222 Railroad Unions "We'll Be Out Jan. 26," Start Campaign Against Big Lie' Say Bitter Steelworkers

By Samuel Steele

CHICAGO, Nov. 5 - Some 5,000 railroad workers attended a mass meeting in Chicago today to protest the predatory and unilateral attacks of the railroad bosses on their unions. The meeting con-+-

campaign to combat the big lie friend of labor, and pointing to the railroad corporations are peddling about "featherbed- Taft-Hartley and Landrumding.'

Vol. XXIII - No. 46

The first speaker, William Lee, pledged the support of the Chicago Federation of Labor in the fight of the railroad workers. August Soderstrom, president

of the AFL-CIO, Illinois, pledged the support of the state's 850,000 union members. He recalled past struggles and cited the progress that unions have made, not only for themselves but for the country as a whole.

He recalled how the unions had fought Pinkerton labor detectives, injunctions, the National Guard, and the government. The unions had gone forward despite the obstacles until they had now reached such a pinnacle of success that we even have "our" representatives in government.

The last assertion proved to be a build-up for the next speaker, Wayne Morse, senator from Ore-

Ahead with Land Reform

The Castro government inched ahead last week in applying its Agrarian Reform law. A 2,633-acre tobacco plantation was taken over Nov. 10 from the Cuban Land and Leaf Tobacco Co. of Trenton, N.J. Company officials announced they would buy tobacco from former sharecroppers who will divide up the land valued at \$2,500,000.

The Fate of Working People Mechanized Farming - Vital Need for China **Inspired Kathe Kollwitz's Art** Stalin, on the other hand dencies within the commune By Daniel Roberts Augh Marcleland - drove the peasants into collec- have clearly not been resolved For more than 'a year, signs tives, whether these possessed and continue to plague the Chihave appeared of serious differmachinery or not, and then pro- nese CP. Po's program of de-By Trent Hutter

Most of Kathe Kollwitz's powerful drawings and etchings were inspired by the sufferings and struggles of the working class. Her activity as an artist and her very existence were closely linked to basic issues, forces and events of the twentieth century. She devoted herself entirely to the "downtrodden"; and in the end she became herself a downtrodden victim of war's misery

Kathe Schmidt was born in 1876 in Konigsberg, East Prussia. She married Dr. Karl Kollwitz, a physician who practiced in a workingclass section of Berlin. Official recognition of her artistry came after World War I. Under the rather progressive cultural policy of the Weimar Republic, she was made a professor and a member of Prussia's Academy of Fine Arts in 1919. However, she did not support the Social Democratic leaders' treasonable alliance with the bourgeoisie and their 1918-19 counter-revolution. Her series "In Memory Of Karl Liebknecht" unequivocally condemned it.

When the Nazis seized power in 1933, a complete boycott set in against Kathe Kollwitz and other great German artists who stood for human dignity and brotherhood. Nobody was allowed to mention her name publicly. During World War II. destitute, isolated, she experienced without complaint the fate of those forgotten sufferers to whom her life had belonged. She increasingly resembled the poor women of her drawings.

At the close of World War II, while Stalin's armies, blinded by reactionary chauvinism and hostility toward revolutionary elements, occupied East Germany, a starved Kathe Kollwitz died at Moritzburg near Dresden, April 22, 1945.

I warmly recommend the reproductions of nine deeply moving Kollwitz drawings which Pioneer Publishers have included in their Christmas list. The subjects were undoubtedly observed in Dr. Kollwitz' waiting room. They are not defiant. They need help. They have gone through so many hardships" and now wait patiently with resignation, a slight distrust, a little hope. Naturally, the children show some fear, not only because they are sick but because of the unaccustomed, awesome atmosphere of the doctor's office.

There is one drawing of an old couple and another of the wife alone that I find particularly touching. Authentic in their individuality, they also represent millions of such old couples anywhere in the working class. I have met them in various cities of the world: A life of toil and hardly any material possessions to show for it, countless sorrows, tenacity and unpretentious daily courage, a strong feeling for justice and decency, a profound faith in mankind despite disappointments and bitterness. And a humble

Prematurely aged, caught in a cycle of unending drudgery, their marriage perhaps deformed and endangered by depressing conditions, attempting every day to make ends meet they seem to tell the doctor - not in words but in their expression, their eyes, their gestures: 'Our children are our only happiness and hope. Please cure our child!" Some are submissive others close to despair. All are fighting for their children in a hostile world.

