N.Y.-N.J. Area **Registers** New **Decline** in Jobs

NEW YORK, March 10 - Heavy unemployment hit this area little later than some other parts of the country, but when it did hit the blow was hard. According to a State Employment Service spokesman today, there were 448,900 people in the State drawing unemployment compensation as of Feb. 20. Of these 234,400 were in New York City. And that doesn't tell the full story.

During the week ending Feb. 27, 2,271 people exhausted their benefits without finding a new job. About the same number the week before got their final compensation check with no work in sight. This means that at least eight per cent of the labor force in the state is now jobless, as compared to six per cent nationally. During January 179,000 people lost their jobs throughout the state. Labor Department officials tried to pass off the heavy drop as "normal" post-Christmas layoffs. But according to their own figures, there were 77,000 more people laid off this January than last year.

Across the river in New Jersey, where a good number of New Yorkers have been working, the situation is even worse. Last week Gov. Meyner declared that a real state of emergency exists there. At the end of February 208,000 people were out of work in the state, almost nine per cent of the labor force. With unemployment heavy throughout 1958, he said, state jobless (Continued on Page 3)

Detroit Unionists Charter Train to Transport 1,500 From Lines of Unemployed

Preliminary reports indicate that the National Guard Armory, reserved by the AFL-CIO for its national unemployed conference in Washington April 8, will be filled to overflowing. From Detroit comes word that the United Automobile Workers are planning to dramatize the critical unemployment problem in that city by chartering a special

train to carry 1,500 jobless workers to the conference.

Union organizations in various parts of the country are arranging to send special delegations to the conference. In New York the March 1 issue of District 65 News, published by the Retail, Wholesale & Department Store Union, carries a full page "special message" to its members on the conference. "As many of our unemployed mem-

THE MILITANT

Fighting Unemployment

[The following extracts are taken from a program written by Leon Trotsky in 1937 for the Fourth International, the world-wide revolutionary - socialist party he founded in that year to carry on the tradition of Marxism. The complete program, called "The Death Agony of Capitalism and the Tasks of the Fourth International," can be obtained by sending 25 cents to Pioneer Publishers, 116 University Pl., New York 3, N.Y.]

Under the conditions of disintegrating capitalism, the masses continue to live the meagerized life of the oppressed threatened now more than at any other time with the danger of being cast to the pit of pauperism. They must defend their mouthful of bread, if they cannot increase or better it. There is neither the need nor the opportunity to enumerate here those separate partial demands which time and again arise on the basis of concrete circumstances-national, local, professional. But two basic economic afflictions, in which is summarized the increasing absurdity of the capitalist system: that is unemployment and high prices, demand generalized slogans and methods of struggle,

The Fourth International declares uncompromising war on the politics of the capitalists which, to a considerable degree, like the politics of their agents, the reformists, aims to place the whole burden of militarism, the crisis, the disorganization of the monetary system and all other scourges stemming from capitalism's death agony upon the backs of the toilers. The Fourth International demands employment and decent living conditions. for all.

Neither monetary inflation nor stabilization can serve as slogans for the proletariat because these are but two ends of the same stick. Against a bounding rise in prices, which with the approach of war will assume an ever more unbridled character, one can fight only under the slogan of a sliding scale of wages. This means that collective agreements should assure an automatic rise in wages in relation to the increase in prices of consumer goods.

Under the menace of its own disintegration, the proletariat cannot permit the transformation of an increasing sec- ed the Social Democratic charge tion of the workers into chronically un- that the New York State Indeemployed paupers, living off the slops of pendent-Socialist ticket was a crumbling society. The right to employment is the only serious right left to the worker in a society based upon exploitation. This right today is being shorn from him at every step. "No Help Wanted" signs are a gloomy sight for five million Americans pounding the pavements in search of jobs. But for the Democratic Party high command the same signs point encouragingly to a new four-year lease on the White House. That's why the Democrats in Congress are making a play for labor votes by proposing to do something for the unemployed.

But they don't propose to do very much. As political operators for the capitalist class, they have no intention of giving anything which they are not forced to give. And since the unemployed are illorganized and have no political representation of their own that's not much.

The leaders of the AFL-CIO would like to pretend that their Democratic. friends in Congress, whom they introduce as "friends of labor," are really doing something for the jobless. They would like to be able to show something for the policy they have followed for decades of asking people to vote Democratic.

But the Democratic "friends" aren't doing anything to boast about. This was so clear that Reuther and Meany found it necessary to hold a meeting in Washington on April 8 to dramatize the plight of the unemployed for the benefit of their political friends in Congress.

