## Are Labor's Muscles Flabby and Untrained?

By Tom Kerry

The unification of the rival lations." federations was heralded as the dawn of a new era for the ormain impetus toward unification. United into one body, the union heads promised a reversal of the trend toward union retreat and stagnation.

Four years have elapsed since the merger. Drawing a balance of the four-year period in its account of the recent San Francisco AFL-CIO convention, the Sept. 19 issue of the magazine, Business Week, observed: "Four years ago, unions in the old AFL other. Mexican Students Fight Bus Fare Hike

Mexican students at Guadalajara use an overturned bus as a platform during a protest demonstration Nov. 5 against a sudden five-centavo fare hike. The students stopped 97 buses from operating but were attacked by federal troops who wounded 12 of them. The cost of living has been increasing sharply in Mexico. A five-centavo increase, which is four-tenths of a cent, doesn't sound like much unless you know that even a skilled Mexican worker makes only about \$2.40 a day. Most workers earn a lot less. As for students - it's the prin-

# Whitewash of Lynchers In Mack Parker Case Sets Off More Killings

By George Lavan

As a consequence of the unpunished lynching of Mack Charles Parker in Poplarville, a wave of racist killing and anti-Negro violence is sweeping through Mississippi.

The world outcry for punishment of the guilty, which folment of the guilty, which followed the Poplarville lynching They'll Gladly Eat last spring, at first gave pause to the white supremacists, making them wonder if perhaps the days were past when they could kill Negroes at will. But the subsequent emergence of the known lynchers - not only unscathed but as local heroes-has reassured them that the old days still remain. Mississippi's crime statistics are not endangered: a white man runs much greater risk of arrest and punishment for killing a deer out of season than for killing a

In the past month alone Negroes have been killed in Clarksdale, Philadelphia and Corinth, Miss. The first two of these killings are listed as lynchings by the Nov. 21 Afro-American, a leading Negro newspaper, which further reports that state authorities have taken even less interest in these two cases than

in the Parker lynching. The third killing—that of a 15-year-old boy by eight white teenagers -may also fall into the category of lynching. In addition a Negro pastor in Rolling Forks narrowly escaped a mob and in Tupelo the threat of mob action hung for days over the Negro community.

Booker T. Mixon, 35-year-old Negro, was found naked and un- 27-year-old Luther Jackson was conscious on the highway near killed. He and a girl friend were Clarksdale. # An Ice Cream Hat

For Secretary of Labor Mitchell, unemployment is a numbers game in which you eat an ice-cream hat when you guess wrong. But the members of the special Senate Committee on Unemployment Problems were told what unemployment really means at a Nov. 17 hearing in McDowell County, a West Virginia coal mining area devastated by chronic unemployment.

"Unemployment has caused emotional upset among pupils. . . . This has been our worst year as far as children not having clothes and school supplies," said a statement of 20 school teachers. Rep. Kee (D.-W.Va.) said he had heard reports of children taking home part of their free school lunch to feed their parents. "Men are making moonshine, cutting hot wires in mines to sell them for copper - even stealing food from garbage dumps," reported Howard Chambers, a local sheriff.

Gov. Coleman has made no reply.

Two days after Mixon's death, sitting in a car parked on the street, when a cop came up and ordered them out. Mrs. Thomas' affidavit, sent to the U.S. Department of Justice by the Mississippi NAACP, gives the following account.

"At the time I was getting out happened so quickly. When I arrived at the scene . . . Mr. Jackson was lying in a ditch. He had been killed instantly. I began to cry and said, 'You have shot him for nothing.' I knelt down beside him and the officer knocked me back. I hit him back . . He went to his car and call-

# So Your Tax Dollars Go Up in Smoke The Capitalist Casts a Wary Look

By Harry Ring If all goes well, 75 new hospitals, worth \$4 million each, will be at the bottom of the

ocean by the end of 1960. That isn't a literal fact, but the government does hope to have the dollar equivalent of those 75 hospitals - three Polaris nuclear submarines - un-

der water by that time. Those three machines of death, and the 75 hospitals that could have been built in their place. represent only a tiny fraction of the staggering price the American people are paying for a war budget so huge that it defies comprehension.

These are among the startling facts presented in the November issue of the Washington Newsletter of the Friends Committee on National Legislation. Under the title "What Happens to Your Tax Dollar?" The Newsletter analyzes 1959 Congressional appropriations and shows what they mean in terms of the social progress sacrificed to "balance" the arms budget.

In 1959, Congress appropriated Newsletter observes: "If transround frips to the moon."

national debt now stands at \$285 billion. In 1939 the debt was \$40.4 billion, including \$15 billion in debts from World War I. Banker's Dream

For the bulk of the American people this fantastic debt means ever-increasing taxes and inflated prices. But for the Wall Street tycoons who hold the IOU's, the government debt is a banker's dream come true. The nterest on it is currently estimated at \$9 billion. That's more han double the \$4.2 billion that the government grudgingly decided to spend on health, education and welfare.