Kathe Kollwitz made each of her drawings etchings, lithographic prints and sculptures a work of art, achieving maximum effect with a rigid economy of means and concentration on the essential. An unbridgeable gulf separates her from the Saturday Evening Post cover style insisted upon by the bureaucracy in the Soviet Union today as so-called "socialist realism." Kathe Kollwitz did not believe in trying to imitate photography. Nor did she indulge in cheap sentimentalism or cheap brutality, in any over-simplified hero-and-villain formula, the very negation of social reality.

With perceptivity and the genuine socialist's compassion for the individual trampled under foot by a hypocritical and merciless society, Kathe Kollwitz truthfully depicted the victims of capitalism. To her they were not just test-tube cases to be analyzed, or infinitesimal particles of the masses, but human beings abused, hurt, about to be crushed - human beings she understood and whose plight never left her indifferent. The work of her genius has preserved what she saw and felt.

ences of opinion in the Chinese Communist party leadership over economic questions.

The most recent indication is an article in Red Flag, a fortnightly theoretical magazine published by the CP Central Committee. The article, on the technical transformation of agriculture, is by Po I-po, Vice-Premier and Chairman of the State Economic Commission. It is reprinted in the Oct. 18 Engmodesty that we notice in the mothers' faces, lish-language edition of the official Hsinhua News Agency.

Po considers it imperative "to get our agriculture out of its present state of technical backwardness and on to a modern technical basis." "The process of changing China from a backward agricultural country into an advanced industrial country involves the gradual transformaion of her vast agricultural population into an industrial population." Po wants no delay in proceeding with the task. He wants planning that envisages the simultaneous development of heavy industry, light industry and agricultural mechanization

and electrification. He admits that "To transform all of rural China, which is so vast and so backward . . . into a technically modernized countryside . . . is an extremely dificult task. The question now is to strengthen the party's leader- chemical fertilizers and insectiship over the work and to make good overall plans."

Evidently, the views Po expounds are not unanimously held in the CP leadership for he considers it necessary to argue against "some people [who] hink that ... once industrializaion is accomplished the technical transformation of agriculture will materialize by itself. Basing themselves on this viewpoint they maintain that efforts should for the time being be concen-

trated on industrial development technical transformation of agriculture. This viewpoint is wrong beyond doubt."

First, "we must at least double our present grain output or industry divorced from farm equipment and that is financed by agricultural surpluses squeezed out of intensive farm labor.

China needs to replace its countless foot-driven pumps with mechanical pumps. It also needs machines, such as have been developed in the U.S., to plant and harvest rice. Virtually all agriculture in China is still carried on by human and animal labor. The above drawing shows not only traditional Chinese farming methods but new barrack-like buildings erected in some of the communes to replace old mud huts. (Drawing is from the Toronto Telegram.)

Alienation

In the field of psychology, the increasing number of nervous breakdowns is ascribed to the alienation of man's needs from the dominant values in society today.

In politics, alienation is pointed to in the reaction of the voters to the two parties. Alienation exists between Soviet bureaucrat and Soviet worker, between employer and employee in capitalist countries, between union official and rank-and-file member. Finally, economists talk of the alienation of the producer from the product of his labor, the worker from his job.

What is alienation? How did it arise in history? How will mankind overcome it? For a thorough examination of this concept, read William F. Warde's penetrating study in the fall issue of International Socialist Review. Send 35 cents for a copy.

"Choke Off" What, Mr. Cooper?

R. Conrad Cooper, chief negotiator for the major steel firms and spokesman for U.S. Steel, complained Nov. 6 that the steel strike was "a dispute between two parties having vastly unequal powers," the poor defenseless company having "only the power to say no to demands which it cannot accept — and to suffer the beating it may take in consequence." On the other hand, Cooper claimed, "There is only one man who can choke off the supply of our nation's steel at will, and that man is the president of the steelworkers' union," David J. McDonald.

Where does the power lie and who has "suffered the beating"? Before the strike even began, the corporations had cleaned up more profits in the first six months of 1959 than in all of 1958. The stockholders have since received their regular dividends - in full and on time. The officers and directors of the corporations have collected their usual fat salaries, stock bonuses, country club fees, traveling expenses and all other benefits and emoluments that come from controlling the treasuries of vast corporations. The only ones to suffer the "consequence" to date are the steelworkers, whose wages were cut off the day they went on strike. But they have borne their suffering with pride and hardihood and without the whining that Cooper indulges in to win undeserved sympathy.

