"It's Up to You."

"To diminish the intensity of the struggle for social control, there must be an end to the belief that the human mind will be liberated from this bondage of interest. But this belief is contrary to the facts. The struggle is not a battle, but a struggle for control. The question is not whether the human mind will be liberated from this bondage, but whether the human mind will be controlled by the interests of others."

GIRARD, KANSAS, U. S. A., MAY 4, 1901.

APPEAL TO REASON.

FIFTY CENTS A YEAR.

THE ARKANSAS RIVER COTTON FARM COMMITTEE CLEARED 10½ CENTS PER POUND ON COTTON IN 1900.

The Arkansas farm contract closed with April 28, 1901. Although this farm is declared a failure, it will be printed in the No. 294, and as soon as possible thereafter, a new contract will be started. This will be interesting reading for the farmer.

The Appeal is now figuring on the cotton and will continue under the same contract. The farm has 180 acres of cotton, 120 acres of corn, 60 acres of potatoes, and 80 acres of hay. The farm is located in the back country of the state, near the town of Rushville, where the weather is dry and the ground water is kept underground.

One of the farmers, Mr. Kim, the new attorney general, drew $50,000,000 as attorney for the Morgan Bank. He has "resigned" this position for the last five years.

One of the farmers, Mr. Kim, refuses to resign his position as attorney for the Morgan Bank, and of course will not be able to resign his position.

Hereafter we shall endeavor to get back our "get-rich-quick" schemes.

Another one of Mr. Kim's "get-rich-quick" schemes was to borrow $50,000 from the Morgan Bank, pay 5 percent interest per year on the loan, and then pay 5 percent interest per year on the interest of the loan.

A Little Bunch of Burras

A "burra" is the name of a woolen word, and the word is used to denote a primitive object or a thing of small size.

The "burra" is used extensively in the early days of the gold rush, when the miners had to carry a lot of small objects with them.

The "burra" is a term used in the mining industry to denote a small amount of gold or other precious metals.

The "burra" is a term used in the mining industry to denote a small amount of gold or other precious metals.

WHY MILLIONAIRES WILL STOP MAKING MONEY.

Written for Appeal to Reason.

In the past few decades, the old saying has been: "Money is the root of all evil." But the question is: How far is it true? Is money really the root of all evil? What is the true meaning of money? Is there any way to make money without causing harm to others?

An article in the Appeal to Reason magazine discusses the question of whether money is the root of all evil. The author argues that money is not the root of all evil, but rather it is the misuse of money that causes problems.

The article begins by pointing out that money is a necessary tool for society. It enables people to trade and exchange goods and services. However, it is the misuse of money that can lead to problems.

For example, many millionaires have been accused of using their money to support political candidates who are not aligned with their beliefs. This can lead to corruption and political instability. Additionally, some millionaires have been accused of using their money to influence the legal system, which can lead to unfair outcomes.

The author argues that these problems can be solved by changing the way we think about money. Instead of seeing money as a tool for personal gain, we should see it as a tool for service. By using our money to help others, we can create a better world.

The article concludes by stating that while money is necessary for society, it should not be the root of all evil. With responsible use, money can be a force for good, rather than a source of harm.

19TH CENTURY PROPHET.

In the 1800s, there was a prophet named William Miller who predicted the Second Coming of Christ. His followers, known as Millerites, believed that the end of the world would occur on October 22, 1844. However, this prediction did not come true.

Many people were disappointed by Miller's failure to predict the end of the world. However, his beliefs and ideas have had a lasting impact on American culture. His predictions of a coming apocalypse have influenced many people's beliefs about the future.

The Millerites were a religious group that believed in the Second Coming of Christ. They were known for their strict moral beliefs and their adherence to the Bible. Their beliefs and practices have influenced many other religious groups.

The Millerites were also known for their belief in the end of the world. They believed that the end of the world would come suddenly, and that it would be a time of suffering and judgment.

Despite the failure of Miller's predictions, his beliefs and ideas continue to have an impact on American culture. His predictions of a coming apocalypse have influenced many people's beliefs about the future.
Doctors' Special Edition.

No. 266 will be a HOT NUMBER.

100 copies, 50 cents; 50 copies, 25 cents.

Just accept the natural blessings of the good, and reject the artificial ones; the latter are not yours.

The paper will be started in the doctor's office, and will be published weekly. The first number will be November 23rd.

The Ohio, Indiana, Illinois, Iowa, Kansas, Missouri, Wisconsin, and Minnesota, and the Dakotas, will be the first states in the Union to be reached by the paper. The paper will be published at a cost of five cents in each of these states, and at a cost of six cents in each of the other states of the Union. The first number will be published on the 23rd of November, and will be sold for five cents in each of the states of the Union.