The interest payment is \$1.4 billion more this year than last year. That's because the administration felt the bankers weren't doing well enough and hiked the nterest rate.

Financial and industrial interests cash in on every aspect of the arms program, including 'waste." The Newsletter offers some facts on this that received only passing notice in the press.

The word "waste" is actually ambiguous. For the business interests involved, it's something quite different. For example, Rep. F. Edward Herbert (D.-La.) revealed on June 3 that private contractors had overcharged the Air Force \$30 million on 14 con-

amount on two chemical plants and the Chamber of Commerce and then closed them without frighten the military authorities schools that weren't built.

from closing them." He said if these pressures were not applied If All of Us Lived "the taxpayers could save \$5 billion a year." In a Single Town

But the government has developed a substantial apparatus for dealing with those who would apply a different kind of pressure - those who are opposed to the suicidal war preparations.

Congress appropriated this year the not insignificant sum of \$124.211.000 for the nation's secret political police, the FBI. The bulk of that money is used by J. Edgar Hoover and his snoopers and paid informers, for the harassment and attempted intimidation of those suspected of heretical views — and who is more heretical than those who oppose or simply dare to question the government's war plans?

The Newsletter seeks to indicate how much of our money is drained off for weapons by listing the major items for which our national income goes.

Food is the only thing we spend more for than war preparations - \$67.4 billion in 1958. For arms we shoveled out \$45.9 billion. Only \$26 billion went for clothing and shoes and \$18.4 bilcording to the House Committee lion for medical care and death

For weapons research and test-Far greater sums are poured ing \$3.8 billion was poured down out just to keep military plants the drain. This topped considand installations going when erably the \$3.4 billion spent last year by all the people of the United States on books, magazines and newspapers.

# At the Intellectual on the Payroll

The intellectual is a mistrusted but indispensable figure in capitalist society. Mistrusted because he does not, simply by being an intellectual, have a property stake in capitalism and is liable to be oversensitive to its misdeeds and abuses. Indispensable, because no modern society can be operated without the skills and abilities which the intellectual possesses. The intellectual may become a hired man, swallowing his humiliation and selling his talents in the market place to men he despises for purposes which he deplores. But often he has some opportunity for independence and is able to adopt a critical stance towards the institutions of cap-

The latter fact has often been a cause for concern among the upholders of capitalism. How is it that normally well-fed people, benefiting from capitalist "freedom" become radicals and

The question has been raised again by Calvin Hoover in the September-October Harvard Business Review. He regrets the "almost total lack of enthusiasm on the part of so many United States intellectuals for an economic and political system under which they have fared so well." He seeks an explanation for what he describes as "the passivity and sometimes outright hostility of intellectuals to modern American society" and outlines an approach which he hopes will win their allegiance.

Whether this writer is himself an intellec-- and he makes it clear that, unless specially hired for the purpose, intellectuals have generally left capitalism to fight its own ideological battles - or one of the "thoughtful businessmen" to whom the Harvard Business Review is addressed is not manifest. In any case, he is shrewd enough to know that intellectuals cannot be won with the old stuff. Arguments for capitalism couched in terms of Adam Smith's 'invisible hand" guiding private interest to bring about public advantage can only raise a smile these days. Something more sophisticated is required which does not disguise the fact that the economy is ruled by the big corporation and is sustained by supports driven into the system

This is the capitalism Hoover wants to put over, but he spends a good deal of his space in showing how bad the Russian system is and assuming that there is no choice between the Russian model and American-style capitalism.

That many intellectuals have been attracted dustries is just another move by Russian achievement in the economic, tech-Bonn's program to end gov- toward the complete restoration nical and cultural fields is a tribute to the Rus-West Germany's federal assets ernment ownership of industry of pre-war capitalism in West sian revolution and reflects interest in a society minister, said that denationaliza- has the wholehearted support of Germany. What Bonn turned them into time-servers and cynics on

There is also a grain of truth in Hoover's ing opposition among the work- implied gibe at the "irresponsibility" of intellectuals: "Modern capitalism," he says, "makes it possible for the intellectual to enjoy the Bonn retained ownership of thrill of being a critic at little or no cost." Such 72% of Preussag which will be is the impression one derives from reading put up for sale later on in the some of the radical magazines. There are, unstock market. The same will be doubtedly, what might be called tolerated critics, who know they will not have to justify Volkswagen was the only auto their criticism in any way likely to cause them industry in the capitalist world personal inconvenience, let alone sacrifice. They to be operated on a state-owned, can even get recognition as critics and sell their non-profit basis. It proved, to books on the strength of their daring; but they the horror of private enterprise have not really broken with capitalism. They the world over, that an auto- have not accepted responsibility for replacing mobile factory could be run it with a better system by taking their place in

