FATHER COULGHN--THE AGENT OF FASCISM IN AMERICA

Is Spreading the Poisons Doctrines Of Hitler, Mussolini

Practically all the sixteen principles of Social Justice are being put into practice in Italy and Germany.

—FATHER COULGHN

Pater Charles E. Coulghn appears to be the Adolph Hitler of the United States. He acts as Number One propagandist in the campaign for the Fascist cause in this country as in Italy.

Frequently on Sunday afternoon broadcasts, in his magazine "Social Justice," the father, in a few minutes, changes his audience from a group of dull babblers into a highly enthusiastic army of young Fascists. He is the bane of American Protestantism, he is the bane of American democracy.

In his latest broadcasts, he denounces the "wasteful" and "immoral" industries, and declares that the "cultural" and "social" reforms of the government are "socialistic" and "communist." He claims that the "social" and "cultural" reforms are being used by the "socialists" to "destroy" the "American" way of life.

Pater Coulghn, however, is not satisfied with his broadcasts alone. He also writes a weekly column in "Social Justice." In this column, he attacks the government and the "socialists." He claims that the government is "socialistic" and "communist," and that the "socialists" are trying to "destroy" the "American" way of life.

Pater Coulghn, in his broadcasts and his column, is trying to put into practice the principles of Social Justice. He is trying to "destroy" the "American" way of life. He is trying to put into practice the principles of Social Justice.

Build Workers' Defense Guards

National Guard Launches Wave Of Terror To Break Mine Strike

HARLAN, Ky. - Tension runs high in a walk-breaking point this week in Stebbins Harlan at the National Guard strike-breakers handled a wave of force to break the miners' strike at the 12,000 ton coal mines in the area.

"Shoot to kill!" the National Guard commander ordered his soldiers, trying to intimidate the thousands of strikers who are maintaining the picketing lines despite the violence.

A volley of shotguns was fired, shortly afterwards, by a national guard machine gun on the mountain side. The guardsmen were ordered to shoot to kill. The strike was broken.

A major clash was narrowly averted yesterday when the National Guard commander ordered his soldiers to cease firing. But this time the guardsmen were ordered to shoot to kill. The strike was broken.

Theoretical methods of the changeover to an "American" way of life are being used by the National Guard strike-breakers to break the miners' strike. The guardsmen are being ordered to shoot to kill. The strike was broken.

Desperate Move

The efficiency of the Harlan Guard is to stop all picketing, the miners have been declared to be "outsiders and intruders." The guardsmen are being ordered to shoot to kill. The strike was broken.

The Perspective of United States Imperialism

By B. J. WIDICK

The recent emergency that has been brought about in the United States labor movement, especially in its capacity as an instrument of the world war. The entire problem of the labor movement is closely connected with the current war for the land, and it is clear that the labor movement is not just a part of the general anti-war movement, but is a tragic part of the repressive forces that are working to put down the anti-war movement.

1. The war is an attempt to expand the power of the United States over the rest of the world. The war is a war of conquest, and the labor movement is a part of that conquest. The labor movement has been used to wage the war and expand the power of the United States.

2. The labor movement is a part of the world war. The labor movement is a part of the world war because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting.

3. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting.

The Struggle Against the War

The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting.

4. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting.

Problems of the War

The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. The labor movement is a part of the world war in which the United States is fighting because it is a part of the world war in which the United States is fighting. Time Marches On

Roosevelt Moves Do Not Deceive Puerto Ricans

"Only by Smashing the Grip of Yankee Imperialism" Can Puerto Rican Freedom Be Attained, Says Spokesman in Interview

BRIDGE MONTANARE

"The Puerto Rican people must rise up and demand their independence," said the spokesman for the Puerto Rican independence movement, speaking in an interview last week. "They should be allowed to determine their own future, free from outside interference."

The spokesman, who is a member of the Popular Democratic Party, said that the recent move by the United States government to tighten control over the island would only serve to alienate the Puerto Rican people further. "This is not the way to build a strong, independent nation," he said.

The spokesman called for a movement to be organized to demand independence for Puerto Rico. He said that the movement would be based on the principles of self-determination and freedom from foreign domination. "We cannot allow the United States to continue to control our destiny," he said.

The spokesman also called for a moratorium on the duties and taxes imposed on Puerto Rican goods by the United States government. "These are unfair and unjust," he said.

The spokesman said that the Puerto Rican people would not be satisfied until they had full control over their own affairs. "We will not be satisfied until we have our own government," he said.

The spokesman called on the United Nations to intervene and help the Puerto Rican people to achieve their goal of independence. "The United Nations should be a force for justice and freedom," he said.

The spokesman said that the Puerto Rican people would continue to fight for their rights and independence until they achieved them. "We will not give up until we have our freedom," he said.
Whipping Up the War Spirit--It's All in the Mobilization Day Plan

By HAL DRAPER

The Mobilization Day Plan was the last war called "How This Work Is Done." Today, before the war crisis, the previous mobilization was the great public relations effort--and this year's will be an entirely different type of work, a different type of organization... From the British point of view, the war is an economic war. The war, for the British, is an economic war. The war, for the British, is an economic war. The war, for the British, is an economic war.
