The Physician’s Duty.

OFF physics believe in evolution. They believe a larger number of things will flow from pre-existing conditions than there are things already existing. In other words, if you have a condition of the stone, or if you have a condition of the heart, you can make the stone work to your advantage. You can make the heart work to your advantage. It is all as much possible as it is not possible. What do you mean by evolution? It is a principle that certain forces are always at work and that certain results are always possible. If you have a condition of the heart, you can always make it work to your advantage. If you have a condition of the stone, you can always make it work to your advantage.

The physician, of all men, should be the best social to social relations. He is the man who is most likely to be able to understand the conditions of the heart and the conditions of the stone. He is the man who is most likely to be able to understand the conditions of the nervous system and the conditions of the muscular system. He is the man who is most likely to be able to understand the conditions of the mind and the conditions of the soul. The physician, of all men, should be the best social to social relations.

Socialism and its Relation to Physicians.

When we hear the word “socialism,” we think of the word “social.” That is, we think of the word “social” as a synonym for the word “society.” We think of the word “social” as the word that expresses the idea of society. We think of the word “social” as the word that expresses the idea of the way in which people live together. We think of the word “social” as the word that expresses the idea of the way in which people work together. We think of the word “social” as the word that expresses the idea of the way in which people play together. We think of the word “social” as the word that expresses the idea of the way in which people rest together. We think of the word “social” as the word that expresses the idea of the way in which people eat together. We think of the word “social” as the word that expresses the idea of the way in which people drink together. We think of the word “social” as the word that expresses the idea of the way in which people talk together. We think of the word “social” as the word that expresses the idea of the way in which people laugh together. We think of the word “social” as the word that expresses the idea of the way in which people cry together. We think of the word “social” as the word that expresses the idea of the way in which people work together. We think of the word “social” as the word that expresses the idea of the way in which people play together. We think of the word “social” as the word that expresses the idea of the way in which people rest together. We think of the word “social” as the word that expresses the idea of the way in which people eat together. We think of the word “social” as the word that expresses the idea of the way in which people drink together. We think of the word “social” as the word that expresses the idea of the way in which people talk together. We think of the word “social” as the word that expresses the idea of the way in which people laugh together. We think of the word “social” as the word that expresses the idea of the way in which people cry together. We think of the word “social” as the word that expresses the idea of the way in which people work together.
SOCIALIST PRESCRIPTIONS.

A Prophecy.

This can prophecy is historically certain. It has been written by the people of every industrial country of Europe and Asia, and the people of every home, factory, and shop, by the millions. It has been written by all the scientific, philosophical, and religious brains of the world, and the millions of friendly ghosts who have not yet been born. It has been written by the patience and endurance of the millions of workers and peasants who have never written a word in their lives. It has been written by the sacrifice and suffering of the millions of revolutionaries who have been imprisoned and burned at the stake.

Socialism and Man of Brains.

The epoch of the economic and social revolution is upon us. The epoch of the final triumph of social science is upon us. The epoch of the scientific treatment of social problems is upon us.

NEW YORK.—The most recent edition of the "American Journal of Science," containing a full account of the late expedition of Dr. R. E. F. Willoughby, who visited the South American coast, was published this week. The report is of great interest, and contains a description of the country, the climate, the flora and fauna, and the industries of the region. The expedition was chartered by the American Institute of Natural History, and was under the direction of Dr. W. H. D. Gliddon. The party consisted of nine naturalists, and the results of their work were published in the "Journal of the American Institute of Natural History," vol. xxxiv., pp. 1-140. The report of the expedition is a valuable contribution to the knowledge of the South American coast, and is highly recommended to those who are interested in the study of natural history.