Of course, this is not the "responsibility" which Hoover wishes to induce, far from it. He workers have seen that nation- wants to win intellectuals to a sincere faith in alized industry means a higher the virtues of corporate business; not an easy standard of living which will be task when he has to call on business to elimidrastically undermined by the nate practices which only give ammunition to the critics. He seeks to provide them with "a

better understanding of the true nature of the economic and political systems which are in all-out competition in the world today." It is obviously extremely important for him that the choice should be kept as one between the bureaucratically degenerated Soviet Union and

He seems to assume that intellectuals only want a good material standard and about as much scope to express themselves as they get in present-day America. He is the dupe of his own unmeasured confidence in capitalism and therefore does not begin to plumb the sources of the critical tendencies of the intellectuals. He does not see that they often set off (and sometimes continue) with a preference that their abilities should be used for mankind and not to serve the profits of the corporations. He does not understand their reluctance to devoting time and talent to seeking for more effective means of destroying life when they might be used to extend man's command over nature. He does not consider their concern that the techniques involved in the mass media should be used for the perversion of the cultural values they have been taught to respect. He does not see the basic contradictions which weave complex patterns through the consciousness of the modern intellectual.

He does not understand, consequently, why intellectuals should frequently sense that there is something in the Russian system which is absent from American capitalism. He says that Russia is widely believed, by intellectuals, to be a "worker's state"; he puts up an argument against this, but that is not the main point. The idea that society should be operated by and for the workers by hand and brain is a simple, logical and powerful idea which often survives a higher education. It is this which has to be argued against, and here he conspicuously falls

The kind of antiseptic, cleaned-up capitalism with a Sunday School halo which he recommends can never exist. Capitalism came into this world dripping with blood and filth from every pore. No detergents or deodorants have been invented which can clean this away or cover it up to its dying day.

### Uneasy About Capitalism?

No doubt the fears expressed by Hoover about the present allegiance of American intellectuals is more than a little exaggerated. That such concern should be expressed in the journal of the leading business school in the very citadel of world capitalism is highly significant and surely represents an unconscious uneasiness about the system itself. It is probable that, for the time being, most intellectuals have made their peace with capitalism, and many former radicals bend their efforts to holding the system together. Others have settled for relatively innocuous and oblique criticism or for the polite reformism of the right-wing intellectuals in the British Labor party, who get a pat on the back from Hoover.

Material prosperity has played a role here; it was otherwise in the thirties, and it will be otherwise again. The role of Stalinism is also crucial; it has, for many, destroyed the faith in the possibility of a workable alternative which will safeguard the things intellectuals

consider valuable. But the choice is not either Russia as it is, or American capitalism. "Intellectuals," writes Hoover, "do not accept the proposition that the alternative to capitalist organization and direction of production is administration of the economy by a hierarchical bureaucracy . . . Indeed he offers no reason why they should except the degeneration of the USSR. Socialists who can explain what happened to the Soviet State in the twenties and thirties, showing the origin and role of Stalinism, have great opportunities for work among those intellectuals who follow this line of thought. They can show, too, that the task of building a working-class movement as first step to the new society, can offer satisfactions and possibilities far exceeding those provided by accommodation or shame-

faced criticism without commitment.

### A Modest Fellow

"The Kennedy compromise embodies the restrictive provisions of the House bill with a few exemptions," reported the Aug. 31 Wall Street Journal, These exemptions for the garment and building-trade unions are what earned for Kennedy the labor leaders' gratitude. But the exemptions were never seriously challenged by Landrum and Griffin. The "labor-reform" bill as it finally passed through Congress was substantially the Kennedy "compromise." Kennedy is really too modest when he declines to associate his name with the final version of the bill. The law justly merits the title of Kennedy-Landrum-Griffin.

This is not the first time that powers to "investigate" and Kennedy has acted as the hangman's assistant in labor legisla-"While only a court test can tion questions. ### Logical End for Social Democrats

At its national congress at Bad Godesberg last week, the German Social Democratic party voted 324 to 16 to drop advocacy of socialism from its platform. This means that the party program will now conform to the true nature of the German Social Democracy, which even before World War I had become a capitalist reform party - or more precisely, a bourgeois labor party, to use Friedrich Engels' definition. On Nov. 15, the party congress adopted a new program including the following points:

(1) Class warfare is definitely discarded. The Social Democracy will no longer claim to be a working-class party but a party that promotes the welfare of the entire "nation."

(2) The party declares itself on the side of "democracy" in the battle against "world Communism."

(3) Nationalization of industry is abandoned as the solution of economic problems. The emphasis is on regulation, vaguely called "public ownership," and on promoting economic freedom including the free initiative of employers.

(4) The Social Democrats come out for "national defense." Military conscription is opposed only as long as Germany is divided.

