The THE TERROR

Two Communist Trials in Yugoslavia.

Besides the numerous minor proceedings against Communists in Belgrade, two important trials are now in progress in Yugoslavia. The first is the case against five leaders of the League of Communist Students, arrested in Belgrade in May, 1942, and charged with complicity in the assassination of a party member. The second is the trial of fiveing leaders of the Communist Party in Yugoslavia, arrested in Belgrade in April, 1942, and charged with plotting to overthrow the government.

The defendants in the Belgrade trial are accused of plotting to seize power by armed force. They are charged with having organized a conspiracy to overthrow the government and to establish a Communist regime.

The trial of the five Communist leaders is important because it is the first time that the government has publicly admitted the existence of a Communist plot in Yugoslavia. The defendants are expected to plead not guilty.

The regime of Marshal Tito is already facing a serious threat from the Communists, who have been active in the country since the war ended in 1945. Tito has been forced to crack down on the Communist movement, and his government has moved against the Communist Party.

The trials are being watched closely by the Western powers, who are concerned about the stability of the Yugoslav government. The trials are also being followed by the Western powers, who are concerned about the stability of the Yugoslav government. They hope that the trials will help to discredit the Communist movement and to strengthen the government.

Vol. 2. No. 19

15th March, 1943
increasing exploitation of the proletariat, and against the disastrous international, enslavement policy of the great powers. But the mass of the workers do not rally to hear the advance of the proletariat masses. And in order to disguise the fact that they are exploiting the people, they resort to slander and denunciations of the Soviet Power. That is also why they label us as "socialists," who are the enemies of their own proletariat power. They are demanding freedom for the enemies of the people, the hostages of the tsarist regime, and they are absolutely unable to carry on their anti-proletarian policy in Western Europe. Their move to Moscow is directed not against the Soviet Power, but against Germany of yesterday, although it was these same Germany, the Hitlerite Germany, and all the capitalist governments; it should be addressed to the Internationalists 2 and 2½ and to the leadership of the proletariat, which is not supporting the governments of those countries. And to this cry we add the warning:

"Proletarian Russia, Proletarian Russia, international proletariat against the counter-revolutionary gang!"

The Polish Cabinet Crisis.

By L. Dobros (Warsaw)

The Polish cabinet crisis, which arose so unexpectedly, is a new episode in the old struggle which has been going on since the establishment of the republic between the National Democrats, representatives of the large capitalist, and the military adventurer, Wolski. Before this struggle reached its present acute stage, it was known that the National Democrats were carrying on an underground guerrilla campaign against the Polish Communist Party. At present, Wolski has lost a question of principles than of persons. Although the National Democrats, representing the large capitalist and foreign policy, they felt injured by the fact that all diplomatic posts under Skurnick were held by Communists. The National Democrats were not prepared to part with such important positions. The cabinet, however, was dissolved and the Topolanski cabinet resigned. The result of the crisis has been a victory for the Wolski government, which has managed to retain control of the cabinet.

The Tragedy of Korea.

By B. Shumatski (Moscow)

The Congress of the Workers of the Far East, held in Moscow recently, has been one of the most notable events of the Far Eastern countries, especially Korea, suffering under the ineptitude of the imperialist powers. The most careful analysis of the data as far as they relate to the social and economic conditions of Korea shows that the Korean people are not only a poor but also a bourgeoisie satisfied with the present state of affairs. The Korean children's lives are at stake, and the Korean peasants are suffering from the poverty and hunger that prevails in Korea. Nevertheless, this is not the case with the Japanese capitalists, who are exploiting the Korean people. The Japanese capitalists are the main cause of the Korean tragedy, and the only way to overcome it is through a "real" industrialization of Korea.

ECONOMICS

The Industrialization of China.

By A. Friderich (Berlin)

The principal object of the recent congress held in Peking was to discuss a "real" industrialization of China. The congress was attended by a large number of delegates representing the interests of the Chinese proletariat. The Congress was an important step forward in the struggle for the industrialization of China. The delegates discussed various problems and adopted a resolution calling for the establishment of a "real" industrialization of China.

The real rulers of China are the Tuchuan, the generalissimo Chiang Kai-shek, and the Nationalists. The Nationalists have almost monopolized the power in China in the last few years. The Tuchuan, on the other hand, has been in power for a long time, and his control is more or less absolute. The Nationalists, on the other hand, have been in power for a shorter period, and their control is less absolute. The Tuchuan is the real prime minister of China, and he is responsible for the direction of the country.
The Labor Movement

Is a United Trade Union Front a Possibility?

Ole O. Lima on his negotiations with the Amsterdammers

The president of the Norwegian Trade Union Federation, who has been negotiating with the Bureau of the Amsterdam Federation for a united trade union front, is reported to have told the members of the international trade union movement that he has frequently returned from his journeys without making any progress. In a speech to the conference, he will say:

"It would be a mistake to think that theami..."
Austrian Women and the Increase in Prices.

by E. P. (Vienna)

"Already during the progress of the war, the investigations of the social democrats and the labour movement revealed the fact that the prices in Austria suffered the most from the rise in prices. The Austrian women have been used to such increases in prices; they have learned to endure them.

The trade unions of the workers have been fighting against the increase in prices, but until all the cooperatives have been established, the effect of prices may still be individual cases.

The trade unions have been fighting against the increase in prices, but until all the cooperatives have been established, the effect of prices may still be individual cases.

Commissars Sentenced in Jugoslavia.

On February 23rd sentence was passed in the Jugoslav Communist Congress on wartime officials. Accused were either charged with having attempted to assassinate the state or with trying to overthrow the state. Each of the 17 accused members of the Party Executive were sentenced to death, which means a new period of great sacrifices for the socialist revolution. The accusers of other countries can help us only if they can save us.

The means employed were:

1. The four powers (England, America, France and Japan) agreed among themselves to respect the right of the neutral countries to trade with the neutrals. This means that England is on her side. Since England is in a position to take whatever action is necessary to implement her policy, Japan is hard for all other powers.

2. The Japanese cabinet has agreed to the principle of the four powers, but it is understood that the Japanese government will not agree to the principle of the four powers. This means that Japan is on her side, and that England is on her side as well.

3. The French government has agreed to the principle of the four powers, and it is understood that the French government will not agree to the principle of the four powers. This means that France is on her side, and that England is on her side as well.

4. The American government has agreed to the principle of the four powers, but it is understood that the American government will not agree to the principle of the four powers. This means that America is on her side, and that England is on her side as well.
