### **Steelworkers Bitter Over White House Aid To Union-Hating Bosses**

#### By Alex Harte

On Oct. 9 President Eisenhower set Taft-Hartley machinery in motion against the 500,000 steel strikers. But the angry reaction of the steel workers to this government strikebreaking move

has given pause to the administration. It is hesitating about following through with an 80-day injunction against the strikers. In the recent Longshoremen's strike the "fact-finding" board appointed by Eisenhower on Oct. 6 had completed its "study" of the strike by the next morning and an anti-strike injunction was issued later that day. But the steel "fact-finding" board set up on Oct. 9 was given until Oct. 16 to report and then the deadline was extended to Oct. 19. Moreover these "fact-finders" hough forbidden by the T-H law to make recommendations for a settlement - are openly doing more mediating than fact-finding. Only after they report can

the President seek an injunction. Till now the administration and the steel companies have worked in perfect harmony against the union. Eisenhower warned against any "inflationary" wage increase during negotiations and the early part of the strike but otherwise kept

Price 10c

Coast longshoremen bowed to a Taft-Hartley injunction and ended their eight-dayold strike Oct. 9. Eisenhower's use of the strikebreaking law is reported to be the fastest on record.

The union is demanding a 50 - cents - an - hour package agreement. Base pay is now \$2.30 an hour. They also want a signed agreement that no automation be installed without the consent of the union.

If the union's demands are not met, the longshoremen stand ready to resume strike action on Dec. 27 when the 80-day "cooling off" period ends.

At La Quinta, Calif., striking Steelworkers from three southern California locals hold placards as they cluster in front of road leading to George E. Allen's home where Eisenhower was on vacation. The strikers did not want the president to invoke the Taft-Hartley Act in the steel strike. Eisenhower was too busy golfing to see the demonstrators. Besides, it might displease his host, a director of Republic Steel, one of the giant corporations out to cut down the union, if he listened to the appeals of the strikers.

Besides, His Host Likes Taft-Hartley

Your Help

Is Needed!

At a convention a few months ago, delegates of the Socialist Workers Party decided to undertake a campaign to raise \$16,000 as a socialist publications fund. The delegates began preliminary work at the convention itself but gave themselves until December 15 to meet the deadline. In our next issue, we will report the first results from the various areas and thereafter give a weekly account of the campaign.

We support this effort of the Socialist Workers Party as an important undertaking. We urge our readers to help in every way possible to make it a success.

In the American radical movement, the Socialist Workers Party is the main organized force pressing for nomination of socialist candidates in the 1960 presidentia' election. Toward this objective, its energetic and selfsacrificing Michigan members and friends are mopping up right now on the tough job of collecting enough signatures to put the socialist movement on the ballot in that state. In other areas work is in the planning stage

The main aim of this activity is to spread the socialist message as widely as possible; to bring it to new sections of the working class who feel they've had enough of the two parties of big business.

Socialists always serve as educators, bringing Marxist ideas into circles that might not otherwise even hear of them. This work that goes on year in and year out becomes especially important as general interest in politics rises during electoral contests. It becomes a first-rate problem to keep up the supply of literature, for the socialist forces are few and printing costs are high.

Thus it falls on the most sympathetic people to dig deep for what is essential to keep going - money.

We know that for many socialists right now money is not exactly plentiful. In quite a few cases they are involved in strike struggles that have knocked out the family budget. But we also know that it is precisely these socialists who understand best how important to success in the class struggle the dissemination of socialist ideas is. It will not surprise us at all to see such comrades leadstated: ing the list in many places in giving to the cause to which they have dedicated their lives.

To people who feel it a duty to contribute to worthy causes, but who also think the money should be distributed in various directions, we urge reconsideration of the relative need and importance of the movements appealing for aid. Socialism represents the society of the future, a society of enduring peace, well-being, brother- our democratic system will lead hood and happiness. Every dollar you contribute to the Amendment as it applies to the socialist movement today speeds the arrival of that future. powers of legislative investiga-

Page Two

The Maha Jana Eksath Peramuna, or MEP, was a middle- the pressure of the extreme class coalition with a reform pro- communal and class-conscious gram. The coalition received a

socialist coloration through two ex-Marxists in the cabinet namely, Philip Gunawardene and William Silva. Another group in the alliance called itself a Sinhalese Language Front and was led by Wijayananda Dahanayake, the man who recently replaced Bandaranaike as prime minister. The largest group in the MEP was Bandaranaike's Sri Lanka Freedom Party, a party of small capitalists.