(5) In foreign policy, the program supports strengthening the United Nations and including a reunified Germany in a European "security system"-presumably a military alliance such as NATO represents and to which West Germany already adheres.

None of these programmatic positions do violence to any previous practice of the Social Democratic leaders.

Abandonment of class-struggle principles? From 1918 to 1932, the German Social Democrats repeatedly entered coalition governments with capitalist parties in the "interest of the nation." Again after World War II, they formed coalitions in several German states.

Defense of capitalist democracy against Communism? The Social Democrats lined up with the big industrialists, Junkers and pro-Kaiser army officers in 1918 to crush the Berlin workers who were moving in a revolutionary direction. They were accomplices in the murder of Karl Liebknecht and Rosa Luxemburg, the heroic German Communist leaders. This was the criminal basis on which the Weimar Republic-the Social Democrats' proud achievement - was erected.

No nationalization of industry? When and where did the German Social Democracy, when it held office, ever move to expropriate capitalists or infringe on their profit-making in any way? When the Social Democrats were in power they broke strikes, clubbed demonstrations, witchhunted working-class militants - in short administered a capitalist state. They took no steps whatever leading toward socialism.

"National defense?" The German Social Democratic leaders enthusiastically supported German imperialism in World War I and backed the Kaiser's war effort to the hilt.

Support of a European "security system"-that is, a military bloc of imperialist nations? Many Social Democratic leaders, forced by the Nazis to flee Germany, took shelter with British and U.S. imperialism and supported the ruling classes of these countries in their predatory World War II aims.

### "You Just Do These Things"

But while betraying socialism in deeds, the Social Democrats clung verbally to Marxism during the last fifty years. Time and again they rebuffed those who advocated that the party frankly admit it had abandoned socialism and stood merely for reforms. "You don't say these things. You just do them," is how a shocked party bureaucrat once answered a theoretician who proposed to bring the Social Democratic program in line with its practices. Because of current political conditions in Germany, the party leaders finally decided to "say these things" as well as do them.

The German Social Democratic leaders believe they can catch more votes in the 1961 elections without a socialist platform than with one. Repeated Social Democratic and Stalinist betrayals have lowered the support for socialist ideas among the workers-especially the younger people. The boom of the past decade has also conservatized the working class. The Social Democrats have lost three elections in a row to Chancellor Adenauer's Christian Democratic party. A non-socialist platform, the Social-Democratic leaders hope. will attract some liberal middle-class

The fact, however, that the party leaders have decided to drop their socialist verbiage for current vote-getting purposes shows how lightly they took the socialist program all along. Evidently they never thought socialism good for anything else but vote-catching and holiday speechifying in those periods when the majority of

workers were strongly socialist-minded.

Just the same, one might think that the German Social Democrats, of all peopple, would have developed an insuperable conditioned reflex against touting capitalism, For German capitalism brought Hitler to power, and despite the loyal services that the Social Democracy had previously rendered big business, Hitler filled the concentration camps and gas chambers with a goodly number of Social Democratic adherents, including many lowerechelon functionaries. Furthermore, in the days when Hitler was advancing on the road to power, but had not yet seized it, the Social Democrats clung all the more tenaciously to their capitalist allies in the vain hope that these would block the Nazis. They refused to mobilize the working class for struggle against the Nazi storm troopers for fear that this would drive the capitalist liberals into Hitler's arms. The Social Democrats (and the Stalinists, too, from their side) paralyzed the German working class, and Hitler conquered without a struggle. Surely, one would think, the consequence of their treacherous politics and the horrors of Nazism would have been branded forever in the memory of the Social Democrats, rendering them incapable of ever coming to terms again with capitalism.

### Retreat into a Rat Hole

But hidebound labor bureaucrats, such as lead the German Social Democracy, are incapable of learning. Their younger replacements have no interest in learning. As Leon Trotsky wrote in 1940 about the Social Democratic breed not only in Germany but everywhere, these "opportunists know but one policy - that of passive adaptation. Under the conditions of decaying capitalism nothing remains open to them but the surrender of one position after another. The whittling away of their already miserable program, the lowering of their demands, the renunciation of demands altogether, continuous retreat further and further back until there is no place left to retreat except a rat hole."

The open renunciation of socialism by the Social Democrats does not end the His refusal touched off the agement of the plants. The struggle for socialism - especially not in Poznan general strike and dem- Zeran workers criticized a gov-Germany, where the working class has onstration. He was dismissed ernment proposal for a general experienced the barbarism of decaying shortly thereafter. capitalism on a scale worse, perhaps, than recently appointed Deputy Prethe proletariat of any other country.

Again, Eugeniusz Szyr was a recently appointed Deputy Premier. Szyr was a prominent lead to inflation."