When the delegates meet, it will doubtlessly occur to many of them that they do not have a single solitary political representative in either the Senate or the House. If even one were there to stand up and call the attention of the two bodies to demonstrators outside with their message from the millions of unemployed, how much greater impact and meaning it would give to the demonstration! The plight of the jobless would begin to gain some of the national political weight that is its due.

Labor doesn't have a congressman; we have to put whatever pressure we can through rallies, marches, protest meetings and petitions.

These, however, would be much more effective if they were tied in with the question of organizing labor's power for independent political action. Even the modest start of singling out congressional districts in which to run labor's own candidates against the Democrats and Republicans would get action for the jobless of the aggressive force behind like nothing else the unions could do.

the Presidential seal. Five glasses of "ele-

Got to Balance the Budget

House."

Eisenhower's opposition to even the meager extension of jobless benefits proposed by Democrats looking ahead to the 1960 elections is ascribed to his interest in "balancing the budget." This is a difficult operation, for out of each dollar that Eisenhower puts in the scales, 59 cents go to the military (the Democrats think that's too low), 10 cents to the bankers for interest, 7 cents to the veterans and 8 cents to agriculture. That leaves only 16 cents for all other expenditures.

Understandably, the administration is reluctant about earmarking even 1 cent or 1¼ cents for the unemployed. Such outlays, to unexpected numbers of claimants, must be weighed against really pressing necessities that come out of the 16-cent portion of the budget dollar. For example, White House state dinners. These can be appreciated from an Associated Press description:

Committee March 2, Secretary of Defense Neil McElroy said that the "present" policy of the government in relation to World War III is not to strike the "first blow" but "whether that always will be true is another matter."

McElroy implied in this way that top Washington circles are debating the advisability of launching a surprise attack on the Soviet Union the way Hitler did.

At his press conference two days later, Eisenhower was asked about this. The Commander-in-Chief responded that he did not foresee any circumstances where the United States might strike the first blow. Nevertheless he backed up Mc-Elroy by adding that while only Congress has the power to declare war, if "enemy" missiles or planes were discovered "coming in our direction, then we have to act just as rapidly as humanly possible to defend ourselves."

The reactionary columnist David Lawrence gave a further tip-off on Pentagon thinking when he commented on McElroy's remark. "America . . . might conceivably strike first in what has become known as 'pre-emptive' rather than 'preventive' war."

"A pre-emptive" war is not a preventive war-God forbid. America, as Pentagon propagandists have repeatedly insistthat. So what is a "pre-emptive" war? Lawrence quotes Capt. W. D. Pules-

ton, retired U.S. Naval officer: "If the enemy should persist in its preparations fore the war 336 companies to attack, we could-with honor-attack with three million employes in first, and thus gain the initial advantage Japan and abroad were part of instead of conceding it."

Here's how it would work out. A general in Washington decides that the Soviet Union is getting ready to strike the "first blow." So the general pushes the button for a "pre-emptive" blow. That kind of blow beats a "first" blow. Thereupon American planes loaded with H-bombs set off for the kill.

What happens next? Having been attacked, the Soviet Union, it may be supnuclear weapons, some of which, presumably, have escaped the "pre-emptive" U.S. later, U.S. casualties would include possibly half the population or more.

The ensuing radioactive contamination might wipe out all life on this planet. But of course it is a satisfaction, looking forward to this prospect, to know that the put a new squeeze on the work-Pentagon has finally worked out how the ers, employed and unemployed. U.S. can launch the kind of Pearl Harbor attack that will successfully precipitate World War III, yet keep its "honor" by refraining from striking the first blow.

Trawlers Of Cables and

On Feb. 26 the U.S. Navy boarded a Soviet fishing trawler off Newfoundland under excuse of "investigating damage" to five trans-Atlantic cables. The American press was immediately filled with dark stories about "sabotage" and "cutting" of the underwater lines.

They disregarded the fact that trouble with trans-oceanic cables is fairly common due to corrosion, sperm whales, mud slides and so on. Slides in deep sea-canyons are sometimes so great as to break a series of cables miles apart.

Then came another spectacular move. Two days after the lone trawler had been boarded in the Atlantic, the Philippine Navy took five Soviet trawlers "under surveillance."

How these five trawlers in the western Pacific might have given a hand to the lone trawler near Newfoundland in "damaging" cables in the North Atlantic remained an impenetrable mystery. They were finally ordered released March 6.

The real motive in this case of international intrigue and espionage on the high seas can be gathered from the fol-Monitor: "The Pentagon has wondered the island as a cheap labor for some time whether or not the Soviet trawlers had their nets out for useful military information as well as fish."

The answer the Pentagon got was included in the same report: "The most the Navy has said thus far is that there was no evidence found by the boarding party that the trawler intended to do anything other than fish."