#### **Racialist Bloc**

From the outset a bloc of militant Buddhists and Sinhalese racialists, recruited from all groups in the MEP and backed by a section of Buddhist monks, sought to influence and control the Bandaranaike government. Within two months after the MEP government took power. this group resorted to direct action by staging a hunger strike to prevent the prime minister from granting "concessions" to the Tamils on the language question. This "passive resistance" was developed into active resistance when the racialist-religionist group organized anti-Tamil riots in June 1956, after a bill was introduced in Parliament making Sinhalese alone the country's legal lang-

## Who Benefited from Murder Can America's Capitalists Be Persuaded?

By Joseph Hansen

Soviet superiority in space navigation, as demonstrated by successively more complex and powerful rockets placed in orbit since the first sputnik two years ago, has led to a nationwide debate in America that can be summed up briefly: "How do we catch up?"

Is this controversy of interest to socialists? Aren't the capitalist spokesmen really demanding new, unheard of weapons capable of surpassing the implied defensive and offensive lead of the Soviet Union in the missile field?

The outcome of the discussion, however, can influence America's fate and the fate of the world. Socialists had better make themselves heard. That is if they are firmly convinced still not satisfied. How to Catch Up

**Back to Wallace?** international disarmament un-

der law so that the world may be rescued from the fear of war and the burden of armaments lifted forever from the backs of mankind."

(Meanwhile "our government" methodically continues to build bases for nuclear weapons trained on targets in the Soviet Union, the latest acquisition being in Turkey.)

#### The Guardian's Reasoning

The basic flaw in the Nation-Guardian position is its

idealistic rather than materialist approach. The reasoning goes something like this: Atomic weapons have introduced a qualitative change in the character of war. War has become so irrational that no rational human being can count on gaining anything from it except self-destruction. But capitalists as human beings are, in the final analysis, rational ex-

cept for a minority of armament-makers and the Pentagon crowd.

Already the capitalist class in its majority, the reasoning continues, is convinced of the irrationality of nuclear war, or with some effort can be persuaded of its irrationality. . . the non-socialist world," declare the editors, "must be the blame for the armaments throughout the continent of persuaded to the view that life can, and must, go on without armaments."

What stops our capitalist rulers from willing an end to armaments production is a mental block caused by a rather childish fear that prosperity hinges on arms-spending and that if the war budget were eliminated depression would follow as an immediate consequence. The same fear affects even workers and labor officials.

Thus it has become the first duty of every rational person. be he Quaker, Socialist or a Cyrus Eaton, to pitch into the job of convincing the fearful capitalists that the prospects are really not as bleak under capitalism as they believe. The senile system still has some juice available if you know how to put on the right

squeeze. That is the substance of the Guardian position. From the viewpoint of theory, this position does not come up to the level of the utopian socialists who were outmoded more than a century ago upon publication of the mention how labor's support of Communist Manifesto. The old the Democrats in 1958 paid of utopians at least sought to persuade the capitalists of the irrationality of capitalism and of laboration all the way from Titans and their mountings. the rationality of changing over the local to the federal level. ing of American socialists as

The "real" Such a sensible road to peace need in capitalist society is profits; that is the aim of cap- of Commerce, the National Asitalist production. That is what sociation of Manufacturers, and the steel barons are seeking to bend the productive forces to as they exert their "will" against the Steelworkers. And that you've got a far more rathat is what armaments and wars are for; not only for the immediate production of profits, but for safeguarding and even-

tually promoting the expansion of the production of profits. The desire to sell disarmament to the capitalists is so strong that the National Guardian even offers it on the installment plan. "A nation can't in a day switch production of time needed can be reduced by wise advance arrangements." Resumption of world trade is also promised as a sure "stimulus for industry." How the capitalist, merchants of peace

convert their foreign purchases into money in case of a depression is not indicated; although the possibility of depression despite disarmament is not excluded, since, we are told, capitalism would still suffer from its "general crisis and economic cycle."

**Class** Collaboration The Marxist concept of the lass struggle goes up in smoke: "The change to a non-military economy will require not only planning but determination,

and a readiness to accept work and sacrifice along the way. The political problems are enormous. The economic transition will call for mobilizing the full resources of the entire government in a prolonged attack on this question. It calls

for the full cooperation of labor and management with government all the way from the local to the .Federal level." (Full cooperation with the monopolists and their government

-is that the hidden meaning of the cryptic slogan, "peaceful coexistence"?) The socialist position, in contrast to this class-collaborationst view, is that the achievement of a non-military economy can come only by ending capitalism and replacing it with general economic planning. This in turn requires the work and sacrifice needed to build a revolutionary-socialist party. And this party can succeed in giving correct political guidance to the working class only if it persistently opposes class col-

As already indicated, the

National Guardian goes far in

ought to convince the Chamber anti-union heads of the corporations and their labor-hating government representatives tional outlook than they've had up to now. How can they refuse to let such reasonableness persuade them to enter the straight and narrow path?