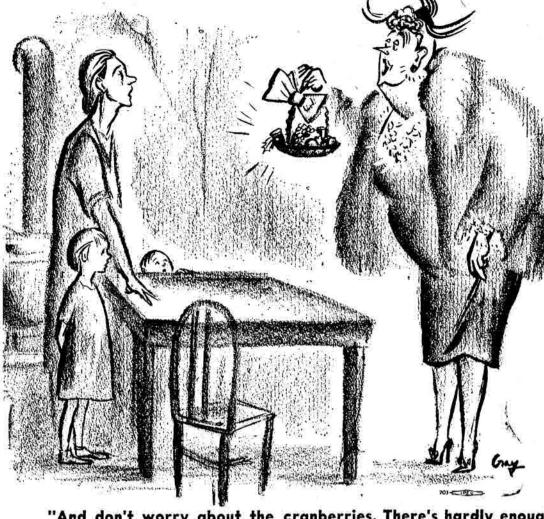

Germany is the country where Marx- economist of the pre-October The Zeran workers pledged "to ism first won a mass following. For de- days. Since then he has urged double production as compared cades before the degeneration of the Social Democracy, the German Marxists Stalinist-type methods of ad- losses in production, and, what taught and led the international socialist ministrative "pressure" and is more to create condition movement. Afterwards, the great left-wing more with upping the produc- which would enable the factory leaders - Luxemburg, Liebknecht and tion quotas-especially of heavy [then working at a loss] to earn Mehring — contributed their imperishable page to the history of world socialism.

Again, Germany is the industrial heart of Europe. The prospect of a social-ski, nicknamed "Gen. Gaspipe," increase in their real earnings," ist Germany has inspired the European who was given the post of a Warsaw radio station reported manian people want to exercise working class since the turn of the century Deputy Chief of Staff in charge at the time. and will inspire it again. Witaszewski was removed cations contained in the Zeran Nov. 28. A march by a group of capitalism and will make possible the flowering of socialist democracy.

The Social Democracy's open rejection of socialism does not detract one iota from the genuine Marxist tradition or the glowing prospects that socialism offers the German and European working class. What the latest move of the party leaders of opposition to the appoint- there must take place now or in does is to end a big lie. It disposes of the claim that socialism can be attained under a Social Democratic leadership, that the Social Democrats offer a road to social-

Class-conscious workers and rebellious young people eager to fight for a world without war, poverty or oppression, but fooled in the past by the socialist pretensions of the Social Democracy, will now feel freer to contribute their talents and energies to the building of an authen- him as their spokesman. tic party of socialism. The economic boom won't last forever. It will give way to a depression, and when it does, this will shatter the illusions among the working people that they can obtain economic security under capitalism. A German revolutionary-socialist party - with its principal rival, the Social Democracy, selfdisqualified as a socialist pole of attraction - will be able rapidly to gain the adherence of the masses and organize them for the socialist transformation.

It will thus turn out that the Social Democratic leaders performed an unintended service to the socialist cause by produce as much as before but them the right to federate. He owners who remained loyal to ia, Poland and the Soviet Union. openly renouncing socialism. Way of Life

And Now the Butcher's Thumb

Was it a good investment? True, it's cheaper entertainment

America has been faced with some agonizing reappraisals in recent weeks. What about that TV set after all?

While the American people, for the first time in the history of the country, contemplated a Thanksgiving without cranberries, some searching questions were asked. In the interest of maintaining the health of the private enterprise system is it moral to take a chance with the health of the public, if the poison included in food put on the market is small in quantity, detectable only in occasional lots, and has demonstrably caused cancer so far only in

than going to the movies, but+

corruption as was evident in the

Then came another shockeroo.

quiz shows?

rodents?

What about that most important of all questions in this country, profits? The profits of the cranberry growers? If they're to be hurt by a sudden reaction among buyers, which they hadn't foreseen when they used aminotriazole in their bogs, isn't t in the interest of the general public welfare to grant them unds out of the U.S. Treasury? After all, this is something important, not a mere matter of strikers losing their wages or workers running out of unemployment insurance or being denied relief checks.

While people from coast to coast wrestled with these questions, New Yorkers were given still another jolt. Once again they were reminded that you paid a few million dollars for their bargain prices." "Who is the reminder.

Fred J. Loughran has been arrested as a ring leader in this few weeks on the moral front. creative potential lodged in the tale of tainted politics and Some people are even beginning working class. As the Zeran short-weighted meat. He was to wonder if it wouldn't be workers realized, this potential appointed director of the city's wiser to stop looking for morals can be freed only through a re- Bureau of Weights & Measures in the American Way of Life. by Mayor O'Dwyer and kept in

what about the morals of our office by Wagner. The post is children? Is it good to expose a strategic one in the eyes of them hour after hour to such the Tammany boys.

> Inspectors under Loughran put the arm on the butcher shops. About once a year or so they insinuated that it was about time to change brands on the scales they were using. This meant a lucrative commission from the scales manufacturers. In addition they insinuated that butchers who felt compelled to cheat their customers in order to make a profit, had better share their profits with the squad of inspectors.

