Labor Day Will Be Great
When It Comes in November

The greatest battle in the history of the working class is the battle for eight hours a day instead of ten or twelve. This is the battle of the working class for the first time in the history of the world. This is the battle of the working class for the first time in the history of the world. This is the battle of the working class for the first time in the history of the world.

The working class has no alternative but to win or go out. There is no middle ground. There is no middle ground. There is no middle ground.

What would you think of the action of twenty men who would conspire to swindle a farmer out of $10,000—to get that much out of the farmer without any equivalent?

Now suppose that twenty men were the members of a corporation that had monopolized some article used by farmers and should charge the farmers not only $10,000 but $100,000 a year more than had been previously done, what would be the difference between the two acts?

And yet there are hundreds of trusts that are organized by men to swindle the public and do swindle the public millions annually.

One set of thieves you would imprison, and to the other set you give all the powers of the government.