Well, the editors of the National Guardian have asked for discussion of this proposed course of action. I would much prefer to discuss how socialists can utilize the new opportunities to gain a wider hearing for \$45 billion worth of military the socialist program, particugoods to other things. But the larly in 1960, a year which promises unusually high interest in politics. I would likewise prefer to discuss how we can more effectively participate in the big debate over how to catch up with Soviet technological progress.

But if one of the preliminaries to working out these more important problems is discussion of the program advanced by the Progressive Party under Wallace, the time will not be lost. Many Socialists will undoubtedly have something to

say on the question, for they have done a lot of thinking about that experience. The majority, I believe, will seek to help dispel the illusion that Wallace can be reincarnated or that his road, the road of liberal capitalism, offers anything comparable to a planned economy, such as the Soviet Union has, in meeting the great issues facing America and the world.

### ... Missile Base

(Continued from Page 1)

ering 200 miles of the Great Plains. According to Roscoe Fleming

in the Oct. 10 Christian Science Monitor, one base will be located near Cheyenne and will onsist of 24 Atlas missiles of 5,000-mile range. The other base, already under construction, is near Denver. It will consist of 18 Titan missiles, of 6,500-mile range.

"Each of these monsters," says Fleming, "will presumably have as a fixed target a Soviet city or strong point."

The ICBM bases are to be underground. Holes are being Then the area will be covered again. They will be "one-shot" bases since firing of the missiles is expected to destroy much of their installation-if Soviet ICBMs don't reach them first. As with all other American war preparations, the Atlas and Titan bases will provide a bonanza for big business. Morrison, Knudsen Co. of Los Angeles and Boise heads a group of six construction companies holding a \$67 million contract for preliminary work on the Titan bases. American Machine and Foundry Co. has received a contract for \$42.6 million to complete the steel work for the installation of the power plant and the missiles themselves.

Henry Wallace, candidate for president on the Progressive Party ticket in 1948, was all for peace until Truman

plunged America into the Korean civil war. Then he backed the imperialist intervention. By 1956 Wallace had moved so far to the right that he supported Eisenhower for the White House.

(2) The shift in American diplomacy was due primarily to successes in the international revolutionary camp that disrupted Wall Street's timetable for war. These successes include the big gains made in China and the Soviet Union and the intensified class struggle that has flared in the Middle East, Latin America and Africa. This rise in revolutionary potential gives new weight to socialist arguments. The ma iority of mankind is clearly

moving toward socialism! (3) Wall Street's timetable for war has been upset so badly that the war-planners are no longer able to bracket ahead in five- or ten-year spans as they did immediately after World War II. American socialists have been granted precious time for organizing a powerful

movement in the United States. (4) Big business has stepped up the class struggle in America by opening a major offensive against organized labor. Whether the labor bureaucrats course, add a proviso: "Catch like it or not, they are forced more and more into politics, even in conducting ordinary union affairs, and the rank and file are visibly growing more restless over the suicidal policy of supporting the political enemies of labor. The correctness

of the socialist stress on the need for independent political action is being confirmed every day in the week. We need only in the anti-labor Kennedy-Landrum-Griffin Act. This alone has reinforced the stand-

### **Class Struggle** And American Labor

The anti-union offensive puts labor's officialdom on the griddle. But instead of mapping a program designed to fight back, the top labor leaders complain that big business is "waging a class struggle in America precisely as Karl Marx wrote it would be waged."

Labor must not respond in kind, says Walter Reuther or "we are going to do really serious damage to America and the cause of freedom in the whole world." But what alternative does Reuther offer? Simply to adapt to the Kennedy-Landrum-Griffin law, as the labor leaders adapted to Taft-Hartley? Will Reuther stick with the Democrats despite their "double cross" on the labor bill?

Read Tom Kerry's examination of the new stage of labor-management relations in the fall issue of the International Socialist Review. Send 35 cents for a copy.

### **The School Placement Decision**

"DANVILLE, Va., Oct. 9 - A high NAACP official predicted here this week that school placement laws 'will be declared unconstitutional by the U.S. Supreme Court because of the way they are being used.' Speaking before the Virginia State Conference of NAACP branches, Gloster B. Current, director of NAACP branches, declared that 'this law gives prejudiced officials a device with which to deny admission of Negro pupils to previously all-white schools." (NAACP press release.)

"WASHINGTON, Oct. 12 - The Supreme Court turned down today an attack on state pupil placement laws that are designed to slow the pace of integration. The court refused to review two decisions upholding North Carolina's placement law." (N.Y. Times.)