Of course, the steel companies do not stand exactly alone. They have the U.S. government, the strong right arm of the American capitalist class, to wield the weapon of legal coercion, the Taft-Hartley Act and its injunction powers. They have the national press, TV and radio, owned and controlled by the great aggregates of wealth, to propagandize their cause. There is, in fact, such an immense array of governmental and propaganda forces hurled at the steelworkers that their fortitude and resistance can only command the admiration and support of all decent elements of our society.

Cooper's charge that McDonald is the "one man who can choke off our nation's supply of steel at will" is about the silliest of the host of nonsensical statements inspired by the steel strike. McDonald stood by whimpering for six months before the strike, begging Eisenhower, Nixon and piled up enough production to outlast what "double-crossed" them, that's all.

While we are on the subject of power to "choke off our nation's steel supply," would it be impolite to recall that the steel industry "choked off" as much as 50 to "self-determination," the French Mollet, who was trying to pre-60% of steel production in the recession of 1957-58, throwing hundreds of thousands ally had denounced it, has come of steel workers out of employment? The Algerian policy. steel barons have always had and used the power to "choke off" steel production when it served their profit interests. a much easier, cheaper way of

The Big Fix

quiz-show programs is that they represent a grievous misuse of public property. The TV channels do not belong to the networks; they are limited in number and belong to the public. Broadcasting companies are licensed to use the channels providing they do so in the general interest. The Federal Communications Commission is supposed to use its licensing power to police the networks. And the House Subcommittee on Legislative Oversight is supposed to check up on the FCC.

"In practice, however," writes Anthony Lewis in the Nov. 9 N.Y. Times, "a television or radio license has become almost a property right since the FCC rarely thinks about refusing to renew it." The FCC could drive fraudulent programs and advertising off the air by setting minimum standards. It could also lay down minimum programming requirements ----"so much time in evening prime hours for public affairs, and so forth," says Lewis. But the commission has been "meek instead of aggressive," and this has encouraged the worst in the industry. And what about the Congressional subcommittee? In February 1958, Dr. Bernard Schwartz, the group's chief counsel, resigned under pressure because the subcommittee blocked his probe of the intimate tie-up between the FCC and major networks. Evidence he had already uncovered indicated that the FCC had become the creature of the very networks whose activities it was supposed to regulate in the public interest. After Schwartz resigned, the subcommittee showed no further interest in finding out why the FCC was so "meek" in its dealings with the broadcasters.

In his statement of resignation, Schwartz said, "I accuse the majority of this subcommittee . . . of joining an unholy and that the Sept. 17 Political alliance between big business and the Bureau declaration had "devi-White House to obtain a whitewash" of the FCC.

The unholy alliance that Schwartz named — that's the really big fix in television today. An example of how it works is the way the equal-time provision for candidates for public office was knifed last summer.

Under this provision, any free time given one candidate for public office had to be matched with equal time for the government concerning Algeria. other candidates. The networks, abetted In 1936 the CP proclaimed the be brought to an end only by by the FCC, worked this democratic pro- theory that Algeria was "a na-

vision around to give the Democrats and Republicans virtual monopoly of time on self-determination. At that time can the legitimate aspirations radio and TV. Under the ruling, however, if they fought hard enough for it, socialist leadership of Messali were first candidates did manage to get some time to answer the candidates of the two parties of big business. The networks decided to kill the equal-time provision.

First, the FCC issued a ruling ostensibly liberalizing the provision but really designed to provoke congressional action. President Eisenhower denounced the ruling as "ridiculous" at one of his press conferences. Then the broadcasters and the big business-press raised a clamor. Finally, in the second edition of the Congress passed legislation giving the networks what they wanted.

As a result, the broadcasters now have more time than ever to sell to sponsors of crooked commercials, rigged shows and other forms of boring or hoodwinking the public.

What Color Is Blood?

Anti-Negro prejudice is so deep-rooted in the capitalist system that it oozes through its most "respectable" pores. A recent example of this was the Nov. 6 pronouncement by Dr. John Scudder, an assistant professor at Columbia University. He asserted that it is dangerous for members of one race to receive blood transfusions from members of another race. Claiming a scientific basis for what he termed a "new philosophy," he contended that Negroes should receive blood only from Negroes and whites only from whites.

