace, in another a gas stove. The sink was built into the window ledge. One wall had a dish cupboard, the other a buffet. Between these two stood the dining table. There was just enough room between the other furniture and the table to pass sideways. Not one square inch of that room was unused.

Sparklingly clean, yet so overcrowded that there scarcely seemed room to breathe, let since the crisis in the Communist party. And many of those who alone live, this "apartment" had been Abie and Betsy's home since their marriage.

The Scotch lawmakers are very moral people indeed. One couple whom we visited had a son just 10 years old. Now that the boy had reached that age it was no longer legal for him to sleep in the same room with his two sisters. Therefore Alex and Ellen, who live erties and the united political in a genuine "single end," were eligible for one of the new Council Flats under construc-

Abie and Betsy's son is only seven. They must wait their turn another three years.

There has been no housing constructed in clares. "But this did not cancel maintaining and exercising full Glasgow since 1916. That was when the Rent out their value as a means of freedom to present and defend Control Act went into effect, Rents were frozen and if a landlord failed to carry out into positive action on the key and public, we joined in action necessary repairs, the tenants were allowed to deduct 10% of their rent.

Landlords were unwilling to spend anything on repairs so tenants took the 10%. Today thousands of buildings in that grim city have been abandoned by their owners. They are still occupied by tenants who pay no rent. But the condition of those buildings is almost beyond description.

At present construction of the city-owned "Council Flats" is underway. Five gigantic projects circle the city. The one we visited will house 40,000 when it is finished. The flats contain four or five sizeable rooms, with that almost unheard of luxury - a private bath!

The project had its Tenants League and its own newspaper. When we were there the League had just won a fight to keep the city from raising the rents.

During our visit to Scotland the London busmen were on strike and the workers we talked to were filled with admiration for the strikers. But one man voiced chagrin:

"Every big strike wave we have ever had in Great Britain before this one began right here on the Red Clyde. Now the Londoners have taken the lead. We'll have to do some-

A Salute to **British Marxists**

In reply to greetings from British Marxists fighting in the Labor Party for a program that can really defeat the Tories and establish a Socialist Britain, the SWP convention sent the following cablegram:

"The Eighteenth National SWP Convention warmly welcomes your fraternal greetings. We salute the formation of the Socialist Labor League. Your militant defense of the program and movement of revolutionary socialism against such formidable enemies in Britain is an inspiration and model to all your co-thinkers across the Atlantic.'

The cablegram was addressed to Brian Behan, chairman of the Socialist Labor League, and was signed by James P. Cannon and Farrell Dobbs.

The Socialist Labor League, under proscription by the Labor Party's Right-wing bureaucrats, has mobilized considerable party support against expulsion of its adherents.

For Summer Reading

Take part of your vacation to catch up on those books and pamphlets you've meant to read. Here is our recommended list, including several new publications that deserve consideration for your permanent library.

Economic and Philosophic Manuscripts of 1844, by Karl Marx. You may have heard of these rare productions by the 26-year-old genius and wished you could read them. Now they have finally been translated into English. 209 pp. \$1.

Principles of Communism, by Frederick Engels. One of the best introductions to the Marxist outlook. 18 pp. 15 cents.

The Irregular Movement of History, by William F. Warde. A highly readable explanation of the laws of uneven and combined development, with striking examples of how they work out. 51 pp. 25 cents.

Introduction to the Logic of Marxism, by William F. Warde. Lectures on dialectical materialism that make it easier to understand a difficult subject. 73 pp. \$1.

Recessions and How to Prevent Them, by Harry Kelber. A straight talk on an issue that concerns every worker. 38 pp.

The Power Elite, by C. Wright Mills. A much discussed book on social relations in America today, 423 pp. 85 cents. Paperback.

The Wall Between, by Anne Braden. The absorbing stor of what happened when the Bradens helped buy a home for a Negro family in a white neighborhood, 306 pp. \$3. (Regularly

By Leon Trotsky:

Trotsky's Diary in Exile: 1935. From Erich Fromm's review: "This is a modest man; proud of his cause, proud of the truth he discovers, but not vain or self-centered . . . Just as was the case with Marx, here was the concern, understanding and sharing of a deeply loving man which shines through Trotsky's diary." 218 pp. \$4. Literature and Revolution. A Marxist classic of the rela-

tion between proletarian politics and art. 256 pp. \$1.98. The Chinese Revolution. - Problems and Perspectives.

