For forty years the power of Corporations has been growing in the United States. They have not been satisfied with controlling industry to their profit, but have invaded politics and by special laws written by their own hired attorneys, passed by venal or ignorant legislators, dominated the avenue of social activity. They openly defy the laws when they cannot control them, even telling the president what he should do, and threaten to freeze or starve the people if they will not submit like slaves to their pleasure, that they may make yet more profits. By "putting their money where it will do most good," they have changed the character of the government from its once semblance of a democracy to an oligarchy—a rule of the rich. The owners of corporations control the food of the people, the clothing of the people, the shelter of the people, the entertainments of the people and largely the schooling of the children. They control most of the places of employment, and to have an opinion different from them is often means lossed employment and starvation for the worker. This power is growing day by day. Unless this is checked by some radical move on the part of the people the day cannot be far distant when they will control every industry and through them control every life of the nation. Are the Americans willing to submit to this? Are they willing to permit a condition to take place in the hands of a few rich owners a power never held by any king—the power over the necessities of life? The old parties will change the trend of things. Both are controlled by men who own or are interested in the ownership of trusts. They have been able to make a change when they desired. They have not acted yet. You know this. To continue to vote them into power is to continue to vote power into the hands of the corporations. When will the Americans be able to make a change—now, or in a few years hence when the corporations have become stronger? This is a question you will decide by your votes on the next month. Vote for either old party in a note that says you are satisfied with things as they are. To turn out a demand in one place and in a revolution, or to turn a republican out and put in a democrat does not make any change. Democratic and republican states are just alike. One is as bad as the other and a good deal worse.

This is a question for you and your family. It is a question of property or plenty. It is a question of prosperity for the masses or prosperity for the few. If you would have your children possess the same opportunity to become independent, to develop all their ability, it cannot be done when corporations own the industries in which they must work if they work at all. The owners can and do favor whom they please, just as a king favors whom he pleases. Your child will have no RIGHT to employment. It can get it only on just such terms as pleased his Industrial Highness. He will begin life as a wage slave and continue as such. Do you want this for your children?

Every two years the people vote to express their approval or disapproval to what the government is doing. Next month you will have one of these times come around. To vote as you always have is to vote that you are not satisfied and desire a change. If the Socialist vote is large it will be a warning to the rulers. If it is small it will be an endorsement of the rulers. If it is large it will cause the old parties to begin to trim their sails to catch your breeze. For two more years you will have to submit to whatever the old parties desire. Corporations will become stronger, oppression will become more marked, and the yoke of corporate power harder to break. You get nothing except work for your wages if you vote for the old parties. You will get nothing but the FULL, COMPLETE, and UNLIMITED power of the government, with nothing being taken for interest, rent, profits or use of capital.

Sooner or later the world will be governed by the principle of Socialism. Help to hurry the desirable event, and shorten the reign of oppression by Industrial Barons.

It is up to you at the election next month.

The coal lands in Pennsylvania are owned of the corporation. The coal lands used by the companies were bought from the people. The land is in the corporations. The lands are owned by the corporations, not by the people. The corporations have no more right to own the lands than the government. If coal lands are owned by the corporations, who are going to use them? The corporations own all the industries. They own all the mills. They own all the factories. They own all the mines. They own all the railroads. They own all the wholesale and retail stores. They own all the railroads. They own all the land. They own all the mines. They own all the factories. They own all the mills. They own all the land. They own all the coal. They own all the iron. They own all the steel. They own all the iron. They own all the coal.

One corporation now controls practically all the mines in the country. One corporation now controls practically all the railroads. One corporation now controls practically all the telephone companies. One corporation now controls practically all the electric companies. One corporation now controls practically all the banks. One corporation now controls practically all the insurance companies. One corporation now controls practically all the newspapers. One corporation now controls practically all the newspapers. One corporation now controls practically all the banks. One corporation now controls practically all the insurance companies.

Science and Capitalism.

The natural difference between two men is that one man builds a home, while another sells his labor for a living. This difference is due to the difference in their conditions. The former has the use of his time, while the latter has only the ability to work. The former is able to create value, while the latter is only able to add value to already existent things. The former can create wealth, while the latter is only able to increase it.

Economic Equality.

Man is not a machine, he is a complex of organs, and he is not capable of working without the use of his time. The more time he has, the more he can work. The more he works, the more he creates value. The more value he creates, the more he can work, and the more he can create value. This is the natural order of things.

The Appeal to Reason.

In a land where the ballot is the bow, and the ballot box the ballot box, there can be no such thing as an appeal to reason. No one can say, "I appeal to reason," and be believed. Reason is not a weapon, it is a sword, and it can only be used in battle.

The socialistic party is the party of the future. It is the party of the poor, it is the party of the working classes. It is the party of the world, it is the party of the people. It is the party of the future, it is the party of the generations to come.

If you have a rich friend, let me know. As an act of humanity, write a letter. If you have a poor friend, let me know. As an act of humanity, write a letter. If you have a rich friend, let me know. As an act of humanity, write a letter.

If you have a poor friend, let me know. As an act of humanity, write a letter.