This revival of the ancient racist myth of "different blood" was ripped apart in an outraged statement the next day by seven members of the Columbia University Seminar on Genetics and the Evolution of Man. They cited what science has well established: "The only criterion any reputable doctor or hospital dare employ in blood transfusions is whether the blood itself is of the right type, and not from where it came."

"No new evidence was reported," the seven scientists said of Scudder's paper, "and the so-called 'new philosophy' serves no useful purpose except to reinforce the old 'philosophy' of race prejudice, which has been shown repeatedly to rest on ignorance rather than biological or medical knowledge."

This statement was buttressed by Red Cross officials who said that "on the basis of recorded scientific and medical opinion, there is no difference in the blood of humans based on race or color."

Further confirmation of this came Smear Hurled from an even more unexpected quarter. The Red Cross blood transfusion service By De Gaulle of East London, in racist South Africa, said Nov. 9 that the blood of whites has been given to Negroes there for 20 years and "no ill effects have ever been seen."

We have not yet seen how Southern racist papers responded to Dr. Scudder's pronouncement. But an indication of what may be expected can be gathered from the way the story was handled by that "enlightened" daily, the New York Times, which editorially deplores bigotry.

The Times gave Scudder's propaganda front-page treatment and included a biography to bolster his "authority." When the hot rebuttal of the seven Columbia scientists came, the Times put it on page 49 and headlined it: "Seven at Columbia Doubt (!) Peril in Bi-Racial Blood Transfusions." Before publishing the viewpoint of the seven, the Times asked Scudder for a statement which gave him the last word.

The Northern agencies of capitalist propaganda aren't as blatant about their just as sickening.

tion in formation," not a real nation, therefore not entitled to the Algerian masses, under the toward independence of the Aldemanding independence in preserving the essential interpowerful demonstrations. The CP attacked the Algerian nationalist movement as "fascist" and supported the Popular

Front government which proposed the "integration" of Algeria into France ("Blum-Violette project") and which outlawed Algerian nationalism and put Messali under arrest. In 1945 the CP, participating

Popular Front (this time under the leadership of . . . De Gaulle) proposed that Algeria enter the "French Union" (as the French

Empire had been renamed). A leader of the Communist party, Charles Tillon, was Air-Minister in the government which, in 1945, sent airplanes to bomb villages in the regions of Setif and Guelma, in the course of a repression which took the lives of more than 40,000 Algerians.

Letters from Our Readers

From a Veteran **Socialist Fighter**

Editor:

As I sit in my room alone thinking of my past, a veteran of three wars, I cogitate on the stupidity of politicians and patriots.

Uninformed men die, drafted into wars not of their own making. Silly flag waving and bands playing arouse the enthusiasm of these poor victims who march forward to their deaths.

The McKinleys, Wilsons Roosevelts and Trumans are glorified; have their brief moment of huzzas, and lapse into oblivion. Can't these stupid men realize that they too must die?

The owning class, too, must in the end say goodbye to Earth, leaving behind their possessions which their heirs will have to worry about. For possessions mean worry, ulcers and heart trouble. So in the end the poor

and dispossessed have all the best of it. And the owners of automation have to do the worrying.

Nearing my eighty-fifth birthday. I've been in the labor movement since 1888 when I was an cans who have stood for their apprentice member of the rights and invoked the First Knights of Labor. Went into the Amendment, was to bid a sad Socialist party_in 1909 when I farewell to Lloyd Barenblatt, a left the Marines. Then into the teacher who is going to jail for How Do We Know? couldn't understand why these

I managed to survive the news that the TV guiz shows were fixed. But when I'm told that TV commercials are deliberately designed to bolster my inferiority complex (which is already bad enough), then it's time to blow

the whistle. Here's what I mean. I watched that gorgeous young lady pour a stein of Hagenshlager. A pale dry brew with a cool, creamy head of foam that sent me right down to the corner grocery for two handy six-can packs. I poured myself a glass, stopping half way to leave room for that creamy head. What happened? A thin performance like the suds you get from the new miracle detergents. That's Hagenshlager when I pour it.