The shakedown was \$50 or \$60 a month, and as many as 500 or more shops are rumored to have been involved.

The butchers used ingenious ways of working the public for the benefit of themselves and the Bureau of Weights & Measures. Those with dexterous thumbs exercised them regularly while weighing up an order. Some, not so dexterous, hid the reading on the scale from the customer's view, an illegal practice. Others rigged wire contraptions that permitted a heavy toe to substitute for the thumb. Still others used loaded counterweights.

Hand Faster Than Eye Butchers, adept at card tricks and similar sleight of hand, weighed tender prime meat on the scales, then with the magic words, "Presto, change-o," converted it into tough commercial meat right through the wrap-

Mayor Wagner, of course, has passed the word down the line to keep investigating "until everything is cleaned up." Loughran looks like a promising candidate for the fall guy.

It is remarkable what cynical remarks are heard in New it hurt to find out that they had getting so you can't trust even there that isn't fixed?"

It's been an unusually rough

Khrushchev is said to have initiated the meeting with Tito.

### American Plane Oil Adulterant Poisons 10,000 Moroccans

Nearly 10,000 cases of paralysis of the arms and legs have occurred in Morocco recently. They were caused by mineraloil poisoning. Surplus stores of the oil, used normally to rinse airplane engines, had been sold to Moroccan merchants by the U.S. Air Force base at Nouaseur near Casablanca. The merchants fraudulently used it to dilute olive and peanut oil and resold it for cooking purposes.

Physicians say no cure has been found for the paralysis. The situation has been officially proclaimed a national disaster. The merchants involved face the death penalty.

A spokesman for the U.S. Air Force stated that the oil was sold as machine oil. "Its subsequent use is not our responsibility," he said.

### Note British Fallout Coincides with Rise In Leukemia Deaths

Deaths from leukemia in five counties in England rose by 50% between 1950 and 1957, reports the Lancet, a British medical journal.

Leukemia, or cancer of the blood, is almost always fatal. The increase of its incidence in the counties in question is ascribed by a British medical officer, Dr. Phillips, to strontium 90, a radioactive element in the rainfall. The medical officer pointed out that four of the counties are mountainous areas with high rainfall.

Increase of leukemia by 38%. 25%, and 19% was reported in

# Lull-a-Buy Baby

By Herman Chauka

Do you still have the backward notion that music is to entertain? Wake up! Music is to break down sales resistance.

Mitch Leigh, president of Music Makers, Inc., explained this to the Wall Street Journal. Modern jazz in a TV commercial, he said, can implant in your mind the idea that a Ford is a modern car.

That's only the beginning. They want you to believe the Ford is roomier. As actors jostle into a "non-Ford," the music changes meter. "Each meter change gives the viewer an uncomfortable experience."

Real musical brains go into the compositions. "Our music has got to give people an emotional experience that they'll associate with the client's product," this modern maestro says. "It's got to sell, not just entertain."

And it does. To sell Duncan Hines cake mix, a Proctor and Gamble product, Mr. Leigh composed a real high-brow piece, "Concerto for Announcer and Orchestra." With quiet pride, the composer said, "We wanted to build up an

image of real class around their new deluxe

Not that the ordinary jingle is dying - as you may have thought, or hastily hoped. Jingle Mill, a New York firm whose production methods would make old Henry Ford's eyes glint, has three writers and a quintet that turn out as many as 40 jingles in an afternoon.

The year Jingle Mill started, only 3,000 jingles were produced. In the coming year, production is expected to hit 8,000 jingles. The best jingles are at the cash register.

The company has a stock of some 500 tunes that are used over and over. The client selects a tune and Jingle Mill dubs in the message on the already recorded music. That way a capitalist can choose the type of music most suited to his product — "peppy, dreamy, calypso, rock n' roll, country."

Don't get this new industry wrong as you drink in the commercials. As Mr. Leigh told the Wall Street Journal, "This isn't a new way to brainwash the public. It's like the mood music used in motion pictures."

## Notes in the News

TV QUIZ SHOWS FIXED TO INCITE CLASS WAR? — J. Edgar Hoover's gum shoes are exploring the possibility that some of the participants in the rigged quiz shows were either "communists" or connected with "communist fronts," according to Variety, which peddles the inside dope in the show business. The need for such an investigation is pointed up by one of the letters from an ad agency to a quiz show sponsor now in the files of the House Subcommittee on Legislative Oversight. The letter proposes: ". . . let the farmer become champion and find a good city slicker to compete against him in another contest." Clearly a move to widen the gulf between town and country.