Some people may conclude from the above quotations merely that the crystal ball in the NAACP's national office doesn't have even three-day visibility. But something much more serious is revealed. The NAACP leaders have either failed to recognize or are concealing from the Negro people the staggering blow dealt the school desegregation fight last year by the Supreme Court's upholding of the pupil placement laws.

Moreover, Gloster Current's speech reveals that even at this late date (after the Eighth Circuit Court of Appeals last month stopped the scheduled integration of three Negro children at the Dollarway school out of deference to Arkansas' new pupil placement law) NAACP "strategy" is not to sound the alarm but to lull public opinion with "predictions" that the Supreme Court will declare these laws unconstitutional.

The Supreme Court's upholding of the Alabama Pupil Placement Act last year marked a turning point in the legal history of the school desegregation fight. The decision put the court's stamp of approval on a political deal made between the Southern officials, Washington and Northern big business.

The deal emasculated the original school desegregation ruling. In return for giving up "massive resistance" the Southern ruling class was authorized to retain its Jim Crow school system 99 9/10% intact, with the other 1/10 of 1% of Negro children to be admitted to white schools as token integration. This accomplished, Southern "desegregation" would be frozen-for the 1/10 of 1% of Negro children in white schools are not to be regarded as the thin edge of an entering wedge but

lent about the high court's okaying of these vicious state laws. Unwilling to criticize the court, NAACP releases to this day have given the merest passing mention of it and nowhere has it assessed the ruling's true significance.

But the enemies of school desegregation were fully aware of what the upholding of these laws meant. Anti-integrationist Arthur Krock, dean of N.Y. Times correspondents in Washington and hobnobber with Supreme Court justices and senators, spelt it out last Dec. 30. The anti-Negro U.S. News and World Report did likewise.

Among battlers for integration, most of whom depend on the NAACP for information and evaluation of the progress of school integration, only a few voices have been raised. One of these was the Militant, whose main headline on Jan. 5 was: "High Court Shifts Stand on Segregated Schools - Racists Get Tip Off On What To Do."

Another is Martin Luther King, the Negro leader from Montgomery, Alabama. In the current issue of Liberation he declares that "the struggle for civil rights has reached a stage of profound crisis," which has "its origin in a decision rendered by the Supreme Court . . . which upheld the pupil placement law. Though little noticed then, this decision fundamentally weakened the historic 1954 ruling of the Court."

Comparing compromise on desegregation, for which this decision has become after night over the past few ernment; of the Tories' and Lathe basis, to the deal withdrawing federal troops from the South, thus ending Reconstruction, King writes: "The Negro was the tragic victim of another compromise in 1878, when his full equality was bargained away by the federal government . . . There is reason to believe that the Negro of 1959 will not accept supinely any such compromises in the contemporary struggle for integration."

But in order that the Negro people moderate nature, would secure brought immediate electoral and their allies not supinely accept such the floating vote. In this cona sell-out of school integration it is first necessary that they be told what is happening and how important it is. This the NAACP leadership has failed to do. At best this failure shows that they are not leaders-because leaders lead-and raises questions about their competence. At worst it raises the question whether or have long since secretly decided to live acted upon.

### The British Elections

The Tory victory in the British elections on Oct. 8 has not altered the basic feature of British politics since World War II. This is the polarization of the British people behind either the Tory Party, representing the capitalist class, or the Labor Party.

Even in the recent elections, in which the Tories scored their highest post-war gains, Labor's popular vote remained strong. (Labor won 43.9% of the popular vote; the Conservatives, 49.4%; the Liberals, 5.8%; others, .9%.)

A solid core of workers has continually voted Labor, even when it was dissatisfied with the official milk-and-water program, because these workers are loyal to the idea that the working-class must have its own party and must run the government if the working people's problems are to be solved.

In 1945, the lower middle class and the least class-conscious workers also rallied to Labor's banner. They wanted the working class to carry out the Labor Party's promise to reorganize British society along socialist lines. Had the party leaders acted decisively in this direction they would have continued to carry the masses with them.

But the Labor Party bureaucrats merely introduced a few social reforms (a number of which were subsequently retained by the Tories) and proceeded to carry out the regular functions of the capitalist state, such as rearming and imposing the arms burden on the working people. The labor bureaucrats' betrayal of

selves to going along with token integration in the South.

practical people," said this leading Democrat

"We must take it away from the sob-sisters." A more effective measure would be fines

for members of the City Council. They bear the largest responsibility for the lack of playgrounds and parks, the broken-down schools, slum conditions and low wages with which

parents are forced to rear their children. These are what foster the anti-social

forms youthful rebellion takes.

socialism caused the middle class and the more politically backward workers to lose confidence in the Labor Party and to swing over to the Tories.