Even worse was that specially carbonated million-bubbles-to-the-ounce club soda. On the TV screen it sparkles and dances like champagne. But I can't get bubbles like that out of it even when I shake the bottle with my thumb on the opening.

Take the stain on the living-room couch where I spilled the TV dinner. The very night it happened I saw the demonstration for Onethe jiffy giant spot killer. The camera wnack panned in on a couch with a spot that looked like the contents of the kitchen sink grease trap. A dash of One-Whack on a rag, a quick, easy swipe across the couch and not a stain in sight. In the morning I plunked down my 99 cents for a bottle. One swipe at the stain. Two swipes. Nothing happens. Maybe this stain needs rubbing. Sure enough; things begin to happen. The stain spread everywhere the rag touches. That new Chevvy I dream about. (Our budget permits a modest amount of cost-free dreaming.) GM uses nothing but Libby-Owens special, distortion-free plate glass for its side windows. I could never stand a side window that gives you a distorted view of the billboards.

view through Libby-Owens glass in a GM car. Sparkling, high-fidelity, not a trace of distortion. almost like no glass. So why do my eyes tend to draw together when I look through the side window of my friend's car? It's a GM product.

I've got a complex? No. I came around to the view that I really am inferior. Then the Federal Trade Commission set me up again. Just before they train that camera on the distortionfree glass, the Commission reports, they roll the window down.

About that One-Whack. The New York Post, which seems shook up about the possibility that TV commercials are dishonest, put a reporter on it. To believe him. I was using both a wrong cleaner and a wrong stain. He got it right from Madison Avenue that the TV expert doesn't go to work on a spilled TV dinner stain. He splashes around a mild solution of iodine. Then he adds a dash of "hypo" to One-Whack. Hypo erases iodine on contact. You can't beat the combination for speed and ease.

That million-bubbles-to-the-ounce club soda? I didn't know the secret. Coat the inside of the lass with invisible rubber cement and thos

SHARP-EARED COP - Last month Joseph

Why don't I get a rich, foamy head when I pour Hagenshlager? My own fault. When I picked up the dozen cans I forgot to also pick up a bottle of "Frothee." That's a vegetable compound with which you doctor the beer. A few drops will give you a king-size head that stands up like shaving lather.

I appreciate those Post explanations of the efficient way they do things on TV commercials. Now maybe they'll tell me how some of those products work that are advertised in the Post.

Like that lovely looking girl whose old dress is now three times too big for her. "I did it with Diet Delight," she says.

I tried Diet Delight just as recommended in the Post. But I don't seem to be any more successful with newspaper ads than with those on TV. I've just discovered I can't button last year's overcoat.

30 he was arrested again by Patrolman John Farrell on a charge that he had "annoved passers-by by talking to them." Ruiz was held in jail for a week because he was unable to raise \$500 bail. On Nov. 6 he again won acquittal. Why? Ruiz is a deaf-mute. "If he is deaf and no surplus of wheat in the world," he said, can't speak, then he can't make noise," said

Notes in the News

Magistrate Walter Gladwin. "Maybe the patrolman can tell us how he spoke." The patrol-

. . . **PIOUS HYPOCRITES** — The Methodist Church apparently isn't too effective in preaching the gospel of the brotherhood of man. Only 18.9% of 7,000 Methodists polled in a national scientific survey believed that all racial discrimination and segregation should be abolished. The findings were reported Nov. 6 by Dr. Walter G. Meulder, Dean of the Boston University College of Theology.

TENNESSEE JURY AT WORK — After 49 minutes of "deliberation," a Tennessee jury recommended Nov. 6 that the charter of Highlander Folk School, an interracial, non-profit inschool is operated for "the personal gain and enrichment" of its founder and president, Myles Horton. Educators testified that Horton's salary of \$9,000 a year was low compared to similar school positions elsewhere. A loan appraiser testified that the school had been denied a loan because "the property was communist infiltrated." State authorities have sought for years to shut down the school. * * *

WHAT TO DO WITH ALL THAT WHEAT - Farm experts and congressmen are grappling with the problem of how to dispose of more than 1.2 billion tons of surplus wheat now in storage in this country. There is no market for it here or abroad. Thomas D. Campbell, of Hardin, Mont., said to be the country's Africa?" biggest wheat grower, has made a simple, sensible suggestion. He believes the surplus should be given away to China and India. "There is

"when you put it in reach of all hungry people." * * *
