Events in Russia.

We have some information that requires immediate attention and action. Several important committees of the government have been called into consultation by the minister of interior. The committees are charged with the task of dealing with the situation of the political prisoners who have been arrested and detained without trial. The committees must decide whether to release or continue the imprisonment of these individuals.

The political prisoners include members of the Social Democratic party and other opposition groups. The authorities are concerned about the potential for unrest and disorder if the prisoners are released without due process. The committees are expected to make their decisions within the next week.

Russia has been facing economic and political challenges, including inflation and food shortages, which have heightened tensions among the population. The committees will need to balance the interests of public order with the rights of the prisoners.

We encourage the international community to monitor the situation closely and to advocate for a fair and transparent process in dealing with the political prisoners. The treatment of these individuals will be a test of Russia's commitment to human rights and democratic principles.

California has a Four-hour union

The strike of the machinists of the Union Pacific railroad is to date of the labor

A union that will pick up as much as a year in union membership.

The strike is an important one to the labor movement in California, where the railroad is not only a vital link in the transcontinental system, but also one of the most highly unionized.

The machinists have been at work for the last six weeks on the line, and have been continuously picking up new members. The strike is expected to continue for several weeks, and the machinists are prepared to fight for their demands.

Twice Told Truths.

Private property in the means whereby you can buy the labor of others to work for you. To own the means of life for yourself is to own life itself.