IT'S NOT ILLEGAL, BUT - Arthur D. Foster, III, a 27-year-old resident of Baltimore, has been walking through the poor section of the city, knocking on doors and handing people \$25 or \$50 as a gift. He reportedly came into a large inheritance recently and simply wanted to give it away. Police heard about these unusual doings and the young man was promptly hauled off to jail. The money was checked to see if it was good and he was grilled at some length. He was finally released. A puzzled police officer said, "There's no law saying a man can't give away money if he wants to."

ONE OBSTACLE TO CHINA TRAVEL RE-MOVED - The State Department has quietly blotted out a clause from the passports of 31 newsmen cleared for travel to China which the government of that country had branded as an "insult." The section authorized the newsmen to travel "in those portions of China under Communist control." Asked about the action, officials said the change had been made without announcement so it should not be misinterpreted as a change in basic policy toward China.

HOW MANY OTHER SIMILAR CONFES-SIONS? — Charles Baisten, a 17-year-old Negro, was scheduled to go on trial in Chicago Nov. 16 for the slaying of a 16-year-old boy. Police had a strong case. Baisten had made a full confession of the crime, although he later repudiated it. But three days before the trial James Duncan, 18, admitted he had committed the killing and the murder weapon was found in his room. Baisten said he had confessed after police had threatened to mutilate him.

THE LINING IN THAT CRANBERRY CLOUD - Lingonberries, a red Scandinavian berry that can be substituted for cranberries, are enjoying a leap in sales. Some New York shops are now charging as much as \$1.95 for a one-pound can, although others are still charging 65 cents. The wholesale price in New York is about 33 cents.

H-BOMBS NOT ENOUGH - The army is seeking reversal of the present U.S. declaration that it will not use chemical warfare except in retaliation. Pentagon officials feel there is a good chance this will be done. A recent budgetary request by the army for \$40 million for research in these weapons was upped to \$55 million by the Defense Department. Army public relations men have been campaigning to counter public aversion to use of chemical and bacterio- board chairman, who spoke on: the USSR was no longer a and "even a murderer and half to me and became enraged." logical weapons. One of the press agents' favorites is a chemical that will render the entire population of a city "temporarily" insane without damage to property.

MAN WITH A VISION - Joseph Fiala, a Darien, Conn., real-estate broker, claims to have the country's first dealer franchise on atomic fallout shelters. He is handling a steel cylinder, seven feet in diameter and 11 feet long, to be buried in your back yard. The shelter sells for \$1,800. There's an extra fee for burying it three feet underground which is the depth recommended by the Office of Civilian Defense to provide protection against fallout. Batteries, bedding and other accessories are extra. The shelter will hold food and water sufficient for two or three weeks. Mr. Fiala took the franchise because he believes that history teaches that war is inevitable and the shelters have a

MACHINERY REPLACES FIELD HANDS -U.S. farmers are expected to spend 15% more for mechanized equipment this year than last. With more machinery they will be able to equal last year's crop with fewer man hours. According to the Nov. 10 Wall Street Journal, in 1958 it took 11.1 billion man-hours of labor to produce America's crops and livestock. In 1950, 15 billion hours were used and in 1920, 24 billion. The productivity of farm laborers today is four times what it was during World tional Guardian, Dr. Annette T. War I. Farmers now have 4.8 million tractors, Rubinstein called for the formathree times as many as in 1940. One farmer tion of a committee to support now supplies food, fibre and tobacco for himself | "independent and socialist peace and 23 others. A century ago a farmer supported candidates" in the 1960 eleconly four others.

'NOTHING UNUSUAL' - After several York and across the country inyears of pleading by tenants of two adjacent tenement houses in New York, the owner and management agent of the buildings were hauled into court Nov. 13. The New York Post offered this description of the buildings which house 200 people in reconverted one-room apartments: "For each 50 tenants there is one United Independent-Socialist working bathroom. Water pours through the halls, walls, floors and ceilings. Wall have collapsed, ceilings fallen. Rats are everywhere six tenants have already been bitten." The City Welfare Department, which is paying rents as high as \$108 a month for 26 of the families, reported it found "nothing unusual" there. The situation was reported to Mayor Wagner last January, but nothing happened.

IS TIME THE SOURCE OF ENERGY? - A Soviet physicist is working on a theory that the flow of time from past to future is the ultimate source of energy in the universe. According to one Soviet scientist's exposition of the theory, the forward flow of time may be similar to a stream of water flowing down hill, or a waterfall whose energy can be harnessed to produce electricity. Propounded by Dr. Nikolai Kozyrev, the theory was first presented in a Soviet Academy of Sciences booklet, "Causal or Asymmetrical Mechanics in Linear Approxi-

(Continued from Page 1) know that I am president of this great organization that has such fremendous power and I never went on strike in my life; I never ran a strike in my life; I approval to any compound that never ordered anyone else to run a strike in my life, never of vital organs. Permission had had anything to do with a picket line. So," he concluded, "if that weed killer after the crop had is the type of power people have been harvested. They used it in mind, they should get another while the berries were growing. fellow for president, because I The growers association has have no experience with that type of power."