A sampling of Trotsky's views on a subject that finally shook the world. 22 pp. 35 cents. Three pamphlets on Germany: The Turn in the Communist

International and the German Situation, 20 cents; Germany, the Key to the International Situation, 35 cents; The Only Road for Germany, 65 cents. All three for \$1.10. Written in warning of the danger of Nazism, these pamphlets could well serve as texts in a basic course on Marxist politics.

By James P. Cannon:

Notebook of an Agitator. A collection full of humor, irony, anger and heart-lifting vision of the socialist future. 362 pp. Cloth \$4: paper \$2.50. The History of American Trotskyism. The story of the dif-

ficult struggle to build a revolutionary socialist party in the heartland of world capitalism. 268 pp. Cloth \$2.75; paper \$2. The Struggle for a Proletarian Party. A companion book

to the History of American Trotskyism. Cloth \$2.75; paper \$2. America's Road to Socialism. A lucid presentation of the prospects for socialism and a stirring forecast of what socialist America will look like. 78 pp. 35 cents.

Socialism and Democracy. The Marxist view on a topic that is under vigorous debate today. 21 pp. 15 cents.

Eisenhower "Helps" McDonald

When a union confronts a united front of employers determined to inflict defeat on the workers - and this is the sort of foe that the steel union faces in the current negotiations - only one kind of strategy can smash the bosses' plans. The union must stake out clear and firm demands, capable of arousing the workers' enthusiasm, and prepare for a test of strength and endurance on the picket line.

David McDonald and his fellow bureaucrats in the United Steel Workers of America are going about the showdown struggle with the steel owners in exactly the opposite fashion. They are surrendering the union's positions in advance of the fight. Their treacherous behavior can prove costly to the steel workers.

McDonald has already 'pared down the union's demands considerably over what he indicated they would be at the outset of negotiations. (He never spelled out these demands clearly but had talked about big money gains, reduction in hours, and settlement of outstanding grievances over working conditions.)

Next, he agreed to postpone the strike, scheduled to begin July 1, and continue negotiations without securing an agreement from the employers that any gains they would be forced to grant would be retroactive to July 1.

It is true that McDonald did not cede this vital bargaining point to the steel companies directly. In fact, he refused to abandon retroactivity two weeks ago when the employers proposed it. But then President Eisenhower - whom the union had denounced as in cahoots with the steel barons - came along and asked for a strike postponement, and McDonald ac-

ceded to his request just like that, without even insisting on retroactivity.

But that's not all that McDonald yielded to the steel barons. In a letter to Eisenhower, June 27, which prompted the latter's request for a postponement of the strike, McDonald asked the President to help the union negotiate a "non-inflationary" wage increase "such that in your words the 'price [of steel] is not compelled to go up'."

Earlier in the negotiations, the union leadership had scored the corporation's phony argument that a wage increase would cause a new price increase. The union had proved by unimpeachable statistics that inflation was caused by factors totally unrelated to wage increases, but very much connected with the steel barons' profit-making. The union leadership had also denounced the Eisenhower administration for backing up the steel corporations in their hue and cry about "inflationary" wage increases.

In this connection, the AFL-CIO Executive Council said: "The basic issue in York's Coliseum, a vista of Sothe steel negotiations is whether an in- viet power emerges. The unidustry which is swollen with profits . . . can terrify the country with phony appeals to the dangers of inflation. . . .

Well it looks as if McDonald has been terrified. For what he proposed to Eisen- hurled into space. Oil and Taxes Don't Mix

Do you ever get the feeling that you are being boiled in oil when you add up the dollars taken from your wages for income taxes, sales taxes, entertainment taxes, "luxury" taxes and dozens of other

But those in the oil racket don't feel that way. It seems that oil and income taxes just don't mix. The June 15 United Mine Workers Journal offers some instructive facts about this oddity.

The giant oil corporations not only pay far less income taxes than other corporations but the bigger outfits pay less than the smaller ones.

A few examples: Ten of the largest corporations in 1957 paid 44% of their declared profits in income taxes. But a benevolent government took only 14% of the admitted profits of the ten biggest oil corporations.

That's the average figure. The five "smaller" oil outfits paid more taxes than the five really big ones. In fact, the biggest octopus-Standard Oil of New Jersey, with greater declared assets than any other corporation in the world-paid only 7% of its 1957 "net" in income taxes.

Standard was still far behind the spectacular 1956 record of the Arabian-American Oil Co. Aramco pumped \$280million from the lake of oil under the Saudi Arabian desert and didn't let go of a thin dime in U.S. income tax!

Of course the oil companies do have their burdens. Some colonial governments insist on at least a trickle of their natural

resource. Standard, for example, paid about \$350 million in taxes abroad as against \$53 million in this country. (That was on a gross profit of over \$1 billion.)