Meanwhile the Pentagon's fishing expedition did succeed in providing fresh sensational material for all those interested in keeping up the cold war.

Letters from Our Readers

Capitalist Power Is In Labor Fakers

Editor:

I was very pleased with the recent article by Murry Weiss, also the Dobbs-Browder debate. It is good to see a firmer stand against the role of labor fakers in unions. These are really watch dogs of the employing class. Browder is now praising the fakers instead, of exposing them.

The Militant is very interesting to me, and I hope there will and worked at it seriously in be more about the labor-faker Detroit's Debs Hall. problem. There are many in the unions who are afraid to speak because they would lose their jobs.

The power of the faker is i his control of jobs; and the Hold Celebration power of the capitalist is in his control of labor fakers. We will eventually have to

deal with this matter if we Editor: are to reach the union members.

WORKING WOMEN - If present trends continue, nine out of ten young women will spend 25 years of their life as wage earners, Dr. Henry David, director of the National Janpower Commission, told a Young Women's Christian Association 'March 4. With the country needing a larger labor force and most families needing extra income, he said that the idea a woman stops working for a living after she marries and has children has gone out the window. Some 28,000,000 women now hold jobs, he declared. About 30% of them are married. * * *

"No Prospect Of Being Called Back to Work"

DETROIT—When a Senate Banking and Currency subcommittee held a one-day hearing here, March 2, on the Douglas-Cooper aid-to-depressed areas bill, UAW president Walter Reuther, Gov.

Mennen Williams and Mayor Miriani appeared and made statements favoring the bill. Not Atom Bombs,' Also put into the subcommittee's record was an authentic **Socialist Urges** voice of the unemployed themselves, the statement of Wesley Wilkens, co-chairman of the UAW Production and Skilled Workers Unemployed Committee, which is a city-wide coordinating body of unemployed committees. Here is the major

part of the statement: "My name is Wesley Wilkens. I have worked at the Chrysler Mack Avenue Plant for ten years and have been laid off for eight months. I have no prospect of ever being called back to work. On March 31 I will be cut off compensation. I have a wife and five chlidrenthree to 15 years old. The oldest is in her first year of high school. When the Federal Temorary Unemployment Compensation Emergency Program dies at midnight, the end of this month, my entire family must become a burden to city welfare. Our city welfare has already run out of funds, the food

allotment has been cut. In the "We don't want welfare. Permanent dole is not the answer.

family to stop eating, to stop Bill to amend the Fair Labor

PUERTO RICANS IN CONNECTICUT -Puerto Rican migrant workers took a real beating from truck farmers and nurseries in the New Haven, Conn., area, according to a study released March 5 by the National Advisory Committee on Farm Labor. They were brought in by unlicensed, out-of-state contractors because wages were so low and hours so long that none of the local unemployed would take the jobs. Of 186 Puerto Rican workers surveyed, about 80% were paid 65 cents an hour or less, with some getting as little as 51 cents. Most of them worked 75 hours a week.

* * * GOING, GOING - For long years the

Singer Sewing Machine Co. was an important source of employment in and around Elizabeth, N.J. But automated equipment has been steadily whittling down the payroll. In 1951 there were 9,600 jobs at Singer. Now the figure is about 4,800. On March 6 the company announced that all production will soon be transferred to a new one-story building better equipped for automated production. A spokesman said production would continue at present levels but declined to say if more layoffs are anticipated.

* * * FULL, YET PARTLY EMPTY - Dr. Beryl W. Sprinkel, a Chicago bank economist, was quoted in the Feb. 28 N. Y. Times as seeing full employment by the end of the year. The Times explained this rather startling prediction: "His definition of full employment was an economy with no more than 4,000,000 unemployed. By recent count unemployment approximated 6,000,000." * * *

MODERN NECESSITY - A device has been patented on behalf of the Atomic Energy Commission which sounds a warning when a telephone is being used to pick up conversations in a room even though the receiver is on the hook. Use of a special method of energizing the phone mouthpiece so that it acts as a hidden microphone is said to be widespread. The new device to combat this practice was described as useful for government agencies subject to eavesdropping from other government agencies. Executives were warned to be suspicious of silver paint or ink on their phones as this could indicate that they had been "bugged."

* * * FAUBUS FOR FUEHRER - To express. his disapproval of a bill in the Arkansas legislature giving Gov. Faubus control of the local school board, Rep. Gayle Windsor of Little Rock introduced one of his own to abolish the legislature and the courts and give the racist governor full dictatorial powers.

MOUNTAINS OF WHEAT — At the end forthright action until the pot of 1958, 2,300,000,000 bushels of wheat were boils over and the starving almost finished poster in the on Feb. 19 sent a letter to U.S. stored in the United States.