To allay any suspicion that he intended any change in the established order Meany expounded his credo to the assembled corporation chiefs. "In the final analysis," he assured them, "there is not a great deal of difference between the things I stand for and the things the NAM (National Association of Manufacturers) leaders stand for. I stand for the profit system; believe in the profit system. I believe it is a wonderful incentive. I believe in the free enterprise system completely. I believe in the return on capital investment. I believe in management's right to manage."

After establishing basic agreement on what he considered all the fundamental issues, Meany asked, "what is there left for us to disagree about?" And answered: "It is merely for us to disagree, if you please, as to what share the workers get, what share management gets from the wealth produced by the particular enterprise." That's all! Merely a disagreement over the division of the national income. Nothing to get excited about for as Meany observed to the NAM gathering: "We have so much in common that it seems rather silly to be fighting over the things that we do not have in common.'

Irony itself stands incredulous and disarmed before such seemingly artless simplicity. If anything, the hard-headed NAM business fraternity are materialists. All of the ideological fluffindividual freedom, liberty equality, democracy — is intended to deceive the people into supporting an economic system pased on the exploitation of human labor. Such pap is useful for indoctrinating a boy-scout troop in the virtues of the socalled "free enterprise profit sys-NAM where all virtues, values and principles are measured in

# Dr. Rubinstein Seeks Grouping Help Independents in 1960

NEW YORK - In a letter published in the Nov. 16 Na-

She urged that people in New terested in working for such candidates write to her.

The Independent-Socialist candidate for Lt. Governor of New York in 1958, Dr. Rubinstein was one of the initiators of the Committee and, until its recent dissolution, a consistent advocate of a united independent-socialist presidential ticket in 1960. The text of her letter to the National Guardian follows:

I am writing as a former leader of the American Labor party, the Independent-Socialist candidate for lieutenant-governor of New York in 1958, and a member of the administrative board of the United Independent-Socialist Committee to date.

Last week's Guardian reported the UI-SC board's amicable agreement to dissolve because of its substantial difference on electoral policy for 1960.

who felt unable to commit them- if not a socialist, position.

DR. ANNETTE T. RUBINSTEIN

selves to an independent election effort at this time favored "postponing decision on a Presidential campaign pending posdidate by the Democratic Party." building neighborhood groups candidates who would, like Congressman Meyer of Vermont A number of those members take an uncompromising peace,

It seems to me that both these aims might be furthered - as well as the desire of the more intransigent of us for an independent Presidential campaign by the formation of a committee for the support of independent and socialist peace candidates in

This is a poor second best for a united-independent Presidential campaign, but it would offer some alternative to sitting out an election year; and if July confronts us with a race between a Rockefeller or Nixon and a Kennedy or Humphrey proponent of the bi-partisan war policy, many who now still hope for a more meaningful choice may be very glad to have the opportunity for political work which a committee for the support of independent and socialist peace candidates could offer them.

I earnestly invite all those in terested in the formation of such a group on a state or national scale to write me. I am sure this will include many who served sible nomination of a peace can- on the board of the I-SP and the UI-SC, or worked in last year's Others indicated their hopes of campaign. NUMBER 47

one seems to miss the absence tors is determined to relax of buses from the Twin City work rules and past "company area too much. Co-operative practices" which the union won car pools have been formed to in years of negotiations. As in get workers to their jobs and steel and packinghouse, work traffic has continued to run rules loom even more important in the present controversy than

Feeling against the bus company is strong among Twin City riders, who have been irritated by one fare increase after anservice and deterioration of buses. Add to this a scandal so smelly that it forced the ouster of the former Board of Directors. Indictments are pending for illegal sales of property involving kick-backs.

The bus service is missed much less than anticipated. Downtown traffic was expected to increase over 20%, and traffic details were alerted for the "emergency." However, workers got up an hour earlier to leave for their jobs by car pools, and traffic was helped by the absence of buses.

Department store sales in the downtown area fell off a reported 30 to 40% the first day of the boys who had been riding strike, but are now said to have picked up some. One local radio station is devoting a good portion of its morning time broadcasting offers of rides downtown from various outlying points. A Twin City reporter said he had received 17 offers of rides within 20 minutes and drivers were disappointed when he informed them he was merely making a spot check.

This is the first time Twin City bus drivers have gone out on strike since their organizational drive in the thirties which was sparked by the Minneapolis Drivers Union. The present strike promises to be a long one with union and company far apart, and federal and state mediators unable to bring the parties even close to agreement.

However, Christmas shopping check which he had made out is just getting underway and the department store sales Hunter subsequently received downtown have been hard hit threats and one night six or by the strike. Storeowners with seven white men with shotguns influence on the board may dedrove up to his farmhouse in a cide that the squeeze is too much and get the board to make