Lest you begin feeling sorry for the of a 10-billion-volt atom smashoil barons, however, remember that the Treasury Department permits them to subtract taxes paid abroad as a "cost" before making out the U.S. tax forms.

It's pleasant to know that at least somebody gets a break on taxes in this country. However, it's also quite a luxury for it means \$11/2 billion a year in tax and on the future. A legend revenue that the average person has to reads: "On the basis of wide- "Suppose someone is ill at home help make up.

How is this done? Standard Oil indicated the answer in its 1957 report to shortest working week in the stockholders. Payments to the U.S. and world with simultaneous inforeign governments added up to \$2,300,- crease in the welfare of its pop-400,000. Of this, the company put \$400 ulation." million in the kitty. The rest was made up by consumers who coughed up between six and nine cents a gallon each time they amount of electric power is now bought that precious stuff at a gasoline produced every three days as pump.

How do the oil companies get away with it? Easiest thing in the world. A ent generating capacity will be thoughtful Congress permits them a 27.5% "depletion allowance." Their pumps may suck oil out of the ground for a couple of generations and they may get back their initial investment in a few years. But each year they start out with 27.5% of their yield tax free.

Why not a depletion allowance for wage workers? Nothing to it. Just put some people you control into Congress.

The "Security Risk" Decision

Like any other group of capitalist politicians, the Supreme Court justices appreciate the value of taking some of the curse off a reactionary decision by following up with a relatively liberal one. Thelatest example of this came when the high court dealt a crippling blow to the First Amendment with its June 8 Barenblatt and Uphaus decisions. Three weeks later, in its first ruling on the government's industrial security program, it held that a defense plant worker cannot be fired as a "security risk" without the right to confront and cross-examine his accuser.

The court certainly was presented with a happy opportunity to resume its "liberal" posture with this particular issue. The entire security program so crassly violates the Bill of Rights that the court would have been hard pressed to give it its blessing even if it wanted to. The eight to one majority testifies to this.

The issue at hand was nicely understated in a July 1 New York Times editorial which said: "Our security programs - the one for government employes even more than that for industrial workers have an unhappy history of unfairness."

Thousands of "security" victims have been summarily fired from their jobs. At best they have been offered the opportunity of a star-chamber hearing and an expensive, drawn-out court fight. The security program has been a basic component of the overall witch-hunt which has corroded American public life for the past dozen nize more; miners have to work

Yet the court evaded the constitutional issues involved, deliberately confining itself to a technical decision, and one that easily lends itself to reversal. It merely ruled that neither the President nor Congress have authorized the firing of workers without the right of confrontation of accusers.

In considering the industrial security ruling, it is also instructive to note that the sole justice to uphold the right of federal star-chamber purges was Tom prisons. Clark. As Attorney General under Truman's "fair deal," he was the man who trade unions. "Supposing a logical achievements, the free issued the original "subversive" list on which the security program is based. (People are fired on the basis of real or alleged membership in one or another of several hundred organizations arbitrarily branded as "subversive.") Clark's reward for this service was appointment to the

The court's decision can be used in the fight to end the vicious industrial "security" program; but militant unionists would be well advised not to mistake this as the end of the witch-hunt.

"And I told the guide at that Russian exposition that if they think they're going to seduce us with their vodka . . ."

Britain's Buchenwalds In Kenya

Britain's "Buchenwald" is how Tribune, a British socialist weekly, describes the Hola detention camp in Kenya. (Buchenwald was one of the most notorious concentration camps under the Nazi regime in Germany.)

Last March the British government was forced to conduct an investigation of the Hola detention camp after eleven prisoners died of beatings administered by the guards. A coroner found that the beatings had been "entirely unjustified and illegal."

However, says Tribune, these eleven deaths were not exceptional cases. Back-breaking labor and torture resulting in deaths are regular features of the detention camps that British imperialism set up in Kenya to prevent the growth of the national independence movement.

Thus, "On June 9, the Deputy Public Prosecutor of Kenya reported on Manyani camp. He found that a legless man had been made to work; that a detainee had been subjected to the water torture; that another Sukarno's move had strong had been beaten with a plastic hose on the testicles and that army, whose top officers are others had been made to stand facing the sun holding stones above their heads."

