California first and Illinois second on the Physicians' Fund.

GERARD, KANSAS, U.S., FEBRUARY 3, 1901.

THE PHILADELPHIA INQUIRER.

North America is one of the most open to the growth of the great medical profession. The United States, Canada, and Mexico, have in common, a population of over 200 million people. In these countries, the medical profession is well developed, and the standards of medical education are high. The medical profession plays a significant role in the social, economic, and political life of these countries.

The medical profession in North America is characterized by a high level of education and expertise, with a strong emphasis on research and innovation. Medical professionals in these countries are dedicated to promoting public health and improving the quality of life for all citizens.

The medical profession in North America is also involved in significant philanthropic efforts, supporting research and educational initiatives, and advocating for policies that benefit the health and well-being of the population. The contributions of the medical profession in North America are significant and have had a profound impact on the health of the region.

The medical profession in North America continues to evolve, with advances in technology, research, and education driving changes in the field. The future of medicine in North America is promising, with continued growth in the number of medical professionals and expansion of healthcare services.
"The Power of Life or Death."

By Julian Hawthorne, in Philadelphia North American (Republican).

A CAPITALIST SAGE.

"I don't want to answer that, sir," answered the capitalist sage to the question, "but I do want to point out that the majority of stimulants should be used by the public in moderation."

"But how do you explain the fact that the majority of stimulants are used in moderation?" asked the lawyer.

"Well," said the capitalist sage, "the majority of stimulants are used in moderation because the public is never quite sure whether they are using them in moderation or not."

"But how do you explain the fact that the majority of stimulants are used in moderation?" asked the lawyer again.

"Well," said the capitalist sage, "the majority of stimulants are used in moderation because the public is never quite sure whether they are using them in moderation or not."
