WHAT SOCIALISTS ARE AFTER

Full opportunity for full development is the main thing.

We demand:

1. The native labor men and women to do the work of the world.
2. The machinery of production and distribution for all the people.
3. The collective ownership of the means of production and distribution to the benefit of all the people.
4. The rights of man to be free from all domination of despotic governments and the control of wealth and the production of wealth to satisfy the wants of all the people.
5. The right of man to live in harmony as a basis of a new social order, a higher civilization, a real civilization.

This is Socialism.

Socialists Victorious

The Socialist Party of America was the only political party of the year that made any headway. While the Republicans and the Democrats were fighting each other to a standstill, the Socialists were winning the election. The Socialists won the election in many parts of the country, and their candidates were elected to office. The Socialists were able to make headway because they were able to appeal to the working class, who were dissatisfied with the status quo.