Colombo Harbor

Despite the Bandaranaike government's use of troops to work cargo, the port of Colombo, Ceylon, remained virtually paralyzed in the ninth day of a harbor strike that began June 24. Fifteen thousand port workers answered the United Port Workers Union's strike call in protest against the government's attempt to cut wages. The UPW is led by adherents of the Lanka Sama Samaja Party, a revolutionary socialist organization. The LSSP is the largest working-class party in

Ceylon. The harbor workers' strike has dealt additional blows to the Bandaranaike government which enjoys only the slimmest support in Parliament and may fall any day. If it does, new elections will probably ensue.

Jazz Duo Rocks Tchaikovsky Hall In Moscow Hot jazz finally came to the

Soviet Union last month when two American Negro artists gave an impromptu concert at Moscow's Tchaikovsky Conservatory before some 500 music students. The students and their instructor went wild with enthusiasm over the performance. The two artists were Willie Ruff and Dwight Mitchell, playing the piano and bass fiddle. The two are a renowned duo in this country. "We came here as ordinary tourists," Mr. Ruff said. "We just came over to the conservatory and told them who we were, where we had studied and asked if they wanted to hear us." Professor Lev Vlasenko then arranged the concert.

Asked how he squared his "The authorities Arouses Mexicans

"Title I" — Fancy Name for an Old Game of Profits

By Gordon Bailey

In the ten years since it went into effect, the Title One Slum Clearance Program has offered little to New York tenement dwellers hoping for better housing. But

committee.

property.

of \$409.244.

it turned out to be a bonanza to politicians, real-estate sharks and racketeers out to make easy sor. That is left to the profitmoney at the expense of tenants and taxpayers.

The measure was passed by Congress in 1949 to aid cities in replacing slums with new apartments, stores and public buildings. Under its provisions a city buys slum property, guaranteeing its owners a good profit, and then sells it at a lower price to private interests, who are supposed to redevelop the area on profit-making basis.

One-third of the city's loss is met by local taxpayers; while the federal government makes up the other two-thirds.

In New York many of the projects have bogged down in a morass of profiteering, fraud and scandal. Insiders have coined hundreds of thousands of dollars without tearing down a single slum. Persons with racketeer connections have entered the lucrative field. Where slums have actually been torn down luxury apartments have been built instead of low-rent projects for the displaced tenement dwellers.

In one case reported by the New York Times, the NYU Bellevue project, a tenement property in mid-Manhattan, was 1953 the city bought the property for \$7,850,854 and sold it to a syndicate for \$1,020,000. The syndicate then collected

\$2 million in rent from the tenants of the slum buildings for practical big business man is the next three years. They paid that Soviet orders "are cagerly large fees to various members of commercial competitors, such as dered." Two lawyers among the legal fees. Two accountants got \$37,000. An insurance broker nvestigation of Soviet trade who invested \$5,000 in the syn-

ance commissions. At the end of four years none of the old buildings had been sponsors defaulted on their con-

tract and sold the project.

Nine other projects launched under Title One in the past ten years were handled in much the same way. Property in Harlem that cost the city, \$5,244,383 was turned over to a group of investors for \$415,000 and mortgages. Rent from tenants in the buildings brought the syndicate \$71,500 a month. In the next five years the sponsors received \$3, 047,509 from the property. Seven years later only three of six proposed new apartments had been built and 35 tenants were still occupying condemned slum dwellings.

Even when slums are actually torn down and new apartments put up the former slum dwellers do not benefit. They are shunted off into other slums while their former homes are replaced by apartments renting for \$150 or \$250 a month and more.

MOSES REARS HIS HEAD

Robert Moses, New York Park Commissioner, who also heads signed to help erect low-cost Clark Foreman, the ECLC housing. He says the intent of

Committee, has made profitable loans to sponsors of Title One projects through the Federated Bank and Trust Company of which he is president. Shanahan's duty is to pass on the financial reliability of prospective sponsors. Moses defended his deputy against criticism by saying that his banking connections had been invaluable to the committee.

Persons with connections in the Democratic Party have been favored over others. A roster of Title One sponsors reads like a list of "who knows who" in Tammany Hall.

Public protests mounted when the committee appointed Louis Pokras, an associate of gambler Frank Costello as sponsor of the mid-Harlem project. Mayor Wagner was forced to cancel the

appointment. Robert Moses has defended the actions of his committee as the only way to get private enterprise interested in slum clearance. He claims that Title One is now a "dead duck" because

of the disclosures. Title One may be a dead duck in New York, but as a means of replacing slum dwellings with low-cost housing it never hatch-

ed from the egg. In ten years only 200 acres of New York's 7,000 acres of slums

have been torn down under this program.

At this rate it would take 350 years to replace the present slums, without touching the new slums that would develop in that
