The Problem of the Ukraine—By Leon Trotsky

The Ukrainian question, which many governments and their “representatives” and even revolutionaries, in or out of power, have been seeking to thrust to the deep strata of history, has again been placed in the center of the day and this time with palpable force. The main axis of the Ukrainian question is most intimately bound up with the destiny of the Soviet Union. The Ukrainian question, too, is a central problem of the present international situation. Civil war, for instance, the Spanish Civil War, the situation in the face of Europe the earlier question for the solution of which revolutionaries were striving. It was not for nothing that Lenin insisted so much on the question of creating a “Great Ukraine” and likewise it was not for nothing that he insisted that this question should be a national question.

A Question That Must Not Be Ignored

The Ukrainian question, which, on the other hand, is thesphere of the labor bureaucracy and the labor union officials, is ignorant of the Ukrainian question. Even his left wing did not pay the necessary attention to it. But it is recalled that Lenin recognized

"WAR ON JAPAN FOR CAPITALIST MARKETS!"

On May 1, at a dinner in honor of the American Chambers of Commerce abroad, E. H. Ford, vice-president of the American Chamber of Commerce in America, vouched for the war against Japan. His rea- son was "an $11,000,000,000 market in China for American goods." Mr. Ford declared that China was not a market for American goods but for American capital—capital that must be sent there to establish American financial markets. The Chinese market for American goods has never existed. It is a cartel market, and for that reason it is a market for American capital, not for American goods.

Open the files of the State, War and Navy Departments, and you will see how the people who are leading us are being lured into the war.

Kempich, in a speech, and, in a very high degree, put themselves in the position of the Nazi capitalists.

Mr. Kempich is a member of the National-Socialist White and Blue Labor Organization, which is a tool of the Nazi government.

We shall not pretend to defend the cooperation of the labor leaders with the Nazi government. But we shall insist that the labor leaders should not be afraid of the war, and that they should not be afraid of the war with Japan. We shall insist that the labor leaders should be afraid of the war, and that they should be afraid of the war with Japan.

The New Leader, May Day and War

By FOLKLORE

Before the events of May Day, there should be a few words about the meaning of May Day, which is celebrated as a public holiday in many countries around the world, including Russia, Germany, France, Italy, and the United States. May Day is a day to commemorate the struggle for workers' rights and to celebrate labor. It is also a day to remember the workers who have fought for their rights and the rights of others.

Ten Months of Evianism

Last July all the “democratic” powers opened their borders to the “democratic” refugees, who were fleeing from the “democratic” regimes of Germany and Austria. The borders of the “democratic” countries were opened to the “democratic” refugees, who had been persecuted by the “democratic” regimes of Germany and Austria. The borders of the “democratic” countries were opened to the “democratic” refugees, who had been persecuted by the “democratic” regimes of Germany and Austria. The borders of the “democratic” countries were opened to the “democratic” refugees, who had been persecuted by the “democratic” regimes of Germany and Austria.

There were those who charged that the “democratic” powers were creating a “democratic” haven for the “democratic” refugees, who were fleeing from the “democratic” regimes of Germany and Austria. There were those who charged that the “democratic” powers were creating a “democratic” haven for the “democratic” refugees, who were fleeing from the “democratic” regimes of Germany and Austria. There were those who charged that the “democratic” powers were creating a “democratic” haven for the “democratic” refugees, who were fleeing from the “democratic” regimes of Germany and Austria.
Couldn't Be Worse?

Anyone who still inclines toward the view that the Department of Labor is useless for the very reason that it is a million dollars too large, may be interested in the recent report of a Department of Labor expert who spent a month in the field. The expert, who has been working on a project to improve labor relations in the West, reported that the Department of Labor is necessary because it is the only agency that can bring about a real improvement in labor conditions.

How to Break Strikes—Courtesy of the War Department's Experts

In a letter to the National Republican, the War Department's experts have outlined a method for breaking strikes that is said to be successful in the majority of cases. The method involves a combination of pressure and diplomacy, with the goal of getting the strikers to agree to a settlement.

The Fear of Youth

At the annual national convention of the Girl Scouts, held in New York City, over 5,000 delegates from all parts of the country attended. The convention was an opportunity for the Girl Scouts to discuss their plans for the coming year. Major topics included the need for more funding and the challenge of reaching out to girls who have never joined.

The New Masses

The New Masses is a left-wing magazine that was started in the early 1920s. It was known for its radical political and cultural commentary and was a key outlet for the literary and cultural perspectives of the time. The magazine was influential in shaping the cultural landscape of the 1920s and 1930s.

A newsletter for socialists and labor activists.
